Join the gores of the skirt as notched, leaving the left side seam free above single large "O" perforation in front gore for placket. Gather upper edge between double "TT" perforations. Adjust stay to position underneath upper edge of skirt, bringing single small "o" perforation at upper edge of stay to center-front, single large "O" perforation to center-back and double small "oo" perforation to right side seam; close stay on left side.

The square scallops at the lower edge of the waist may be bound with taffeta or silk braid.

Pictorial Review Costume No. 6374. Sizes 14, 16, 18 and 20 years. Price, 15 cents.

Hints for Housewives

French Toast Sandwiches.

French toast sandwiches are among the favorite tea room novelties that housewives find it easy to duplicate at home. These sauted slices of bread, put together in pairs, with any preferred filling have the advantage of being adaptable to any of the three meals of the day, while their particular mission is to afford something a little out of the ordinary for the Sunday night tea table or the after theater supper. The occasion must decide what filling is appropriate and whether the French toast sandwich shall be served crisp and dry from the griddle or accompanied by a suitable sauce.

The novelty consists in the fact that after the sandwich is made it is pressed closely together and then dipped in a thin batter made in the proportion of one beaten egg to a half cupful of milk. If the filling of the sandwich is a savory mixture of egg, cheese, fish, meat or fowl, a pinch each of pepper and salt should be added to the batter. If, however, the sandwich has a sweet filling, the batter should be slightly sweetened and flavored with a teaspoonful of sherry. Cook the moistened sandwich on a hot, well greased griddle, browning first on one side and then on the other. A shallow iron frying pan will answer the same purpose and olive oil will be found an excellent substitute for butter.

For those who like something more than the ordinary breakfast of fruit, cereal and eggs several variations of the French toast sandwich will be found appropriate to accompany the morning coffee. Flaked salt codfish, made a little less moist than in the popular dish known as creamed codfish, is an excellent filling for a breakfast appetizer of this kind. Half fish and half finely chopped hard boiled egg makes an equally good mixture, or a little finely chopped cold boiled potato may be used. Season well and dip in batter. When thoroughly browned on the griddle serve hot, either with or without a little white sauce.

A particularly appetizing combination, suited to serve at breakfast, luncheon or Sunday night supper, calls for equal parts of finely chopped cold boiled ham and tongue. This should be seasoned with either French or English mustard and moistened with a little cream or rich milk.

Lovers of cheese will enjoy a hot cheese sandwich with filling of softened cheese moistened with cream and highly seasoned with Worcestershire sauce and paprika. The batter should also be seasoned, and the finished sandwich when toasted and served piping hot should have much the flavor of a Welsh rabbit.

As a simple sweet course at luncheon or family dinner French toast sandwiches with fresh fruit or jam filling will be found delicious.

The story goes that we are indebted to a thrifty housewife for this particular brand of toasted sandwiches. In her endeavor to utilize an oversupply of dainty sandwiches prepared for an afternoon tea the idea occurred to her to brown a few of them on the griddle for her luncheon the next day.

A French Dainty.

Tenderloin and mushrooms is the plain name in this country, but this way of doing the cookery is purely French.

Peel six mushrooms and take out the stems. Then drop them for five minutes in cold salted water. Take them out, dry on a fresh cloth and put them in the plat with a teaspoonful of butter. Cover the plat with a saucer or breakfast plate, set it over the blaze and saute the mushrooms for fifteen minutes without uncovering. Then dump them in a hot little vessel, cover that and keep warm until the steak is cooked.

Scrape the tenderloin steak with a knife, rub it over with the cut side of a lemon and put on a faint dust of salt and pepper. Then place the plat with all the mushroom taste and a little of the sauce over the fire and when piping hot put in the steak. It should brown a little on either side, but still be pink inside. When cooked pour the mushrooms back into the pan, add a pinch more of butter if the sauce has dried out, cover the plat, set it in the oven for three minutes and serve at once. As mushrooms draw their own juices, only enough butter to start them cooking must be used when they are first prepared.

Chocolate Cake.

One-half cake of chocolate, one-half cupful of sugar, one-half cupful of milk, one egg yolk and a pinch of salt. Cook in double boiler until smooth.

One cupful of sugar, one-half cupful of butter, creamed together well; add two eggs beaten light, one cupful of milk and one level teaspoonful of soda dissolved in milk, two level cupfuls of flour and one tablespoonful of vanilla. Mix this with the other, beat well and bake one-half hour.

Tomato Eggs.

Beat one-half dozen fresh eggs lightly. Rub one-half cupful of tomatoes through a colander and mix with the eggs. Stir in one tablespoonful lemon juice, one small onion finely minced, one tablespoonful minced parsley, one teaspoonful each salt and celery salt and a generous dash of sweet paprika. Pour into a double boiler, place over boiling water and stir constantly until thick enough to serve on toasted bread.

SONG OF THE SHREW.

It Is Pitched So High That Only Sharp Ears Can Hear It.

The high pitched squeaking or whistling of the shrew is a curious sound and frequently acquires quite a songlike character. More often, however, the voice of the shrew is raised in anger, for it is a pugnacious little animal, and the males have fierce combats in the spring of the year. It is a curious fact that many people are unable to hear the shrew's squeaking, not that the sound is not loud enough, but because it is so highly pitched that only sharp ears can record the vibrations.

Though often spoken of as a mouse, the shrew is of an entirely different species, being insectivorous and having sharp teeth on each side of the mouth instead of front teeth, suitable for gnawing, such as are possessed by mice and other rodents.

Though it exists in very great numbers and can very frequently be observed, much remains to be discovered regarding the life of this little creature, an Italian species of which is our smallest known mammal. It is still a mystery why so many dead shrews should be found about the roadsides and pathways. They are fearless little animals, and even when disturbed in their spring journeys from one place to another they do not allow themselves to be put out of their course by a trifle. —London Spectator.

SIX MEALS A DAY.

This Husky Old Laborer Had a Fairly Healthy Appetite.

Undoubtedly it is better as a general rule to take food sparingly than to eat to repletion, and there are some people who even advocate living on one meal a day and who practice what they preach. But there was no "one meal a day" nonsense about the aged Sussex laborer whom E. V. Lucas met. Thus he described his daily round and common task:

"Out in the morning at 4 o'clock, mouthful of bread and cheese and pint of ale; then off to the harvest field, ripping and moen (reaping and mowing) till 8; then morning breakfast and small beer—a piece of fat pork as thick as your hat is wide; then work till 10 o'clock; then a mouthful of bread and cheese and a pint of strong beer (forenooner—'farnooner's lunch,' we call it); work till 12; then at dinner in the farmhouse, sometimes a leg of mutton, sometimes a piece of ham and plum pudding; then work till 5; then a nunch and a quart of ale (nunch was cheese, 'twas skimmed cheese, though); then work till sunset; then home and have supper and a pint of ale."—London Chronicle.

Arithmetic by Hand.

We shall never be in danger of forgetting that our ancestors did their sums on their fingers so long as arithmetic retains the word "digits." But modern civilization knows nothing of the elaborate developments of this method. It takes a Wallachian peasant to multiply 8 by 9 on his hands. This is how he does it: The fingers of either hand, beginning with the thumb, stand for the numbers from 6 to 10. So the ring finger of one hand and the middle finger of the other are stuck out to represent 8 and 9. Counting the fingers remaining on the side farthest from the thumbs, he finds them 1 and 2 respectively, and 1 multiplied by 2 gives him the units of his product—2. Then he counts from the thumbs to the stuck out fingers inclusive, finds them 3 and 4, adds these and gets 7 for his tens. Answer, 72. All this to avoid knowing the multiplication table beyond 4 times 4!

Napoleon's Temper.

A story is told of a sudden rage into which Napoleon I. fell one day as he was at dinner. He had scarcely partaken of a mouthful when apparently some inopportune thought or recollection stung his brain to madness, and, receding from the table without rising from his chair—his small stature permitted that—he uplifted his foot—dash went the table, crash went the dinner, and the emperor sprang up, intending to pace the room. Quick as a flash his waiter scratched a few magic symbols on a bit of paper, and the emperor's check had grown more than double. Napoleon appreciated the delicacy of his attendant and said, "Thank you, my dear Dunand," with one of his inimitable smiles. The hurricane had blown over.

An Old Verb.

To laze is an old verb. In Samuel Rowlands' "Martin Markall," 1610, we are told that "loyterers laze in the streete, lurke in alehouses and range in the highwaies." The word occurs, I believe, in some of Mortimer Collins' lyrics:

But Cupid lazeth 'mongst the faiery lasses,
 Whose clere complexion he oft sweareth passes.

—London Notes and Queries.

Anchovies.

The delicious little fish called the anchovy is found in large quantities in the Mediterranean sea and also on the coasts of Spain, Portugal and France, where extensive fishing operations are carried on during the months of May, June and July.

A Far Cry.

Ella—Miss Antique says she wishes she could step to the phone and call up her happy college days. Bella—If she did she'd have to employ the long distance phone.—Florida Times-Union.

Nothing but the harmony of friendship soothes our sorrows. Without its sympathy there is no happiness on earth.—Mounet.

TODAY'S FASHION NOTE

The quiet elegance of this costume in dark brown repp will commend itself to the well-dressed women. The skirt is stitched with two rows of braid and pointed tabs of Dresden silk, bound with braid, trim the front of the waist on either side of the white silk vest. Collar and cuffs are also of silk, one yard being required for the purpose. The dress calls for 4 7-8 yards 44-inch material.

Pictorial Review Costume No. 6353. Sizes, 32 to 46 in. bust. Price, 15c.

Pictorial Review Patterns may be procured at the M. Katz & Co. Department Store, Fulton.

The KITCHEN CUPBOARD

HOT WEATHER MENU.

Insufferable season of the sun,
When will your endless reign of fire be done?
Your armies with unconquerable stings,
When will they flee—for what do they have wings?
How long before brave autumn with a shout
Will succor me and put them all to rout?
—Oliver Herford.

BREAKFAST.
Cantaloupe.
Broiled Salt Mackerel. Rice Cakes.
Coffee.

DINNER.
Blackberry Soup.
Cold Lamb in Aspic. Corn.
Creamed Potatoes.
Tomato Salad. Cheese Straws.
Peach Ice Cream.
Silver Cake. Iced Tea.

SUPPER.
Omelet in Chafing Dish.
Nasturtium Sandwiches.
Blackberries. Chocolate Cake.
Iced Tea.

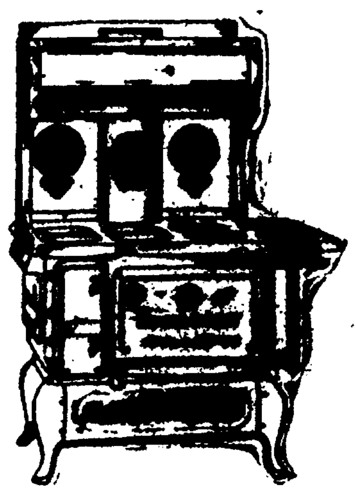
AMONG the breakfast dishes that have been found specially nice at this season as well as easy to prepare are the following:

Broiled Salt Mackerel.

Take the fish from the brine and wash it thoroughly. Put to soak overnight in cold water, taking care to soak it with the skin side down. About ten minutes before breakfast drain from water, pat dry on a clean cloth and wipe over both sides with olive oil. Broil under the gas flame, attending to the flesh side of the fish, as the skin side scorches easily and needs but a moment or two to brown. Put on to a heated platter, pepper lightly, garnish with a little parsley and cut lemon and serve with creamed Irish potatoes, fried sweet potatoes, baked or boiled new potatoes, either of which go well with salt mackerel, if you care to have potatoes at all for breakfast. In a lovely country home a little bowl of crispy sliced cucumbers from the home garden always goes to the table on a hot summer's morning as an accompaniment for fish or omelet.

Rice Cakes.

Mix one cupful of cold boiled rice with the well beaten yolks of two eggs and half a gill of milk and two heaping tablespoonfuls of flour sifted with a half teaspoonful of baking powder. Whip the whites to a stiff froth; add the rice mixture slowly to the whites while beating constantly, and with a tablespoon turn portions onto a hot, well greased griddle. Bake a light brown on both sides and serve with marmalade, honey, maple sirup or jelly. If the batter seems too thick add a little more milk.



What Do You Look For In a STOVE?

Don't say "FIRE"---this is not a joke!

But, to use other words, what is your idea of a Good Stove?

FIRST---You ask for RELIABILITY.

SECOND---You demand STRENGTH.

THIRD---The Stove must be ECONOMICAL to Operate.

FOURTH---And the Housewife demands this---It Must Be MODERN.

Just at present we are conducting a campaign for

THE FAMOUS SUMMIT

This Stove meets all of the above requirements and many more.

It Is Reliable, for it is made by a company which prides itself upon setting up a standard and sticking to it.

It Is Strong and Sturdy, you can see that in a glance.

It Is Economical; a strong, well-built firepot affords the greatest amount of heat for the least coal consumed.

It Is Strictly Modern; it is more than that, for it is far ahead of any Stove now on the market in up-to-date improvements.

THE FAMOUS SUMMIT
IS TWO STOVES IN ONE

Four Gas Griddles in addition to Four Coal Griddles an improvement you won't find in a Stove that costs twice as much.

A Large Oven, in which you can bake either by gas or coal.

A Large Warming Oven, on top of the Stove proper in which you can set food when someone is late for dinner.

Look over some of the Stoves on the market. Look at Stoves that cost up to $100, and you will not find all these improvements.

And here's the final argument:

The Famous Summit sells for $55

Terms to Suit You—Small Payment Puts Stove in Your Home.

A. M. DRUSE & CO.

7 SOUTH FIRST STREET, FULTON

ALBANY GOSSIP DAY BY DAY

Chronicle of Events and a Forecast of What is Doing in Officialdom---Special Correspondence.

By Frederic T. Cardoze.

Albany, Aug. 19.—If there is one proposed amendment upon which there is unanimity on the part of the delegates to the Constitutional Convention it is that which seeks to give to juries sitting upon murder cases, the power to determine whether the death penalty or life imprisonment shall be imposed and moreover, when the verdict is thus established, taking away from the governor the power to commute or pardon except in cases when the innocense of the person convicted shall be later established.

The above amendment is advocated by practically all of the delegates in that it is a compromise and the introducers of the proposition to absolutely abolish capital punishment have agreed to the compromise as above, such compromise having been incorporated in the report of the committee on Bill of Rights in the form of a compromise amendment to the Constitution.

Delegate Charles H. Betts of Lyons, who has made the most ardent fight the Convention adopt an amendment doing away with capital punishment, views the action of the committee on Bill of Rigrts as a partial victory. By taking away from the governor the power to pardon or commute persons sentenced to life imprisonment, he feels the delegates have swung around to his way of thinking that justice will not be miscarried.

"As a matter of fact," says Delegate Betts, "but two per cent. of the number of persons tried for murder, first degree, are convicted. The conscience of the people of the state has already abolished the death penalty, for the idea prevails that if no more than 2 per cent. of the convictions can be secured, there is no need of the existence of the provision in the Constitution that electrocution shall continue.

"In twenty-seven states the idea which we as delegates are seeking to have the people adopt prevails. Let us take for example the case of Leo M. Frank; a mob lynched him because the death penalty provision was in the Constitution of the State of Georgia, and it was felt that the governor who commuted his sentence had prohibited the carrying out of the death penalty. It was the belief that Frank should have been executed, so he was hanged, or rather lynched. This was an act contrary to law, and yet the Constitution of Georgia reads that it is proper to take the life of a man convicted of murder, first degree."

According to Delegate Betts both Thaw and Becker would now be serving life sentences and the state would have saved large sums of money had there been no death penalty provision in the Constitution of New York State.

"If a man convicted of murder, first degree, is sentenced to life imprisonment, he is safe from society, he cannot longer offend it and the ends of justice are satisfied as fully as though he had been executed. The taking from the governor of the pardoning power makes it impossible for such a man to ever again regain his freedom."

Hon. Andrew G. White has gathered statistics to the effect that only one conviction for murder, first degree, results in the average for one hundred and twelve trials, according to Delegate Betts, who communicated with him regarding the wisdom of abolishing the death paently.

ITALIANS WIN FIVE MILES OF TRENCHES

Milan, Aug. 18.—Successful actions along the Carinthian and Cadore frontiers continue.

After a heavy bombardment the Italian batteries on the slopes of Seikofel, Creda and Rossa have silenced the forts at Sexten and a flanking fire has been successfully opened against the Austrian trenches.

The Austrians have been compelled to retire from the defenses they erected along the slopes of the Sexten Valley. A similar success has marked the Italian movement a little west of Sexten at their new positions on Ober bacher and Kanzel, which form a wedge between the Sexten and Landro forts.

Dispatches received here state that the Austrians have retreated suddenly in the Plezzo region after numerous violent attacks by the Italians.

Since August 12, it is stated, the Austrians have lost fivem iles of the trenches, several machine guns and 3,800 prisoners.

The most violent Italian attacks are now being made in the Popena Valley, west of Landro. Here the Austrians are subjected to a murderous fire. In one trench 700 Austrains have been found dead, including a number of officers.

The actions around Plezzo and at other points south and east of Monte Nero are of considerable importance, the Austrains having brought up reinforcements, in hope of dislodging the Italians from their new positions by force of numbers.

'SHALL AND MUST TAKE VERDUM,' TEUTON ORDER

Geneva, Aug. 18.—8he Journal La Suisse, of Geneva, states that in an army order recently issued by the German Crown Prince and found on prisoners taken by the French occurs the following phrase:

"We shall take, we must take, Verdun, Then the war will be finished by December at the latest."

Your appetite for fresh-every-day rolls increases every time you eat the Black company's article. adv

NAILING THE LIES!
Puncturing the Hot Air!

The (so-called) Business Men's League, the politicians who want you, Mr. Citizen, to vote down commission-manager form of government, asserts in a paid advertisement that the tax rate of Des Moines has doubled since commission form of government went into effect in that city.

That statement, like all other statements thus far made against commission-manager form of government, is founded on falsehood.

The "Taxpayers' Committee" herewith presents refutation of the falsehood:

CITY OF DES MOINES,
DEPARTMENT OF ACCOUNTS AND FINANCES,
FRED GERMAN, SUPERINTENDENT.

Des Moines, Iowa, August 12, 1915.

In reply to yours of August 6th will say that I am indeed very much surprised at the accusations made in your town regarding our tax levy, and in order to fully inform you as to the same, since the commission form of government went into effect, which was in 1908, will give you the tax levy for each year:

1901—40.3 for city purposes.
1902—40.6 for city purposes.
1903—39.3 for city purposes.
1904—38.8 for city purposes.
1905—38.7 for city purposes.
1906—39.7 for city purposes.
1907—37.9 for city purposes.
1908—36.4 for city purposes.
1909—37.1 for city purposes.
1910—37.1 for city purposes.
1911—37.1 for city purposes.
1912—37.1 for city purposes.
1913—32.1 for city purposes.
1914—32.1 for city purposes.

It is the total millage levy for all city purposes. You will note that from 1901 the levy has dropped more than 8 mills, and of course we have in that time increased our valuation some, but we have also increased our population about 25,000, and naturally the population necessarily has brought more taxable property values, and also created a little more expense for the city, so that we consider that one offsets the other. Any further information that you desire, and, that I can give you, I will be glad to do so.

Trusting that your efforts for the commission form of government will be successful, I remain

Yours Very Truly,

(Signed) FRED GERMAN,
Supt. Dept. Accounts and Finance.

Tax Rate Not Doubled, But REDUCED

But, citizens, what can you expect but misrepresentation from politicians fighting to keep hold of your government?

Vote for commission-manager form of government on September 17th.

Signed, TAXPAYERS COMMITTEE

Opinions

Are Abstainers Cowards?

Miss Jane Addams repeats her accusation that soldiers in the war are drugged to make them reckless, in order to give her authority. She says a French officer, an Oxford man and a German officer gave her the information. She neglects to give names, therefore, she has given no authority worth while. It is generally believed that sober men would do all the strenuous fighting recorded in the war. Any general could get abstainers to volunteer for any risk and he would be better off with sober men than with m en drugged. Rum courage isn't intelligent. Does Miss Addams believe that men areb raver when filled with grog or does she believe that sober men are not brave? Repeating her insult to the brave men in all the armies will not help her. Woman's place may not be at home, but it certainly isn't as a war critic.—Watertown Standard.

The Galveston Hurricane

On September 8, 1900, a hurricane fromthe West Indies drove the waters of the gulf over the island of Galveston, Tex., to an average height of four feet—in some places to 16 feet. There were 8,000 lives lost and $20,000,000 damage was done to property.

In order to protect the island against similar disasters in the future a colossal engineering scheme was carried out at the cost of millinos of dollars. A concrete sea wall, 17 feet high, was built about the island, and the whole level was raised to a height believed to be safe. A concrete causeway was built to connect with the mainland.

Despite the best laid plans of the engineers. Galveston has again suffered severely from a hurricane. The island was inundated to the depth of five feet in some places. All structures on the sea wall were destroyed. Large sections of the causeway were blown or washed away. There appears however, to have been little if any loss of life. The hurricane swept into the great cotton region on the main land, and much damage may have been done there.

When it recovers itself Galveston will doubtless set about to so strengthen its defenses that eventually it will be hurricane-proof.—Utica Herald-Dispatch.

State Supervised Fruit Auctions.

In an effort to lower food prices and provide a market for much surplus farm produce Commissioner Dillon of the State Departments of Foods and Markets has arranged for fruit auctions nextm onth. He plans to extend this service to include vegetables also by next year. Apples, pears and peaches will be sent to the auctioneer on consignment to be sold on 5 per cent. commission. There will be no other charge for the farmer, save for cataloging and handling samples of the fruit—an expense estimated at about two cents a barrel.

To whatever extent this brihgs into the markers here fruits—and later vegetables—which would not otherwise find their way here it will be beneficial. This city, paying high prices for produce, is constantly hearing tales of the farmers who can't get eough for their stuff to make it pay to send it to market. Here, in one line at least, there will be offered to them a plan which seems to promise a fair return. Whether it will be of equal benefit to the consumers remains to be seen. The customers at this auction will be mostly, the dealers, the middlemen, and there will be no particular compulsion on them to sell fruit cheaper than thep revailing prices, even if they can buy some of it more cheaply than usual. The consumer who could buy a barrel of apples, or even of vegetables, and store it in an apartment in this city is rare indeed. Nevertheless, the plan is worth trying. Anything which will bring additional supplies of fresh fruit and vegetables here regularly is bound to be of some help to the public.—New York Tribune.

FEAR PROMPTS THE NOISES

The Business Men's League, which has launched its crusade against the establishment of Commission-Manager form of government, may be given credit for its sincerity, but whether the efforts are well directed is another matter for Mr. Voter to decide.

Even those persons who remain lukewarm and undecided about the merits of the progressive movement for reform in municipal affairs will not hereafter defend the nature of the attacks made in the political advertisements authorized by the League, as authorized they must be since each one carries the signature of that organization whose membership prefers to remain in obscurity. That there is little meat in the broth which appears in the newspaper political advertisements bought and paid for by the Business Men's League is apparent to even many of the opponents of the Commission-Manager form of Government, as they see in the League's opposition nothing more than an attempt to becloud the real issue of the campaign—that the people of Fulton should have a government administered in a straightforward and efficient manner, and not after the methods that produce waste and extravagance. The reason for this does not lie in any particular moral or political influence but must be explained by the realization on the part of the men who want reform for reform's sake, but yet who do not favor at present the accomplishment of a Commission-Manager Government, of the utter ineffectiveness of telling the people that it would be a terrible thing were this city to secure from some source at present unknown a manager whose capabilities and experience might be the means of serving the taxpayers' interests better than they have ever before been served.

Yet, while the Business Men's League is engaged in sounding the tom-toms and in making other noises about a human being who might be brought here to manage the city, all of which is the remotest of remote possibilities, its membership must at times admit that it is clap-trap, cheap talk to continue proclaiming through the newspapers that organization's opinion of what may be accomplished following the successful result of the present campaign for Commission-Manager form of Government. In other words, who of the hundreds of men working hard for a reform city government has indicated that Fulton is unable to raise up a man capable of serving as manager of this city? Do the men comprising the Business Men's League honestly allow themselves to believe that their more careful neighbors are trying to deprive efficient Fulton men of a chance to serve the city whose interests they hold sacred? What is it but fear that prompts opposition to a movement for the betterment of conditions? Nothing.

So, while the work of the Business Men's League continues to afford amusement, it would be too much to expect that it will be relegated to the scrap heap of political obscurity for some time to come, notwithstanding that hundreds of real patriotic people will agree that it should be.

HOME RULE FOR CITIES

Inefficiency and corruption in the government of our large American cities were for decades evils so prevalent that we fell into the habit of looking upon them as inevitable and incurable. We resigned ourselves to the explanation given twenty-seven years ago by Lord Bryce in his "American Commonwealth;" "In great cities the forces that attack and pervert democratic government are exceptionally numerous, the defensive forces that protect it exceptionally ill-placed for resistance. Satan has turned his heaviest batteries on the weakest part of the ramparts."

The failure of ordinary democratic methods to meet adequately the needs of our young rapidly growing cities, with their heterogeneous populations, has numerous causes. One of them, long recognized, is that the cities have been forced to exist in an unnatural condition of dependence upon the state legislatures. Generally, cities have no powers other than those conferred upon them by the state. When needs arose that were not provided for in the charter as originally granted, municipalities had to apply for special legislation.

Under that system the government of the city was in effect divided between the local and the state authorities. One result was that the dwellers of a city had no chance to acquire a real sense of civic responsibility. Another consequence was that the legislature constantly harassed the city officials by acts of interference; a third was that the "bosses" were quick to use the processes of special legislation for their own advantage.

From the Galveston flood of 1900 dates a new era in the history of American municipal government. The "commission government" then improvised to restore the ruined city has in many places proved its value as a permanent form of administration. Other cities have tried with success the plan of having a "city manager." Those are signs that we are once more beginning to believe in the possibility of having well-governed cities in a democracy.

Moreover, the cities show an increasing desire to be free from legislative interference. More than fifty cities in the State of New York, including New York City, have appealed to the state constitutional convention now in session for a "home rule amendment." The provision is understood to compdehend these three major points:

(1) A broad grant of powers to the city to do those things that are necessary for its welfare as a community. (2) Restraint of the legislature from passing laws to regulate the affairs of a city unless those laws at the same time are made to apply to the entire state. (3) Authority in a city to frame its own charter, so that its form of government shall be adapted to its peculiar needs.

The government of our states and of our rural communities is based upon the principle of local popular control. The idea of home rulef or cities is therefore in accordance with sound democratic theory. May an awakened sense of responsibility for their upbuilding make it successful in practice!—Youths' Companion.

WITH THE SUFFRAGISTS

In Alabama, where lawmaking still flourishes in the heat of August, woman suffrage has lost out by a margin of one vote in the committee of privileges and elections.

* * *

In California Phoebe A. Hearst, the well-known philanthropist, has given a thousand dollars toward the expenses of the Women Voters' Convention to be held in San Francisco in September. In doing this she endorses the policy of the Congressional Union which is working for suffrage through congressional action.

* * *

In New Jersey the state superintendent of the anti-saloon league has published a statement to the effect that in his experience of ten years and more against rum, he has found that the liquor interests will spend as much money and fight as hard against woman suffrage as against anti-liquor legislation.

* * *

In New York City Mr. Seth Low has suggested that passenger rates should be reduced and freight rates advanced because passengers vote and freight does not. Whereupon a puzzled citizen asks in the New York Times, "Would the rates for women be reduced or advanced?"

* * *

In Watertown the last of July the New York Association of Police Chiefs endorsed woman suffrage. Suffragists regard this as authoritive testimony that votes for women will hold up the hands of the protectors of law and order.

* * *

In Philadelphia Dean Mary Swift of the University of Montana said in an interview that the men of Montana had always been polite to women but that, as the result of votes for women, to chivalry had been added a respect never shown when, in other days, women had gone seeking legislation at the state capitol.

* * *

In St. Louis Charlotte Rumbold, who opened the first municipal playground eight years ago and whose work has increased until she now runs seventeen in addition to swimming pools, which include the largest in the country, municipal dance halls, picture shows, and concerts, and all for the same pay she received in the beginning, has been refused an increase in salary by the city council. The committee to which the question was referred issued a statement to the effect that Miss Rumbold was not a voter and when she had places to fill she did not favor the Republicans.

$12,000,000 WAR ORDER OFFERED

Baltimore, Aug. 18.—The Spedden Shipbuilding Company here has been offered munition contracts of $12,000,000.

The Detrick-Harvey plant, acquired by the Bethlehem Steel Company, will be used a supply shop, it was announced today.

WATERTOWN COMPANY GETS BIG WAR ORDER

New York, Aug. 20.—Charles A. Starbuck, president of the New York Air Brake Company, stated yesterday that his concern had booked $16,581,000 war orders and was figuring on more.

POLITICAL OPINIONS

The Progressive party of Erie county has accomplished little else than to be of invaluable assistance to the Democrats. The split three years ago will long be remembered. Since that time, however, Progressive strength has dwindled and the suggestion now offered by Chairman Hamlin has been a foregone conclusion.—Buffalo Enquirer.

* * *

The Roosevelt party disintegrated in this state as rapidly as it formed. When the Colonel's all-pervading personality was removed, there was nothing left of the organization that had been built up around his name. It will be recalled that in the campaign of 1912 Mr. Strauss, the Progressive candidate for governor, received 393,183 votes in this state, a shade better than even the distinguished candidate for thep residency. The straight Republiacn vote for Hedges was 444,105, while Sulzer topped them all with 649,559.

In 1914 the Progressives nominated Frederick M. Davenport for governor, and his vote in the entire state was 45,586, a drop of 90 per cent. Locally, the Progressive decline was equally marked and equally disastrous.—Brooklyn Times.

* * *

Even Democrats must begin to have considerable respect for the prophetic powers of Republican statesmen. In the campaign of 1912 the latter warned them and all the rest of the people that Democratic success at the elections would mean the end of the country's prosperity and a return of hard times.

The Democratic party won and the hard times predicted by the Republicans arrived on schedule time. The prophecy has been literally fulfilled and, fulfilled in such an impressive manner that no one can have any doubt on the subject. Everybody must agree that thep rediction has come true.—Plattsburg Press.

LA TENA'S CIRCUS COMES HERE SEPT. 2

At last, in the opinion of the small boy seconded by pater or mater, there is coming to town once more a circus. This time it is La Tena's big show and the date is Sept. 2. The Newport, R. I., Herald has this to say about the show:

"La Tena's wild animal circus that gave two performances here yesterday is a very unusual show. It is not quite like any tent entertainment that has ever been here. In it wild animals are brought forward though the acrobat and the trapeze performer are not forgotten. And in its presentation of wild animal acts several scenes that are thrilling as well as interesting are given.

"In one a den of lions is used and in another a cage of bears is put on. The lions and the bears are turned into a large circular wire cage and in this the performances are given. Over the lions a woman becomes perfect mistress and one animal finally is made to lie down and another is made to affectionately lie across him. Then the woman sits down upon the last lion and one of the most remarkabel pyramids ever seen is formed. In the cage of bears a man presides and gains complete mastery of them. In this there is much done that one ordinarily ses at a circus, but finally the ponderous beast crouches upon the trainer and seems about to crush him when only the head of the man remains visible. There is a sigh of relief when the animal raises himself and its shows that the elephant has merely been covering the trainer and has never touched him."

BUSKWHEAT CROP THE HOPE OF MANY FARMERS

With 75 per cent of the wheat crop reduced to cheap chicken feed, the hay crop more than half spoiled, oats and barley badly damaged and the potato crop hit with the blight, there is still a chance for thef armers who are fortunate enough to have large acreages of buckwheat to get a little money with which to pay their fall bills. Buckwheat in this country is looking good and the stand on the ground now promises to produce a good crop of this grain.

Buckwheat is generally considered a "money crop." By that it is meant that it is sowed solely for the money that the grain will bring and no other profits are derived as the straw is of no value as a fertilizer and the most of the grain is sold and taken off the farm.

EXPLORER AIDED IN KONGO DEVELOPMENT

Richard Mohun Was Decorated by Foreign Governments.

Washington. — Richard Dorsey Mohun, a soldier of fortune in Africa and a prominent figure in the civil government of the Belgian Kongo region, who died suddenly at his home at Royal Oak, Md., near Washington, where he had gone to recover from the effects of wounds received during twenty years of service in the heart of Africa, was born in Washington fifty-one years ago and received his education from private tutors. Then he became interested in African affairs and was the fourth of his family who tried to stamp out the slave traffic. He took an active part in the suppression of the Arab slave trade, made several exploring trips which resulted in adding new features to the maps of Africa, governed humanely 5,000,000 natives, substituted peaceful markets of exchange for old forays and tribal wars and assisted in breaking up cannibalism. For his work in the Kongo Free State and other parts of Africa Mr. Mohun was decorated by the governments of England, Belgium and France.

He was also decorated by the sultan of Zanzibar for his work as intermediary between the British admiralty and the sultan at the time of the winning of that place by the English. He was one of the few surviving comrades of Baron Dhanis, under whose direction the work effecting many changes in Africa was done. Mr. Mohun was the only white survivor of the party which succeeded in connecting the west and east coasts of Africa by telegraph. He was also a survivor of the last Guggenheim expedition into Africa. Mr. Mohun had devoted considerable time to endeavors to exterminate the tsetse fly.

The explorer first went to Africa as a commercial agent for the United States, after the governments of the world had recognized the Congo Free state. His work was so notable that at the expiration of his service for the United States—about three years—the Belgian government sought his services.

Mr. Mohun's wife, who was before her marriage Miss Harriett L. Barry of New York, once accompanied him to Zanzibar, but spent most of the time in Belgium, between which country and Africa communication was rapid. Mr. Mohun was an officer of the Red Cross ship which was sent to Belgium from this country last year. His great-grandfather, William McKenny, was prominent in the African colonization prospect.

He had a rare collection of pictures of African scenes made during his service there. Although not connected with the armies of the governments which he represented, he wore a uniform a large part of the time, this being an aid to maintaining discipline among the natives. He was a member of the geographical societies of England, France and Belgium.

OUR SHRINKING SUN.

Its Diameter Becomes About Four Miles Less Each Century.

There are various theories to account for the enormous store of heat and light in the sun. The theory now generally accepted by physicists is that the gradual contraction of the sun in cooling is the chief source of apparent inexhaustible energy. It has been calculated that at the present rate of expenditure of heat the sun's diameter would contract four miles in a century, and in a few millions of years it may become as dense as the earth.

The sun is supposed to be composed of much the same materials as the earth, except that they are at a much higher temperature. About forty of the seventy terrestrial elements have been identified by the spectroscope as existing in the vapors around the sun. Astronomers think that they find traces there of very few substances not already known. Even these may be discovered on the earth some day.

It has been calculated that the heat thrown on a square mile exposed at noon under the equator would melt in an hour 26,000 tons of ice. This amount has to be multiplied fifty million times to arrive at the quantity of heat received by the earth's surface during a single hour. Yet this enormous supply is even less than one two-thousand-millionth part of what the sun pours forth in all directions in space. It stands to reason that this inconceivable outgiving of heat must be accompanied by a gradual though imperceptible diminution in the size of the sun.—Philadelphia Press.

Did Him Little Good.

James W. Marshall, a native of New Jersey, was the first man to discover gold in California. It was in 1848 that he noticed a glistening object in the bed of a stream, which happened to be a nugget of gold. Notwithstanding this important find Marshall died in 1855 penniless and alone in his little cabin.

THE CZAR'S CHECK.

It Passed Over Itching Palms, but That Was No Surprise.

When Professor Tuxen, the Danish artist, had finished his great work, "The Coronation of Edward VII.," he received, it appears, an order from the Russian emperor for a copy of this painting, for which the czar was to pay 12,000 rubles.

In due course the professor repaired to Petrograd to deliver the painting. He was granted an audience with the czar, who expressed his satisfaction with the picture and who handed the professor an order on the imperial treasury for the sum agreed upon.

When the professor presented the check for payment he was told that an order from the emperor was subject to a discount, and he had, therefore, to accept a sum considerably smaller than the face value of the check.

Before his departure from Russia the professor had a farewell audience with the czar, who in the course of conversation asked him, "Did you get your money, professor?"

Professor Tuxen replied that he had not intended to mention the matter, but since his majesty himself raised the question he would say he had received only part of the money.

At this the czar seemed not at all surprised, but calmly made out another order for the sum which had been deducted from the original amount, and thus Tuxen got his money.—Washington Star.

Curious Letter Endings.

A few specimens of the style of beginning and ending letters in the old days may prove interesting as in striking contrast to the laconic "yours obediently," "faithfully" or "truly" of the present day. It would certainly be difficult to match the following subscription of a letter from the Duke of Shrewsbury to Sir Thomas Hanmer, dated September, 1713: "I desire that you will believe that, wherever I am, I shall always endeavor to deserve and very much value your friendship, being, with a sincere esteem, sir, your most faithful and obedient servant, Shrewsbury."

Frequently one meets with bellicose subscriptions, as in the case of the Earls of Huntly and Errol, who in 1594 threatened "awful consequences" to the magistrates of Aberdeen unless they released certain gentlemen imprisoned in their city and subscribed, "Yours as ye will, either present peace or weir."

Quotes the Headlines.

"Do you see that youngster standing on the corner with his hands in his pockets and whistling with all his might?"

"Of course I see him and hear him too."

"He's one of the calamity howlers in our neighborhood."

"You must be mistaken."

"No, I'm not. He sells newspapers after school." — Birmingham Age-Herald.

Telling Time in West Africa.

Because of the scarcity of clocks in West Africa events are timed by the regular daily occurrences. For example, a native wrote that she had received news of her sister's illness "a little while before the guinea fowl talk"—that is, about 5 o'clock in the morning.

OTHERS' FAULTS.

If by silence we hide the faults of others God also will hide ours, but if we divulge them God will also make known our own.—S. Paemen.

SETTING OUT ROSE BUSHES

Points to Be Remembered by Those Who Are Fond of the Fragrant Flower.

All roses are heavy feeders and require rich, moist soil. A clay soil, if well enriched and having perfect drainage, is ideal. Pruning should be carefully done, preferably in the spring. All weak growth should be cut out and the balance well cut back. The flowers of almost all roses being borne on the new wood, the bushes should be cut back half or more of their growth.

In the majority of cases, roses on their owns roots will prove more satisfactory than budded stock. On own-rooted stock, the suckers or shoots from below the surface of the soil will be of the same kind, whereas with budded roses there is danger of the stock starting into growth and, not being discovered, and finally killing out the weaker growth. Still, if the plants are set deep enough to prevent adventitious buds of the stock from starting, there is no question that finer roses may be grown than from plants on their own roots.

In setting out the rooted bushes, do not crowd the roots into a small space, but have the roots well spread out and the ground well firmed around them.

GARDENS FOR THE WINTER

Specially Designed Boxes Will Always Be Found to Secure the Best Possible Results.

If it is possible, the boxes should be made to order. When one realizes that these boxes will last for many seasons, this does not seem extravagant. Good wood can then be selected, and the boxes made to fit the exact space one wishes to devote to them. Whatever the length desired, do not have the boxes less than one foot wide and one foot deep.

Excellent boxes may be purchased ready made at the various florist shops and department stores in the city if one does not care to go to the trouble of having them made. Never set the boxes flat on the porch or window sill, but support the ends by pieces of "two-by-four." In the bottom of each box bore quarter-inch holes at a distance of six to eight inches apart, to insure drainage.

Paint Up!

Says the Abilene Reporter: "A gallon of paint costs less than two dollars and will go a long way toward covering your house. It not only improves the beauty of the structure but preserves the wood from decay. It is cheaper to paint up than not to do so." This advice is particularly applicable to conditions now existing in our own city. There is a large amount of unemployed labor here that could be profitably used in such work and with a great number of vacant houses needing the application of the paint brush, the owners of such houses could find no more opportune time for enhancing the value of their own property and at the same time giving employment to a deserving class of citizens now forced into idleness.

Community Builders.

To be a community builder is a great thing, an invaluable thing, of the utmost importance. There are many men who can make money who are in no way community builders. They have nothing of the ability to help their neighbors along as they progress themselves, that is accumulate for their own pocket. The builder does more. He encourages, enthuses his neighbors, leads them into better methods of doing what they are pursuing, leads them into more profitable and hopeful employment of their faculties. The builder is worthy wherever he is found. He is especially a great factor in the farming community.—Greenville (Tex.) Banner.

The Small Town.

Now, living is the most important business that a man has to do. He picks out a place for it with the same care that he picks out a location for a factory, a store or an office; and whenever it is possible for him to pick out the place that he likes the best, he picks out a small town, unless he is one of those foolish persons who think that joy is to be found in a cabaret, pleasure in a crowd. If the normal man cannot take up his residence in a small community, that is his dream of the future.—Bloomington Journal.

Home and School Gardens.

The federal bureau of education announces it will investigate and promote home and school gardens. Ethel Gowans, a graduate of the New York State College of Agriculture, is temporarily in charge.

Progressive Minneapolis.

Minneapolis is outclassing all other American cities in utilizing flowers to ornament the business streets. Window boxes and hanging gardens have been introduced in all the shopping thoroughfares.

Justification For "Gent."

As to "gent," it is startling to find Spenser using the word. But it is an adjective—"he lov'd, as was his lot, a lady gent"—that is to say, gentle. It is rather unfortunate, by the way, that we have in modern English no word that will stand for "ladies and gentlemen." Our forefathers could do it with "gentles," but "Mr. Chairman and gentlefolk" would only raise a laugh. The Germans have "die Herrschaft." You can ask if the master and mistress of the house are at home with this expression, and a German guide at a show place will call the attention of "die Herrschaft" to its wonders.—London Chronicle.

He Had Felt Slippers.

Old Lady (in shoe shop)—Have you felt slippers? Boy Assistant (solemnly)—Yes, ma'am; many a time.

FUN RAYS

By Ray I. Hoppman

THE DOG.

Be he setter, hound or collie, dachshund, bull or St. Bernard, he will stick to you, by golly, for he is a faithful pard. He may be a ragged mongrel or a dog aristocrat, but he never will desert you—paste this proverb in your hat. You may be a reckless outlaw with a price upon your head, you may be a humble beggar, asking alms and begging bread; you may be a lowly toiler, yet a multi-millionaire couldn't separate him from you by the wideness of a hair. He will love the starving master as he loves the man with dough, for there is no class distinction with the canine crew, you know. You could feed him on a thistle, yet your side he'd not forsake, though a passerby should tempt him with a juicy slice of steak. Should your coin wad be depleted, should your troubles reach the sky, yet you always would be greeted with the lovelight in his eye. He will share your tribulations with the calmness of a sage, he will ever dog your footsteps till he falters from old age. We have lots to learn, my shipmate, from this loyal quadruped, for he's got some things we lack, pard, sticking in his canine head. I have yet to see the canine with a stationary tail—I have yet to find the dog, friend, whose man-love would ever pale. Yes, it's hats off to the canine, be he doubly pedigreed—winner of a hundred trophies—or a dog of lowly breed. If you want the kind of friendship that will never slip a cog, get a wagging tail kyoodle, get a faithful, barking dog.

RECIPROCITY AT HOME

Many persons believe that the word "reciprocity" has merely a political significance.

But it means one of the greatest principles. All civilization is founded on it. Were it not for this great principle there would be no government, no society, no cities and towns. We would have merely anarchy.

IN PLAIN WORDS, "RECIPROCITY" MEANS THAT IF YOU EXPECT SOMEBODY TO DO SOMETHING FOR YOU, THEN YOU MUST DO SOMETHING IN RETURN.

Let us lay aside the political significance of the word and discuss this great principle as it applies to our own individual and communistic interests.

We have a prosperous community. We have a town which we are proud to call our own. We have various business establishments, good, well-kept stores, stocked with merchandise; we have various facilities for marketing the produce raised by the farmers who are a great and important part of our community.

Were it not for the farmers we would not have all of these facilities for doing business. It is possible that there would be no great necessity for a town of this size and importance.

On the other hand, were it not for the town the farmers would not be enabled to market their crops with such facility and their prosperity would be considerably curtailed.

Now here is where the reciprocity comes in and affects our local conditions and our prosperity.

THE STOREKEEPERS HELP THE FARMERS AND THE FARMERS HELP THE STOREKEEPERS.

Simplest thing in the world. Each does something for the other and both are benefited. The town is benefited and the agricultural district is benefited. We have good schools, churches, places of entertainment and our town is a general headquarters and meeting place for all interests. Every one of us has a certain place in the community and helps to make up a desirable place where we can have interchanges of ideas and commodities.

What if some great monopoly should swoop down and buy up everything the farmers raise, cattle and sheep and crops of all kinds, ship the whole lot direct to the city and thereby deprive our local merchants of the opportunity of handling the same; to utterly ignore the local interests?

Business would suffer. Many of our concerns would find it necessary to close up shop and go out of business. If this same policy were to be continued we would soon be without the necessity of having any town at all.

Of course, this is rather a far-fetched illustration, because there is no possibility of anything of the kind happening. BUT THERE IS DANGER FROM ANOTHER SOURCE.

What if the farmers should all send their money to the mail order houses instead of buying their goods from our local storekeepers?

Many of them do—too many of them.

IF THIS POLICY OF SENDING MONEY AWAY TO THE BIG CITIES INSTEAD OF BUYING FROM THE LOCAL MERCHANTS KEEPS UP AND CONTINUES, WE SHALL EXPERIENCE CONDITIONS WHICH WILL BE FAR FROM PROSPEROUS.

Reciprocity is what we need, right here at home. The storekeepers must deal fairly with the farmers and the farmers must deal fairly with the storekeepers, otherwise our system of business will be thrown out of its philosophical orbit.

Keep the money at home. Buy what you need from the local storekeepers. Don't help the big mail order houses to profit at the expense of our local merchants. Help the men who are helping to build up the community, helping to increase the value of your property by making a bigger and a better town where every facility for doing business is supplied for the benefit of the farmers—and the rest of us.

We must do for others if we expect others to do for us. We cannot evade the responsibilities of reciprocity, nor should we attempt to do so. Every dollar sent away to the big mail order houses restricts our opportunities for local advancement. EVERY DOLLAR SO DIVERTED FROM LOCAL TRADE MEANS SO MUCH TAKEN FROM OUR TAXES, WHICH GO TO SUPPORT THE COMMUNITY.

We can all do as well at home in the buying of goods as we can by sending our money to the mail order houses. We can do better, when we come to consider values and everything.

And reciprocity is the thing that builds up communities. THINK IT OVER THE NEXT TIME THERE'S SOMETHING TO BE BOUGHT.

D/34

BLUE SERGES

Now Included in

Our Semi-Annual Sale

EVERY Fancy Summer Suit, Raincoat, Spring Overcoat and Balmacaan in this big store must be sold.

ALL garments bear their original low cash price ticket, See mark-down price and figure your own saving.

REMEMBER---Merchants who conduct sales almost every day in the year usually equip themselves with cheap sale clothing from auction houses or clothing rejected by high class stores.

REMEMBER, WE HOLD BUT TWO SALES EACH YEAR because we sell for cash at a small profit, consequently when we mark our goods down from our low cash price the buying public appreciate the wonderful saving and our stocks are quickly sold out.

ALSO REMEMBER---that the value and importance of a sale depends entirely how high the goods were marked up before marking them down.

THIS sale includes all the regular lines from Hart Schaffner & Marx, Dolan-Ferrie Co., Rochester Special and College styles for young men. Frankel Fifteen excepted, which price cannot be changed.

MME. SARA HEINEMAN HEARD TO ADVANTAGE

The Oswego Times says of Mme. Sara Heineman's singing:

Mme. Sara Heineman, a mezzo-soprano of exceptional merit, delighted the large audience at the Richardson last evening with a program that appealed to musician and layman alike. Her voice is one of superlative beauty with a sweetness and purity which charmed the most exciting among her auditors. Mme. Heineman sang the famous Aria from Samson and Delilah; an English sonnet, Absent, by Met calf, and the always popular Mother Machree. George Roberts was a most artistic accompanist.

Besides this feature you will see Progress and Prosperity in Oswego, the picture which the whole town is talking about and is making a tremendous hit at every performance. If you want to enjoy a good laugh come and see yourself and friends in the movies. At the evening performances Madame Sara Heineman will be heard in vocal selections.

Tonight, Les Legerts will appear at 8 and 9:30 o'clock.

CONCERT TONIGHT ON WEST-SIDE

An innovation proposed by Exalted Ruler John W. Stevenson of the Elks proved highly successful and pleasing last night, when Bernard Jones of this city and Syracuse, a talented young baritone, sang "Dublin Bay," accompanied by the Elks' band. Mr. Jones, who is well known here among the younger set, and is an exceptional violinist, stood upon the stone coping which surrounds the porch of the Elks' club, and his voice was distinct and clear to the limits of the crowd. He was vigorously applauded and was obliged to respond to two encores. It is hoped that this feature will be repeated at future concerts, as it was keenly appreciated by the crowd. The band, under the direction of Leader Pooler, accompanied in a very able manner.

Last night's concert was largely attended and the ice cream, popcorn and Coney Island booths were well patronized. The dance in the ballroom of the clubhouse after the concert also attracted many, including several Oswego and Syracuse people who stayed over after the fair.

The concert tonight will be staged at West Second st. and West Broadway and will be one of the series of city concerts. The program follows:

March—Greeting to Bangor .... Hall
Selection—High Jinks ...... Friml
Waltz—Cecile —— McKee
Overture—Wanderers Zeal .. Suppe
Characteristic March—Ye Ancients .... Reeves
Selection—Bohemian Girl .... Balfe
Popular Hits:
(a) When It's Nighttime in Bergundy
(b) Jane
Medley Overture—Along the Rialto .... Feist
Selection—The Firefly .... Friml
March—Greater Fulton .... Newton

MUST NOT SHOOT DUCK UNTIL OCT. 1

Despite the fact that the open season on ducks and other water fowl opened Sept. 16, according to the state law, hunters are warned that the federal bird law prohibiting the taking of such fowl prior to Oct. 1, will be rigidly enforced. This will result in a limited season as far as New York state is concerned and will shorten the hunting period for the northern counties by reason of the halfmonth's delay. The constitutionality of the federal migratory bird law, which over rides the game laws of the several states, is now pending before the supreme court, but will not be argued until after the opening of the season.

ROBILLARD—SMITH.

Benjamin F. Robillard of Granby and Miss Dora M. Smith of West 1st st., N., were married by the Rev. J. W. Barrett, pastoro f the First M. E. church, yesterday at high noon. After a brief honeymoon trip Mr. and Mrs. Robillard will reside at Granby, where the former is employed by his brother on a farm.

MISS PUTTERILL BURIED

The Rev. J. W. Barrett officiated at the funeral this afternoon of Miss Carrie Putterill, whose death occurred early Wednesday morning at the home of her cousin. William Dexter, 368 West 2nd st. Burial was made in Mt. Adnah cemtery.

AN INFANT'S BURIAL

The infant son of Mr. and Mrs. John Hosler of Walradt st. was buried this afternoon at 4 o'clock. The child was only five monthe old, and died yesterday afternoon. Theb urial was made in Mt. Adnah cemetery, the Rev. J. W. Barrett officiating.

OLD SETTLERS AT DEMPSTER

Dempster Grove Camp Ground, Aug. 20.—There is a big crowd already here for the opening of the annual session of the camp meeting which begins today and others are coming on almost every train. The open-gate policy adopted by the directors is going to prove a big attraction to visitors. It is a daring venture, but the trustees believe in its wisdom. To meet expenses they will depend upon the generosity of those who attend and upon friends who will make contributions to this important work. Offerings will be taken in the congregations. Friends may send contributions to the Rev. C. E. Miller, District Superintendent, Rome, N. Y. It is hoped that the trustees will be generously supported.

Yesterday the annual meeting of the old settlers of Oswego county was held. Dr. Mary E. Walker, to whom has been allotted the work of reviewing the history of the association and the men and women who organized and perpetuated it down through the years, was early on the ground and was warmly greeted by many old friends.

In connection with the camp meeting, the first special, under the auspices of The Northern Christian Advocate, the original organ of the Meth odist church in this section, a rural churchc onference is to be held tomorrow on the Dempster grounds. The conference will assemble at 10:30 and continue through the day.

"The conference is a new idea," said H. E. Woolover, editor of The Northern Christian Advocate, last night. "It will be on the first day of the annual Summer camp meeting, which will last ten days. The aim is to solve the many problems confronting pastors of churches in the rural districts. Census figures show us that more than fifty per cent. of the population lives in places of 2,500 inhabitants or less, and the question is how to get them to the church services."

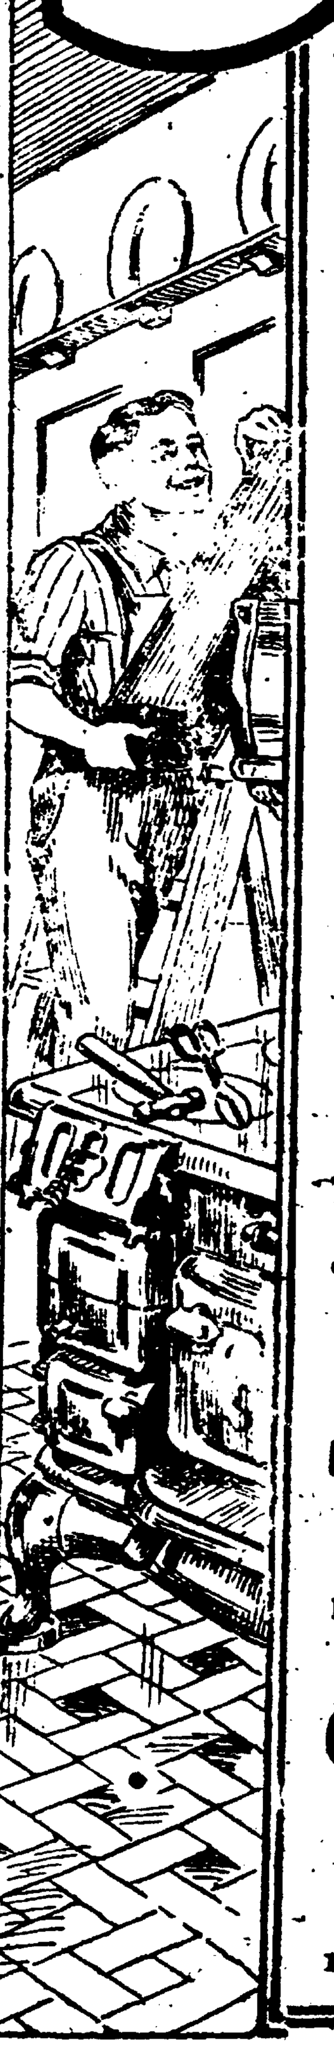
Black Baking Company time in Fulton is at all times. Your grocer sells the goods. adv

3 Only 3 days more— $5 installs the SCIENTIFIC STERLING in your kitchen



HEED THE CALL OF OPPORTUNITY

Today, August 20th, there are a number of housewives in Fulton who are convinced of the superior merits of the "Scientific Sterling"—the modern two-fuel range—over all other gas, oil, coal, or "combination" ranges.

Today there are a number of Fulton housewives whose whole summer will be easier and more pleasant—every day a vacation day—because the "Scientific Sterling" is on duty in their kitchens.

Today marks the beginning of the end of our great "Scientific Sterling" sale on the Co-operative plan, whereby you can obtain this wonderful new range on terms that will never be duplicated in Fulton.

Only three days more—but in those three days there will be at least a great many more "Scientific Sterling" ranges sold on the Club Plan. It is human nature to wait until the last minute before making a decision—will you be one of the fortunate owners of a "Scientific Sterling" when the Club is closed?

THE "SCIENTIFIC STERLING"
—THE GAS RANGE THAT BURNS COAL—

Recommended by the endorsement of a number of your Fulton neighbors, who bought "Scientific Sterlings" after careful thought and thorough examination.

You have their word that the "Scientific Sterling" that cooks and bakes perfectly with either gas or coal—the one perfect range to use throughout the year—is the most convenient, cleanly, efficient, safe, and economical cooking apparatus ever sold in Fulton.

That alone should convince you that you need the "Scientific Sterling" now.

We are enthusiastic about the merits of the "Scientific Sterling"—the Gas Range that Burns Coal. Fulton housewives have justified our enthusiasm by their delightful response to our offers.

We are still more enthusiastic about the merits of the Club Plan, which has enabled so many Club Purchasers to install the "Scientific Sterling" in their homes.

THE CLUB PLAN IS OUR STRONG APPEAL TO YOU

Think of it! Here is a range—not a "combination," but one compact construction—five burners for gas—six holes for coal—no larger than the ordinary range—even equally efficient for gas or coal without change—a range that is twenty years in advance of all previous constructions. A range that would cost you $77.00—the full cash price—and $10 or $12 for installation added—if you came to our store and laid down cash four days from this date.

Today you can buy the "Scientific Sterling" on Club Terms never before duplicated in Fulton.

$5.00 FIRST PAYMENT—$2.00 A WEEK
30 DAYS FREE TRIAL
Free Installation — Free Insurance — Absolute Guarantee — Inspection Service
CREDIT FOR EIGHT MONTHS

Here is our whole argument—the one perfect range for cooking and baking—a price you can afford to pay—terms you cannot afford to refuse.

Easy & Practical Home Dress Making Lessons

Prepared Especially For This Newspaper by Pictorial Review

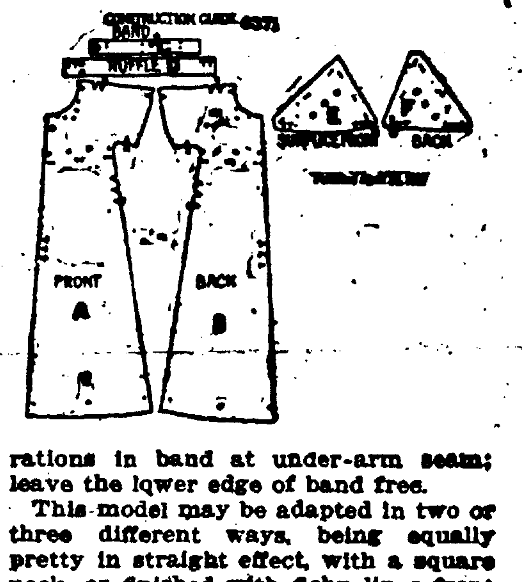
PRETTY NIGHT GOWN IN KIMONO STYLE.

A novel design for a nightgown. It is made in kimono effect and gathered into a band at Empire waist-line, with a straight ruffle.

It has become quite the perfunctory thing for lingerie to be fashioned after outer garments, hence the introduction of the peplum effect upon this kimono nightgown of fine nainsook. The neck is finished in round outline, eyelets being embroidered below the band for the accommodation of narrow ribbon. This treatment is repeated on the short sleeves. The embroidery on the front of the gown is done in eyelet and satin stitch.

To make the gown for a person of average size requires 4¼ yards 36-inch material, with 1¼ yard beading for the waist, 2 yards of 1½-inch wide ribbon and 4 yards of ⅛-inch wide ribbon.

The kimono effect is exceedingly simple to cary out, and the home dressmaker will be delighted at the quickness with which it can be put together. First close the under-arm, sleeve and shoulder seams as notched. Turn hem at lower edge on small "o" perforations. Gather on crosslines of single small "o" perforations. The large "O" perforations in ruffle indicate front edge. Close back seams of ruffle and band; gather upper edge of ruffle between double "TT" perforations. Sew ruffle to band, center-back seams even, and bring front edges of ruffle together at center-front. Adjust band to position, stitching the upper edge of band over gathers in front and back, center-fronts and center-backs even, small "o" perforations in band at under-arm seam; leave the lower edge of band free.



This model may be adapted in two or three different ways, being equally pretty in straight effect, with a square neck, or finished with fichu lines front and back.

Nighties show many innovations. Ruffled shoulder capes are among the most unusual.

Pictorial Review Nightgown No. 6371. Sizes 32, 34, 36, 38, 40, 42, 44 and 46 inches bust. Price, 15 cents.

Bowser Catches On

And It's Mrs. Bowser Who Gets the Worst of It.

By M. QUAD.

Copyright, 1915, by the McClure Newspaper Syndicate.

Bowser had been good for a week—that is, good for him.

He hadn't been up in a balloon or down in a submarine.

He hadn't planned a trip to either pole.

He hadn't had a row with the street car conductor or told the butcher what he thought of him for sending so much bone with the meat.

He hadn't hustled a tramp out of the yard or had he threatened the arrest of a street peddler.

But in place of this he had been very arrogant about the house. He had talked about "my" house, "my" grocery, "my" friends and a whole lot of other "mys," as if he was the whole show and Mrs. Bowser was nothing at all. She was both amused and provoked, and after several days she wrote a letter to her mother. In the letter she said:

"Mr. Bowser has a case of the 'big head.' I think you had better come out

HE BACKED AGAINST A FENCE AND READ EVERY WORD OF IT.

here and apply the remedy. I want you to come unexpectedly and catch him in the act."

And the mother wrote back:

"I will come next Friday afternoon, and I will attend to Samuel's case with promptness and dispatch, as I well know how to do. I can find my way over from the depot, and I will arrive about an hour before he comes up to dinner. Let him act up and canter around, for his time is short."

On the day Mrs. Bowser wrote her letter she handed it to Mr. Bowser to drop into the letter box on the corner. He carried it along in his hand, and as he was about to mail it he noticed that the envelope was not sealed.

"Huh!" he grunted. "Just like a woman. This letter is to her mother, and I suppose it contains a hundred dollar bill? Guess I will look in and see."

And he backed up against a fence and read every word of it. He was thereby put in possession of Mrs. Bowser's nice little plot to take him down a peg or two.

"The old woman will answer this in a day or two," he mused, "and I will get hold of the answer in some way. Then we will see who is the biggest man. Acting up, am I? Need taking down a peg or two. H'm! Nice little bear trap they are going to set for me."

Like 99 women out of 100, when Mrs. Bowser received her letter she reads it and then places it on the mantelpiece or piano until she gets time to read it two or three times more. Mr. Bowser had only to read it once to lay his little plan.

When the train from Okomas arrived in the city at 5 o'clock in the afternoon Mr. Bowser's mother-in-law was one of the passengers. As usual, she had a folded umbrella in one hand and her quaint old carpet bag in the other. She was disputing with the hackman as to the price to be paid when her smiling son-in-law approached with extended hand and a bland smile. He not only wrung her hand like one glad to see another, but he kissed her—yes, sir, Mr. Bowser positively kissed his mother-in-law and that before fifty people!

"Why—why—why"— she stammered, in her great confusion.

"Why, mother, dear, I'm awfully glad to see you," he said.

"But I—I didn't expect you to meet me. Did Sarah tell you to come?"

"Oh, I just happened to be here on business. You are going to the house, of course?"

"Why—er—yes."

"Then come along, and never mind the hack. We'll whirl over in an auto. Nothing is too rich for my dear mother."

The old lady was so paralyzed that she dropped both satchel and umbrella, and when he had picked them up she slowly followed him out of the depot and wondered if she had arrived at Oshkosh or Yaphank, and whether his name was Bowser or Jones. On the way over to the house he kept calling her "dear mother" and saying that he had been longing to see her for the last month, and she was so astonished that for once in her life she kept her mouth shut for fully five minutes.

It had been arranged that Mrs. Bowser should be prostrated with a sick headache about fifteen minutes before Mr. Bowser would reach home for dinner. There would be camphor sprinkled around, and she would have a nice clean towel around her head. The mother would be seated upstairs, ready to play her part at a minute's notice. Mr. Bowser would burst into the hall in his usual impetuous way, and, smelling the camphor, he would strike back into the sitting room and demand of the half dead woman lying with closed eyes:

"Woman, what in the old Harry does this mean! Is it another of your infernal sick headaches? Can't I leave this house for a day and return without finding you kerflopped with some ailment or other?"

"Oh, Samuel!" she murmured.

"Don't 'oh, Samuel me!' " he shouted, "but tell me what's the matter. Have you got a chicken bone in your throat or has a rattlesnake bitten you?"

And at this critical moment the mother-in-law would appear in the door, and the way she would go for Samuel Bowser and the way he would be crushed would long be remembered. But that little plot never developed.

Mrs. Bowser was on the front steps, looking up the street for the arrival of the expected mother, who probably would come on the street car, when an auto whirled around the corner and drove up to the gate and stopped with a grand flourish. In that auto were seated Mr. Bowser and her mother. They were not ghosts, but living human beings. Mr. Bowser raised his hat and gave a half cheer, and the old lady somehow managed to call out, "Howdy, Sarah?"

With tenderest hand and smiling like a June morning Mr. Bowser assisted his visitor to alight and conducted her up the steps and said to the puzzled and astonished wife:

"Isn't it splendid of her to come to visit us? She probably will want to return home in about a month, but we will keep her three months at least—six months—a whole year. Never, never shall we let the mother out of our sight again."

When the mother and daughter were alone upstairs the mother asked:

"Sarah, what in tarnation does this mean?"

"I—I don't know, mother."

"Well, he acts more like a bridegroom than a son-in-law. He never liked me, and I never liked him, and yet he is as juicy and tender toward me as a rare beefsteak. He said he was at the depot on business, but I don't believe it. I believe he must have got hold of my letter and is playing a joke on us. It doesn't look as if I would have a chance to do any crushing this trip."

The "crushing" was all in Mr. Bowser's hands, and Mrs. Bowser was made the victim. Under the excuse that the house might be broken into if left to guard itself he invited the mother-in-law to go to the movies with him while Mrs. Bowser remained at home. "Dear mother" accepted the invitation, and her daughter shed a few tears during the lonely hours she had to pass.

The old lady had never been to a zoo. Mr. Bowser took her to one while Mrs. Bowser had to remain at home to see about the dinner.

One evening at the dinner table Mr. Bowser announced that he had received an invitation to deliver an address before the Gulliver club.

"And you will go?" asked Mrs. Bowser.

"Not by a long shot. I am going to teach mother how to play euchre this evening."

And he did. The next day the mother said to the daughter:

"Sarah, this is intolerable. We must change it."

"But how can we?" was asked.

"There is but one way—let him be Bowser again. I liked his old ways better than his new ones."

"So did I."

And the "dear mother" took an early opportunity to say:

"Samuel, my son, you are acting too darned good. Please make a change."

And a few hours later as Mr. Bowser came upon Mrs. Bowser using the carpet sweeper he saw tears in her eyes as she looked up at him.

"Oh, Samuel, you are too good—too good! Please go back to last week and be bad again. You have punished me enough!"

"Hanged if I don't be a bad man with a big B and carry two guns and a knife!" he laughed.

And next time you hear Mr. Bowser you will learn that he has resumed business at the old stand.

Do You Believe This?

A plumber once presented to a millionaire a bill of $100 for mending a pipe.

But the millionaire handed the plumber a dollar note and said severely:

"Receipt that bill of yours in full."

"But—but"— said the plumber.

"Receipt it in full," the millionaire repeated. "I used to be a plumber, man, myself."

The plumber at this gave a great start, receipted the bill and handed the millionaire 59 cents change.—Detroit Free Press.

Look Before You Leap.

The cake she made looked fine enough
To justify her pride,
But when we came to eat the stuff
We pretty nearly died!
She said she could not comprehend
What trouble there could be.
She'd followed closely to the end
The cookbook recipe.

It certainly seemed strange the cake
Should turn out such a mess
Unless she made some sad mistake
Despite her carefulness.
The book proved such the truth to be
Beyond the slightest doubt,
For from the simple recipe
Six pages were torn out!
—Boston Journal.

PRACTICAL HEALTH HINT.

Sprains.

A sprain is due to the stretching and tearing of the ligaments around a joint. It usually is accompanied by great pain and swelling. Hot water applications are the best to relieve the pain and reduce the swelling. The injured joint should be kept absolutely at rest. A good way to secure this is to strap the joint for some distance above and below with adhesive plaster, layer upon layer. If there is a weak spot in the dressing it can be strengthened by another layer or so. Care should be taken to see that the plaster is not so tight as to interfere with the circulation. It is easy to determine this by noting whether the parts below the dressing remain warm. If they do not it is a sure sign that the dressing has impeded the circulation of blood. If this is the case loosen the bandage sufficiently to allow the blood to flow normally.

THE FAMILY VACUUM.

She Knew Its Exact Location, and He Confirmed Her Report.

The good man had just been informed by the only person who could possibly possess the information that he hadn't an ounce of sense, that he had never had an ounce of sense and that there was not the remotest chance that he ever would have an ounce of sense.

Having been assured on these points, the good man turned to his paper, only to be interrupted by his young son and heir:

"Father," asked the boy, "what is a vacuum, and where can I find one?"

"My boy," replied the good man, "if we are to assume that your mother is qualified to speak on the subject I possess the only real vacuum in the neighborhood, and, for your further information, it is situated just between my collar and the glossy open space where I used to grow hair."

"You mean your dome?"

"Yes, my son, that is the family vacuum."—St. Louis Post-Dispatch.

My Dog.

I tried to write a poem
To my dog the other day,
To tell him that I loved him
In the very nicest way.
Mamma said it was a poem—
That I had done quite well,
But papa's name is nicer,
For he called it "Doggerel."
—M. H. Church in St. Nicholas.

Awkward.

The Boss—Anybody call while I was out?

Office Boy—No, sir.

Boss—Gee! Then I'll have to go out again. I told Brown to call today and get his money.—New York Globe.

Coming and Going.

One Professor McDome of St. Clair
In five hours tracked a bear to his lair.
Mr. Bear was at home
And Professor McDome
Spent five minutes returning from thair.
—Cornell Widow.

Might Have Been Worse.

Flatbush—Wasn't that awful for Nero to be playing his fiddle while Rome burned?

Bensonhurst—It might have been a good deal worse.

"How so?"

"Why, the old man might have played the bagpipes."—Yonkers Statesman.

English as She Is Spoke.

That synonyms don't always work
Can thus be proved with precision:
The girl you're mad at is a sight.
The one you're taken with—a vision.
—Judge.

She Agreed.

Rector—The divorce laws are scandalous. They should be changed.

Grass Widow—I quite agree with you, rector. It's a shame to be compelled to live so many months in those impossible places in order to acquire a legal residence.—Puck.

Or Thereabouts.

Boys will be boys
Until twenty-one—no more.
Girls remain girls
Up to thirty-four.
—Louisville Courier-Journal.

A Figure of Speech.

Fred—What's Jack doing?

Tom—He's railroading.

Fred—I thought he studied for the law.

Tom—He did. He's district attorney.—Dartmouth Jack o'Lantern.

Gritty.

In a sand pit William fell,
Swallowed earth from out the pit;
Father smiled and calmly said:
"Brave boy! Will is full of grit!"
—Princeton Tiger.

True Bliss.

The Pessimist—The best luck any man can have is never to have been born, but that seldom happens to any one.—Boston Transcript.

Woman's World

The Exquisite "Little Lady" Who Interprets Barrie's Plays.

MISS MAUDE ADAMS.

You have seen her—seen her from "the front," as they say in stageland—perhaps as a little lad in green breeches, with a charming, wistful face, in his right hand Pandean pipes and whom the members of his band called Peter Pan, or, perchance, as a gypsy girl with mischief in her eyes and rowan berries in her hair, yclept Lady Babbie, or, again, it may have been as one called Phoebe—Phoebe of the ringlets—whose home was in Quality street. Or was it as the patient Maggie Wylie trying—oh, so hard—to implant just one little spark of humor in the hopelessly humorless John Shand? Besides all these names and more which were thought out by a little man of Thrums and sent across the Atlantic to be made into very real people, she who created those characters so dear to playgoers has still another name.

It's Maude Adams.

Maude Adams and James Matthew Barrie—they are a unique and joyous combination. It scarcely seems that either could get along without the other. To interpret Barrie's subtle and delicious humor, with its ever present strain of tenderness, needs just such a winsome personality as the "little lady," as those who sit "in front" love to call her. And, without the Scotch playwright to build for her the most fascinating roles in the world, what, indeed, would Maude Adams do?

But, though it is Barrie who builds the roles and writes the whimsical dialogue of those who people his plays, it is Maude Adams who sees to it that these characters speak those lines and do those things which make them fully as real and quite as human as they were in the mind's eye of the man who conceived them. And this is not an easy task.

"It is my contemptible weakness," writes Barrie of himself, "that if I say a character smiled vacuously I must smile vacuously; if he frowns or leers, I frown or leer; if he is a coward or given to contortions, I cringe or twist my legs until I have to stop writing to undo the knot. I bow with him, eat with him and gnaw my mustache with him. If the character be a lady with an exquisite laugh I suddenly terrify you by laughing exquisitely. One reads of the astounding versatility of an actor who is stout and lean on the same evening, but what is he to the author who is a dozen persons within the hour? Morally, I fear, we deteriorate. But this is a subject I may wisely edge away from."

And so after Mr. Barrie has played his part as dramatist Miss Adams' work has but begun. How she sets about her task is best told by the director of her stage:

"When Miss Adams first receives a new play from Mr. Barrie she reads it over many times. She commits it to memory in its entirety. When this is accomplished she begins to visualize its characters from the most important to the most insignificant. Mentally she pictures first the segregated situations and then the entire action of the play. Her conception is always subject to subsequent changes, but, as a rule, she adheres to her original ideas. When she has mastered the play in the manner described the rehearsals are got under way. But these are conducted along lines quite different from the usual method pursued in stage work. Instead of dealing with the cast as a whole Miss Adams rehearses the principal characters individually. While this work is going on the minor characters are being taken care of by stage directors, who, for the sake of coherency, impersonate the more important, yet absent characters. Then comes the day when a complete rehearsal is called and the remarkable part of this performance is that every detail of action and every part of the action fits together as splendidly as though the complete cast had been working side by side for a month. And the satisfying result is that enthusiasm has not been dulled nor illusion dispelled by long and tiresome sessions where a more apt individual would often be made to wait upon one not so quick to perceive a given direction."

Care of Books.

To preserve books from becoming musty and possibly moldy in moist weather place a few drops of oil of lavender and Canadian balsam in a back corner of each shelf. This will not injure the bindings of leather books as sulphur compounds do, but helps to preserve the bindings.

HOW TO KEEP YOUR PIANO.

Some years ago a piano expert said that it is a mistake to keep a piano tightly closed. The fall board should be left partly closed when one goes away for the summer. This keeps out the greater part of the dust and, what is more important, permits a circulation of air and helps to keep the strings in better condition. He says that the best way to prevent moths from getting into a piano is to have the piano blown out by a professional piano tuner occasionally in order to keep the dust out. Moths will attack new pianos as well as old ones. It is not always possible to guard against them, but the dust can be kept out by a blower.

Every piano dealer nowadays has piano blowers to sell, and these little bellows arrangements are not expensive. One can be bought for $3. Ordinarily the tuner will blow out the dust for 50 cents. On a grand piano the owner can use the bellows herself, but it is wiser to have a professional use it on an upright piano. If your piano is a player piano you can get a kinetic blower, which will cost you about $5 and which you can operate yourself.

SOUR CREAM.

How to Utilize This Valuable Food In Various Ways.

The idea with most women is not "What can we do with it, but instead tell us some new ways of using it profitably." Many of us have used sour cream for griddle cakes, biscuits of various kinds, cakes, cookies, shortcakes, puddings, salad dressings, meat sauces, fish sauces and, freezing it with fruit juices, have made most delightful ice cream. And did you ever use sour cream in place of milk in preparing a white sauce for codfish? If not, you have a treat in store. Do not cook the cream too long to allow it to curdle the mixture. But you ask for recipes, and here are just a few:

Sour Cream Cookies.—Take a cupful of sugar and a cupful of molasses to two cupfuls of rich sour cream, add two well beaten eggs, a teaspoonful of soda and one of baking powder, a tablespoonful of ginger, a dash of cinnamon and cloves and enough flour to roll. Let stand on ice to chill before rolling out.

Chocolate Cake.—Take a cupful of brown sugar and half a cupful of sour cream, half a teaspoonful of soda, one egg well beaten, a cupful and a half of flour sifted with a teaspoonful of baking powder. Dissolve two squares of chocolate in half a cupful of boiling water and add to the cake the last thing. Flavor with vanilla and bake in two layers.

Cabbage Salad.—Shred cabbage very fine and plunge into cold water to crisp. Drain and dress with sour cream, sugar, salt and, if not quite sour enough, a very little vinegar may be added. This is a salad which can be enjoyed at any meal with almost any combination of foods.

Sour cream when mixed with fruit juices and sweetened will freeze smooth and velvety. Orange juice with sour cream and sugar to sweeten is a combination especially tasty and delightful. Mix and freeze as an ice cream. Raspberry, grape juice or peach juice are others. Lemon is such an acid with the sour cream also an acid that the result is not so good unless a sour frozen dish is desired.

Hints For Traveling Baby.

The two most common mistakes made in traveling with children are with respect to their clothes and their food. In the hot summer weather, for a long journey, the little child should be dressed only in the sleeveless gauze shirt and diaper, with one thin outer garment. A sleeveless low necked slip of white china silk is best, since it is much cooler than cotton, sheds the dust and can be washed out in the basin when soiled.

It is well to change the baby's clothing as soon as the journey begins in order to have the regular outfit clean to put on when leaving the train. The little baby may go barefooted, but an older child should have barefoot sandals to protect the feet from the cinders scattered over the floor.

Mothers should observe the same regular hours for feeding their children as at home. One of the worst things she can do is to give the baby cakes, candy, bananas, sweet crackers and the like, as so many mothers do, to keep him quiet in the train. This kind of irregular feeding with unsuitable foods, together with the heat of the train and the fatigue and excitement of traveling, is very apt to upset the baby and make him irritable and restless.

Use a patent bottle to keep baby's milk cool, not warm. The porter will bring you a bowl of hot water to warm the feeding at the regular hour.

How to Renew Worn Tablecloth.

Buy four yards of torchon insertion at a sale; cut it in halves; then cut four squares from the best part of the tablecloth and join to insertion, using the selvages or outside edges for center of cloth; your insertion, of course, to cross the center. Trim edges and hem. Result, a very good looking tablecloth.

Another way is to cut carefully all around, hem it by hand and sew a wide torchon lace edge on the edge, making a round tablecloth to fit the table. The four corners cut from the above make four small hemstitched napkins.

Easy & Practical Home Dress Making Lessons

Prepared Especially For This Newspaper by Pictorial Review

A SMART FROCK OF BLUE SERGE.

6343

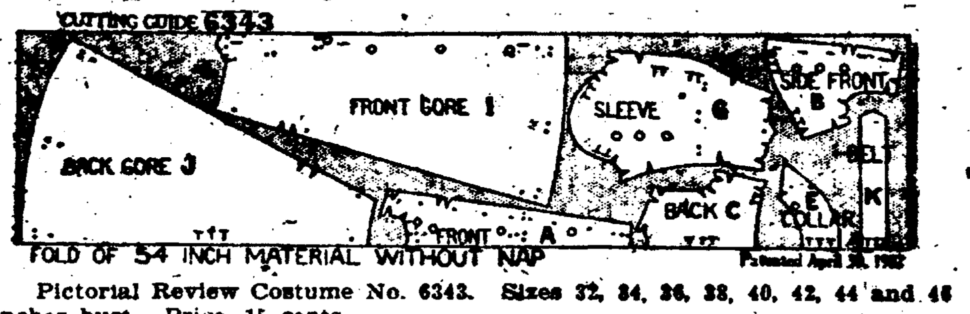
Costume of blue serge which is suited alike to slender and stout figures.

as an inset front section may be added for the latter.

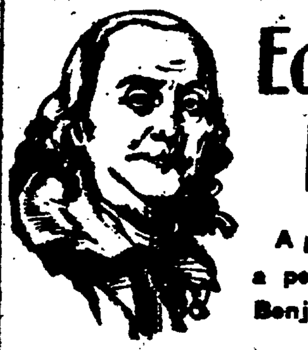
The fashionable colors for fall are all dull, faded and flat. Blue is among the leaders because it is one of the few colors which the manufacturers can guarantee to "hold fast." Very few reputable spinners are warranting the fastness of their latest colors. Men's wear serge can be used to advantage in building up this one-piece frock. There is a vest of self-material, although silk may be substituted. Even silk, however, should be in the same color. The full skirt is innocent of gathers about the hips, and the sleeves are draped to a point over the hands, the finishing being supplied in a piping of blue silk. In medium size the design requires 6½ yards of 54-inch serge, with ⅞ yard of 2-inch belting for the stay.

After the serge is folded and made ready for cutting, select first the back gore of the skirt (J), the back of the waist (C), the collar (E) and the belt (K). All of these are laid on a lengthwise fold of the material, but not consecutively, however. The front of the waist (A) comes between the back gore of the skirt and back of the waist, but is arranged on a lengthwise thread. Opposite the front of the waist and as far toward the left as the back skirt gore will allow the front gore is placed on a lengthwise thread. To the right of this comes the sleeve, followed by the side front of the waist.

Length of line may be gained by continuing the vest below the belt so that it will have the appearance of an inset section. Provision is made for this in the pattern, and when the inset section is used the front gores of the skirt are cut away.



Pictorial Review Costume No. 6343. Sizes 32, 34, 36, 38, 40, 42, 44 and 46 inches bust. Price, 15 cents.



Economy Hints

A penny saved is a penny earned.—Benjamin Franklin.

DID you ever stop to think that good care of the toothbrush is almost as essential as good care of the teeth? Yet how few persons really take the proper care of either! Nothing spoils a pretty face so quickly as bad teeth, and the girl who has any regard for her appearance will watch both her brush and her teeth.

It never pays to invest in a cheap toothbrush. In the first place a bad set of bristles leave their work half done. They have not the necessary stiffness and resistance to clean the teeth well. Then the bristles in a cheap brush are not well fastened and are apt to fall out. This makes a cheap toothbrush a real menace, for if the bristles come loose in the mouth they are apt to slip down the throat, catch there and decay, or they may pierce through the walls of the digestive tract.

Buy a good brush and then take care of it. Before you use a brush for the first time soak it in a weak solution of bicarbonate of soda for two hours. This not only serves to disinfect it from shop handling, but it sets the bristles so that they will not fall out so readily.

It is better not to use a toothbrush for a longer period than three weeks at a time, and it is wiser to keep two brushes going at once. In this way one can be drying out and airing while the other is in use. Be sure that the brush is well rinsed and thoroughly clean of all tooth paste or dirt before hanging it up to dry. Once a week let it boil in clear hot water for about five minutes to kill any germs which may be lingering in the bristles and to disinfect it well.

The teeth should be brushed after each meal, before retiring and upon arising in the morning. The nightly cleansing, so often neglected, is in reality the most important of all. It is essential to brush the teeth both inside and out before retiring, so that the food particles will not stay in the crevices and decay overnight. Once a day or twice at the most is often enough to use tooth paste or powder. At other times wash the teeth with clear water.

Very often after a long illness it will be found that the teeth have begun to decay. This is usually laid down to the nature of the illness. In reality it is more often due to neglect of the teeth than to the ailment itself. During illness the teeth should be cleaned often, especially as they cannot be attended to by a dentist.

The best mouth wash, one which will help to harden the gums and will keep away tartar, can be made by dissolving a teaspoonful of bicarbonate of soda (ordinary baking soda) in a pint of water. Bottle this and keep it on hand for use. It is quite as good a cleanser as peroxide, and it is not so hard on the teeth. The peroxide is said to wear the enamel away.

The Care of Foodstuffs.

As soon as meat or fish arrives from the market it should be examined in the folds and crevices to make sure there are no eggs left by intruding flies. A wire safe in the cellar is the best place to hang meat. In mutton or in lamb the marrow or soft, fatty substance should be taken from the backbone, as also the thin membrane which appears under steaks and chops, as these decay quickly and, therefore, are liable to taint the whole piece. Never leave meat in paper, but put at once on a clean plate if it is not hung.

Fish should not be laid directly on artificial ice, as the ammonia used is apt to combine with the fish and cause ptomaine poisoning. Do not cover meat or fish tightly before being cooked and never cover cooked food such as soups, meats and vegetables while still hot. Let them cool as rapidly as possible, then cover. Bacons and hams may be kept in any cool place where there is plenty of cold air in circulation about them to prevent mildew. They are best hung, protected by bags of cloth or paper.

Fruits should be kept in a cool, dark place and separated as much as possible. Berries should be poured on large plates or platters and spread out. If the watermelon is too large for the ice chest cover with a wet piece of sacking and place where the wind will blow over it. The evaporation will make it delightfully cold. Lemons are best kept by wrapping in tissue paper and hanging in an openwork bag in a cool place. A bag made of netted white string is admirable for this purpose and can be washed when necessary.

Homemade Towels.

A fad has developed among fastidious women for making their own towels. They buy for the purpose fine French birdseye and French huck for their own personal use and German huck for general family use. Of course the fancy towels, which are lace trimmed and embroidered, are not honestly practical.

But those hemstitched are, and either the family initial or some quaint emblem in cross stitch, white or colored, makes a charming finish.

Mexico has about everything that could serve to complicate its affairs except an energetic peace movement.

HOW TO KEEP MOSQUITOES AWAY.

To keep mosquitoes away from one while asleep it is recommended that the following solution be prepared and a few drops put on the pillow and on a towel near the head of the bed:

Oil of citronella	1 oz.
Spirits of camphor	1 oz.
Oil of cedar	1½ oz.

Another preparation for the same purpose is:

Oil of lavender	1 oz.
Alcohol	1 oz.
Castor oil	1 oz.

This is not as unpleasant as the other mixture, and a few drops can be sprinkled on the face and hands and on a towel hung at the end of the bed.

Orange peel burned in the room is also an efficacious mosquito killer. For mosquito bites plain soap applied to the bitten places is effective. Other remedies are ammonia, alcohol, glycerin, bicarbonate of soda, sugar, calcium chloride.

TEST FOODS.

Many Household Staples Found to Be Adulterated.

Housewives ought to have a bit of many kinds of knowledge. The perfect housewife must not only have a thorough knowledge of the cuisine, but she must also be an excellent business woman and know how to apply business methods to her home. She must have a practical acquaintance with chemistry and biology and must have the art of making a house into a home.

Just at present the women in the home need another kind of knowledge which will prove invaluable to them at many a time. That is how to know if their food is adulterated. There are, unfortunately, frauds in every line of work, and the food frauds always seize upon such occasions as the present, when the authorities are busy elsewhere, to perpetrate the worst crimes against the community. Probably foodstuffs all over will be adulterated and the wise housewife will learn how to detect the presence of foreign elements in the provisions she buys.

Butter is one of the first to suffer. Margarine has often been used as a substitute in the past and probably will be passed off many times in the future. While margarine is perfectly wholesome, still no woman wants to pay the price of butter for the less costly margarine. A reliable test is, melt a little bit in a spoon over a gas burner. Good butter froths a great deal, but makes very little noise. Margarine, on the contrary, crackles and bursts and makes little explosive sounds. After applying this test you can refuse to buy again at the same shop if you detect the presence of margarine in the substance which you bought as butter.

The easiest and commonest food to adulterate is milk. Watered milk is almost as common as plain water, but it is so easy to discover the fraud that no housewife need be taken in by it. Pour your milk into a pail or pot. Then take a fairly stout, very bright knitting needle and plunge it into the milk. If, on removal, a large drop of the fluid clings to the end of the needle for quite a time without falling off you may feel quite sure that the milk is all right. If, on the other hand, the liquid runs right off the steel needle and forms no lasting drop the milk has certainly been watered.

Mint Relishes.

Green Peas and Mint.—Shell green peas just before they are to be cooked. Line the top of a double boiler with green lettuce leaves, put the peas in, add a tablespoonful of chopped parsley, cover and cook until done, which will be about half an hour or perhaps forty minutes. Then drain, add a tablespoonful of finely minced mint, salt and pepper and two tablespoonfuls of butter.

Mint Sauce.—In taking your walks abroad at this season bring home with you if you can a handful of mint from the brookside. To make the sauce that goes so excellently well with spring lamb or game chop fine the well washed leaves of a bunch of mint, then pour over them a cupful of boiling water and add two tablespoonfuls of sugar. Cover and let stand in a cool place for an hour to fuse; then add a quarter of a teaspoonful of salt, a dash of paprika and four tablespoonfuls of vinegar. Mix thoroughly and serve with the meat.

Mint Chutney—Add to a handful of finely minced mint leaves a cupful of seeded raisins; two tablespoonfuls of sugar, one of tomato ketchup and a saltspoonful of salt. Mash and mix until juicy; then serve in a boat with cold meats.

Mint Sherbet.—Take six lemons, two oranges, two cupfuls of sugar, two cupfuls of water, one large bunch of fresh mint, the white of one egg and a piece of green leaf the size of a pea. Squeeze the juice from the lemons and oranges. Pour cold water over the peelings and put on the stove, allowing it to come to a boil; then pour it over the sugar and mint, which has been cut up fine. Cover it and allow it to steep for an hour. Then strain over the juice of the lemons and oranges. Dissolve the green leaf in a little of the mixture until it is clear and then add to the juices. Mix the ingredients together with the white of an egg, well beaten, and put in the freezer. Serve in sherbet glasses garnished with a tiny sprig of mint.

TODAY'S FASHION NOTE

A lovely frock of light colored serge, selected because the tucks which form its trimming give length of line and materially assist in reducing the apparent size of the figure. The skirt is a six-gored plaited effect with a three-piece yoke. Medium size requires 4¼ yards 54-inch material.

Pictorial Review Costume No. 5333. Sizes, 32 to 46 in. bust. Price 15c. Embroidery designs No. 11964. Transfer pattern, 10 cents.

Pictorial Review Patterns may be procured at the M. Katz & Co. Department Store, Fulton.

The KITCHEN CUPBOARD

THE EVENING MEAL.

SUPPER MENU.
Breaded Tongue.
Potato Salad. Biscuits.
Olives. Salted Nuts.
Fruit. Cake. Tea.

BREADED TONGUE.—Cut cold boiled fresh or corned tongue into slices about half an inch thick. Egg and breadcrumb them and saute in butter. Saute an equal number of rounds of bread cut about the same size and lay each piece of tongue upon a round of bread. Pour around a tomato sauce or a sauce made as follows: Add a little butter if needed to that in the pan in which both tongue and bread were fried. Put in a rounding tablespoonful of flour and stir until brown, then add a cupful of stock, a teaspoonful of finely minced parsley, a teaspoonful of lemon juice and a tablespoonful of chopped pickles.

Beet and Celery Salad.—Mix equal quantities of chopped boiled beets and chopped crisp celery. Moisten with a boiled dressing made as follows: Mix together one-half teaspoonful each of dry mustard and white pepper, one teaspoonful of salt and one teaspoonful of sugar. Stir in the beaten yolks of two eggs. Melt two tablespoonfuls of butter in one-half cupful of hot vinegar. Cook one teaspoonful of sweet milk slowly over the egg yolks, then very slowly stir in the vinegar and butter. Let just come to a boil again, remove from the fire and cool. Whip the whites of the eggs to a very stiff snow and fold them lightly in the cooled dressing.

Marble Cake.—Cream half a cupful of butter, two cupfuls of sugar and the yolks of four eggs. Add a cupful of milk, half a teaspoonful of vanilla and three and a half cupfuls of flour sifted with three and a half teaspoonfuls of baking powder. Lastly fold in the white of four eggs beaten stiff. Divide into three parts and bake two in layers. To the third add a quarter of a teaspoonful of cinnamon, a third of a cupful each of chopped figs and raisins and a tablespoonful of molasses. Put the dark layer between the light ones, with jelly between.

Scalloped Onions.—Boil onions until tender, cut them in quarters and put them in a baking dish. Season, cover with white sauce and fine crumbs and brown in the oven.

NEW YORK STATE FARM BUREAU WORK

There are now thirty-three farm bureaus organized in New York state, and farm bureau managers, according to the director of farm bureaus whose office is in the State College of Agriculture at Ithaca, are at work in 31 counties. It is expected that two others will begin work January 1. During the past year and a half the total membership in farm bureau organizations of the state has increased from 2,620 to 8,769, which represents 8 per cent. of all the farms in the counties having bureaus. The average membership has increased from 145 to 313 during the period. The five counties in the state having the largest membership are: Otsego, 866, or 16 per cent. of all the farmers in the county; Wyoming, 620, or 17 per cent.; Chenango, 580, or 13 per cent.; Monroe, 480, or 8 per cent; and Orange, 415, or 10 per cent.

How the Bureaus Work.

The local administration and planning of the work is in the hands of the farmers of the county through their farm bureau association and its executive committee. The association determines what the program for agricultural improvement shall be in the county, and the committee, together with the farm bureau manager, works out definite projects or plans for the purpose of putting this program into practical operation. The programs in the state chiefly have to do with soil, crop, and livestock improvement, the controlling idea being to incrase the profit to farmers, and to improve the quality of their products.

In order to carry out these programs there are 152 definite and detailed projects or plans of work.

Local Field Tests as Object Lessons.

The farm bureaus' announced purpose is to duplicate either farmers' institute or college extension work. Their principal method of work is by field tests, or trials, followed by demonstration meetings as the tests mature with the view of teaching the best practices and the best farm management by means of example and object lessons. There are 3,138 of these definite field tests, or about 105 per county. The largest number of these tests, 409, have to do with the use of lime, which is necessary on most of the soils in the state. These are closely followed by 369 trials of vetch, and 339 of alfalfa. There are 224 ot smut treatment tests, 212 meadow fertilization tests, and 388 tests of potato breeding selection and fertilizaiotn. The remainder are of a miscellaneous nature.

In addition to this work 1,064 farm management surveys have been taken, with the assistance of the College and the U. S. Department of Agriculture, on as many farms in 16 counties. Three hundred and forty meetings have been held to demonstrate various facts in connection with livestock. Altogether 608 meetings in fields or barns with a total attendance of 14,679, have been held during the past six months.

The farm bureau director states that the bureaus are further concerned in organizing groups of farmers and assisting them to accomplish things for themselves. As a result of this work with the assistance of the state department of agriculture and the state college of agriculture at Cornell, thirty-eight cow testing associations have been formed, fourteen breeders' associations, seventeen co-operative organizations, seven potato associations, four poultry associations and six miscellaneous, or a total of seventy-three. At the same time the bureaus have acted as clearing houses for college and department extension work and have received and given substantial assistance from and to these and other co-operating institutions.

Persons who may interested in further details of this work may secure a copy of thef ull report by addressing the Director of Farm Bureaus, Ithaca, New York.

JOHN McGINNESS' CAR LIES A COMPLETE WRECK ON OSWEGO'S BORDER LINE

John McGinness of West First st. was seriously injured and his Allen touring car completely wrecked on the outskirts of Oswego yesterday near the Oswego Country club, when he attempted to avert a collision with a car owned and driven by Frank Dilts of this city, and crashed into a concrete culvert.

Mr. McGinness was headed for Oswego and had followed the Dilts car for some distance. Both machines were maintaining a fair rate of speed and Mr. McGinness was not watching the other car intently, when suddenly the Dilts machine turned to the right at Munn st. at the Country club. Mr. McGinness saw no warning signal from the driver ahead before the turn was made, and in attempting to avert a collision with the other machine he turned sharply to the side of the road and brought up with great force against the concrete culvert.

Glass from the windshield flew in showers and Mr. McGinness was violently thrown against the front of his car and rendered unconscious. A doctor was hurriedly called and his wounds were dressed and he was brought to this city in another car. His condition was greatly improved last night. The front axle of the touring car was bent back, the radiator was smashed, windshield broken and steering gear put out of commission. Last night the car was still standing at the scene of the wreck and it is doubtful if it can be repaired.

ABSORB PLANTS OF COUNTRY

The Warring Nations Make Experts Uneasy---Have to Secure Big Forgings for This Country.

New York, Aug. 20.—The ordnance departments of both the army and the navy are confronted, it was declared yesterday, with the prospect of securing all the important gun forging facilities of the country absorbed by foreign buyers. The opinion is expressed in military circles that the situation is lending emphasis to the recent demands of prominent Washington officials that the government organize and maintain a steel works of its own. Either this will have to be done, it is now declared, or else the authorities in an emergency will simply have to commandeer every availablep lant.

The difficulty, however, is not one having to do with an emergency, but rather with normal conditions of peace accelerated to some extent by the necessity of precautionary measures.

The actual assembling and finishing of guns for the army and the navy is accomplished at the government arsenals at Watervliet and the Washington Gun Foundry. The former arsenal is controlled by the army, the latter by the navy. The forgings essential to theg uns are obtained through public proposals, and works like the Bethlehem Steel Company, the Carnegie Works and the Midvale Steel Company have been largely drawn upon for this equipment.

In the matter of coast defense the United States will always be compelled, ordnance men say, to rely in an emergency on what has been prepared in time of peace. This situation has been urged upon Congress for years. While projectiles and smokeless powder can always be obtained more rapidly than guns or mortars, it takes a long time to produce forgings for guns and to finish and assemble the guns.

Importance of Artillery.

The Teutonic success so far in the present war has been essentially an artillery success. This is the view military critics are in the main accepting. Infantry has only been able to occupy ground previously prepared for it by the artillery fire. Never, it is emphasized, has artillery played such a part as in thep resent European conflict. Napoleon first demonstrated the value of artillery en masse. His practice invariably comprised an annihilating artillery fire in advance of a general attack, and Waterloo was lost, it is now generally conceded, through the inability of the French to bring their artillery into line early in the battle. Rains blocked the roads.

During the Civil War in the United States artillery was used indifferently. The navy understood its value better, and the fall of Fort Fisher was made possible only by the naval artillery fire directed upon the works in advance of the army assault.

In 1870 the German success was everywhere the outcome of posting the artillery well to the frant and using it in great numbers: the French were woefully deficient in artillery in the Franco-Prussian war.

The United States field guns are of the 3-inch calibre, long recoil type. The weight of gun is 800 pounds and the length twenty-nine calibres. The breech mechanism is of the slotted screw single motion type. Recoil is controlled by an oil cylinder lying inside the cradle, and return to battery is effected by helical springs assembled around the cylinders, which in turn are regulated by an oil buffer, A fixed spade at the end of the trail holds the carriage in position. Gun, carriage and equipment complete weigh 2,500 pounds.

GAVE HIM FINE RECORD BUT HE FAILED IN TEST

New York, Aug. 20.—Many and varied are the humorous incidents discussed in connection with the base ball game, but there are few more deserving of a prominent place in baseball's "nut" department than the following interesting story:

Jack Hendricks, now manager of the Indianapolis baseball team in the American Association, was at one time a ball player under command of Manager Pongo Cantillion, and the latter "canned" him—in the vernacular of the sand lots. At present Hendricks is a co-manager with Cantillion, and Freeman Afford recently gave the following account of how it happened:

Jack was surprised in the middle of the season to learn that he had been purchased from Spokane by Washington. Having nothing to say in the matter, he reported to his new owners. Jack was told to cover a bunch of splinters on the dug out seat, and this he did for 11 days.

On the 12th day the game grew close. In the ninth inning the Washington catcher scored a single and lumbered to first. The Senators needed a run and needed it badly. Cantillion, who was coaching off first base called to Hendricks. The youth divested himself of his sweater and trotted to the initial sack.

"Run for this guy," instructed Cantillion. "Go down when I tell yuh."

In wonderment Hendricks took the base. On the second pitch the manager yelled with all his lung power. "Beat it."

Hendricks got up his best steam, but was intercepted 25 feet from the second sack by the baseman with the ball in his hands. He strode back to the bench, trying his best to avoid the awful eye of the irate Cantillion.

"You poor sucker," breathed the manager, with the deadliest venom. "I thought you could run bases."

"Who told you I could run bases?" demanded Hendricks with spirit. "I never claimed to be a base runner."

"Why you stole 65 bases in Spokane last year, didn't you?"

"I stole only 15 bases in Spokane last year," answered Hendricks, truthfully. "The record book says 65, but that was a typographical error by the printer."

Cantillion tore his hair and cussed. He screeched and fumed around the base line until the players grew so nervous that they blew up and lost the game.

"Get out of here," the manager stormed at Hendricks. "I don't want you around. Get out, you—you—typographical error, you."

CIVIC BEAUTY COMING NATURALLY, EAST AND WEST

Gradually all phases of commercial industry are coming under thei nfluence of the city beautiful movement, comments the San Francisco Call. Factories erected today secure sufficient ground area to have some landscape gardening round about the building or buildings. Even railroads, those supposed "soulless corporations," are now quite generally embellishing station grounds and rights of way. The schoolhouses, both rural and city, are being much improved in surroundings, being much helped by the school gardens, and the whole land is becoming, each year, more deeply engrossed in making a more beautiful America, and California is well up in the list. Let us not grow fainthearted in the work.

"Black's white bread" and Black's cookies have won a place here. They suit the taste. adv

FREE METHODIST CHURCH FREE OF INDEBTEDNESS

The annual society meeting of the Free Methodist church was held last evening for the purpose of electing officers for the ensuing year.

Mrs. Edward Breads was elected delegate to represent the church at the conference which is to be held here next month, and seven stewards were chosen, as follows: Asher Kinney, Charles Seeley, John Dexter, Homer Rowley, Amos Loveland, Mrs. Edward Breads and Mrs. Hiram oung.

Homer Rowlee was elected class leader, and Mrs. William Curtis was made Sunday school superintendent.

The following were elected trustees: Edward Breads, William Curtis and Asher Kinney.

As proof that the membership of the church is self-sacrificing and composed of a loyal class of citizens, the treasurer reported that all current expenses have been met and the church is out of debt.

"The best seller," is the expression of merchants handling Black Baking Co.'s products. adv.

Fulton Keynotes

Mr. and Mrs. A. M. Druse had as recent guests Mr. and Mrs. Loomis of Mexico.

* * *

Harold T. Keeler has returned from Old Forge, where he has been since August 1, and is assisting Irving Galusha during the later's absence.

* * *

Mr. and Mrs. Homer Dennison of East Lansing, Mich., are guests of local friends, and will later spend some time at Thousand Islands.

* * *

Dr. Lee Preston of Oneida has been a guest of his mother, Mrs. Anna Preston.

* * *

Mr. and Mrs. M. L. Northrup and son, Myron, have been spending several days at the home of Mr. and Mrs. Loy Allen Palmer, 301 Oneida st.

* * *

Mrs. Herbert Jacobs of the East River road last evening was given a birthday surprise party by friends and relatives. A pleasant time was enjoyed and substantial reminders of the oc casion were left with Mrs. Jacobs. They were a handsome cut glass piece and a vacuum cleaner.

* * *

The young people of the Congregational society will sell ice cream cones at the band concert this evening.

* * *

Mrs. Jarvis Newman and children of Oneonta, Canada, are guests of Mrs. Wendell Knowlton.

* * *

Mrs. Margaret Bennett of Oswego is a guest of Mrs. Louisa Bargey.

* * *

James Fredenburg, of Fourth st., is attending the Firemen's convention at Oneida.

BLAKE—ROWLEE.

Miss Maude E. Rowlee, daughter of Mr. and Mrs. John Rowlee of So. Hannibal, and David L. Blake of Bowen's Corners were married Tuesday evening at the home of the bride.

Mrs. Blake was one of the popular and successful teachers of this section and Mr. Blake is an enterprising youn merchant of Bowen's Corners.

SAYS COURSE OF U. S. IS CONSISTENT

Salt Lake City, Aug. 20.—Speaking here last evening before the meeting of the American Bar Association Simeon E. Baldwin, ex-Governor of Connecticut, called attention to the analogies in history of the British and German war zones and described the United States as taking a consistent position against any such limitation of the rights of neutrals on the high seas. He continued:

"No form of human law can endure which is not capable of amendment. To the law of nations change comes slowly, for it must be the act of many different peoples. It will change irregularly and in detachments. Macauley has observed that there are in thea dministration of government two kinds of wisdom: the highest wisdom, which is conversant with great principles of political philosophy, and a lower wisdom, which meets daily exigencies by daily expedients.

"In respect to the development and application of international law, those two kinds of wisdom often come in conflict, and when they do, it is seldom the higher that controls. Nations are self centered. Each view rules of international conduct mainly as it is itself, at the time being, affected by them.

"And back of all, at all times, we must reckon with the implses of self preservation. In the eloquent words of our late associate, rederick R. Coudert, 'Self-protection and self-preservation constitute the corner stone of modern international law. This instinct is as strong in communities as in individuals and will, when aroused by real or imaginary perils, sweep away forms and law as worthless incembrances, if they interfere with their first duty to resist aggression, and the right to live.'"

NEW JERSEY YACHT GOES THROUGH LOCKS

The yacht Flier of Rumson, N. J., passed through this city yesterday bound for New York City from the Thousand Islands. A party of seven people were on board the craft, which is one of the neatest power boats that has passed the locks here this season.

RUSSIAN FLEET ENGAGED IN GREAT BATTLE IN GULF OF RIGA, IS OUT-CLASSED

London, Aug. 21.—A great naval battle is in progress in the Gulf of Riga between the German fleet and the Russian Baltic fleet. In point of ships employed the engagement is the greatest on water since the war began.

The news came from Petrograd early this morning that the Germans had penetrated the defenses at the entrance to the Gulf of Riga, and, the official message said, "fighting with our ships continues." Berlin, while the early stages of the engagement were entered on Thursday, has made no reference to naval activities in the Baltic.

A German fleet, consisting of ten dreadnaughts and battle cruisers, with a large number of armored cruisers and destroyers, appeared before the entrance to the gulf two weeks ago and engaged th Russians off Michaels' bank. The channel into the gulf, well protected by mines and airships, held the Germans from all but long range fighting with the Russian war ships.

Following the first failure to force an entrance, which cost a destroyer and a small cruiser, the Germans withdrew and prepared to clear a way by mine sweepers covered by the battle fleet. This work was accomplished early in the week, and apparently orders were issued then for a sustained effort to pierce the channel.

Entering through the Dirhen channel the Germans found the Russian war ships, consisting of [illegible] ships with a squadron of destroyers standing off the Rmo, a large island about fifty miles from the Baltic. Here it is, in the opinion of London naval observers, that the engagement began.

From the information in the hands of observers here it is certain the Russian fleet is far outnumbered in guns and displacement.

The Russian Ministry of Marine has made no mention of the force held to guard Riga, but it is understood here it includes the Imperator Pavel, the Scava and the Tessarevitch battle ships, and a squadron of four or possibly five armored cruisers with a flotilla of destroyers.

The battle ships each carry four 12-inch guns in addition to secondary armaments of 8 and 6-inch guns.

In the absence of details of the battle it is believed, in the circumstances, the Russian commander is conducting a running fight and that if he sees the odds are too strong against him he will lay a course for the channel that connects the Gulf of Riga with the Gulf of Finland and save his ships for the further protection of Petrograd.

Failing to capture Riga by land operations in the time allotted by the General Staff the Germans sent their fleet to co-operate with the army and turn the city by land and water.

ITALIAN MACHINE GUNS SILENCE TEUTON ARTILLERY

Milan, Aug. 21.—A methodical Italian advance on Carso, where serious fighting has been resumed, goes on. In reply to the steady encroachment of the Italians on their positions, the Austrians undertook a fresh offensive on a large scale.

For the first time their attack began in the daytime, the Austrians having abandoned hope of successful surprise moves by night. They adopted the bold tactics of a frontal attack in large masses, resolved either to crush or to be crushed.

The result was that during two days they persisted in their efforts and were thoroughly beaten, their ranks being rapidly thinned by the fire of the Italian batteries, which had been moved forward to hold many points of vantage.

The Austrian artillery was silent, and the Italian machine guns moved forward. The infantry followed, and the Austrians were driven out of the positions from which they started to attack. This is how the Italians have succeeded in holding more advanced positions at Marcottini and along the entire line between Monte San Michele and Monte Sei Busi.

Another important success mentioned today is the capture of the strong Austrian position at Dreizinnen and a small frotier fort on the northern scope of Monte Paterno, which is still in the Austrians hands, and where, besides a number of killed and wounded, they lost twenty-four prisoners.

These actions form part of the general operations in the upper Sexten and Soden valleys, where the Italians are making a general clearing of the Austrian troops, sometimes capturing considerable stores accumulated there by the Austrians with a view to invading the Italian territory south of the Dolomite territory, a plan which signally failed.

* * *

Bovic Safe, Say Officials

New York, Aug. 21.—With the absence of real news in New York concerning the sinking of the Arabic there were today put into circulation many rumors affecting almost every steamship now on her way to England, but before the various steam ship officers closed for the day all of these, with the exception of the report that the New York City, of the Bristol line, had been sunk, were denied.

The Bovic, of the White Star line, and the Lapland, alsor unning in the White Star service, were the principal vessels named in theser eports. The report of the sinking of the Bovic was started about eleven o'clock this morn ing and several newspapers carried accounts of the rumor, but cable inquiry by the New York offices of the line failed to reveal any foundation of truth for them. Later in the evening Press Association in London said the Bovic arrived at Liverpool and proceeded ot Manchester.

Then came the rumor of the loss of the Lapland. [illegible] ing and it is thought her geographical position more than anything else was responsible for the wide circulation and credence given the reports of her loss. In her case, as well as that of the Bovic, the New York officers of the White Star line declared they had no definite information. They branded the reports of the loss of the Lapland as "too absurb to believe."

Many theories have been advanced to account for these several rumors. The one that met with the most general belief was that some Wall St. interests were behind the reports. One inrteesting rumor that emanated directly from Wall street was to the effect that between \$4,000,000 and \$7,000,000 worth of American securities on their way to New York had gone down with the Arabic. This report, however, failed for want of reliable confirmation.

Third Report of Loss.

A third report of lost vessels dealt with the steamship Nicosian, of the Leyland line, a subsidiary of the International Mercantile Marine Company, owner of the White Star line. A rumor that she, too, had been destroyed by the Germans was current, but, like many similar reports that agitated ship owners here recently, lacked verification.

Coupled with this rumor, whose source could not be traced, was the report that she was a troopship. This was disproved by maratime records, which showed that she left New Orleans on August [illegible] Liverpool. The Nicosian is a slow vessel and shipping men estimated that she was just about due to arrive in war zone waters. She carried no passengers. The Nicisian is a new vessel, built in 1912.

The report of disaster to the Lapland was current in Queenstown as well as in New York. A cable dispatch from there, however, said that it was thought probable the Lapland was confused with the Bristol line steamship New York City, which fell prey to a submarine yesterday.

COMPLAINTS TO BE MADE MONDAY

Department to Open All Bids Next Thursday; Specifications Call for First Street 34 Feet in Width.

First st. property owners, who are opposed to the plan to widen First st. four feet between Broadway and Rochester st., when the street is paved this fall, are not losing sight of the fact that the Board of Public Works will meet Monday night at City Hall for the purpose of hearing complaints on the question. The board has drawn a resolution to pave the street 38 feet wide, four feet wider than the present street. Whether or not the board proposes to take the additional four feet from the west side of the street as planned at first, or to divide the increase by taking two feet from each side of the street, has not been learned.

Those who have followed the question closely prophesy some lively arguments at Monday's meeting, for it is well known that president Stevenson of the Board of Public Works is greatly in favor of the wider street and is determined that thep lans made shall be carried out. The property owners have been appealed to by both sides and petitions are expected to arrive in great quantities Monday night. Commissioners Gage and Mason, appointed by the property owners when the board planned to pave the street 34 feet wide some months ago, will be present to represent the property holders as before, it is said.

The State Commissioner of Highways, Edwin Duffey, announced yesterday that bids will be opened August 26 at Albany on the paving. The specifications call for the laying of 34 feet of brick pavement on a 5-inch concrete base with a 1 1-2 inch sand cushion for .36 of a mile. The state assumes the cost of 16 feet, the city nine feet and the Empire United Railways nine feet, according to the present plans. The commission will receive bids at the same time for the building of twenty-three other highways in twelve other counties, a total of 94.5 miles.

GRIEVANCES MAY BE MANY ON SEPT. 7

City Chamberlain George Washburn announced this morning the date of Grievance Day, September 7, and requests all taxpayers who have not yet examined the assessment rolls to do so at once in order that all grievances and complaints against assessments may be made on that date.

The rolls are on file at the office of the City Clerk and many taxpayers have examined them closely during the past month. Last year's assessments are also on file, in order that comparisons can be made. It is very likely that the grievance list this year will be a long one, inasmuch as large increases in property valuations have been made, especially in the business district. The assessments on property in some cases show 40 per cent. increase and on buildings the increase averages about 15 per cent.

WEATHER FORECAST.

Rain tonight and Sunday; fresh to south and southeast winds, shifting to southwest Sunday.

STEVENSON'S MICHIGAN KING FAILED BEFORE JOE PATCHEN III

Although the weather was fine all day, the attendance at the last day of the Oswego County Fair slumped badly from the previous marks and barely 2,000 people were on the grounds. The infield yesterday was fairly well filled with automobiles and wagons but the crowd at the races, which were perhaps the most interesting of the meet, was small, and ther est of the attractions did little business.

The concessionaires never pin any faith on the last day of any fair, however, being content to get what they call "get-a-way" money, and the majority of them seemed perfectly satisfied last night with the results of their four days' work.

Fulton Horse Failed to Win Honors.

Interest yesterday centered at the track, where the 2:22 trot and a free-for-all pace for purses of \$250 each were the attractions. Four horses were entered in the free-for-all and, although five were entered in the trot, two were scratched and only three started.

Fulton sportsmen were keenly interested in Michigan King, a new addition to the string of John W. Stevenson, who has hung up enviable records on the Michigan tracks this season. The horse's mark is 2:10 and he easily [illegible] ians yesterday. Driven by George Dubois, the animal was roundly applauded when he paced up the track before the first heat and large sums of money were posted by the local enthusiasts that he would win in straight heats.

Michigan King's followers reckoned without Joe Patchen, 3rd, one of the wonderful Patchen pacing strain, the property of Weaver & Jones of Canastota, with Erine Jones in the sulkey. Patchen had his adherents in large numbers and when the quartet of steppers came down the track to a perfect start the stands were in an uproar. Patchen held the pole at the start, with Michigan King second, and Vanna Vola and Burt H. close up. Before the first turn was reached Patchen shook his head and drew away and when the horses once more came into view of the Judge's stand. as they rounded the lower turn the Canastota entry was leading by a length. The Fultonians were still hopeful, however, as the King was pac ing nicely and every one seemed to think Dubois was driving a waiting race. But when the final turn was reached and Patchen was still leading, although Michigan King had come up within a length of the Canastota mare the King's backers optimistically decided that the next heat would be productive of better results.

The second heat was a repetition of the first with Patchen in the lead all the way except for an eight of a mile, when he broke at the lower turn and Michigan King drew into the pole. The stands went wild for a short moment, but Patchen settled down to the old tireless pace again, and drew up and away with a world of speed. This heat convinced almost every one that the Conastota horse had too much speed for the Fulton entry, but some were still hopeful that Michigan King would carry the next three heats, and even the band stopped playing to watch the final brush. Patchen won the last tilt even more handily, however, with Jones pulling up in the last stretch, Michigan King second, and Burt H. third. The money was divided in the same order.

It was said yesterday at the fair grounds that Joe Patchen had reeled off a mile in 2:08 twice this season and had plenty of speed in reserve yesterday which Jones was not called upon to use. In spite of the Canastota horse's superiority, the race was the most interesting of the meet. The winner was sired by Joe Patchen and is a bay gelding.

The Weaver & Jones entry, Lady Weaver, bay mare, won the 2:22 trot in handy fashion, with Miss Prim and Bird Song second and third. Bird Song was the favorite in several instances when the Wetmore gelding settled down to trotting, he drew to third place in two heats, taking second in the last heat.

The results:

2:22 Trot; Purse, \$250.

Lady Weaver, b. m., by Erin (Jones)	1	1	1
Miss Prim, br. m. (Quencer)	2	2	3
Bird Song, b. g. (Wetmore)	3	3	2

Time—2:25, 2:21 3-4, 2.23 1-4.

Free-for-All Trot and Pace; Purse, \$250.

Joe Patchen III, b. g., by oJe			
Michigan King, b. g., (Dubois)	2	2	2
Burt H., b. h., (Kelly)	3	4	3
Vanna Vola, blk. m. (Curley)	4	3	4

Time—2:14 1-2, 2:14 3-4, 2:17.

Charles I. Thomson of Whitesboro, who acted as starter at the local meet, was enthusiastic over the competition which developed in the meeting here. Mr. Thomson who is a traveling man, will strat the races at the Sandy Creek, Gouveneur, and other fairs. He has started the races at the local fair for six years.

Among those in the judges' stand yesterday were, E. J. Schem, Charles Alvord of Syracuse; Myron Stranahan, Thomas Putnam, S. K. Bresee of Syracuse, and M. C. Hammond of Oswego, all of whom acted as judges and timers.

Open Athletic Contests Hold Crowd.

Between heats of the races several free-for-all athletic contests were run off on the track before the grand stand. Local talent was forced to give way once more, and R. R. Scobey, the Syracuse Central High school crack, was easily the star of the day. Scobey won the century dash, the 220 yard run, was third in ther unning broad, tied for first honors with Richard Ferris of DeWitt Clinton High school, of New York City, in the running high jump, and tied for second place in the pole vault.

The entry list was small, and the only Fultonians who made any showing were the Ward brothers, George and John. George Ward, a crack athlete in his high school days here and also at Mercersburg Academy, gave Scobey a hard battle in the sprints, but thef saky Syracuse lad had the reserve strength to win out by small margins in the hundred yard event and in the 220 yard run. Ward tied for a time in the 220, but Scobey drew up in the final sprint and won by two strides.

John and George Ward gave each other a hard battle in the 440 yard run, but George finally won out, with John second and Markey Pullen third.

Ferris and Scobey flipped a coin for first honors in the high jump and the New York lad won the two. Both failed at 5 feet even. John Frawley of this city was third. Ferris won the broad jump, with Pullen and John Ward tied for second and Scobey was third.

The pole vault was a walkover for Herbert Grigson of Westfield,

Opinions

Not a Practical Scheme.

It is charitable to assume that the social uplifters who glibly advocate insurance against unemployment have never stopped to consider the practical obstaeles in the way of the adoption of such a scheme. If they had, their reputation for intelligence would be open to question. A writer who has taken the trouble to investigate the matter seriously points out that such a form of insurance would be a failure unless some method was devised of distinguishing between voluntary and involuntary unemployment. The man who was thrown out of work through no fault of his own would be entitled to assistance. But what about the lazy, shiftless, incompetent workman? Insurance against unemployment, in his case, would furnish him with the means to live in idleness at the expense of the industrious and thrifty.—Rochester Herald.

The Consumer Not Victimized.

The theory has been cultivated for the last few years that because food products cost the consumer considerably more than the producer received for them, both were being robbed by conscienseless middlemen. But at the conference in Philadelphia between consumers and the Philadelphia Vegetable Growers' Association, it was found that there was another side to the story and that the middlemen's profit represented only one item in a long account which the consumer has to settle in order to have the products of the farm transported to his kitchen door. These include the telephone in the grocery for the convenience of customers, the clerk who takes the order, the clerk who delivers the order, and the upkeep of the horse and wagon used in delivering the goods. While the number of persons who take their toil from every order of groceries is large, the aggregate is less than the cost to consumer of going out into the country after his vegetables, assuming that his time is at all valuable.—Rochester Chronicle and Democrat.

A Mock Investigation.

After sessions extending over two years the Federal Industrial Relations Committee has ended its labors at Chicago. What it has found out about American industry will be turned over to Congress in ten district reports representing, it is said, only the conflicting views and recommendations of the various individuals composing the commission.

It is to be hoped that Congress may turn up nuggets in the mass. The proceedings of Chairman Walsh and his associates have seldom edified the country during the time they have been at work. Yet the public is willing to hope that, despite unseemly wrangles and the reported absence of any conclusions upon which they can agree, the members of this body may nevertheless have discovered something worth while, something which may help us to a better understanding of what industry can look for from legislation.

The nation has a touching faith in investigating commissions. It has spent $500,000 on this one. Its optimism deserves some reward.—N. Y. Evening World.

Commissioned-Governed City.

The great storm on the southeastern coast develops worse in its effects as details are made known. Galveston again bears the brunt of it, as it did fifteen years ago when the hurricane drove the waves over the city and took more than 5,000 lives. At that time Galveston put up a great sea wall five miles long along the exposed side of the city and this wall has saved it from a repetition of that disaster. It did not prevent the wind driven ocean from backing up into its streets, but it did prevent it from being a battering ram to destroy its houses. In this flood Galveston loses 14 lives, and in the territory at large over a hundred lives have been lost and estimates of property damage have climbed up to $30,000,000. Galveston is asking no help, but Virginia Point, Texas City and other places have been more thoroughly devastated. The government, however, has taken prompt charge through its army and is relieving any necessities that may arise by furnishing tents and blankets for commissary stores. It is not a repetition of the terrible disaster of 1910, although the storm was more fierce in intensity, simply because Galveston was prepared for it. It is not a great city, but it refused to be conquered by the sea and its confidence has been justified.—Watertown Times.

Running Pictures Backward.

In making motion pictures a common method of making difficult scenes easy is to reverse both action and film movement. Then the film is developed and run thro the projecting machine right end to, thus creating the desired impression at minimum risk. The method is a favorite in hair-breadth escapes. In rescuing a girl bound upon the railway tracks, for instance, the hero stooping from the cowcatcher deposits the heroine gently upon the tracks; when the film is reversed he appears to be picking her up while the locomotive is traveling at top speed.

Oscar Wilde insisted that life was an imitation of art. If that be so perhaps human beings in time can develop a reverse mental process. It would be of the utmost utility for a man to have hindsight take the place of foresight. Think how rich you could have been if you had known that shares in certain industrial concerns were going skyrocketing. And what would Bill Barnes have given to know the outcome of his libel suit against Colonel Roosevelt before he engaged in that unfortunate legal controversy?

Give The Evening Times a trial. It has all the news about all the people you know, and then some more.

SYSTEMATIC SAVING BY SCHOOL PUPILS

While the people of Fulton are preparing themselves to vote intelligently upon the question of whether they shall have a local government of and by efficiency, instead of a government that changes every two years, bringing each time into play a new set of important officials, such as City Clerk and City Chamberlain, etc., it is well to not lose sight of other problems that remain unsolved. One of these problems was touched upon in a recent issue of The Evening Times when over the signature of the Electric Company it is proposed to offer to the pupils of the public and parochial schools of the city cash prizes for the encouragement of systematic saving of money, which means thrift.

Thrift is a necessary requisite in any plan of preparedness, and that is why a plan that has for its motive the preparation of the children for rising above their surroundings, for making of them a part of the great system of preparedness at all times for all emergencies that arise in the industrial and social world, is something better than an annuity. There is no charity in such a system and there should be none. The suggestion offered by the Electric Company is made in good faith and if it has not received the notice of the Chamber of Commerce and the public and parochial school authorities it is hoped that the reason lies in the many attractions which now beset the people of the city. The offer made by the Electric Company is apparently made in good faith. It has no strings tied to it; and to all intents and purposes is designed to meet the changing conditions not only in Fulton but throughout the country, for it is a recognized fact that there is a growing sentiment against reckless methods in dealing with the people, or at least those of them who have been "horn-swoggled" into graveyard insurance schemes and other catch-the-penny ideas of getting rich quick.

Everywhere the people are demanding safety in everything. They are demanding efficiency and safety. If they get the one they want the other. They are demanding that public officials give a dollar's worth of service for every dollar received, the same as they themselves have to do in order to hold a situation. Systematic saving of money is a step in the direction of safety and efficiency. One depends upon the other for its success, and little hope is felt for the success of any government that does not depend for its existence upon a contented working population. Contentment is the result of the right environment and the right practices, and thrifty people are just the kind of people who will look well to the proper administration of their own town or city affairs.

FIRE PREVENTION DAY COMES IN OCTOBER

New York, Aug. 21.—A program for a nation-wide campaign of fire prevention was drawn up yesterday at a joint meeting of the fire insurance and fire prevention committees of the Safety First Federation of America. October 9 was selected as a national fire prevention day.

The federation recommends the enactment of special fire prevention laws in all states, instruction in all schools in fire preveiton and the appointment of state fire marshals.

Among the committeemen who are engaged in this campaign are Elbridge G. Snow, president of the Home Insurance Company; William Guerin, ex-chief of the Fire Prevention Bureau of New York; Edward R. Harty, J. O. Hammit and Frederic C. Buswell.

PAID $36.50 FOR SHOOTING ONE SQUIRREL

Port Jefferson, L. I., Aug. 21.—The value of one squirrel to the state of New York is put at $35. Add to this $1.50 for court expenses, and it costs $36.50 to kill a squirrel out of season. Donald B. Campbell, ship builder, of this place, considers the cost entirely out of proportion to the value of a squirrel.

Mr. Campbell found that an English walnut tree on his place was being robbed of nuts by squirrels. After vainly trying to scare the animals away he shot at them and killed one. Game Protector Everitt Overton of Quogue heard about it and arrested Campbell, who settled by paying $35 and $1.50 costs.

SUNDAY SYLVAN BEACH EXCURSION

Beginning Sunday, July 25th, and continuing each Sunday until August 22d, the O. & W. Sylvan Beach train will leave Oswego at 8:40 a.m., returning leaving Beach at 5:15 p.m.—advt.

OUR WASHINGTON CORRESPONDENCE

News Mostly of a Political Nature From the Nation's Seat of Government for Times' Readers.

Washington, Aug. 20.—(Special Correspondence). Oxalic acid is used in tanning, calico printing, woolen and silk dyeing, andi n various bleaching processes, especially the bleaching of straw hats and bonnets. The laundries also use nearly 3,000,000 pounds a year in whitening shirts and collars. From eight to ten million pounds are annually consumed in this country, and prior to 1903 it all came from Germany, England, Norway, Belgium and Austria, which countries had combined to form a syndicate to control thep rice all over the world. Prices to the United States at that time ranged from 8 to 11 cents a pound. The syndicate was controlled by Germany, from which came three-fourths of the acid.

In 1903 the manufacture of oxalic acid was undertaken on a small scale experimentally in this country, the plant being located in Pennsylvania. No sooner did the construction of this plant come to the attention of the syndicate than prices dropped, in 1903 to 4.7c; 1904, 4.6c; 1905, 4.7c; 1906, 5.2c. This sort of price-cutting knocked the American company out of the ring, and immediately the oxalic syndicate raised the price to 7 1-2c and in 1907 to 9c. In 1908 the American company made another start, and the syndicate dropped the price to 6 1-2c.

The Republican revision of the tariff was up about that time, and the American company presented figures which induced Congress to give a protective duty of 2c a pound on oxalic acid. This duty was based solely on the difference in cost of common labor at home and abroad, per pound of product, and did not take into account the overhead charges and selling costs. When this duty went into effect the foreign price went to 7 1-4c, where it remained through 1910, 1911 and 1912. By some pretty close figuring the American company was able to operate at a profit, and it acted as a check on the foreign syndicate methods of price controlling. A large share of the annual consumption was being manufactured in the United States, the only money going abroad was for the purchase of potash, the raw material; American labor was being employed at wages which enabled the men to be good customers of the clothier and the food producer, and the country was the possessor of a new industry, which would, if properly fostered, render us wholly independent of Germany.

Then came the destructive tariff legislation of the Democratic party, which sneaked into the Capitol through a crack in the protective party wall. The duty on oxalic acid was cut 25 per cent. This was too low protection, but it gave the foreign syndicate the opportunity it sought to dump oxalic acid on the market, and they lost no time in taking advantage of it. The first quarter of the fiscal year of 1914, under Republican law, 1,600,000 pounds were imported; the second quarter, when the Underwood law took effect, 1,720,260 came in; the ihrd quarter, 2,600,000; the fourth quarter, 2,850,000 pounds. Then came the war, acting as a high tariff and the American company is now recovering from the shock. Even yet, however, the importations for the ten months ending April, 1915, amounted to 4,300,000 pounds. If that cent and a half duty remains in the law when the war has ended, Germany will hand the American company a side-winder from which it will never recover, and another skeleton will be found lying alongside the Democratic trail.

* * *

At the close of business Saturday, August 7, the net balance in the general fund of the United States Treasury was $65,744,940, as compared with $131,627,458 on the same date two years ago, under Republican laws. The deficit for the prestn fiscal year from July 1 to August 7 was $18,452,200.

Expert Advice for the Automobile Owner

Queries and Replies Covering Matters of Importance to the Man Who Runs a Car

In using denatured alcohol as a carbon remover, how much should be used in each cylinder, and should it be allowed to stand for twelve hours or so before using again?

The piston of the cylinder should be on top, dead center, and both valves closed. The cylinder should then be filled to capacity with the alcohol. This should remain in the cylinder at least six hours and preferably twelve hours. The cylinders should be hot when the alcohol is poured into them.

What advantage is gained by placing a plate on the pistons to obtain higher compression? Will it cause an excessive vibration in a motor running 2,000 revolutions per minute?

Many owners have fastened plates to the piston tops in order to increase the compression and gain power and speed, but the construction is not advised, as the results obtained are not worth the expenditure in time and money. All depends upon the weight of the plates as to whether the vibration will be high.

How long will a magneto run without remagnetizing it and overhauling it in general?

Magnetos will run for five years and upward without remagnetizing if a good job has been done in the first place and if the magnets employed have the proper degree of retentivity. The exact time cannot be stated, but the service which you can secure from a magneto before it needs recharging will extend over an indefinite period of years.

There is a knock in the cylinder of my car which I can stop only by retarding the spark lever as far as it will go and keeping it so, no matter at what speed the car is going. What is the matter?

You have not said whether you are obliged to retard the spark so far that the power is reduced. It may be that the spark linkage is conneeted up so that the spark ordinarily occurs too early and that the lever must be retarded all the way before the spark occurs in the proper place. If this is the case change the setting of the spark linkage so that when the motor is cranked slowly the spark occurs at dead center with the lever retarded.

Vary the adjustment of your carburetor with the lever halfway advanced, and then note whether the knocking continues. Crank the motor slowly, and note which cylinders offer small resistance to the pull of the crank. If all are strong then there are no leaky valves, pistons or rings, but if one or more are weak you should take your car to a repair shop and have the trouble fixed.

Remove the radiator cap while the motor is running, and note whether the circulation of water seems free; also feel the various parts of the system and see whether there are any wide variations in temperature or whether the temperature is fairly uniform all over the radiator and piping. Big differences in temperature would indicate lack of circulation, caused by sediment in the water jackets, loose pieces of hose in the passageways or dirt in the radiator. A thorough flushing of the system should be sufficient to put it in good order, and if it is not the car should be intrusted to a repair man. A heavy coating of carbon on the cylinders will cause a knock, and the remedy is to remove the carbon. Defective ignition, if it causes a knock, should also cause a miss. Worn insulation, loose connections, poor adjustment of the vibrators, incorrect spark gap, dirty plugs and cracked porcelains are the principal ways in which the ignition may give trouble.

What are the advantages of a floating rear axle?

In the floating rear axle the shafts are relieved of all stresses but torsional ones, which is quite an advantage. The shafts may be removed without disturbing the wheels, and with a sufficiently large plate in the differential housing the differential itself may be removed for inspection. In this type of axle the shafts carry no weight and hence do nothing else but turn the rear wheels.

What is the average life of a spark plug?

The average life of a spark plug is two seasons. Some makes of plugs which are more costly and which have a better composition of nonburning material in their electrodes will last much longer than the cheaper plug. The average of two seasons may be taken as the life of most plugs.

What treatment is necessary to make a brake lining stick better?

No treatment should be given a brake lining to make it fit better except keeping it clean and maintaining the proper adjustment on the brakes. When worn down the brake lining should be replaced. One of the frequent occurrences is the wearing of the asbestos compound below the surface of the copper rivets which hold it in place. This brings the copper rivets in contact with the metal brake band, greatly reducing the retarding effort of the brake.

The consistent advertiser wins in the end. It may cost a dollar to get a dollar, but the deal wins prestige.

PEACHES AT 25 CENTS.

A long time ago one said that an Englishman eats a peach as if he was performing a religious ceremony. No wonder! In the London market a sale of a dozen peaches ranks as a wholesale transaction. And the price! The London Telegraph recently printed an article on "Cheap Fruit," in which the statement occurs that "small samples" were worth two to three shillings a dozen, but that the best fruit could be bought at twelve shillings a dozen. Think of paying a quarter for a single peach! But there were some shops that cut the price, and that would sell you a peach for threepence—six cents.—Youths' Companion.

AIR CRAFT GUNNING SPORT OF THE WAR

Soldier That Does the Work Is Prince of Artillery.

"ARCHIBALD" IS A TERROR.

Allies Give Nickname to Their Busy Anti-air Craft Gun, Which Is Removed From Place to Place in a Private Car — Aeroplanes Can Withstand Much Shell Fire.

A crack and a whish through the air. No sound is more familiar at the front where the artillery is never silent—the sound of a shell breaking from a gun muzzle and its shrill flight toward the German line to pay them back for some shell they have sent, writes a correspondent from the British headquarters in France.

Only this which did not pass put over the landscape in a long parabola on toward the German lines. It went right up into the heavens at about the angle of a skyrocket, for it was Archibald who was on the job.

Six or seven thousand feet over the British trenches there was something as big as your hand against the light blue of the summer sky. This was the target—a German aeroplane.

Wings of Intelligence.

Other features of life at the front may grow commonplace, but never the work of the planes—these wings of the army's intelligence. If they might fly as low as they pleased they might know all that was going on over the lines. They must keep up so high that through the aviator's glasses a man on the road is the size of a pinhead.

Archibald, the anti-air craft gun, sets the dead line. He watches over it as a cat watches a mouse. The trick of sneaking up under the cover of a noonday cloud and all the other man bird tricks he knows.

A couple of seconds after that crack a tiny puff of smoke breaks about a hundred yards behind the taube. The smoking brass shell case is out of Archibald's steel throat and another shell case with its charge slipped in its place and started on its way before the first puff breaks.

Archibald rushes the fighting. It is the business of the taube to sidestep. The aviator cannot hit back except through its allies, the German batteries, on the earth. But all that the aviator can see is mottled landscape. From his side Archibald flies no goal flags.

Archibald's propensities are entirely peripatetic. He is the vagabond of the army lines. Locate him—and he is gone. He is the only gun which keeps regular hours like a Christian gentleman. All the others fire at any hour night or day. Aeroplanes do not go up at night, and when no aeroplanes are up Archibald has no interest in the war.

Why he was named Archibald nobody knows. As his full name is Archibald, the Archer, possibly it comes from some association with the idea of archery.

Has His Private Car.

Archibald, who is quite the swellest thing in the army, has his own private car built especially for him. While the cavalry horses back of the lines grow sleek from inaction, the aeroplanes have taken their places. All the romances and risk of scouting are theirs.

Such of the cavalry's former part as the planes do not play Archibald plays. He keeps off the enemy's scouts. Do you seek team work spirit of corps and smartness in this theater of France where all the old glamor of war is lacking? You will find it in the attendants of Archibald.

The sport of war is not dead for Archibald. Here you see your target, which is so rare these days when British infantrymen have stormed and taken trenches without ever seeing a German, and the target is a bird—a man bird. Puffs of smoke with bursting hearts of death are clustered around the Taube. They hang where they broke in the still air. One follows another in quick succession—for more than one Archibald is firing—before your entranced eyes.

It is amazing how much shell fire an aeroplane can stand. Aviators are accustomed to the whizz of shell fragments and bullets and to have their planes punctured and ripped. Though their engines are put out of commission and frequently though wounded, they are able to volplane back to the cover of their own lines.

By Comparison.

"Dubkins is a great comfort to me."

"I don't see how you can say that. He's the most tiresome chump I have ever met."

"That's just it. Although I don't amount to much, it's true, every time I look at Dubkins I feel that I could amount to less."—Birmingham Age-Herald.

The Silkworm.

The silkworm is three inches long and is well provided with legs, having no less than sixteen of them.

RIGHTS OF EMPLOYERS.

In the course of a recent address before the Central Labor union of Meriden, Conn., Samuel Gompers said:

Men must learn that employers have some rights. If you will investigate you will find that strikes oftener are caused by unorganized or recently organized labor. In the latter case the workers suddenly think themselves all powerful and imagine employers have no rights. Avoid strikes. The right to strike is of paramount importance, not the exercise of that right.

In this country, when the war is over, thousands of workers will be thrown out of employment because of the cutting off of the present artificial market for the necessaries of life as well as for the implements of war. Labor organizations should prepare for this condition.

INSURES WORKERS' LIVES.

Brooklyn Rapid Transit Company Will Pay Half the Premiums.

By a group insurance contract issued recently—the biggest policy ever granted, it is believed—the 8,000 employees of the Brooklyn Rapid Transit company operating in Brooklyn borough, New York city, are insured for $1,000 each by the Travelers Insurance company of Hartford, the $8,000,000 insurance costing the B. R. T. about $50,000 a year, or about one-half the total premiums.

The opportunity to insure was offered all employees who have been with the transit company two years or more, and the company pays one-half the premium up to $1,000 of insurance, the rate of insurance varying, according to the age of the individual employee. The employee may, if he wishes to pay the additional premium, increase his policy to $5,000.

A special agreement will be required whereby in case of the employee leaving no dependents the principal of the policy may be used:

For paying funeral expenses; for reimbursing the company for premiums paid by it during the period in which it has assumed the entire premium, turning the balance over to the employees' benefit association.

All premiums will be paid in the first place by the Brooklyn Rapid Transit company, which will, through its respective constituent companies, collect by periodical deductions from wages one-half of each annual premium due.

It is pointed out that employees between the ages of fifteen and thirty-two will pay weekly on the average a fraction more than 7 cents for $1,000 of insurance; employees more than thirty-two and less than forty, a fraction more than 8 cents a week; employees of fifty will pay a fraction more than 13 cents a week; those of sixty, a fraction more than 26 cents a week, and those of sixty-five years, 41 cents a week.

His Qualities.

"What makes you think Dauber will succeed as a painter?"

"He has the soul of an artist and the perseverance of a book agent."—Philadelphia Ledger.

Woman's Tact.

Rev. Mr. Gassington—Honestly, Miss Deering, do you think my sermons are too long? Miss Deering—Oh, dear, no! I merely think that life is too short.—Puck.

HOME TOWN HELPS

KEEPING THE CITY CLEAN

Washington Physician Tells of the Importance of the Work That Has Been Done.

"If Washington residents continue cleaning up this week as they did last week," remarked a Washington physician, "a long step will be taken in the direction of making the national capital a flyless, dirtless and diseaseless city during the coming summer.

"Dirt, flies and disease go hand in hand. Get rid of the dirt, and the flies have nowhere to breed and propagate. Eliminate the flies, and three-fourths of the sickness of summer will be prevented.

"There is no more reason for permitting accumulations of decaying rubbish, heaps of stable manure and the like to remain in alleys, on vacant lots, or hidden in back yards, than for allowing such refuse to exist in the front yard or the open public street," the doctor continued. "Property owners, householders and health officials alike would refuse to permit the continuance in exposed places of such debris and filth, the latter from sanitary reasons and the former out of pride.

"But often the health authorities cannot know of such accumulations hidden in back yards with high board fences, and inspectors fail to discover them in out-of-the-way alleys, etc. In such cases the householder or the property owner ought to take a sufficient degree of pride in his home or his property to see that the rubbish is hauled away; if he doesn't do it he ought to be prosecuted, the same as would be the case if he permitted any other nuisance to remain unabated.

"Flies carry disease of many kinds, all of them filth diseases. Typhoid fever is the chief among these, although a score of the so-called 'summer ailments' are borne by flies. Great progress has been made in Washington in the last few years in eliminating the fly by destroying the breeding places where the insects propagate and from which they spread to all the houses in the neighborhood. Much more can be done along this line if citizens generally will continue to co-operate in a whole-hearted manner in the clean-up activities, and it is not too much to say that continuance of campaigns such as that of this spring and several preceding springs may be expected, in a few years, to make flies as rare in the District of Columbia as buzzards are in Maine."—Washington Star.

In Setting Plants.

In setting any kind of plants make sure that the roots are well spread out. The most important thing is to bring the soil into as close contact with the roots as possible. The root can take no moisture from the soil in a natural condition until the soil is so close to the root that capillary water flows from the water film around the soil particles to the root. We water newly set plants for two purposes. 1. To keep alive the plant till it can get to taking in water naturally, without the help of water artificially supplied. 2. To wash the earth particles more closely about the roots and so help bring about an early contact of the roots with the soil. Some do not know this and try purposely to leave the soil as light about the roots as possible, thinking the roots can thus penetrate it easier. The penetrating power of roots is beyond the calculation of most people. Roots will go wherever there is food, moisture and air, no matter how firmly the soil may be packed. Corn roots are frequently found four feet below the surface, having passed through layers of earth very firm and which, of course, had never been disturbed by the plow.

Roses in Lath Houses.

In choosing roses for planting in lath houses or places somewhat shady, extreme care must be paid to choosing sorts known to be free from mildew. First-class drainage of soil will do much to overcome this fungus and it will prove a pleasant surprise to see how many roses will thrive in quarters with little or no sun. A concrete building was erected on a lot adjoining a garden, on the south side. This threw in complete shade a half-dozen roses, and several others were thereafter in partial shade. It was a pleasant surprise to note that in three years but two have been troubled with mildew, not badly however, and only at such times as others in full sun were also affected.

Put Well Away From the House.

The old-fashioned idea of having the well in close proximity to the house is being relegated to the discard as fast as a growing knowledge of sanitary science can put it there. To locate the well away from the zone of possible contamination and at the same time meet the requirements of house, barn, garage and garden, is causing a decline in the demand for the long-popular cheap pump. The growing demand for modern conveniences in suburban districts is creating a demand for a better grade of pumps.

Drawing the Line.

Mrs. de Fashion—My dear, I have picked out a husband for you. Miss de Fashion—Very well, but I want to say right now, mother, that when it comes to buying the wedding dress I am going to select the materials myself, so there!—New York Weekly.

There Are Lots of Them.

Hokus—Old Gotrox is devoted to music. There is a clause in his will leaving $25,000 to establish a home for poor singers. Pokus — How inadequate! Twenty-five millions wouldn't begin to house all the poor singers.—Life.

Good Reason.

"So you have written a book on cemented basements. But why did you choose such a subject?"

"Because I wanted it to be among the best cellars."—Baltimore American.

FUN RAYS

By Ray I. Hoppman

THE FARMER.

THE farmer is a happy man, he "lives" as only farmers can, where nature's on display. He may not know the city's ropes, as open-eyed and green he gropes along the Great White Way. He gets up early in the morn to feed the hens, and pluck the corn beneath the clear blue sky. When people say that there's a charm in living on a well kept farm, I do not wonder why. He gets fresh grub right from the soil and labors at an honest toil, with happy mien and vim. He has his barn well filled with hay and gets unwatered milk each day. Oh! how I envy him. His good wife baketh home-made pies that bring the lustre to his eyes of apple, pumpkin, mince. The man who lives upon the farm, where roosters crow the morn alarm, is equal to a prince. He knows Dame Nature to a "T" and how to treat each shrub and tree—each flower, plant and bud. If food goes up, he does not care. His bin is filled with garden ware—the onion and the spud. He has a "hoss" to take him when he must go to town again to sell his choice produce. He sits within his bungalow and makes his healthy "physog" glow by drinking apple juice. He lives the "back to nature" life, away from city noise and strife, where songbirds gayly sing. To live within the city, where there's premiums on clear, fresh air, would make his belfry ring. He may not measure up to snuff on city ways or Broadway bluff, nor know the latest slang. Why should he worry? He's got his.

DOLLARS COME HOME TO ROOST

EVERY farmer who makes our town his market place has an interest in this community. The fact that he is a member of the community makes much difference to him when he considers that the prosperity of our town is his own prosperity.

But when he sends his money to the mail order houses HE DOES NOT STOP TO THINK THAT HE IS NOT HELPING TO PAY THE REQUIRED TAXES IN HIS OWN COMMUNITY; not that he does not pay his own legally assessed taxes, but that he is not helping our local merchants to pay the taxes necessary to support the community.

The mail order man has absolutely no interest in the community. He plays the part of a fisherman—strolling about, casting a line here and there, where he thinks the best fishing is to be found, and after pulling out the fish he departs. The mail order man does not contribute to the upkeep of the community. He merely takes away from it.

When a farmer sends his dollars to the mail order house he prevents a certain amount of improvements, say, for instance, in road building, here in our county. The mail order man does not help to build our roads, but the local storekeeper does.

If we keep the dollars at home they will keep on helping us all. Dollars, spent at home, come home to roost. They come back in the upkeep of our town and county institutions. We have none too many dollars at the most in our community and it seems a shame to send any of them away to the mail order houses, where we will never see them again.

The dollars we send away help the mail order man to take a vacation in Europe or at the seashore. THEY HELP HIM TO MAINTAIN HIS AUTOMOBILE AND TO RIDE ON PAVED ROADS.

If we keep these same dollars at home they will help us to have better roads in our own county. Of course, the mail order man pays his taxes in the city, which helps to pave the streets of the city, but we here in our town don't benefit by that. Therefore, the best thing for us to do is keep our money at home, where it will do us some good.

OUR LOCAL MERCHANTS WILL USE THE DOLLARS TO GOOD ADVANTAGE BY HELPING TO PAY THE TAXES HERE—THE TAXES REQUIRED TO BUILD GOOD ROADS. EVERY DOLLAR SPENT IN OUR HOME TOWN MEANS IMPROVEMENTS AT HOME.

The merchants of our town deserve the patronage of the people in our community. They are a part, a very large part, of the community and they pay a major portion of the taxes. The more business they do the more taxes they must pay and the more taxes paid into the county treasury, the more improvements we can have.

Unless we are careful and watch our own interests we will find out to our cost that the ultimate result of the mail order scheme will be the centralization of all of the country business in the large cities and the absolute destruction of the financial interests in the small cities and towns. The only way to prevent this is to stop sending our orders to the mail order houses.

Let the dollars come home to roost. That is the only way, and they will come home to roost if we do not send them too far away. The dollars spent locally will circle around and keep things lively, but if sent away we must get more dollars from outside to take their place. It is not always an easy matter to do this. THE SAFEST THING TO DO IS TO TAKE NO CHANCES, BUT TO SPEND THEM AT HOME WITH THE LOCAL STOREKEEPERS.

If we had any expectation that the mail order man would ever do anything to help our community, things might be different. But there is no chance. He comes to us in the garb of an artful deceiver, with gross misrepresentations, false promises and a record of disappointments. But we welcome the opportunity to again place ourselves on record as being his dupes. There isn't a grain of kindness in his whole makeup. He demands his cash in advance and gives you that which he wishes to send. You have no redress. You have no rights that he is bound to respect.

The mere fact that we are silly enough to send our money away, out of our own community, to a stranger, thereby injuring our own business prospects and jeopardizing our own prosperity, justifies him in believing that he can take the most outrageous liberties with us.

Bread cast on the waters will return, not so with dollars sent to the mail order house. Turkeys will come home to roost, if somebody does not catch them.

BUT DOLLARS WILL COME HOME TO ROOST IF WE KEEP THEM IN CIRCULATION IN OUR HOME TOWN. TRY IT.

SWEET PERFUME OF VIOLETS!

Female Impersonator with the Tango Show Arrested For Intoxication [illegible] Gets His Gratitude

Several Fultonians [illegible] Tango show at the fair grounds this week noticed that one of the Tango "girls" had a rather manly appearance, to say the least, and was often quite boisterous, especially in the bally-hoo before the tent. The companions of this young lady addressed her as "Clarice" and, although she was often rather loud and blatant, she could at times affect a [illegible] maidenly modesty when [illegible] the appraising glances of the gentlemen patrons fastened upon her.

"Clarice" put in a hard day yetserday and after he had doffed his skirts and donned his regular attire, that of a real man, he announced that he was dry, very dry. One of the razorbacks of the show consented to accompany "Clarice" to some spot where they both might obtain liquid refreshment in large quantities.

After several hours spent in crooking the elbow properly, "Clarice" felt girlish once more and accompanied by William Cregar, the other carnival follower, started to burn up the town in the vicinity of West Broadway. Officer Smith happened along as "Clarice" was giving concerts in imitation of Eva Tanguay, shouting "I don't care!" in a shrill voice, to the amusement of a large crowd, and both artists were requested to accompany the officer to the city jail. "Clarice" pleaded, but Officer Smith was impervious to her charms and both men (?) were locked up.

This morning "Clarice" gave her name as James Weaver and when arraigned before Judge Wilson forgot herself so far as to giggle when the Judge asked, "Are you a married or a single man?"

"I should say not!" she replied with emphasis.

The Judge became stern at once and asked Weaver if he thought his arrest a joke. The Judge told both men that a sentence of thirty days was what they needed but added that he intended leniency with them. Weaver had $7 when arrested and the Judge fined them each $2.

Chief Dyer found that the fare to Gouveneur, the next stop of the Tango show, was $2.75, and in order that the men might rejoin the troupe by rail and not be obliged to "hit the ties," the Judge kindly changed the sentence to 30 days in Oswego Jail and suspended sentence.

He advised both culprits to restrain themselves in Gouverneur and allowed them to go. The female impersonator thanked him tenderly when he left the court room.

* * *

Burns Given Time to Recover.

John Burns wanted to go to jail this morning when he was arraigned before Judge Wilson on a charge of public intoxication. Burns was arrested last night after a prolonged spree and as he sat in the court room this morning he trembled in every limb.

Judge Wilson was of the opinion that ten days in jail would do the man little good and gave him a thirty day sentence in which to recuperate.

INGALL'S CROSSING.

F. R. Babcock and family of Pittsburgh, Pa., took dinner at the Babcock homestead Thursday. They were on their way to Alexander Bay by automobile.

* * *

Farmers here are very busy harvesting and threshing oats. They report on unusually good crop this year. Those who treated seed for the prevention of oat smut are well paid for the trouble, while those who did not will another year.

I. Kio and family entertained friends from out of town last week.

Report from Vienna that the war-babies there are mostly boys compels admiration for the thoughtfulness of nature.—New York Telegram.

One To Convince the Most Skeptical Fulton Reader.

The test of time is the test that counts.

Doan's Kidney Pills have made their reputation by effective action.

The following case is typical.

Fulton residents should be convinced.

The testimony is confirmed—the proof complete.

Testimony like this cannot be ignored.

Mrs. M. Guyer, 413 Cayuga st., Fulton, says: "Doan's Kidney Pills have been used in the family frequently and they have always acted as represented. They were taken for kidney trouble and lame back, and brought most satisfactory results. I publicly recommended Doan's Kidney Pills some time ago, and all I then said still holds good."

Price 50c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. Guyer recommends. Foster-Milburn Co., Props., Buffalo, N. Y. adv

WAGON TOP SENT HORSES ON RUN

Was Close Call for Farmer Fish of Granby, but He Escaped Real Serious Injury

A spirited team of horses drawing a farm wagon, the property of George Fish of Granby Center, became frightened in East Broadway this morning when the small top that shelters the seat of the wagon fell over their backs and ran away. Martin Fish, uncle of George Fish, who was driving, was thrown with great force to the brick pavement when the horses bolted. The wagon overturned after the team had run several yards and the frenzied horses headed for the curb. They swept down the sidewalk with the heavy wagon dragging and missed the plate glass windows of Brooks' grocery store by very few inches. The wagon was dragged across the lawn o. Simon Lavelle, tearing a deep furrow in the grass, and the team brought up against a tree and stopped.

Mr. Fish sustained a broken nose, deep cuts about the face and head and bad bruises about the shoulders and body. He was assisted into a nearby store and Dr. Fox was called. Joseph Connors and Dr. Fox took the injured man to his home in West First st. after his wounds had been dressed. William Sherman of Fairdale caught the horses and held them until a man from the Fish farm came to take them home.

SOLOMON BOUTIN HURT; HE FELL FROM SCAFFOLD

Solomon Boutin of 174 West 1st st. South, while engaged in work upon a scaffold at the canning factory at W. 5th and Phillips st., fell from his exalted position and sustained one fractured rib. Mr. Boutin was removed to his home and is resting as comfortably as conditions will permit.

ALBANY GOSSIP DAY BY DAY

Chronicle of Events and a Forecast of What is Doing In Officialdom---Special Correspondence.

By Frederic T. Cardoze.

Albany, Aug. 21.—As an illustration of the declaration made in many places that the people of the state do not appear to be particularly impressed with what is transpiring in the halls of the Constitutional Convention at Albany, extracts of a letter sent to Delegate-at-Large Edgar T. Brackett of Saratoga, may be quoted from. The letter in question at least sets forth clearly the opinion of the writer that the desires of the people are being disregarded.

Delegate Brackett, evidently desirous of having his fellow delegates know just how his correspondent felt toward the work of the Convention, read portions of the missive at a session and moved that the message conveyed be given a committee reference. This was done by President Root, who sent the communication to the Committee on Bill of Rights.

The matter was aired as the result of Delegate Brackett having arisen and been recognized upon a question of personal privilege. "I don't know what kind of a privilege this is, but I desire to read a letter I received from a constituent," he explained. Thereupon he affixed his glasses and leisurely read this pithy reference to the work of the delegates: "It looks as though the delegates to the Constitutional Convention (a majority of them at least) are stuck on themselves and the public be damned."

Of course the delegates did not take kindly to the comment of the constituent of Mr. Brackett, but the matter was treated in a light vein when it was proposed that the epistle be referred to a committee of the Convention. President Root sent the letter o the Committee on Bill of Rights, but Delegate-at-Large Brackett Louis Marshall did not want that committee to consider it. Being its chairman, he suggested that some other committee be given jurisdiction over the letter and proposed that the committee on Privileges and Elections be that committee. He pointed out that its members had never met.

The letter read by Delegate Brackett and subsequently referred to the Committee on Bill of Rights, is not likely to be heard from again. Certain of the delegates, however, say that it is quite evident that there is some opposition to the work of the Convention and they wonder how much.

The impression grows that in order to favorably impress the people with relation to the amendments adopted by the Constitutional Convention, a campaign of publicity or instruction should be conducted. Some of the delegates are free to admit that the nature of some of the amendments is of such complexity that without explanation, the true meaning and object would not be discerned by the average voter. They go further and admit that their knowledge of state affairs has been greatly added to as the result of attending the committee hearings when the several important propositions were threshed pro and con to great length.

Just what will be done to assist the voter to appreciate the importance of the proposed changes to the Constitution has not as yet been fully outlined, but there is fear that lack of knowledge of the subject matter of the several proposed amendments may lead to their defeat at the polls.

As has been stated, the Secretary of State will publish a small booklet containing the propositions, but it is hoped that much more will be done to simplify the intention of the delegates to strengthen the Constitution.

Cookies and cakes and all things baked by the Black company, fresh every day, at your grocer's. adv

57 NORTH 4th STREET—7 rooms, electric lights, furnace heat, complete plumbing, Few steps to downtown..$1,950

313 SENECA STREET—For business or a home—cheap at $1,500

UNION SERVICES

Union religious services will be held in the East Side Park tomorrow at 5 p. m. The Rev. Burton C. Barrett, pastor of the Sandy Creek Baptist church, will preach the sermon. In the event of stormy weather the services will be held in a nearby church.

Presbyterian Church.

Chas. S. Robertson, Pastor.

Morning prayer at 10.

Worship by families at 10:30 with sermon by the pastor on the theme, "Paul in Rome."

Bible school at noon.

State Street M. E. Church.

Rev. H. D. Holmes, Pastor.

The pastor will return from Dempster camp meeting in time to preach the morning sermon at 10:30, returning immediately after the services to his work at the camp. The morning theme will be "Society and Solitude."

First Baptist Church.

Rev. M. G. Buck, Pastor.

In the absence of the pastor, the Rev. Burton C. Barrett of Sandy Creek will fill the pulpit at tomorrow's services. Mr. Barrett preached at the local church on August 8 and won the united attention of his audience, and for this reason it is expected that a large number of persons will be present at tomorrow's services.

Free Methodist Church.

Rev. C. C. Watson, Pastor.

The services at this church tomorrow will include a sermon by the pastor at 10:30, the theme to be, "Baptism of the Spirit."

Sunday school at 11:45.

Young People's meeting at 6:30.

Preaching at 7:30 by the pastor, whose subject will be, "The Flight of the Soul."

Congregational Church.

Chas. Olmstead, Pastor.

At the morning service tomorrow the theme of the pastor's sermon will be "Priceless Possessions."

The Sunday school will meet at 12 o'clock.

The church will join in the union service at the park at 5 p. m. and there will be a union Young People's meeting at 6:30 p. m.

First Methodist Church.

Oneida and Third Sts.

Sunday services:

Morning worship at 10:30, with sermon by the pastor, Rev. J. W. Barrett, subject, "The Love That Stooped to Save."

Bible school and Brotherhood at noon.

Union vesper service in the park on 3rd st. at 5 p. m.

Christian Science.

Christian Science services held on Sunday at 10:45 a. m. and at 8 p. m. Wednesday, in the Van Wagenen Block. Mrs. H. A. Allen, first reader; Mrs. Noah Merriam, second reader. You will be welcome and interested to attend one or both services.

The subject for next Sunday is: Mind. Golden Text: I Cor. 2: 16. Responsive reading: Psalms 119. 89-94, 97, 98, 101-103, 111, 112, 117.

REV. MINOR J. PETERS UNABLE TO PREACH

The Rev. Minor J. Peters, rector of Zion Episcopal church, remains ill at his home at 3rd and Cayuga sts., and will be unable to conduct services of any nature tomorrow. This announcement is a keen disappointment to his congregation, as the lesson for tomorrow bears upon the twelfth Sunday after Trinity.

RUMMAGE SALE.

The ladies of the Parish Aid Society of the Zion Episcopal church are arranging to hold a rummage sale in the old Stranahan & Love store, in Oneida st. on Thursday, Friday and Saturday next.

A fashion writer recommends the beach coat for women at the seashore. The progressive diminutiveness of bathing suits suggests the possibility that a coat of tan is meant. —Louisville Courier—Journal.

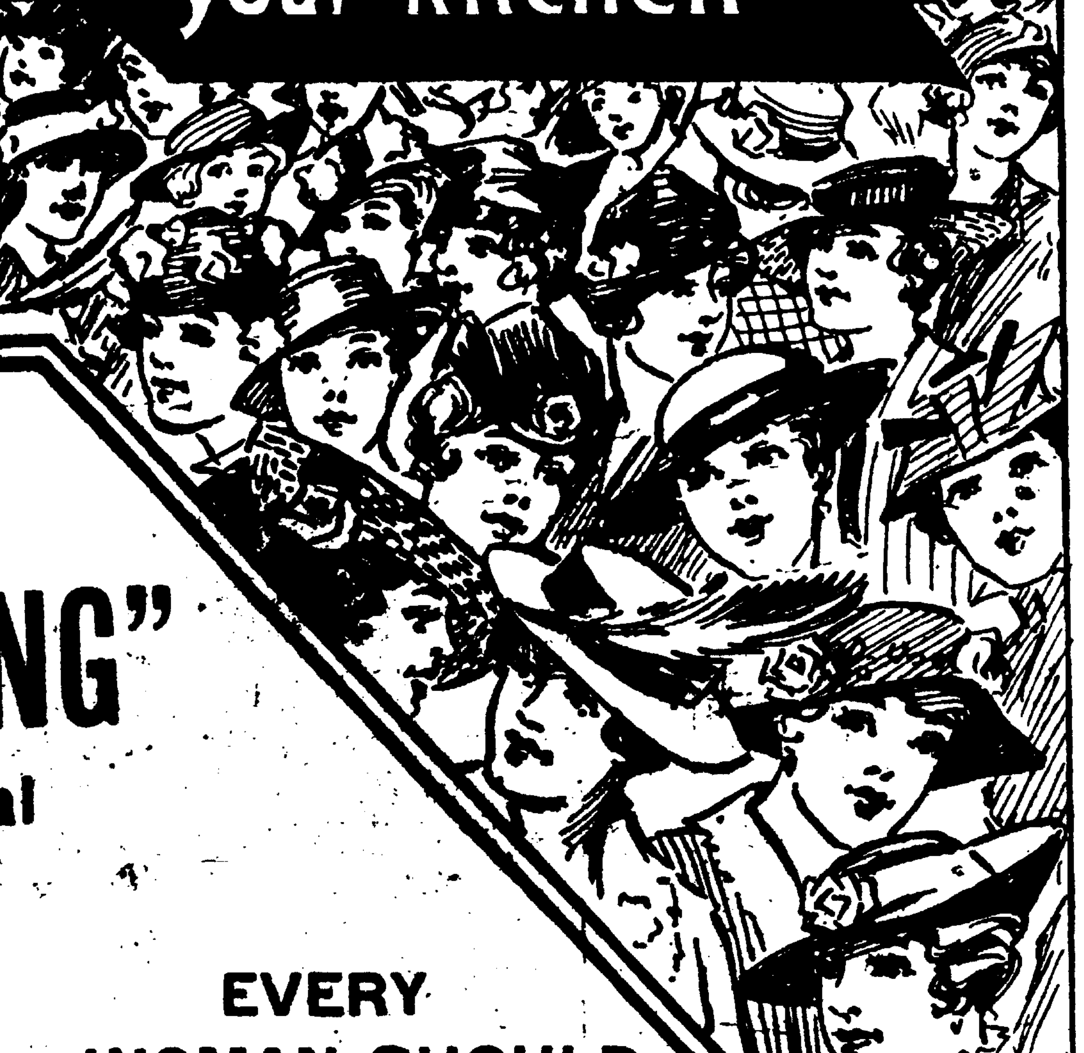
Only 2 days more — $5 installs the SCIENTIFIC STERLING in your kitchen



FULTON HAS ACCEPTED THE "SCIENTIFIC STERLING"

The Gas Range That Burns Coal

Sales on the "Scientific Sterling" yesterday exceeded all our expectations.

We knew that when the last call went out—when Fulton housewives realized that there were only three days more when they could obtain the "Scientific Sterling" under the Club Plan—many who had been undecided would hasten to take advantage of the liberal Club Plan privileges. But we were hardly prepared for the unexampled interest the new "Scientific Sterling" has aroused.

A large number of "Scientific Sterlings" have already been sold on our Club Plan. At least a dozen more will be sold on these last two days.

We take this opportunity to thank the women of Fulton who, as Club Purchasers, have helped us to make this Co-operative Club Plan such an asounding success.

L. P. SMITH COMPANY.

LLING

EVERY WOMAN SHOULD CALL AND EXAMINE THIS NEW RANGE

PURCHASE YOUR "Scientific Sterling" LATER—BUY NOW ON CLUB TERMS

—TAKE 30 DAYS FREE TRIAL—

$5.00 NOW—TWO DOLLARS A WEEK INSTALLS THIS WONDERFUL RANGE IN YOUR OWN KITCHEN AN OPPORTUNITY YOU CANNOT AFFORD TO MISS

The *"Scientific Sterling"* is constructed as a unit—five gas burners, with two holes directly over the coal fire when used open for gas; a six-hole coal range when all covers are in place. Single oven bakes perfectly with gas or coal. No extra oven attachments to move in and out. Safety Damper makes accidents impossible. Smoke, gas, and products of combustion drawn off through a single flue—no fumes can enter the kitchen from the oven.

Perfect circulation of heated air, but no cold air can enter anywhere. Special oven thermometer for perfect baking. Perfect draft when burning gas or coal. Extra large water front. Deep fire box and combustion chamber saving fuel. Extra size, close fitting ash pan to keep the kitchen clean. Neat and compact, takes up little room, and replaces all other cooking and heating devices. As solid in construction as any all-coal ranges. Many other features found on no other gas, coal, or "combination" range. Sold complete with water front and pipe shelf without extra charge.

Patented devices make the "Scientific Sterling" a range that cannot be duplicated in efficiency for many years to come.

You owe it to yourself to see the "Scientific Sterling"—it means comfort, convenience, and economy in your kitchen.

Daily demonstrations at our store.

For two days more, *and for two days only*—the terms of our Club Plan are still in force.

If you have ever thought of buying another range—if you are one of many who know the convenience of gas cooking—if you ever have occasion to use coal in your kitchen—then you should purchase the *"Scientific Sterling"* now while you can still take advantage of the Co-operative Club Plan.

Make your first payment of only $5.00—the regular cash price of the *"Scientific Sterling"* is $77 complete with water front and pipe shelf. Pay only $2.00 a week on the balance—we extend Club Purchasers credit for eight months—*three days from now purchasers will pay the same cash price,* with no added advantages.

After your first payment has been made, we set up the *"Scientific Sterling"* in your kitchen free of all charges. We give you 30 days' free trial of the range. You are at no further expense—we furnish all gas, water, and stove piping, make the delivery and all connections above your floor—and set up your *"Scientific Sterling"* complete ready for cooking or baking. Later purchasers will pay not less than $10 for installations—we have not added a cent to the price paid by Club Purchasers. *We positively will not make free installations for anyone after the Club is closed.*

Club Purchasers only are entitled to our free insurance contract, whereby we protect you in your purchase. Should any Club Purchaser die or become disabled before payments are completed, without further charge, we grant a bill of sale for the range, and cancel all future payments. We take all the risk. The *"Scientific Sterling" Club is not an installment proposition*—it provides for straight credit to Club Purchasers, with insurance against loss.

With every *"Scientific Sterling"* sold to a Club Purchaser we issue the strongest guarantee ever written on any range. It is signed by ourselves, and by the manufacturer, protecting you absolutely against any defect in material, workmanship, and installation of your range—it guarantees that you will get satisfactory service—and provides for insurance against damage for one year. It is the strongest guarantee that we have been able to write.

Inspection and instruction service is free to Club Purchasers—we know that the *"Scientific Sterling"* is the most efficient cooking apapratus ever built—this service is designed to give you the best results you have ever had from any range, of any kind.

There are only two days more during which these terms will be in force. After that "Scientific Sterlings" will only be sold on regular merchandising terms, at the regular cash price. *It means money in your pocket to act now.*

May we ask that you make your visit to our store as early as possible during these next two days, in order that we may be able to give you the courteous attention to which you are entitled.

CONVENTION IS FINISHING UP

Digest No. 1 of Proposed Amendments Appears, Which Includes Emergency Messages; to Be Submitted

Albany, Aug. 21.—At last settled down to the final work of the Constitutional Convention, the delegates are disposing of the various proposed amendments to the State Constitution which have been favorably reported from committee. Up to the present time several propositions have been adopted, so far as the delegates are concerned, and it remains for the people to deal with them as they see fit when they are presented in the form of a referendum.

The proposed amendment prohibiting the Governor to send to the Senate and Assembly emergency messages to facilitate the passage of bills establishes an innovation and precludes the future rushing through of bills which have hung fire for one reason or another. This amendment affects Article Three, Section Fifteen of the Constitution. Its exact wording follows:

"No bill shall be passed or become a law unless it shall have been printed and upon the desks of the members, in its final form, at least three calendar legislative days prior to its final passage; nor shall any bill be passed or become a law, except by the assent of a majority of the members elected to each branch of the legislature; and upon the last reading of a bill, no amendment thereof shall be allowed, and the question upon its final passage shall be taken immediately thereafter, and the yeas and the nays entered on the journal."

The above proposition will have an important effect upon future legislation if it is ratified by the people. Its introducer, H. Leroy Austin, of Catskill, an attorney, and State Forest, Fish and Game Commissioner, though never a legislator, had little difficulty in convincing his fellow delegates that his idea was valuable.

There appears to be an almost universal opinion on the part of the delegates that the principal beneficial result of the adoption by the people of the proposition will be less haste and more early attention to the bills when they are progressed. It has been the custom in the past on the part of the introducers of bills, when the question has arisen concerning the desirability of their being passed, to put them over from time to time until they had secured sufficient support to put them through. This failing, they have gone to the Governor and requested him to certify as to the necessity for the bills desired by the introducer becoming laws. With the recommendation of the Governor, subsequent passage of the measures resulted.

The emergency message thus committed the executive to favorable action upon the bill so passed when it reached him and at the same time piled up the work of the clerical forces of both houses during the closing days of a session.

It has not been infrequent that a dozen or more emergency messages have been secured from the Governor in a single day; in fact, unless a measure was obviously impossible, there has always been a chance for its introducer to enlise the aid of a Governor in its behalf to the extent of an emergency message.

Under the order of things recommended by the Convention, the executive will have no influence with either branch of the legislative body and will not, except in a personal way, have any power to expedite bills. His first official jurisdiction over a measure which has been introduced will be when it comes to him for final disposition by either approval or veto.

A North Carolina editor asks, "Why do a rabbit wobble he nose?" And yet they say that N. C. is a grand old prohibition state!—Mason (Ga.) News.

KANE, ELECTRICIAN, MOVES TO WEST SIDE

D. B. Kane, who for several years has conducted an electrical supply store at 118 Oneida st., removed his stock, fixtures, etc., today from the old location to a shop adjoining his residence at 302 Gansevoort st.

Mr. Kane announces that the change is only a temporary one and that as soon as conditions warrant a return to this side of the river a location will be sought and his business pushed with greater vigor than ever before. In the meantime he proposes to make hay while the sun shines and will nor confine his endeavors to the West Side, but expects to work all over the city.

GETTING READY FOR MID-WINTER FAIR

The Agricultural Division, comprising these members, Messrs. Galusha, Van Sanford and Bogardus, and accompanied by Secretary Heydecker, were in Oswego today to meet a representative of the State Department of Agriculture. Grange officials were also present and the subject under discussion was that of holding a mid-winter fair here in conjunction with a farmers' institute.

SUPT. COMPLAINS OF CONTRACTOR'S WORK

Yesterday's Palladium says:

"County Highway Superintendent Howard plans to again take up with the State Highway Department in the near future the matter of surfacing the West River road just south of Minetto. This road was built by the barge canal department three years ago and has never since had any attention because the State Highway department disclaims all responsibility for the maintenance of roads which are not built under their direction and with their funds. The result is that the road has gone to pieces and is in a bad condition. Mr. Howard hopes to convince the Highway department that the repairs should be made and if this is impossible a special legislative act appropriating money for the maintenance may be secured

"Mr. Howard yesterday complained to the State department about the contractor who is oiling the West River road between the Page farm and Fulton He is oiling both sides of the road at once against instructions of the State department Mr Howard says that this road is particularly troublesome because it is necessary to dress it with cold oil, which takes two or three weeks to cure. Tarvia cures in two or three days, but it cannot be used on asphalt roads."

SNEEZERS TO GATHER AT LAKE PLACID

Members of the Empire State Branch of the United States Hay Fever Association and other sufferers from the affliction are getting ready for the meeting to be held in the Adirondacks on August 27.

The meeting will be held at the Lake Placid Club and P. F. Jerome, secretary of the national association, is one of the many who have already sought the summer resorts in an effort to combat the trouble. Hay fever begins on August 15. On that date Mr. Jerome left his home, 124 East Twenty-eighth st. for Lake Placid.

PROGRESSIVES MET TODAY IN OSWEGO

The Progressive party of the county met today in the Court House, Oswego, to prepare plans for the fall campaign. The meeting was called by L. J. Farmer, the "strawberry king."

Angel Food, Sponge Cake, Crullers and Pies at Keller & Wilson's. adv

BIBLE AS TEXT BOOK.

The public schools of New Zealand like those of our own country, are entirely secular, but for several years people have wanted the school teachers to use the Bible as a text book for nonsectarian lessons, and the ministers of the gospel to supplement the lessons with doctrinal teaching for such pupils as attend their churches. The proposed plan is much like the one, recently described in The Companion, this is on trial in some communities in this country. The question was a leading issue in the recent New Zealand parliamentary elections, but in respect to it the elections were inconclusive, and so nothing is likely to be done about the matter at the present.—Youths' Companion.

Col. Roosevelt's advice to "keep on being a mother," does not interest us, for the reason that, so far as we are concerned, it's absolutely impossible. —Macon (Ga.) News.

It is unfair to judge a man's whole character by what he says when he steps on a collar button just as he is getting into bed.—Lowell (Mass.) Sun.

Easy & Practical Home Dress Making Lessons

Prepared Especially For This Newspaper by Pictorial Review

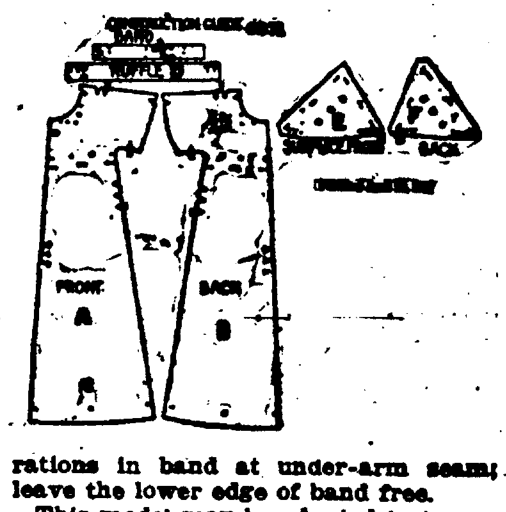
PRETTY NIGHT GOWN IN KIMONO STYLE.

A novel design for a nightgown. It is made in kimono effect and gathered into a band at Empire waist-line, with a straight ruffle.

It has become quite the perfunctory thing for lingerie to be fashioned after outer garments, hence the introduction of the peplum effect upon this kimono nightgown of fine nainsook. The neck is finished in round outline, eyelets being embroidered below the band for the accommodation of narrow ribbon. This treatment is repeated on the short sleeves. The embroidery on the front of the gown is done in eyelet and satin stitch.

To make the gown for a person of average size requires 4¼ yards 36-inch material, with 1¼ yard beading for the waist, 2 yards of 1½-inch wide ribbon and 4 yards of ⅛-inch wide ribbon.

The kimono effect is exceedingly simple to cary out, and the home dressmaker will be delighted at the quickness with which it can be put together. First close, the under-arm, sleeve and shoulder seams as notched. Turn hem at lower edge on small "o" perforations. Gather on crosslines of single small "o" perforations. The large "O" perforations in ruffle indicate front edge. Close back seams of ruffle and band; gather upper edge of ruffle between double "TT" perforations. Sew ruffle to band, center-back seams even, and bring front edges of ruffle together at center-front. Adjust band to position, stitching the upper edge of band over gathers in front and back, center-fronts and center-backs even, small "o" perforations in band at under-arm seams; leave the lower edge of band free.



This model may be adapted in two or three different ways, being equally pretty in straight effect, with a square neck, or finished with fichu lines front and back.

Nighties show many innovations. Ruffled shoulder capes are among the most unusual.

Pictorial Review Nightgown No. 6371. Sizes 32, 34, 36, 38, 40, 42, 44 and 46 inches bust. Price, 15 cents.

HIGH DUES MAKE VIRILE UNIONS

Trade Organizations Fail When Denied Support.

STORY OF THE CARPENTERS

Struggled Hard For Existence Until Power to Levy Assessments Was Conferred on Executive Board—Begging Letter System a Sign of Weakness—Consolidation Urged.

By FRANK DUFFY.

[General secretary of the United Brotherhood of Carpenters and Joiners of America.]

Half a century ago the working conditions of the carpenters were deplorable. A workday lasted from sunrise to sunset or as long as one could see. Realizing they could change or better these conditions only through organization, they commenced to agitate among the men of their craft and then to advocate the formation of carpenters' unions.

In many cities such unions were formed; but, being local affairs without a national head to guide them, many disbanded within a short time. This spasmodic system of organizing and reorganizing locally continued until 1881, when the United Brotherhood of Carpenters and Joiners of America was permanently formed.

It was a question of doubt at that time whether it would be a success or not owing to the fact that the members were not willing or perhaps could not afford to pay from the meager wages received high initiation fees and high dues, while at the same time wanting all the benefits they could get in return. These included sick, death and disability benefits as well as financial support in strikes and lockouts.

Per capita tax to the home office was very low, while the demands on said office were very heavy. A few years later—or, to be more exact, in 1892—after meeting all the demands made on us, we had in our general treasury $51.19.

We met the emergency by giving our general executive board authority to levy special assessments on our local unions whenever necessary. For a number of years following several assessments were levied by our board, which caused much grumbling and considerable dissatisfaction. In 1905 we submitted to referendum vote the question of either raising the tax to the home office or again levying an assessment. The membership voted by a large majority to increase the tax and also continued to give our general executive board authority to levy assessments whenever necessary.

During the last ten years the wages of our members have been substantially increased, in some places 50 cents per week and in other places $7.50 per week per member. Figured conservatively this means that over $13,000,000 have been placed in the pockets of our members annually more than they would have received if there was no such organization as the United Brotherhood of Carpenters and Joiners of America. Yet while that increase was won for our members through our organization they, on the other hand, objected, opposed and voted against paying higher dues, no matter what benefits were promised in return.

To be a success we must be as liberal with our organization as we are generous to ourselves. Or, in other words, if we do not create a fund for our own protection and defense we cannot, should not and, in fact, must not expect others who have such a fund to help us.

The United Brotherhood of Carpenters and Joiners of America, its local unions and district councils have not to our knowledge in the last twenty years issued begging letters to other labor organizations asking for financial aid to tide them over their difficulties and troubles, strikes and lockouts. On the contrary at our Washington convention in 1912 we established a fund to protect our members by levying an assessment of $1 per year per member on our entire membership, payable to the home office quarterly.

In doing this we caused the dues of our members to be raised considerably. On a membership of 215,000 in good standing this means a defense fund yearly of $215,000. We left with our general executive board at the same time authority to levy assessments if such should be found necessary.

This begging letter sytem, now so prevalent among unions, shows a weakness and lack of management somewhere, and of forethought and foresight on somebody's part. It is not at all encouraging to hear one of those letters read at a meeting of a union, predicting defeat and calamity if financial aid is not forthcoming. The old saying has it that "God helps those who help themselves," and as charity begins at home, it is time for organizations unable to support their members in times of trouble, strikes and lockouts to get together and consolidate with kindred trades and thereby form one good, strong organization in which the interests of all can be taken care of and protected. Then we would not have so many national and international unions as we have now, and perhaps not so many jurisdictional disputes to contend with. Neither would we have so many begging letters going the rounds.

An Apparently Fool Order That Won Him Fresh Laurels.

Among the stories in J. B. Thornhill's "Adventures in Africa" is an amusing one that was told by Captain Ghoeur, the Belgian chef de zone of the Haut Luapula zone of Katanga. It followed a discussion on the way office boys rise to preferment while really good outside men make no headway:

"A young cadet in the Portuguese navy was given work at the admiralty office, where he remained, and, without ever having been on board ship, rose through influence to be captain and ultimately admiral. When the king and queen of Portugal went on a visit to Tangier he was charged with the duty of taking them there and hoisted his flag accordingly. The captain of the boat naturally went to him for orders as to which the office bred admiral was in a state of hopeless innocence. He parried questions and solved difficulties by telling the captain to act for himself. On arrival at Tangier the captain asked how many cables he should put out, and the admiral in a quandary answered:

"'All.'

"The order was obeyed, and the Portuguese boat became the laughing stock of foreign battleships as cable after cable was run out. That night a hurricane came on. An English cruiser slipped her cable and put to sea—and safety. The French, German and Italian vessels snapped their cables and were driven on the beach. The Portuguese vessel alone rode out the gale. The admiral was given decorations in recognition of his foresight, was promoted to naval commander in chief and was congratulated by every one.

"'What a head that man has!' was the universal comment."

Help Others.

No man can live happily who regards himself alone, who turns everything to his own advantage. Thou must live for another if thou wishest to live for thyself.—Seneca.

Off With the Old—On With the New.

In a Georgia town the darkies were out for their Saturday afternoon good time. A mulatto woman, whose somber dress and wealth of crape betokened recent bereavement, attended by a man on each side and two in the rear—all clamoring for the pleasure of taking her to the picture show—came down the street. A plainly clad auntie stepped out of a crowd, accusingly fronting her:

"Say, how's dis, Minnie? Mistah Saul skasely col' in 'is grave—an' you 'ceivin' de 'tensions o' gentermens!"

"Huh!" fired back Minnie with a toss of her head that swished her veil. "I ain't crazy 'bout no dead man!"—Saturday Evening Post.

Select.

Once when passing through a cemetery in Lenox Eliot Gregory was surprised to see that the members of one old New England family had been buried in a circle, with their feet toward its center. He asked the reason for this arrangement, and a wit of that day, daughter of Mrs. Stowe, replied, "So that when they rise at the last day only members of their own family may face them!"

Trained on a Trellis.

The head of a big New York business concern is exceptionally tall, and his height is still further accentuated by his exceeding slimness. The other day a visitor from the south called to see him and was duly asked to sit down.

After they had concluded their business the visitor rose to go and his host,

GAZED AT HIS HOST.

who had been sitting low down in his easy chair, rose also and seemed to rise and rise. The southerner, letting his glance travel upward, gazed at his host as though inspecting a new species of skyscraper and, with an expression of awed admiration, ejaculated:

"Great Scott, old man, your parents must have trained you on a trellis!"—Buffalo News.

She Knew.

Passing a swimming pool in a small city one day two country women read this sign at the entrance: "25,000 Gals In and Out Every Hour." "That's all nonsense," said one of the women. "There ain't that many women in this whole county."

Scrap Book

He Delivered It.

A boy walked into the office of the telegraph company at Chicago and asked for a job. He said his name was Missouri. The manager happened to want a messenger boy just at that moment and gave him a message that had to be delivered in a hurry.

"Here's your chance, my boy," said the manager, "these people have been kicking about undelivered messages. Now, don't come back until you have delivered it."

A little while afterward the telephone rang. On the other end of the wire there appeared to be a building watchman, somewhat terrified.

"Have you got a boy they call Missouri?" inquired the watchman.

"We did have ten minutes ago," replied the manager.

The watchman continued:

"That Missouri feller came over here and said he had to go to one of the offices. We don't allow no one up at that office at this hour, and I told him he couldn't go."

"Yes, yes," said the manager.

"Well," said the watchman, "he said he would go, and I had to pull my gun on him."

"But you didn't shoot him?" exclaimed the manager.

"No," meekly came back the response over the wire, "but I want my gun back."—Philadelphia Ledger.

Hope.

There is no grave on earth's broad chart
But has some bird to cheer it.
So hope sings on in every breast,
Although we may not hear it.
And if today the heavy wing
Of sorrow is oppressing
Perchance tomorrow's sun may bring
The weary heart a blessing.
—Unidentified.

The Abducted Voter.

A Londoner of pronounced Tory principles had a wife with strong radical tendencies. On the morning of a contest in which every vote was of the utmost importance his better half insinuatingly suggested over breakfast that they should enjoy what promised to be a glorious day by driving in the country.

The husband readily consented, and after a pleasant outing they returned in the evening just as 8 o'clock was chiming. Then said the wife sweetly, "It is too late now, dear, to vote in this election."

"Yes," was the reply, "but I voted at 8 o'clock this morning, before you came downstairs."—London Tatler.

Time to Call a Halt.

One night an esteemed citizen was enjoying his after dinner smoke and evening paper when little Willie rambled into his zone wearing a perplexed expression.

"Papa," said he, "why is it that people of Africa are black?"

"Because, my boy," was the prompt rejoinder of the old man, "they are always in the sun."

"Um, I see," thoughtfully commented Willie, and then continued, "Papa, why do people hang clothes out on the line?"

"So that the sun will bleach them white, of course," answered father, once more returning to his paper.

"Then, papa," persisted Willie, his look of perplexity getting deeper, "why is it"—

"Cut out the talk!" broke in father. "Can't you see that I am busy?"—Philadelphia Telegraph.

Marine Intelligence.

A steamboat captain who has spent fifty years with the Hudson River Day line is responsible for the following:

"A lot of passengers who had arrived in Albany by train came aboard early one morning," he says. "The boat was crowded, and many of them stretched themselves out on deck to sleep until sailing time. We hadn't got far out of Albany when a much dismayed man came up to me.

"'I've lost my shoes,' says he.

"'How'd you do that?' says I.

"'I put 'em in a cupboard,' says he.

"'Cupboard?' says I.

"'Yes,' says he. 'When I come on the boat I went to lie down, so I naturally takes my shoes off. So I seen a cupboard, and I put 'em inside. Now the shoes ain't thar.'

"'Show me the cupboard,' says I.

"The man led me to the sta'board paddlewheel box, which had been left open as usual during the night to permit inspection.

"'I put the shoes right in thar on one of them shelves,' says my man from up state.

"You don't need to be told what happened, for the shelves were the paddle blades, and the very first revolution of the shaft had dumped the passenger's footgear into the Hudson."—New York Post.

Safety First.

Colonel E. Polk Johnson of Louisville, who fought for the Confederacy, read something in the dispatches from the front the other day that reminded him very much of what happened when he was serving in the western army.

"I remember it was a wet, cold, rainy night in the middle of winter," said the veteran, "when a long, lean chap in my regiment was ordered to go on picket duty. He thought the situation over for a minute, and then he turned to the sergeant who had brought the message. 'You go right straight back whar you come from,' he drawled, 'and tell the cap'n I jest natchelly can't do it I got a letter from Gin'ral Bragg this mawnin', and he said good men was gittin' mighty skeerce in this here army and for me to take good care of my-se'f.'"—Argonaut.

For the Children

Herman Miller Healthiest Baby on Staten Island.

Photo by American Press Association.

The rather solemn young gentleman here pictured is quite distinguished in a way—and a very good way it is. He is Master Herman Miller, aged about one year, and his distinction comes from good health. Herman won a prize recently because he was declared by a competent committee of doctors to be the healthiest baby exhibited at a recent baby show held on Staten Island, New York city. While a fairly good looking youngster, Herman did not win the beauty prize. That went to a girl. But good health in itself is something to be proud of, and Herman no doubt is perfectly content that a girl won the beauty prize.

Game of Initials.

Write ten or twelve questions on cards and distribute them among the party. Have pencils attached. The questions are to be answered by using the two initials of the name of the person holding the card as the initials of the answers given.

As an example, suppose the name is Ethel Hart.

1. What is your name? Ethel Hart.
2. Where do you live? East Hanover.
3. If not yourself, who would you rather be? Edward Hale.
4. What do you think of the tariff? Excessively high.
5. What is your latest fad? Eating horseradish.
6. Describe your character. Exceedingly hopeful.
7. What is your favorite flower? Early hyacinth.
8. Your favorite book? "Eben Holden."
9. The height of your ambition? Encouraging hoboes.
10. Your chief accomplishment? Etching horseshoes.
11. Your favorite occupation? Epitaph hunting.
12. Your favorite dish? Eggs and ham.

Bucks the Indian.

The captains are chosen, and each captain then chooses alternately the remaining company until two long lines are formed. They face each other, holding hands tightly. One captain calls the name of one of his strongest boys, and this boy runs and hurls himself between two boys of the opposing side. If he succeeds in breaking through he takes back with him to his own side all the boys on the line below the place he broke through. If he is unsuccessful he must join the enemy's side. This is kept up, each side taking a turn until all the boys are on one side, the captain included.

The strongest boys should be stationed near the top of the line, near the captain, and stratagem is shown in trying to catch the strong boys off their guard by pretending to tackle the boys at the bottom of the line.

Riddlemeree.

My first is in toasting and also in tea,
My second's in viewing and also in see,
My third is in looking and also in leap,
My fourth is in seeing and also in peep,
My fifth is in several and also in some,
My sixth is in calling and also in come,
My seventh's in bowing and also in bow,
My eighth is in reaping and also in plow,
My ninth is in eating and also in meat,
My whole brings the stars almost to our feet.

Answer.—Telescope.

—Children's Magazine.

The Boy and the Squirrel.

Up in the tree a squirrel,
Under the tree a boy,
While through nut laden branches
Murmured the breezes coy.
Chippy was very busy
Gathering his winter hoard,
Never a moment's play time
Could Chippy Gray afford.

"My, what a lazy fellow!"
(Chippy had spied the boy
Stretched on the grass beneath him
Nothing his time to employ.)
"Hit him a whack!" the wind cried.
Chippy winked back, "That's so!"
Then from his mouth a nut fell.
Up sprang the boy: "Oh, ho!

Some one's up in the nut tree,
Bet I can tell you who!"
While he was speaking—kerwhack!
Down came nut number two.
Then the boy seized his basket,
"Better get busy," he said,
"Else all the squirrels in Nut Town
Of me will get ahead."

—Orange Judd Farmer.

SHARPENING A PENCIL.

The Way a Child Does It Is an Index to Its Character.

It is very often the little things that children do which give the best indication of what their future characters will be. Schoolteachers, for instance, have a first rate opportunity for watching the different traits in the children who come before them. In their work and in their play the sort of man or woman the child will become is daily unfolded. In such a small matter even as the sharpening of a pencil valuable hints may be obtained by any one in the least observant. Here it may easily be discovered whether a boy or girl is careful, destructive, wasteful or economical.

The boy, for instance, who sharpens his pencil into a stub is inclined to be economical, careful and quick in after life. The boy or girl who takes an inordinately long time to make a slender point, cutting very precisely and regularly all the time will usually prove to be of an artistic and dreamy disposition. The child who, regardless of the look of the pencil, gouges out great pieces in order to get to the lead will show impulsiveness and generosity.

Mere destructiveness, however, becomes apparent when a child takes a delight in sticking his knife in his pencil and splitting it or destroying it in some other way.

Parents, watch your children when sharpening their pencils, and correct and advise them accordingly.—Pearson's Weekly.

CARLYLE'S FIRST LOVE.

She May Have Been the Blumine of "Sartor Resartus."

During the year 1818 Thomas Carlyle, the Scotch philosopher, was living at Kirkcaldy, and he seems then for the first time to have fallen in love. The lady appears not to have returned the attachment, although she, with great insight, at the age of twenty-two, perceived the genius of her suitor of twenty-five.

In the letter in which she took leave of her admirer she used these significant expressions: "Cultivate the milder dispositions of your heart, subdue the more extravagant visions of the brain. * * * Genius will render you great. May virtue render you beloved! 'Let your light shine before men,' and think them not unworthy this trouble."

Many years after, when Carlyle wrote his reminiscences, he described the episode. He says that Margaret Gordon "continued for, perhaps, some three years a figure hanging more or less in my fancy, on the usual romantic and latterly quite elegiac and silent terms."

The real interest of the story is: Was Margaret Gordon the original of the Blumine of "Sartor Resartus?" One critic would have us answer that, although Jane Welsh might have inspired some of the details, it was Margaret Gordon who was the true original.—New York Telegram.

The Faust Legend.

For 1,400 years the Faust legend—the sale of a human soul to a devil—has existed. The first recorded hint of its vitality is given in the sixth century story of "Theophilus." That story suited the early Christians in their efforts to stamp out the necromancing devices of evilly disposed persons prone to seek power by unholy means. The association of the name of Faust, however, with the legend is not more than 400 years old. The likeliest prototype of the modern Faust is the man of the same name who in Cracow boldly proclaimed himself a professor of magic. In the sixteenth century stories Helen of Troy was bestowed by Mephistopheles upon Faust, and not until the middle of the eighteenth century does there appear a shadowy Margaret in the form of a "beautiful but poor girl" who afterward develops into the Margaret of Goethe.

The Dead Horse.

The smart traveling man stood on a corner in the little country village at dusk. He was looking for amusement, and the first object that attracted his attention was an overgrown boy, perhaps fifteen years of age, riding a horse that might have come out of the ark.

"Hello, sonny!" shouted the salesman. "How long has that horse been dead?"

Quick as a flash the boy replied, "Three days, but you're the first buzzard that has noticed it."

The traveling man moved on to the hotel.—Youth's Companion.

Force of Association.

While the owner of the touring car dismounted during necessary repairs, the young front wheel timidly asked the old back wheel:

"Don't you get weary of the social whirl—revolving and revolving and revolving?"

"You'll get used to it," said the old wheel. "Our owner is a spinster, with nothing to do but go round, till sometimes I feel like a Daughter of the Revolution myself."—Judge.

His View.

Willis—Do you think a man should be allowed to hold the highest honor in the United States more than four years? Gillis—Sure thing! I say, if a man can top the league in batting for ten or even fifteen years let him stay in the game for the good of the sport. —Boston Journal.

A Difficulty.

"When I marry the woman I want must be the possessor of brains."

"But suppose she makes the same requirement?"—Baltimore American.

Easy & Practical Home Dress Making Lessons

Prepared Especially For This Newspaper by Pictorial Review

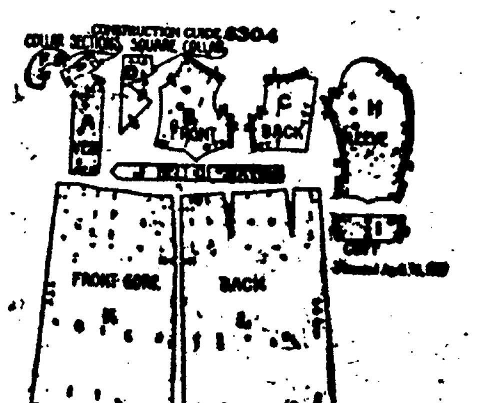
MORNING FROCK IN GABARDINE.

A wonderful effect of refinement and good taste is shown in this morning frock of mastic gabardine trimmed with brown silk.

The more simple the morning frock, the more simple and becoming it will be regarded when inventory of early Fall fashions is taken. The accompanying model in gaberdine exploits the fashionable mastic tone and has the sleeves finished with brown silk cuffs. To duplicate the model in medium size requires 6 yards 44-inch material, with ⅝ yard silk for the cuffs. If the vest and collar are made of contrasting material, ¾ yard will be required, if 27 inches wide.

The front and back of the waist are tucked and the tucks are stitched into position immediately after closing the shoulder seams. They should be about an inch wide. Before closing under-arm seams bring folded edge of tuck at lower edge of front to large "O" perforation and tack. Underface the front about an inch and close seam of square collar as notched, terminating seam at small "o" perforation. Face collar and sew to neck edge as notched.

Hem front of vest and adjust to position underneath front of waist, matching small "o" perforations. Gather lower edge of waist between double "TT" perforations; sew stay to lower



edge of waist, center-backs even, small "o" perforation at under-arm seam; bring lower front edge of front to large "O" perforation in stay and bring front edge of stay to center-front of vest.

Now find double "TT" perforations on sleeve and gather before sewing up seam. Close cuff seam as notched, as just under short sleeve, bringing small "o" perforations at upper edge of cuff to corresponding perforations in sleeve, and stitch to position along lower edge of sleeve. Sew into armhole.

The skirt comes next. Slash front fore to left of center-front on double "oo" perforations for opening. Join gores as notched. Form box-pleats, creasing on lines of slot perforations; bring folded edges to corresponding lines of small "o" perforations; stitch from upper edge to single small "o" perforations and press. Gather upper edge of skirt between the pleats. Sew to lower edge of waist over stay, center-fronts and center-backs even, large "O" perforation at under-arm seam.

The belt of self-material gains an odd finish by being secured with a buttonhole lapped over a button of brown silk.

Pictorial Review Costume No. 6304. Sizes 32, 34, 36, 38, 40, 42, 44 and 46 inches bust. Price, 15 cents.

Economy Hints

A penny saved is a penny earned.—Benjamin Franklin.

ARTICLES that are worn more or less evenly in all parts are best not patched, because, the surplus material of the patch being newer than that of the garment, it will only stain or tear it.

When patching is referred to as repairing it implies putting in entire new portions of a garment, such as bands, cuffs, collars and facings, and is best learned from the ways of making the garment. The ordinary patching is cutting out worn or torn parts and putting in better material. The patch must be of the same substance, color and quality as the original material.

Entirely new material, being stronger than the garment, should not be used. If partly worn pieces are not available it is best to choose thinner material. Wash fabrics should always be washed before using. Dresses generally lose some of the original color through wearing, and one may fade a patch in the sun to the right tone before using. The first principle in patching is to have the patch show as little as possible when finished.

In inserting a patch care must be taken to have the warp of patch and article run in the one direction. Selvages usually all run lengthwise on garments because the warp threads have more strength. When the position of the selvage cannot readily be determined pull the material in different ways; the stronger or warp threads will yield and stretch less than the woof; or fray out a few threads and you will find the warp smooth against a wavy appearance in the woof.

There are many ways of preparing and setting in these patches, but a few usual rules are to be observed. The widths of hems (suited to the thickness of the material) must be the same at each side; the corners must be firmly and securely sewed; the patch must be on the wrong side when finished.

An easy method is to hem the patch on the wrong side and then fell it on the right. Strike or mark on the right side of the material where it is to be cut away, then mark (on the right side) for the seam allowance, usually about one-quarter inch; lastly mark the actual width of the fell according to the thickness of the material. This last marking or striking is on the wrong side, as that is where the patch is to be sewed on.

NEAT FOOTWEAR.

The Fad Styles Should Be Avoided by Women.

Regarding footwear, one cannot lay too much stress on the fact that it is one of the most important features of feminine wardrobe this season. Nevertheless the woman of good taste will disregard the many fad stockings and shoes offered to her and will select quiet, elegant pedal coverings that will distinguish her from the great mass who rush in where angels fear to tread.

It is perfectly good taste to wear the spats of white, of tan or pale gray with the morning or afternoon costume. With the latter, however, may be worn a low shoe of white, of gray or black kid—according to the costume—with trimmings of a contrasting color.

It is always better judgment to have the hosiery match the color of the dress or suit. This makes less awkward, in effect, the woman to whom the very short skirt is not becoming, and it makes less conspicuous the unshapely ankle which offends the eye of the esthetic.

After several seasons of buckle ornamentation an era of simple lacings or bow decoration has set in. Very few buckles are seen even in connection with the dancing slipper. Bronze vamps with champagne uppers are among the novelties offered for wear with the demi costume. They continue the color scheme of the costume and thus counteract the grotesque line of the very short skirt.

Shoe trees have improved vastly within the last few seasons. To a very large extent the wooden forms have been supplanted by those of metal.

Orange Mint Relish.

Take four large oranges, peel carefully, slice and cut into cubes the size of dice. Add an equal amount of pineapple prepared as above, sprinkle with four tablespoonfuls of powdered sugar, two tablespoonfuls of fine chopped mint, one tablespoonful of lemon juice and one tablespoonful of sherry wine. If the pineapple is not fully ripened crush enough to add a tablespoonful of the juice. Stir together lightly to prevent mashing the fruit. Serve in sherbet glasses cold and garnish with candied cherries or fresh cherries or other berries, as preferred.

Cottage Cheese Hint.

In making cottage cheese use an enameled ware colander in which to which to press it. Any milk product is very easily affected by its surroundings, and a metal colander may not only give a flavor, but is apt also to slightly darken the cheese, which should be of snowy whiteness.

After it has thoroughly drained add salt, a good sized piece of butter and a tablespoonful of sweet cream. Mix, cool on ice and serve while fresh.

LURING WILD GEESE.

Live Decoys Are Often Used and Made to Play the Traitor.

American wild geese each spring migrate from waters of the southern states to the shores of the Arctic in northern Canada. The two great common varieties of the bird are the honkers and the wavy, or white, goose.

Both of these are extensively hunted. Covering, as they do, about 5,000 miles on their annual migration, these birds rest at various places en route and are thus shot by sportsmen almost across the length of the continent. The birds have a peculiar trait of always leaving one of their number on lookout while the rest feed.

To aid in the shooting of wild geese live wild ones, captured young and raised in captivity, are often placed in feeding grounds in likely territory on the line of flight of the migrating flocks. These decoys are terrible traitors and by their calling often bring the flying ones within shooting distance of the sportsmen, who lie in hidden pits near at hand.

Painted decoys, shaped like geese and made of steel, are also used by the hunters. In the latter case the men, from their hiding place in the pits, call the birds by using a goose call, a metal instrument like a flute, which mimics the sound of the goose with remarkable realism.—Philadelphia North American.

WRITING ON METALS.

By the Use of Wax and Acids Etchings May Easily Be Made.

Usually a man attempts to put his name on his metal possessions by scratching with a file or knife point and makes the poorest sort of a job. It is really very easy to write on any metal—the blade of a jackknife, a watchcase, skates—if one happens to know how, and the attractiveness of the inscription is limited only by the artistic ability of the individual.

Cover the place where you wish to write with a thin coating of melted beeswax. When the wax is cold write plainly with any pointed instrument, being particular to cut the letters through the wax to the metal.

Then mix one ounce of muriatic acid and one-half of an ounce of nitric acid, or smaller quantities in the same proportions (and remember that those acids are deadly poisons), and apply the mixture to the lettering with a feather, carefully filling each letter.

Allow the acids to remain from one to ten minutes, according as the etching is to be light or deep. Next dip the article in water, wash out the acids and melt off the wax, and the thing is done. A little oil should be applied as a finishing touch. Gold, silver, iron or steel can be marked in this way.—Youth's Companion.

Berthollet and Robespierre.

It is said that the celebrated savant Berthollet in the most dangerous times of the republic sustained his fearless love of truth. Some days prior to the ninth Thermidor a sandy deposit was found in a barrel of brandy intended for the army. The contractors, suspected of poisoning, were immediately arrested, and the scaffold was already prepared. Berthollet, however, examined the brandy and reported it free from all adulteration.

"You dare maintain," said Robespierre to him, "that that brandy does not contain poison?"

As his reply Berthollet drank off a glass, saying, "I never drank so much before."

"You have plenty of courage!" exclaimed Robespierre.

"I had more when I signed my report," replied the chemist, and here the matter terminated.

Seventh Century Needlework.

Before the end of the seventh century needlework was carried to great perfection in convents, where it was used for the establishment of the church and the decoration of priestly robes. Artists did not think it beneath their dignity to trace the patterns used for embroidery in their natural colors. A certain religious lady, wishing to embroider a sacerdotal vestment, asked no less a personage than St. Dunstan, then a young man, but already noted for his artistic skill and taste, to draw the flowers and figures, which she afterward worked in gold thread. —Exchange.

Easily Arranged.

A man took the following telegram to a telegraph office: "Mrs. Brown, Center Street: I announce with grief the death of Uncle James. Come quickly to read the will. I believe we are his heirs. John Black."

The telegraph clerk, having counted the words, said, "There are two words too many, sir."

"Cut out 'with grief,'" was the reply.—Chicago News.

In These Martial Days.

"You must not be so quarrelsome, Willie," said William's father impressively. "Remember that 'the meek shall inherit the earth.'"

"Maybe they will hereafter," responded the young militant, "but around in my school they are used to wipe up the earth."—Chicago Herald.

What It Will Be Called.

Teacher in Civics—When we have everything in common and your business is everybody's business, what is it called? Observing Student—It is usually called gossip.—Judge.

Corrected.

Mr. Hennypeck (peevishly) — When you tell me to do a thing, like a fool I go and do it. Mrs. Hennypeck (acridly)—No; you go and do it like a fool.—New York Post.

TODAY'S FASHION NOTE.

A brassiere of substantial linen, trimmed with lace ruffles and hand-embroidery. The petticoat is a two-piece model, suitable to development in lawn, nainsook or crepe. For the brassiere average size requires 3-4 yards of 36-inch material; for the petticoat, 1 7-8 yards 36-inch material.

Pictorial Review Brassieres No. 4854. Sizes, 32 to 48 in. bust. Price, 10c. Petticoat No. 6074. Sizes, 22 to 34 in. waist. Price, 10c. Embroidery Design No. 11741. Transfer Pattern, 15 cents.

The Kitchen Cupboard

REFRESHING SUMMER DRINKS.

TEMPERANCE Fruit Punch.—Cut up as many different kinds of fruit as desired and mix well. Make a rich sirup of sugar and water, boiled. Pour over the fruit and flavor to taste with lemon juice. Cool and let stand in the icebox for several hours for the fruit flavor to develop and blend, then add plain, cold or charged water and serve. For twenty people you will require a solid quart of fruit sirup, a cupful of sugar, two quarts of water and the juice of six lemons. Freshly brewed tea may be added with good effect.

Raspberry Punch.—If raspberry sirup or vinegar has not been put up at home a commercial article can be obtained. Dilute with carbonated or plain water, then add lemon juice and sugar to taste and bits of pineapple, orange, banana, etc. A tablespoonful of concentrated raspberry juice is usually enough for an ordinary tumblerful of punch.

Raspberry and Currant Punch.—A pleasant drink is made of raspberries and currants, a pint of the former to a quart of the latter. Bruise the fruit in a preserving kettle with a potato masher and pour over it two quarts of cold water. Put the kettle over a moderate fire, where it will heat gradually. After it begins to boil, remove the kettle from the fire, pour the contents into a jelly bag and let it drain through the bag into a large bowl. When it is clear and cool, sweeten it and serve in little glasses with a little chipped ice.

Canton Punch.—Chop one-half a pound of Canton ginger and add one cupful of sugar and four of cold water. Let it stand for thirty minutes. Bring gradually to the boiling point and let boil fifteen minutes. Add one-half cupful of lemon juice and one-half cupful of orange juice. Cool, strain and dilute with crushed ice.

Crab Apple Wine.—Squeeze the juice from the crab apples the same as for cider. Let stand twenty-four hours. Put in casks and add two and one-half pounds of sugar to each gallon of juice, and let it ferment for four weeks or until all the bubbles cease to rise, saving out enough juice to keep filling up the cask as it ferments. Then bottle.

New England Ale.—This old fashioned drink is prepared by steeping in boiling water a bunch of sassafras for ten minutes, then strain and add to taste a cup of ripe blackberries, two tablespoonfuls of molasses and two sliced lemons. Cover closely and have thoroughly chilled, adding at serving time two pint bottles of soda water and a teacup of blackberry sirup. Serve from a stone pitcher into small chilled earthenware mugs.

Anna Thompson.

Miss Lillian Waldhorn of Oneida st. is visiting in Utica.

ALUMINUM PLANT GETS RUSH ORDERS

The Aluminum Container Corporation of West 3rd st. has recently received several large orders and the force is working overtime in an effort to fill them on contract time. Several employes of the company who were laid off some months ago when work became slack at the plant, have been ordered to report again. Christopher Jamswold is now manager of the plant.

YACHT CLUB GOES TO THREE RIVER POINT

The Fulton Yacht club will cruise to Three Rivers on Sunday, August 29, where several races will be held and dinner will be enjoyed. The committee in charge of the run will announce the program later and it is hoped that every member of the club will make arrangements to attend.

PASTOR DRIVES CAR THAT KILLS CONTRACTOR

Newburgh, N. Y., Aug. 21.—William H. Hilton, an official of Newburg, N. Y., and a well known contractor, was killed by an automobile there yesterday as he stepped from a trolley car, driven by the Rev. Frederick Whitney, one of his closest friends. The pastor was held for alleged manslaughter.

James Butts, twenty-eight, of No. 1819 Second avenue, this city, was severely injured at Montclair, N. J. The driver of the auto sped away.

MARSHALL FOR ARMY TRAINING IN SCHOOLS

Kansas City, Mo., Aug. 21.—Vice-President Marshall, declared himself in favor of military training in the schools, in a statement here today.

"I do no tbelieve in forced military training," he said. "It seems un-American, but boys and young men could be trained in the high schools and colleges without loss of time."

Bread as sweet as the "kind your mother used to bake," is the people's verdict applied to Black company's bread. adv

MODERN TORPEDO TERRIBLE WEAPON

Weighs 2,800 Pounds and Is Twenty-three Feet Long.

COST IS $3,000 TO $9,000.

Will Tear Through Side of a Double Skinned Ship and Then Explode. Loaded Only With High Explosive, Either Guncotton or Nitroglycerin. What Happens as It Strikes Prey.

The up to date torpedo is a loaded automobile shaped like a cigar, made to run in a certain direction in a fixed time and explode when it strikes something that offers sharp resistance. A reliable one, properly equipped with explosives and running gear, costs from $3,000 to $9,000, according to size. A large torpedo is twenty-three feet long, twenty-one inches in diameter and weighs 2,800 pounds and it tears a hole 30 by 10 feet in the bottom of a ship of two skins.

"The torpedo," said an expert of the navy, "has four principal parts—the war head, which carries the explosive; the air flask or fuel chamber, the engine and the steering gear and the balance chamber. The explosive head is filled with some high explosive—guncotton, etc.—and is provided with a percussion detonator. This strikes a hard or solid substance, and the explosive goes off instantaneously.

Guncotton or Nitroglycerin.

"The explosive head is the foremost compartment of the torpedo and contains the deadly charge and the pistol with which it is fired. Guncotton and nitroglycerin are the high explosives generally used for submarine purposes. There are many others, but these form the foundation for most of them. Gunpowder of the sort used by the country boy to shoot at a rabbit or a squirrel is no longer used. The high explosive is more powerful than gunpowder. Gunpowder burns quicker than the high explosive, and it splutters around if scattered on the ground, but it explodes if confined in a close place. The high explosive will burn if you stick a match to it, but not so easily as gunpowder. A sudden blow will apply heat to an explosive and set it off.

"The explosive head strikes the bottom of a ship, and a 'detonation,' not an 'explosion,' takes place. The mass of high explosive seems to explode at once, and that is what is desired, as the most sudden blow will knock a hole in the ship. Guncotton is detonated by fulminate of mercury, which, when ignited by a blow, expands 2,500 times its original size. The sudden expansion gives a blow to the guncotton that detonates it."

This Is What Happens.

"What happens when the explosive head strikes?"

"A detonation follows instantaneously and blows the outside of the ship in, making a hole about 30 by 10 feet in size. There is no rule about the extent of the damage to the side of the boat. It may be twice 30 by 10 feet. The blow drives in both the outer and inner skins of a vessel like the Lusitania. The double bottom is not sufficient to break the force of the torpedo if it strikes well. A glancing blow may not cause an explosion.

"The torpedo would have about the same effect on a collier that it would on a big merchant vessel. We have never tested thoroughly the effect of a torpedo blow on an oil tanker such as the Gulflight. We are doing that now.

"After the torpedo struck it would be blown to bits, and most of the pieces would go to the bottom of the sea. Some fragments might go inside and become entangled in the splinters made by the detonation.

"The torpedo must do many things in a very thoroughgoing way. It cannot succeed in its mission if a cog slips on the way, for it is primed for automatic action. Everything must be just right and in its proper place when it starts on its journey of destruction. It has to run at a certain speed so as to get to its destination on schedule time, to go a certain calculated distance in that fixed time, and travel in a certain direction to make sure of its mark. It cannot loaf, vary from the course outlined for it or dip down or shoot up on the way. If anything goes wrong all is off with that torpedo, and the thousands of dollars invested in it disappear beneath the waves.

"Torpedoes run from 1,000 to 10,000 yards to reach the object they are sent to destroy. It requires about eleven minutes to make the longer distance."

"What if the torpedo struck a whale on the way?"

"It would be bad for the whale, although the torpedo might not explode unless a big solid bone was hit."

Of Many Sorts.

"The torpedo is not known intimately by many naval officers," said one specialist. "There are all sorts of torpedoes. Some of them have individuality. No two seem to be exactly alike. We continually improve our knowledge of them. Each torpedo has to be carefully studied and corrected for its one voyage of destruction. Like the bee that stings, it gives up its life for one sting. The ship it strikes sinks. The 200 pounds of guncotton in its warhead tears the ship so that it cannot escape. It is the most terrible weapon of warfare known to the world."

BIGGEST CROP IN WORLD'S HISTORY

1915 Record In United States Surpasses All Others.

$1,135,100,000 FOR WHEAT

Of This Huge Sum It Is Said That the Farmers Will Get $960,000,000—All Products Except Apples Show Tremendous Increase In Bulk and Value. The Government's Figures.

YIELD, BUSHELS.

	Aug. 1, 1915.	Change from 1914 final.
Wheat	966,000,000	+ 72,000,000
Corn	2,918,000,000	+246,000,000
Oats	1,402,000,000	+260,940,000
Barley	217,000,000	+ 22,047,000
Rye	44,000,000	+ 1,000,000
Flax	18,000,000	+ 2,441,000
Rice	30,000,000	+ 6,351,000
Buckwheat	18,000,000	+ 1,000,000
Tobacco	†1,083,000,000	+†48,321,000
Potatoes	431,000,000	+ 16,921,000
Apples	205,000,000	— 48,000,000
Peaches	60,000,000	+ 6,000,000
Hay	*75,000,000	+ *5,000,000

† Pounds. * Tons.

The total value of this year's food crops in the United States will be over $5,300,000,000. Of this total wheat makes up $1,135,100,000, corn $1,750,000,000, oats $841,000,000 and hay $975,000,000.

Uncle Sam's harvest for this year would—

Finance the construction of thirteen Panama canals, complete and ready for operation, at an estimated cost of $400,000,000 apiece.

Pay for the cost of the whole European war for more than three months.

Build the United States a fleet of 310 super-Dreadnoughts at $17,000,000 per ship.

The actual quantities of grain and forage involved would feed every soldier under arms in Europe and supply grain and forage for their horses for rather more than ten years and would similarly feed the entire United States army for nearly 2,000 years.

This year's wheat crop in the United States will probably form one-fourth of the world's total, the year's corn crop three-fourths of the world's total and the oats crop nearly one-third of the world's total.

No nation in the history of the world ever harvested a crop remotely to be compared, either in bulk or in value, with the harvest of grain and fruit which the farmers of the United States are preparing to gather. A large part of it will be sold to Europe's hungry and fighting millions.

Remarkable as was the crop of 1914, in itself far excelling all previous records, the reports of the experts of the department of agriculture show that the harvest of 1915 will exceed it in almost every particular. The apple yield alone among important products will fall below the 1914 harvest.

The wheat harvest this fall may possibly, for the first time in the history of the country, go above a billion bushels. The present and conservative estimates of the department of agriculture call for a yield of 966,000,000 bushels. On the markets experts on prices calculate this crop will stand the country in about $1,135,100,000. The farmers are expected to put $960,000,000 of this directly in their own pockets.

Due to Big Acreage.

The increase in the wheat crop is practically entirely due to the increased acreage under cultivation this year, as the average yield per acre is expected to fall slightly below that of last year, being put at 16.3 bushels to the acre, where last year's yield was 16.6 bushels to the acre.

The corn crop, like the wheat, is threatening to pass another memorable mark by turning out 3,000,000,000 bushels, the advance estimate now being 2,918,000,000 bushels. This is an increase over last year's yield of 245,000,000 bushels. Marketed at 60 cents a bushel, this crop will be worth $1,750,800,000 to the country.

The expansion of the corn crop is due at once to increased acreage under cultivation, and to a better yield per acre, the acre yield having been increased, in spite of the wet weather, from 25.8 bushels to 26.7 bushels. This crop will probably represent close to three-fourths the world's total production.

The oat crop, the third of the three great leaders, has increased over last year's record by nearly 25 per cent, the figures being for this year 1,402,000,000 bushels; for last year, 1,141,000,0000 bushels. Placed on the market the crop will bring, it is estimated, about $841,200,000. Thus these three crops alone represent a marketable addition to the nation's wealth of nearly $4,000,000,000.

Other Record Harvests.

The year's barley crop will, it is estimated, amount to 217,000,000 bushels, or 22,000,000 more than last year; the rye crop has been increased from 43,000,000 to 44,000,000 bushels; the rice crop from 24,000,000 to 30,000,000 bushels. Eighteen million bushels of buckwheat have been raised, as against 17,000,000 in 1914.

Smokers will be pleased to know that the department of agriculture estimates that there will be harvested 1,083,000,000 pounds of tobacco in the United States, where but 1,035,000,000 pounds were gathered in 1914.

Miss Nelson Drives Winners.

Miss Elizabeth Nelson, daughter of Oliver Nelson of Oneida st., drove F. C. Pendergast's team of high-steppers in the women's driving class and won over Charles Halstead's entries. S. W. Pendergast won first and F. C. loose and fell rapidly until the canvas singles.

Miss Nelson, riding her own entry, took second in the saddle class, with Edward Jones of this city, first. Jones made a clean sweep of the saddle classes, and F. Delane, Norman Harding, Bert Ware and Charles Mangot also won honors.

Hammond Drops Into Crowd.

Monsieur Hammond, the nonchalant young man who did the high wire act in front of the grand stand early in the afternoon and a balloon ascension at 4 o'clock, thrilled the crowd yesterday by dropping from the balloon into the park, a feat seldom seen at the local fair. Hammond's balloon rose straight up when it was cut loose and a slight wind from the northeast started the balloon for the lake. Almost 800 feet up, just above the main building, Hammond cut the parachute loose and fell rapidly until the canvas opened. The balloon slowly turned over and then started for the ground at terrific speed. An automobile owner whose car was directly in the path of the descending gas bag, hurriedly cranked up and backed his car away. The balloon reachd the ground just after the parachute jumper and landed with a loud crash between two tents. Hammond was headed for the roof of the building but he guided his parachute to the left and dropped in front of Myron Stranahan's automobile which was completely enveloped by the falling canvas.

The worst is yet to come—the flood of smoking tobacco testimonials from the generals when the European war is ended.—Fremont (Neb.) Tribune.

It seems that Harry Thaw is one of the few really sane persons who are willing to motor through to San Francisco.—Grand Rapid (Mich.) Press.

LEGAL NOTICES

NOTICE TO CONTRACTORS

State of New York, Office of the State Commission of Highways, Albany, N. Y.—Pursuant to the provisions of Chapter 30, Laws of 1909, as amended by Chapter 646, Laws of 1911, and Chapter 80, Laws o i1913, sealed proposals will be received by the undersigned at their office, No. 55 Lancaster street, Albany, N. Y., at 1 o'clock p. m. on Thursday, the 26th day of August, 1915, for the improvement of the following highways: Oswego County—Road No. 5408; Fulton City; East First st. Mileage, 0.36.

Maps, pans, specifications and estimates may be seen and proposal forms obtained at the office of the Commission in Albany, N. Y., and also at the office of Division Engineer, Chas. J. McDonough, 433 South Salina St., Syracuse, N. Y.

The especial attention of bidders is called to "Information for Bidders" in the itemized proposal, specifications and contract agreement.

Proposals for each road or contract must be represented in a saparate sealed envelope, endorsed on the outside with the name and number of the road or contract for which the proposal is made. Each proposal must be accompanied by a certified check payable to the order of the State Commission of Highways for an amount equal to at least five per cent. of the amount of the proposal which such check accompanies.

This check will be held by the Commission until the contract and bond are duly executed.

The successful bidder will be required to give a bond for fifty per cent. of the amount of the contract; such bond to be executed by a surety company to be approved by the Commission, or a bond secured by the deposit of collateral securities to be approved by the Commission.

The right is reserved to reject any or all bids.

EDWIN DUFFEY,
Commissioner.

I. J. MORRIS,
Secretary.

THE FULTON EVENING TIMES

"A Herald of Progress"

Volume 1, No. 210. Established, Dec. 17, 1914. MONDAY, AUGUST 23, 1915. Price One Cent

How the People of Buffalo Will Keep Track of What Their New Commissioners Do. See Tomorrow's Issue of This Paper for No. 3 of the Wilmer Series of Articles, "Running a City Like a Business."

INJUNCTIONS MAY BE SERVED UPON BOARD; WIDER STREET OPPOSED

According to those who profess intimate knowledge of the situation, the opposition element to the plan of making First st. 38 feet wide, between Rochester st. and Broadway, will come to the meeting of the Board of Public Works tonight, armed with injunctions against any action of the board which will show intent to carry out the plan already under way. The meeting tonight is for the purpose of hearing complaints against the proposed improvement and a record attendance is expected.

The board recently advertised its plan to make the street 38 feet wide when the paving work is started and at the same time rescinded all previous resolutions to widen the street, inasmuch as some steps were taken at previous meetings which might stand questioning if the matter came to litigation. Therefore, the board began once more, and drew a resolution to pave the street four fet wider than its present width.

Several property owners along the street are bitterly opposed to the plan, arguing that the improvement is not justified by the traffic on the street. Among these, Almon Bristol, Fred Gage and George Mason are the most prominently opposed, and rumor credits them with instituting the injunction proceedings.

DEMENTED MAN RUNS AMUCK

Fulton Man Made Savage Attack on Residents of Quiet Village; Gets Hearing Today at Sterling.

John Hansen, who says he lives in Fulton, and was employed for some time in one of the local paper mills, ran amuck at Sterling Station Saturday morning and stole a bicycle, attacked one man whom he beat into unconsciousness, attacked a woman neighbor and her husband, and thoroughly terrorized the population of that sedate village before he was corralled by the local police force after a chase. The Sterling police and doctors who have examined him are of the opinion that the man is demented and has probably escaped from an institution. He is of slight stature, about medium height with dark hair.

Marcus Howell, who lives in the vicinity of the station, was awakened early Saturday morning by a noise in his back yard and, looking out the window, saw a man trundling his bicycle away. Howell hastily donned his clothes and reached the front door as the man was leaving the gate. As Howell approached, Hansen jumped at him and struck him in the head with a club, knocking Howell senseless. Then Hansen ran down the road to the home of Howard Williams and entering the rear of the house attacked Mrs. Williams, who was cooking breakfast in the kitchen. Her cries aroused her husband who came running to her assistance, and the maddened intruder struck him several times and then ran toward the railroad. Williams' cries for help attracted the attention of William Bellinger, who took after Hansen and came upon the man sitting placidly by the railroad track, eating a raw ear of corn. Bellinger, with the assistance of the police, took the man to jail.

Hansen will be arraigned before a Sterling magistrate today and will probably be held for the grand jury. He was able to make incoherent statements after his arrest, and told his captors that his home was in this city. No John Hansen is listed in the Fulton directory.

AUTO TORPEDOES A GRANBY WAGON

Projectile Struck Abaft Stern —No Casualties Beyond Slightly Scratched Automobile and Broken Shafts.

The hoodoo corner of Fulton, namely, the intersection of Cayuga and South Second st., was the scene of another accident this afternoon, in which, however, a railroad train played no part George Ives, who lives just out of the city on the Volney road, drove his automobile into the rear end of a democrat wagon, belonging to R. G. Bennett, a resident on the East River road. The force of the collision threw the horse to the ground and demolished the whippletree and shafts of the wagon. The horse was uninjured, and before it could run away was grabbed by several men.

Mr. Bennett had left his horse tied to a telegraph pole on the Cayuga st. side of the Whitaker & Bogardus office and was not in the wagon at the time it was struck. Witnesses of the collision state that there seemed to be a mass of vehicles at the corner, and to avoid a collision with a rig coming down the hill from the opposite direction, Mr. Ives steered to the right, but was unable to avoid hitting the Bennett wagon. The automobile, aside from being slightly defaced, was not damaged.

JEWISH RESIDENTS TO AID WAR SUFFERERS

The Jewish residents of Fulton and Oswego have combined to promote a benefit package party which is to be held in Oswego tomorrow evening. The proceeds will be added to a fund which is being raised in the United States towards assisting the Jewish war sufferers in Russian Poland, and it is expected that a considerable amount will be realized. The coming affair is announced as the first of a series of benefit parties which will be held in this vicinity for the assistance of the war sufferers, and in addition, a subscription fund will be started in both Fulton and Oswego at once.

RUNNING A CITY LIKE A BUSINESS

No. 2—Instead of Political Bosses Buffalo Will Have Salaried Bosses Whom the Taxpayers Can Trust

Some details of the commission charter which will go into effect in Buffalo on January 1 next are of general interest. Buffalo has what might be called a many-men government. That does not signify that it has not, in practice, been a one-man government most of the time. The experience of nearly all American cities have been much the same. With a large council elected by wards and several executive heads, each more or less independent of the other, it generally is necessary, if the city is to get anywhere at all, that somebody take the reins and drive.

The grade of officials secured when power is divided among a multitude is such that most of them, however well-meaning, simply wouldn't know what to do if somebody did not tell them. Moreover even those who may have fairly definite ideas as to what they wish to do or what ought to be done are rarely forceful enough to bring their associates into agreement with themselves. The average man in city politics either can't form an opinion of his own or, if he forms one, can't change it to conform with the opinions of others whose co-operation is necessary unless some power that he fears or respects gives orders. Hence, the city boss. And where there is a boss, there is one-man government in reality, whatever the number of responsible officials.

CHOS[illegible]

Buffalo's commission charter recognizes this weakness of human nature and attempts to turn it to the purposes of good government. It aims to have the city bossed, not by some irresponsible politician outside the government, but by men who compose the government. By vesting the entire executive and legislative authority in five men, it makes each a boss in his own department, and it expects that each will be developed into a big and forceful many by the very nature of the duties and responsibilities which he must assume. These officials will be paid big-men salaries—$8,000 a year for the mayor and $7,000 each for the commissioners. The charter gives them four-year terms, and it does not subject them to recall.

The explanation of that omission makes a story by itself. As an executive each of these five bosses is independent in his own department. But in their legislative capacity they must learn to do team-work. In order to pass an ordinance or an appropriation three out of the five must vote affirmatively upon it. In some of the more important cases a four-fifths vote is required. For instance, if an official during the fiscal year wishes an increase of the appropriation granted him in the annual budget, it can be obtained only by a vote of four of the five commissioners.

THE MAYOR'S ONLY POWER.

The mayor is made a bigger boss than the commissioners only in this respect—he may investigate them. Conversely, of course, they may investigate him, but they will have to act together to do it. Except for some few dignities, which are more impressive than important, the may or is simply one of the five commissioners, degisnated to administer the department of public safety. He has a vote in the council, but he has no veto power.

(No. 3 of this series will be published Tomorrow.)

(Copyright, 1915, by S. S. McClure.)

JOBS FOR JOBLESS; WORK, PULLING FRESH ONIONS

The Employment Bureau of the Chamber of Commerce has received word from an employer of labor who may need from ten to twenty men next week. The work for which men may be wanted is pulling onions, wages are 17 1-2c per hour, and the men must board themselves. The employment bureau will receive applications during the week, and will put the applicants in touch with the employer as soon as the condition of the crop and the weather is favorable.

"YOU'RE IT," IS THE WAY HARDWARE MEN EXPRESS LIABILITY FOR FLOODS

Cellars in business blocks along South First st. resembled miniature lakes yesterday and this morning. Saturday night's torrent of rain, coupled with the downpour yesterday, rushed into the unprotected cellars and ruined goods valued at several hundred dollars, the business men claim. All the store-keepers who suffered from the deluge are loud in their denunciation of the mismanagementwhich allowed large holes under the curbing to remain uncovered, in spite of the threatening weather all last week, but up to noon today, there seems to be a question as to the persons responsible.

L. A. Palmer of the Palmer-Hope Co., who came down late Saturday night to find his cellar six inches under water, says Frank Rumsey, superintendent of the Board of Public Works, is the responsible man, inasmuch as Rumsey's squad dug a hole under the curb for a curb box and failed to fill it in properly.

Mr. Rumsey lays the blame to whatever company or persons excavated for a pipe, sewer or gas, midway between the Palmer-Hope and Druse stores. There the water poured down in a flood and in less than an hour after the principal downpour began Saturday night, both cellars were filling rapidly, and a great deal of stock, the exact value of which has not been determined, was ruined, although Mr. Palmer wishes to deny the report that any of his stoves were floating on the cellar bottom.

The Druse basement carried eight inches of water yesterday morning, but the paving officials claim no water would have entered had not the Palmer-Hope men built a sort of [illegible] wall around the [illegible] erected stretches [illegible] the gutter and prevented the water from flowing down to the corner sewer, the engineers claim, and when it backed up, it rushed into the Druse block.

Feeling ran high in that section of the business district Saturday night, and many spectators were attracted by the flow of heated language that passed between some of the property owners and the men in charge of the paving work. Mr. Palmer refuted the claim made by the engineers that no water entered the Druse cellar until he erected the bulkhead by saying that eight inches of water stood in the Druse cellar before he had begun work.

The Decker cafe in the Waldhorn block also sustained great damage by the invasion of the foreign element, and other stores in that vicinity only escaped inundation by narrow margins.

All over the city the sewer drains proved inadequate during the heaviest downpour Saturday night. In West First st. the water stood several inches deep on the brick paving, and the Broadway bridge roadway was a small river.

The high winds did much damage to plants and shrubs all over the city and campers in the vicinity of Pathfinder Island and Indian Point report a small hurricane in that vicinity. Several camps were flooded and the occupants were obliged to take shelter with neighbors.

I. O. GOOD TEMPLARS GET-TOGETHER MEETING TODAY SESSIONS OPEN TOMORROW

Delegates to the annual convention of Good Templars of the State of New York were arriving in this city all day yesterday and today. The first meeting of the delegates will be held tonight at the Odd Fellows' Temple in Oneida st. at 8 o'clock. This meeting will be a get-together social event for the purpose of making the delegates acquainted with one another, and the registration of all delegates will also take place at that time.

The first session of the convention will take place tomorrow morning at 9:15 o'clock with a prayer and praise service under the direction of Rev. G. W. Sisum, grand chaplain. The opening ceremonies will begin at 10 o'clock and at 10:45 the grand lodge degrees will be conferred, followed by a roll call of officers and committees. The reports of the various committees will be read and at noon a recess will be taken.

The veterans' association will hold a business meeting at 2 o'clock and at 2:30 p. m. the convention will be once more called to order. At 3 o'clock the department of juvenile work, conducted by Miss Marjorie Bowerman, will meet.

The sessions will close at 4:30 p. m. A public meeting will be held at the First M. E. church at 8 p. m. Tuesday evening.

Thomas Mott Osborne, warden of Sing Sing, disbelieves in capital punishment and says so vigorously. During the week of justice and the courts at the Chautauqua institution, Chautauqua, N. Y., Warden Osborne spoke to a large [illegible] audience in the amphitheatre. After the special questions were asked and answered, among others being that of capital punishment. Mr. Osborne said: "I believe in the state doing away with capital punishment. Every one who is directly connected with it hates and disbelieves in the hideous thing. If the governor of this state were by law required to witness every death in the death chamber we should not have any more executions. I can find nothing in the Commandments that will show any reason why the responsibility of taking a life is changed when 500,000 people take the life instead of five. It is the one place in life where we have brought ourselves to believe that a debit can be balanced by a debit. The old Mosaic law of 'an eye for an eye, a tooth for a tooth,' was designed for a different state of society and was a prohibition from going any further. There is nothing in the teachings of Jesus Christ that can give us any ground for considering ourselves not accountable when we take the lives of human beings in this way."

The civil war taught the economists of the southern belt of states that a mistake had been made in living closely up to the theory that "cotton is king." What the south needed most to keep the war going was grain to supply the troops and the civilian population. The European war threatened to make the great southern staple a drug on the market, and this year, according to the Manufacturers' Record, the grain production of the south will show an increase of about 25 per cent as against an increase for the country at large of 5½ per cent. The total increase in the south will be in the neighborhood of 300,000,000 bushels, the cotton states contributing fully two-thirds of the increase. Arkansas, Mississippi, Louisiana and Texas, which were cotton "poor" in 1864 and finally burned immense stores of it to prevent it from enriching the enemy, will be represented in the grain increase for 1915 by over 120,000,000 bushels.

The destiny of Haiti may be that of Cuba. If the United States starts in on pacification it will finish the job, possibly more energetically than in the case of Cuba. We have learned much about our southern neighbors during the past fifteen years. It has also worked the other way. What we do with Haiti in 1915 may be a warning to other turbulent South American peoples. A lesson which should be driven home is that foreign recognition saddles upon the beneficiary the obligation to prove worth it and worthy of it.

A bunch of New England college men are earning $3 a day in the Kansas harvest fields. They are athletes and expect that the hard labor will keep them "fit" for the gridiron when the season opens. Surely farm work affords better practice for muscles than waiting on table.

United States marines pacify the Haitian situation by disarming the scrappers. And this country is believed to be in a position to do some disarming in the European muss any time it takes a notion.

First medical aid by radio may work all right for many ills our flesh or mind is heir to, but a pipe line from the nearest bar is the only way to hurry up the favorite snake bite cure of our daddies.

It is over a year since Franz Josef sent that little note to Servia to be good. Surely it takes a long time to swat Austria, and so many on the job too!

The newest submarine can cross the Atlantic under or over water and back, providing no other undersea voyager prevents it from getting back.

Judging from the year end boasts on all sides, the belligerents have been having an "aitch" of a time putting it over the other fellow.

ECONOMIC THOUGHTS

At a recent convention of financiers and economists a number of solemn forecasts of the business and industrial conditions which will affect this country after the war ends were made by many experts and heavy-weight captains of trade and production, whose opinions pass for much in the world at large.

One of the speakers, George E. Roberts, assistant to the president of the National City Bank of New York, said some things that have peculiar bearing upon Fulton and Fulton people, from the fact that here we are beginning to recognize the necessity of encouraging thrift among the people who work for wages, and because of the recent offer made by the Electric Company to the pupils of the various schools that they may grow up to become citizens firm in the belief that by "saving in little things they can be liberal in great ones."

That The Evening Times' readers may have the benefit of Mr. Roberts' talk to the bankers the following is reprinted:

It would be some compensation for the losses inflicted by the war if out of its experiences there might come a better appreciation of the genuine community of interests that exists in the modern world. When this is understood it will be seen that no nation is in the way of any other nation, or can ever be injured by the prosperity of any other nation. The richer each nation becomes the more capital it has to invest, the greater its powers of production, the more helpful it is to all the rest of the world. And so within our own borders we are interested in those enlightened policies which will promote the greatest possible efficiency in our entire population. The economic waste of war is impressive because it is so apparent, and because it seems to be so deliberate and wanton, but we are surrounded by waste on every hand. The waste of humanity in peace, the waste of idleness, of vice and ignorance. We need to understand that every dollar of capital saved and accumulated, no matter who owns it, is useful to the entire community, and that every idle or incompetent man represents a continuing loss to the community as compared with an industrious and efficient man.

After this war the whole world needs to join in a campaigin to promote efficiency and thrift. There is not one of the warring nations but could readily meet the interest on all its debts, without any curtailment of necessities or comforts, by simply eliminating common, everyday superfluities and waste. A great effort is being made, under the pressure of necessity, to teach this lesson of frugality abroad, but in none of them is it more needed than in the United States.

The idea is widespread in this country that the distribution of wealth is now more important than its production, and that idea finds expressoin in public policies. It is the greatest kind of a mistake, for not only is it certain that you cannot divide any more thanthere is, but also certain that any increase in the stock of wealth is bound to result in a wide distribution of benefits. Just as it is true that the destruction of wealth, by whomsoever owned, is a loss to all the world, so it is true that the creation of new wealth, by whomsoever owned, is a gain to everybody. All new wealth is either in the form of goods for consumption or of equipment intended to increase the supply, or facilitate the distribution, of consumable goods, and, [illegible] qualities of ownership, the end sought in all the activities of the business world is the creation and distribution of more goods for the millions. These are the fundamental facts which lie at the basis of all the social pregress of the past. We know that when 16,000,000 bales of cotton are raised in the United States, cotton goods are bound to be abundant and cheap for the millions. We know that when there is a big wheat crop bread is cheap for the millions. We know, also, that if the rising generation now passing through the schools were properly instructed in the practical arts of production, the output of all the necessaries and comforts could be enormously increased in the United States, and with a more effective organization of industry, the spectacle of want and anarchy, if not banished entirely, might be made very much less threatening than it now is.

The enlightened spirit of progress is exhibited by the work that some of the railroad companies are doing in conducting model farms, and employing lecturers to teach more scientific methods of farming along their lines, expecting to be compensated for their efforts by the greater prosperity of their patrons, and more traffic. In some of the states the bankers have carried on a similar propaganda. It is a good business policy, a sound public policy, and it is the most effective method of dealing with some of the serious problems of the time. The country needs an industrial leadership that will actually increase the national income, rather than a political leadership which makes capital out of discontent and promises impossible benefits through legislation.

The security and development of the social order depends upon sound ideas and the steady amelioration of the condition of the masses. The war with its waste and losses is a brake upon progress, and this makes it more important than ever that the latent capabilities of the people shall be developed and utilized.

Opinions

As Carthage Sees It.

The politicians who are trying to put one over on Congressman Mott by getting some one to run against him for the nomination in the Republican primaries will not succeed because a man with any sense knows that Congressman Mott could not be defeated in the district. He has made good in every way and is a great deal more popular with the people than ever before.

Senator Elon R. Brown is opposed to the short ballot amendment proposed by the Constitutional Convention, which he says is a delusion. There is one thing I like about the senator and that is you always know where to find him. He don't mince things, nor apologize, but hits right out from the shoulder for things he believes to be right. And that's a pretty good trait in a man. If the senator was not quite so strong a party machine man a lot of people would like it better, but what may we expect when he is one of the main spokes in the political wheel.—Carthage Tribune.

Our Lack of Thrift.

In these days of war and rumors of wars meagre accounts reach us of the doings and sayings of the various gatherings and features of the San Francisco Exposition. Among those of which it would be well to know more is the International Congress of Thrift now in progress.

It is a subject on which the American people can learnm üch. In this great resourceful country of natural advantages unmatched anywhere else on earth prosperity has been so easy and wealth accumulation so vast, placing us within 125 years far ahead of the growth of any other people in 10 times that period, that habits of carelessness and waste have become easy.

The old adage that the French housewife will feed a family on what her American sister throws away represents a fact extends all through our life, in public expenditures of every kind, in our enormous fire losses, 10 ope except Russia, in heavy "on top" expenses of corporate management, es pecially in trustified lines that as a rule wipe out the theoretical economies of large scale operation and very largely hampered the inventive genius and enterprise of our people, and in corresponding defects too general in our business, industrial and individual lines. What avoidance of these great wastes would have added to the estimated $125,000,000,000 of our national wealth can only be conjectured. At least the effect can be seen in the fact that while our per capita wealth is far beyond that of any other country, the percentage of thep er capita that does not share in it is one of the largest anywhere. Really the wholesale waste that cuts down what ought to be the heritage of comfort for every American family has, curiously also, been an element in the rolling up among us of fortunes that all the centuries haven ot begun to parallel elsewhere.

It is an economic truth only beginning to be duly appreciated that liberal expenditures beget prosperity in accelerating productive energies throughout all the ranges of industry. But this is true only of expenditures that really get a return. Those that result in better nourishment make a stronger worker. Those that bring a higher standard of living add the vigor of hope to his efficiency. But those that secure things only to throw away do no good to anybody, but offset in part the motive power given to production and trade.—Albany Argus.

County Extravagance.

New York has discovered the waste of county government and a plan of reorganization has been proposed. It is shown that a consolidation of departments could save the county of New York $1,000,000 a year. There is really no need of five county governments in the big city. The authority vested in the counties could be transferred to the greater city or to its boroughs. As a general rule county government throughout the state is the most extravagant and conforms less to present day ideals of progressive government. The glare of publicity seldom dwells upon county offices. Where publicity is lacking evils flourish. It has been shown by Comptroller Pendergast of New York that while the expenses of elective departments have increased 11 per cent. in a few years, the departments officered by appointed men have reduced expenditures 33 per cent. The great spenders are the men elected directly.—Watertown Standard.

POLITICAL COMMENT.

If the work of the Constitutional Convention is ratified at the polls that action will make the next session of the legislature the most important in many years. It will be the duty of the legislature to give definite form and direction to the policies outlined by the convention and to give statutory interpretation to the organic law as amended. It will be the occasion for the exercise of statesmanship not ordinarily expected or required of the New York legislature and by the legislation will much of the results of the Constitutional Convention be ultimately judged.—Rochester Post-Express.

* * *

Unless we have a tariff revision before the end of the war, we are going to have an industrial panic that will make the souphouse days of '93 look like dreams of prosperity. It is up to the people of this country and of every city in it to see that the party of protection, which has stood for prosperity, goes back into next year, and that is not the remnant of a party which Mr. Perkins is moving around with, but the good old Republican party which, for fifty years stood the test and produced a prosperity that made the people of the United States the most prosperous people in the history of the world.—Yonkers News.

OUR WASHINGTON CORRESPONDENCE

News Mostly of a Political Nature From the Nation's Seat of Government for Times' Readers.

Washington, Aug. 23.—(Special Correspondence) Nearly every man carries a pocket knife. Eighty per cent. of the cost of producing a pocket knife is expended for labor. Under the 50 per cent. tariff rates in 1889 the American production of pocket knives amounted to $730,000 annually. In 1892, under the 90 per cent. rates of the McKinley tariff (Republican) the production increased to $1,500,000, with an increase of revenue on importation of $148,000.

From 1893 to 1897, under the Wilson (Democratic) tariff of 53 per cent. the industry barely survived, sales shrunk 52 per cent., wages were reduced 25 per cent. and operatives employed but part time.

From 1897 to 1912, under the Dingley and Payne rates, (both Republican) the American production increased to $3,580,000, employing more than 4,000 operatives at wages averaging from $12 to $27 a week, compared with average weekly wages of from $4.30 to $8.00 in Austria, Germany and Belgium. Based on importations from 1909 to 1912, the Payne rate gave an equivalent ad valorem duty of from 80.63 to 77.66 per cent. Since 1897 three German factories employing 650 workmen and representing an investment of over $500,000, have been established in this country.

To a witness who showed that the importation of pocket knives, compared with domestic production was one to three, Mr. Underwood, then a minority member of the Ways and Means Committee, stated that inasmuch as this was a revenue-producing article, more than one-third of which was brought into this country, he did not think the rate should be changed, provided there was a difference in wages. (See page 2150, "Tariff Hearings" for 1908.) This was an acknowledgement on the part of a Democrat that difference in wages should be considered in drafting a tariff law.

There were five classifications of pocket knives in the Republican tariff law, according to value per dozen, ranging from 40c to over $3.00. It was in the three higher classifications, from over 50c to over $3.00 per dozen, that the American factories felt the competition mose severely. Certain duties were also laid on assembled, but not fully finished knives, and blades, handles or other parts.

With this information before him, and notwithstanding his former declaration, quoted above, Mr. Underwood, when he became chairman of the Ways and Means Committee, and leader of the House, laid a general duty of 35 per cent. ad valorem on all knives, parts, etc., valued at not more than one dollar a dozen, and 55 per cent. on those parts valued at more than one dollar a dozen. This gave a relatively high protection on those knives which did not come into competition wth our makes, and cut to the quick the duties on those which were giving us the most trouble.

The effect was instantaneous. Considering finished pocket knives, those assembled, but not finished, and blades etc., the imports, expressed in dozens, for the last quarter during which the Payne law was in operation were, in round numbers, 165,000. For the first quarter under the Democratic tariff law they jumped to 557,000 dozen. (This huge amount was doubtless due to the fact that many were being held pending the passage of the bill.) For the second quarter they were 346,567 dozen, and for the third quarter, the last quarter of the fiscal year 1914, they were 394,509 dozen. Despite the fact that Austria and Germany are locked out, and Belgium is off the map, the imports for the fiscal year just passed indicate that there has not been a very large reducion in importations. England now has the market. If we desire to see more pocket knives with the imprint "Made in America," we will have to have protective duties.

LA TENA'S SHOW WAS FIRST CLASS

The Biddleford, Me., Journal has the following to say concerning La Tena's show:

La Tena's big wild animal circus which arrived in this city at 4:30 o'clock this morning from Dover, N. H., gave its first performance at Piper's Field this afternoon at two o'clock and proved a big success in the line of circus entertainments. The show is bright and clean and overflowing with genuine acts of worthwhile quality and pleasing to young and old alike, with its excellent program of novel numbers, more than one of which would have done credit to a much more pretentious show. Everything about the show was clean and well regulated, the costuming and staging of the various acts was beyond reproach and the entire outfit proved one of quality and considerable merit.

Both in quality of the program and in the show, La Tena's circus proved a genuine credit to the show business as a whole.

ATLANTIC CITY FIRE LOSS REACHES $250,000

Atlantic City, Aug. 21.—Fire destroyed the Riddle building on the Boardwalk and Pennsylvania avenue today. With a fifteen minute headway the three-story frame building was afire along its entire length before the first engine arrived.

Mayor William Riddle, principal owner, estimated his loss at $70,000. Commodore Louis Kuehnle, politician lost $20,000. The building was covered by $12,000 insurance and there was insurance on $65,000 yearly rents. The total loss was $250,000.

Twelve firms occupying stores along the front of the building met total losses.

The Hotel Strand and Haddon Hall within a hundred yards of the Riddle block, were saved by their own fire fighting force.

Dreaded Rat as Carrier of Disease

By PHILIP HALLER, New York

To stamp out a disease either contagious or infectious to mankind or stock, I agree that no expense or value should be spared in order to arrive at a result without any loss of time, but it seems to me rather a one-sided affair that not only valuable stock but also domestic pets of every description should be sacrificed, whereas nothing is said about the much-dreaded rat, which has been known for years as a disease carrier of the deepest dye.

Nothing is definitely known as to how the hoof-and-mouth disease is spread from one farm to another. It will appear quite mysteriously at a distant line farm and leave the nearer line one perfectly alone, as if it did not exist, and because perhaps one of the disease carriers might be among their number the deputies give orders to slaughter not only valuable stock but also to kill domestic pets.

The authorities should make it compulsory that all rats and even mice in all the infected farms and all farms in the same districts where the disease has not yet appeared be destroyed immediately and the runs and holes of these animals thoroughly disinfected.

The strong and drastic measures now adopted by the authorities could be in many cases avoided and valuable stuck and the lives of our pets spared.

SING SING PRISONERS HAVE PEDIGREED GOAT

Yesterday's New York Herald printed the following from Beason:

"Sing Sing Prison has a pedigreed goat. She is not Warden Osborne's, as a person with a boil might suspect, but it belongs to a prisoner, a delightful chap who killed an old friend here three years ago in a fit of anger or absentmindedness—he is not sure which. The goat's name is Constance, and silly idlers cannot say that (business of snapping the fingers) about her family history.

"The persident of the Beacon Falls Board of Education, H. H. Staart, started something about a week ago by writing to the prisoner at Sing Sing to inquire how he was and if he had any use for a goat. In the return mail he received thei nformation that the prisoner was in robust health and thatl ife, if he but had a pedigreed goat to butt and encourage him, would be one grand mezzo soprano aria. Then Mr. Staart started the goat.

"Well, sir, when Mr. Osborne heard that one of his boys was to have a pretty little goat for his very own he fixed his eyes on the wainscoating of his office for twenty minutes while he determined what action he could take to aid the prisoner without annoying the goat. He, after due and deliberate consideration, issued an edict or ukase stating that the prisoner, during the stay of the goat, would be allowed to use them ountainous country near the prison as a goating ground and genearal butting arena. A large read seal bearing the insign ofa the prison on an eiderdown pollow, was stamped on the left lapel of the ukase.

"It was the intention of the goat given to have the favored prisoner raise goats, and Mr. Osborne, who is in a position to get a goat easily, is expected to obtain one to mate with Constance. The prisoner, whose name is withheld because he is sensitive about the complications following the killing of an old companion, has asked the Mutual Welfare League if he can depend upon its aid and said aid has been voted to him unanimously. As a matter of fact if there was no mountain for the goat the Mutual Wel fare League would consider erecting one.

"Certain persons have expressed the opinion that if Constance sticks close to the happy prisoner shem ay have a long run, one of those fine summer afternoons. Every one at Sing Sing is likely to take one of those runs, it is said."

ITALY'S CRACK MARKSMEN.

They Are All Athletes and Are the Pride of the Army.

The bersaglieri (sharpshooters) are the elite of the Italian army, and each bersagliere is a picked man, chosen for his hardihood and stamina, the average bersagliero being short and thick-set, but with magnificent strength and exceptional powers of endurance.

There is no prouder soldier in the world than the full blown bersagliere as he swaggers along the street of an Italian town in his dark blue uniform, with its rich red facings, and on his head, set at a rakish angle, the famous wide brimmed black slouch hat adorned with large, heavy, drooping plumes of green cocks' feathers.

Bersaglieri, by the way, is pronounced ber-sarl-iary.

When on the march the bersaglieri never walk as do other soldiers, but always go at a sort of quick trot.

These 25,000 or so men are among the most perfectly drilled troops in the world. Every single bersagliere, apart from being a man chosen for his endurance, is a fully trained athlete.—Westminster Gazette.

An Idol With Diamond Eyes.

The famous Orloff diamond was once the right eye of the great idol Serringham in the temple of Brahma. This precious gem was stolen at about the beginning of the eighteenth century by a French soldier who had made a pretense of being converted to the Hindu religion in order to gain the confidence of the priests and admission to the temple. The Frenchman first sold the diamond for £2,000. On the next turn it was bought by a banker of Constantinople for £12,000. The banker kept it until 1774 and then sold it to the Russian empress for £90,000 and a life pension. The gem has been in the Russian royal family ever since. As it is now set in the imperial scepter of Russia it presents a flattened, rose cut surface and weighs exactly 194½ carats.

Stinging Rebuke.

A society man said in Newport apropos of a current scandal:

"It reminds me of a very trenchant anecdote. A young married woman at a seashore hotel went up to a pretty girl in white who had been dancing like mad with the first one's husband and said:

"'I've got a last year's coat suit that's quite good, really. To be sure, it's out of style. Still, would you like to have it?'

"The girl blushed red with mortification.

"'What!' she said. 'Do you think I'd wear your cast off clothes?'

"'I thought you might,' hissed the young married woman. 'You seem anxious enough to get my husband.'"
—Exchange.

Grenadiers.

Evelyn writes in his diary under date 1678: "Now were brot into service a new sort of soldiers called Grenadiers, who were dexterous in flinging hand grenades; they had furred caps with coped crowns, which made them look very fierce: and some had long hoods hanging down behind as we picture fools." The original grenadiers hurled their grenades, and then charged the enemy with hatchets.—London Standard.

Not the Usual Kind.

"What a fool exercise fencing must be for women."

"Why so? I always understood it was fine."

"Here Maude Binks is taking lessons, and she told me yesterday she was learning how to feint."

Before and After.

Stella—When you are engaged you tell him that he must economize. Bella—And after you are married he tells you that you must.—Boston Journal.

Lorraine.

Before Lorraine was united with France in 1736 it belonged to the dethroned king of Poland. Before that it belonged to Austria.

Home Town Helps

BUILT AROUND A DEAD TREE.

Summer Rest Seat That Is Not Expensive, and an Ornament to Any Grounds.

The fact that summer rest seats do not have to be expensive to be attractive is demonstrated in the seat seen in the accompanying illustration. The seat has been termed the "Tree Summer Seat," from the fact that it is really built around a tree which was at one time growing at the point where

Attractive Summer Seat and Shade Built About the Trunk of a Dead Tree.

it now stands. Upon finding that the tree had lost all signs of life, the gardener in this park devised the novel idea of turning the dead trunk into this artistic seat rather than dig it out bodily.

Suiting the action to the decision he cut the main limbs off about six feet from the ground and to the top of these he fastened a pretty roof, which is made of palm branches. This done, the seat, which runs all around the trunk at a distance of about a foot and a half from the ground, was made out of sections of palm branches. In addition to being inexpensive, this seat is one of the most attractive in this very elaborate park.

This suggestion might well be followed by others. It is not an uncommon sight to see unsightly dead trees in public parks, which might be converted into useful and ornamental objects instead.—World's Advance.

SCREEN OF GOOD APPEARANCE

Has Durability and Is Distinguished Looking, Is Claim Made for New Idea on Market.

The attitude of the average person toward screens is expressed by the epigram, "Screens is Screens." When the fly fooler is in need of repairs, the man who is doing the work gets a few yards of screen with no regard to its nonrusting and wearing abilities. A western concern has invented a rust-proof which, acording to the manufacturers, is finished with ten coats composed of three different materials. The copper coats are put on first; then the zinc coats are applied, and lastly a finishing material of lacquer is put on, which protects the zinc and also adds to the rust-resisting qualities of the screen.

All these coats are applied to the wire cloth after weaving by an electro-galvanizing process.

The color after finishing is a dull aluminum, making a handsome, distinguished looking screen.

Billboards a Public Nuisance.

Billboards are a public nuisance. They are dangers to human beings who have to live near them. They present real perils from the standpoint of public health, fire protection, police protection and reasonable safeguarding against accident.

This is the new and practical principle upon which the city council is now asked to amend Sections 706 and 707 of the present building code.

It is a weapon against the billboard nuisance forged out of the perfectly definite practical rights of the citizen instead of from that newer metal known as his aesthetic rights. We may not have reached the stage when we have established the fact that a citizen has the right to be protected against eye-sores, but we certainly long ago reached the point when we recognized that his sanitary well being, the protection of his life and property were charges of the state.—Chicago Post.

Barters Soul for Lump of Soil.

The vice of earth eating is spreading through tropical parts of the Americas, the natives being from infancy addicted to the fatal habit, known scientifically as geophagy. It is always fatal, producing dysentery in adults and dropsy in the very young. Native mothers inculcate the vice into their children by giving them chunks of soft clay to eat. Once fastened on a person, the vice of geophagy becomes insatiable, and the victim will barter his immortal soul for a lump of soft, white clay.

While other nations shoulder the cost and sacrifices of the big war Japan craftily gobbles up all that war tosses her way.

The mention of that new folding dinner pail makes one think of dinners that feel like making a roly poly inside the stomach.

The cost of radium has fallen again. If this keeps on radium will soon be within the reach of the poorest household.

If the sun doesn't shine every day it has a knack of making up for lost time with interest.

The purchaser of Belgium would better wait and deal with the last grabber.

FORESTS AND MOISTURE.

Trees Conserve Water, Aid Percolation and Retard Evaporation.

Trees drink in and transpire an enormous quantity of water. This giving off tempers the dryness of the nearby atmosphere. Moisture bearing currents of air are caught by forest areas as they are not by the heated plains. Local showers may thus become more frequent where trees abound, or at least the availability of whatever rain may fall is increased for the locality by forest growths.

Foliage, twigs and branches break the fall of the raindrops. So does the litter on the forest floor. Hence the soil under this cover is not compacted as in the open fields but is kept loose and granular, so water can readily penetrate and percolate. The water reaches the ground more slowly, dripping gradually from the leaves, branches and trunks, and thus more time is allowed for it to sink into the soil and appear again in springs or subsoil moisture lower down.

In forests there is much less evaporation of moisture than in the open country because sun and wind do not have such free play. It is estimated that forests have from 50 to 60 per cent of water supply more than the open fields because of increased percolation and decreased evaporation.—Country Gentleman.

Immortalized.

Brown—That's the cuckoo from a clock I used to have. I have the highest respect and admiration for it, because it is the only thing that ever dared to butt in while my wife was talking.—Boston Journal.

Too True.

You may break, you may shatter
A ten dollar bill,
And you'll find that the remnants
Won't cling to you still.
—Richmond Times-Dispatch.

MAKING FARMING PAY

EVERY farmer hopes to make a profit as the result of his labors. He toils early and late and spares no trouble to see that his crops are properly planted and harvested. His stock requires constant attention, and, taking it altogether, he has few spare minutes.

Most of the farmers in our community are prosperous. Our market is a good one, while there are certain things to be desired, and we all reap our share of the results to our advantage.

There is one benefit which the farmer receives from his labors that we do not share in but in the making of which we all have a hand. That is the added value of his holdings as they grow in desirability and as the demand for land in our neighborhood increases.

Because increased land values come as the result of conditions which afford additional opportunities of profitable crop raising, not the least of which is the market which permits of a quick and desirable sale. Naturally there can be no need of a market if there is nothing to sell, nor can there be a profitable sale unless there is the right market.

So the increase in the value of the farm comes with the better market conditions, the farmer finding better prices as the market becomes more popular and the market becoming more popular with the number of farmers.

THOSE WHO HELP TO MAKE THE MARKET BETTER ARE ENTITLED TO THE THANKS AND GOOD WILL OF THE FARMER. We all try our best to bring about such a condition and in this way we help to make farming pay.

As a result of our efforts to help the farmer we expect him to do something in return. And when the thought is carefully analyzed it will be seen that we are actually asking him only to help himself even more than he will be helping us, by doing that which we ask.

We ask the farmer to buy his merchandise at home instead of sending to the big mail order houses for his goods. We believe that he can buy at home just as advantageously as to send his orders out of town and that he will be even better satisfied with his merchandise if he buys of our local storekeepers. But the main point is this: We need all of the money in town. We need it for the purposes of business and we need the business that he is accustomed to send away to the mail order houses.

We want to stop their encroachments on local trade. We want to encourage local business men to provide stocks suitable and sufficient for local consumption, but if we send away for the goods we need, then the local business men will become discouraged and decline to invest their money and credit in stocks for our town.

In order to help himself the farmer must help the local merchant. It is only by such reciprocal conditions that a community can become prosperous and grow into a bigger community. And it is only by the fact that a farm is located in proximity to a good market that the farm will become more valuable.

Even if a farmer can make a profit on the buying of certain goods from a mail order house, in the end it will mean that he has helped to stultify his home market, which tends to keep down land values. A DULL MARKET NEVER MADE A BIG TOWN.

In this, we can all help and we are trying to help. The farmers who send their orders to the mail order houses do not think of the effect which their acts have on the community. They do not realize that they are helping to create a sentiment which cannot but injure the financial condition of our home town; a sentiment which interferes with the growth of the community and with the prosperity of every owner of land.

So, to make farming pay, in both the direct and the indirect way, stand by the townspeople and help local business conditions. Every farmer has a share and an interest in his home town. He is as much affected by the prevailing conditions in the town as he is by the conditions on his own farm. THE TOWN CANNOT HAVE PROSPERITY WITHOUT HIS CO-OPERATION AND HE CANNOT LOOK FOR PROSPERITY IF HE DOES NOT LIVE IN A PROSPEROUS COMMUNITY.

Any man can injure his community by failing to co-operate with those whose interests are similar to his own. Shortsightedness may make a man believe that he is not included in this general rule, but few can successfully evade its application.

Make farming pay by helping to "boost" your home town. Do your business with our local storekeepers. You will prosper more in the long run.

BUY YOUR MERCHANDISE AT HOME.

WARNER'S STORE

Why not trade there? You will find it one of the best family stores in town. While we do not advertise to give goods away, we will sell you first-class groceries on as small a margin of profits as is consistent with safe business. You know that some goods are so cheap in quality that they are dear in price. We deliver goods and take orders when requested and we give valuable presents with tea and coffee; also movie coupons with each cash purchase.

Those You Know

Mrs. John B. Patterson and daughter, Camille, of New Castle, Pa., have been visiting Miss Mame Nealis for the past few days. Mrs. Patterson was formerly Mary Reta Murphy of this city.

* * *

The Misses Helen Gartland, Kathryn Gartland and Veronica Carraway were the fair week guests of the Misses Nealis.

* * *

Mr. and Mrs. Walter Albee of Syracuse are visiting Mrs. Albee's sister, Mrs. Vincent Stearns of this city.

* * *

Master James Greene of Caughdenoy, who visited his gradfather, James Greene, of Oneida last week, returned Thursday.

* * *

Mrs. Frank Parsons has returned from a recent visit with relatives at Cardiff.

* * *

Floyd Fullerton of Sanford, Florida, was here Thursday for the fair.

* * *

Neil Parsons of Pennellville visited relatives here Thursday.

* * *

Miss Flora Owen, who visited last week at the home of Ernest Simons, has returned to the home of her nephew, Fowler Baldwin.

* * *

Mrs. D. B. Northrup has returned from visiting relatives at Watertown.

* * *

Mr. and Mrs. Orren Barrett, who have been visiting friends here for thep ast three weeks, left for their home at Delton, Mich., Friday.

* * *

F. Ross Eaton, proprietor of the Onyx, spent Saturday and Sunday in Syracuse on business.

* * *

Mrs. Floyd Fullerton and children of Hannibal visited at Mrs. A. Z. Wolever's last week.

* * *

Mrs. Belle Wheaton of Gilbert Mills visited friends here Sunday.

* * *

Wanted—Four high school boys, 15 years old or over, to work after school hours. Fulton Light Heat & Power Co., 103 Oneida St. 212

* * *

Miss Marie McCollum is entertaining Miss Stella Remington of Phoenix.

* * *

R. L. McCully, secretary of the Van Wagenen Inc., is at Sandy Pond for this week. This resort is reached by the R. F. D. route at Lacona.

* * *

Mrs. Jarvis Newman of Oenonta is the guest of Mrs. Wendell D. Knowlton of 66 West 2nd st.

"The best seller," is the expression of merchants handling Black Baking Co.'s products. adv.

BIG CATTLE AT SANDY CREEK

E. M. Hastin[illegible] of Big Holstein [illegible] Exhibit—Pro[illegible]ders There, To[illegible]

Sandy Creek, [illegible] of the program of the first day of the meeting of the Sandy Creek, Richland, Orwell and [illegible] Society, which [illegible] at [illegible] Creek tomorrow, there will be [illegible] ment sale of Holstein-Friesian cattle.

The exhibit and sale of the cattle will be in charge of E. M. Hastings of Lacona, a pioneer in handling Holsteins and conducting sales in various parts of the country. He will be assisted by Colonel C. H. Wart and Colonel B. V. Kelley.

Although Lacona has been the home of the Holstein-Friesians for many years, this will be the first big display of the black and white cattle in this vicinity. Lacona Holsteins have a national reputation, and during the past few years there have been a large number of shipments of the black and white to all sections of the country.

Mr. Hastings, who is arranging the details for the exhibit, said today that present indications point to a big sale. He also stated that the cattle to be placed in the ring are of good individual quality, and that some of the black and whites are remarkably well bred. The large number of applications for catalogues, continued Mr. Hastings, indicates a considerable degree of interest

In the ring will be more than sixty heifers and young cows selected from the pure-bred Holstein herds of Sandy Creek and neighboring towns. Among the exhibitors will be Grant Farrington of Pulaski, who has a large herd. Other consignors include Hastings & Prescott, Henry Stevens & Son, De Witt & Wills, the B. E. Mead estate, A. T. Blount, W. J. Snyder, J. H. Hamer, H. A. Fish, D. J. Hollis and Leon More of Lacona, Colvin & Deshane of Richland and Whitney & Howard of Mexico.

NEHASANE DEGREE TEAM TO REHEARSE

The degree team of Nehasane Rebekah lodge is preparing for an active fall and winter campaign of work. That proficiency may work its efforts frequent rehearsals are to be in order, the first of them to occur tomorrow evening at Odd Fellows' remple in Oneida st. All members are urged to be present at 8 o'clock sharp.

CHARLES MILNES

Charles Milnes, aged 59, died at his home, 259 West Second st., last night after an illness of several weeks. He is survived by his widow, one son, William, and one daughter, Edith, of Syracuse.

The deceased was a native of Leeds, England, and came to this country when a small boy with his parents, who settled in this city. For several years he was a loom fixer at the American Woolen Mills, and about eight years ago went back to his native land on a visit. When he returned his sight was impaired, and for seven years he was confined to his home and unable to continue his work. For the past year, during which time his sight began to improve slightly, he was watchman for the American Woolen Mill company.

He was taken ill about three weeks abo and little hope was held out for his recovery during the past week. The funeral services will be held from his late residence Wednesday afternoon at 2:30, and Rev. Charles Olmstead, of the First Congregational church, will officiate. Burial will be in Mt. Adnah.

"Black's white bread" and Black's cookies have won a place here. They suit the taste. adv

WINTER INSTITUTES

At a meeting held in Oswego Court House Saturday morning a series of farm institutes, under the auspices of the Institute Bureau of the State Department of Agriculture, were arranged for this county. Fulton will share in the benefits to be derived by a [illegible] days' institute, which will be held here some time this fall, the date to be decided later. Extension [illegible] will be opened in Pennellville, [illegible] Mexico for one week [illegible] will be held in Lacona, [illegible] well, Mt. Pleasant, Palermo, Williamstown, N. Scriba and Central Square.

Instruction will be given in domestic science, home economics, dairy products, corn raising, and in certain sections where the farmers are devoting their time to raising special crops, competent instructors will lecture on methods of handling these products.

FORMER FULTON-OWNED FIRM MOVES PLANT

The Kitts Manufacturing Company of Oswego has moved into a new building recently erected in W. Seneca st. The company manufactures high and low water alarms for manufacturing plants and other water power devices. The Hunter company of this city formerly owned a controling interest in thep lant, which they sold recently to James Parker and Marvin E. King of Oswego.

Black Baking Company time in Fulton is at all times. Your grocer sells the goods. adv

ESSENTIALS OF PITCHING.

First Comes Control, Then Knowledge of a Batter's Weakness.

"Control is the thing," say all the great pitchers, and all the great pitchers agree that a study of the batsman is next in importance. There are certain batters who can punish certain kinds of balls, while against a different style of pitching they are correspondingly weak. If a batter likes a fast ball at the waist line it becomes the duty of the wise pitcher never to give him a ball to his liking. Perhaps he is weak on a curve ball at the knee on the outside. The foxy pitcher makes a specialty of offering him that kind of delivery in abundance. In deciding what is best to pitch to the various batters a brainy catcher is of wonderful assistance.

Then, too, the pitcher must study situations. When he divines that a sacrifice is the play it is usually the best plan to keep the ball high. Such a ball is harder to meet squarely, while it is almost impossible to give it definite direction. On a low ball the skillful bunter can usually place it toward first or third, as is desired. For batters who have a tendency to pull away pitchers usually keep the ball on the outside, mostly depending on the curve. Seldom do batters who pull meet such balls squarely. As a rule they hit fast balls on the inside hard. The batter who hugs the plate closely and steps into the ball is bothered most by a fast ball on the inside, as it has a tendency to make him meet the ball on the handle, thereby losing most of the force he puts into the swing.

The pitcher must also take into consideration the position of his infield and must know who is covering the base on a throw, so that he may pitch to aid his infielders.—Billy Evans in St. Nicholas.

New York's First Ferry.

Cornelius Dircksen was the first official ferryman on the island of Manhattan. The mooring place on the Manhattan side was about where Water street crosses the present Peck slip. He started the system in 1637. Passengers who wanted to be rowed over blew a horn for the skipper if he chanced to be absent when they arrived. From Dircksen's skiff grew the ferry system of the city.

No Chance.

"Your digestive apparatus is all out of kilter," said the doctor after examining his patient. "The best advice I can give you is to discharge your cook and get a new one."

"It can't be done, Doc," answered the patient sadly. "I'm married to her."—Pittsburgh Dispatch.

She Was Ready.

Former Mistress — I would like to give you a good recommendation, Delia, but my conscience compels me to state that you never got the meals on time. I wonder how I can put that in a nice sort of way? Delia—Yez moight jist say that Oi got the meals the same way as Oi got me pay.—Puck.

Why He Was Sad.

"Why so sad and downcast?"

"My wife has threatened to leave me."

"Cheer up. Women are always threatening something like that, but they hardly ever do it."

"That's what I was thinking."—Houston Post.

March of Progress.

"What has become of love in a cottage, anyhow?"

"It has given away to incompatibility in a bungalow."—Kansas City Journal.

The first duty of a man is still that of subduing fear.—Carlyle.

J. ALF. EDGARTON AT PLATTSBURG

He Is One of Two of County's Young Men Under Military Training at Big Camp.

J. Alfred Edgarton, son of Lee Edgarton of this city, is the only Fultonian at the encampment of business men at Plattsburg, and the other Oswego county representative at the camp is E. J. Connolly of Oswego. Mr. Edgarton is now a seasoned veteran of the camp, as he spent the month of July on the grounds with the encampment of college students, and during their month of warplay, the Fultonian was a corporal with one of the companies engaged. He was asked to report at the business mens encampment in order to assist in drilling some of the "rookies" who came from all sections of the United States to get a taste of war life and incidentally to learn as much as possible of the manual of arms and military tactics in a short time.

Yesterday 350 cavalrymen of the camp, including Mayor Mitchell of New York and Robert Bacon, one time Ambassador to France, rode through the streets of Plattsburg in the downpour of rain before many of the residents had seen the light of day. Several of the infantry companies bivouacked on the shores of Lake Champlain Saturday night in the terrific storm that swept that section and it is safe to assume that the majority of the business men fervently wished for the shelter of their homes.

Mr. Edgarton reports some of the usual horse-play which features all similar encampments and tells of the methods used by the campers in persuading one of their number to bathe frequently, as well as other incidents which prove that all the "rookies" have not found the affair a pink tea.

NEW ORCHESTRA HOLDS AFTERNOON REHEARSAL

The work of the new orchestra comprising members of the local council, Modern Woodmen of America, is receiving a lot of recognition. Yesterday afternoon the members of the orchestra went through their stunts in rehearsal at the home of George W. Roy, 208 Highland st., and friends and neighbors were duly rewarded for the time and attention they gave the musicians. Besides selections of a higher order the popular songs were received with a great deal of applause.

LEGAL NOTICES

NOTICE TO CONTRACTORS

State of New York, Office of the State Commission of Highways, Albany, N. Y.—Pursuant to the provisions of Chapter 30, Laws of 1909, as amended by Chapter 646, Laws of 1911, and Chapter 80, Laws o f1913, sealed proposals will be received by the undersigned at their office, No. 55 Lancaster street, Albany, N. Y., at 1 o'clock p. m. on Thursday, the 26th day of August, 1915, for the improvement of the following highways: Oswego County—Road No. 5408; Fulton City; East First st. Mileage, 0.36.

Maps, pans, specifications and estimates may be seen and proposal forms obtained at the office of the Commission in Albany, N. Y., and also at the office of Division Engineer, Chas. J. McDonough, 433 South Salina St., Syracuse, N. Y.

The especial attention of bidders is called to "Information for Bidders" in the itemized proposal, specifications and contract agreement.

Proposals for each road or contract must be represented in a saparate sealed envelope, endorsed on the outside with the name and number of the road or contract for which the proposal is made. Each proposal must be accompanied by a certified check payable to the order of the State Commission of Highways for an amount equal to at least five per cent. of the amount of the proposal which such check accompanies.

This check will be held by the Commission until the contract and bond are duly executed.

The successful bidder will be required to give a bond for fifty per cent. of the amount of the contract; such bond to be executed by a surety company to be approved by the Commission, or a bond secured by the deposit of collateral securities to be approved by the Commission.

The right is reserved to reject any or all bids.

EDWIN DUFFEY,
Commissioner.

I. J. MORRIS,
Secretary.

THE STATE FAIR

An educational scoring for butter and cheese will be held at the New York State Fair at Syracuse under the direction of the Cornell dairy students' association in co-operation with the state fair authorities.

There are always a number of entries and exhibits of butter and cheese, and these naturally vary in quality.

These variations are said to afford an unusual opportunity for dairymen to obtain practice in judging such dairy products. Since the object of the state fair is to educate people along agricultural lines, it is thought that this educational scoring will be one more step toward utilizing the large exhibit of dairy products in an educational way; and everyone who is interested is not only invited by the fair authorities but urged to be present to take part in the scoring test.

The work will be in charge of men who are competent judges of dairy products, both from a scinetific and a market standpoint.

Fulton Keynotes

Miss Frances Forsyth announces receipt of bound volumes of McClure's magazine from 1893 until the present date. Dr. Henry P. DeForest is the donor. Mrs. DeForest is the daughter of Mrs. Eleanor Van Wagenen whose former home in 1. 4th st., South, is now owned and occupied by Mr. and Mrs. H. C. Giesler.

* * *

George E. Taylor, former linotype operator in The Evening Times office, has secured a situation with the Corse Press, Sandy Creek.

Miss Florence Deuel has been entertaining Miss Bessie Wood of Syracuse.

* * *

Interesting articles of wear and otherwise bob up at rummage sales and the one to be held by the Parish Aid Society of Zion church will be no exception to the rule. Thursday, Friday and Saturday are the dates and the place, Stranahan & Loves old store inO neida st.

* * *

Arthur C. Windin of 163 N. 5th st. and Miss Wilhelmina Davis of 317 First st secured a marriage license Saturday morning

* * *

Mrs Dora Munger will remain in Riverside, Cal, for several months.

* * *

The Rev. Jacob Hahn, pastor of the Hannibal Baptist church, is spending a portion of his vacation at Sandy Creek.

* * *

Today is the 60th wedding anniversary of Mr. and Mrs. Andrew Peck, father and mother of the Rev. C. L. Peck, former pastor of the First M. E. church, this city. The event will be celebrated at the family home in Sandy Creek.

* * *

A. C. Haven of Hannibal raised and shipped this season, from two and a half acre berry patch, more than 6,000 quarts of raspberries, besides having a good yield of black berries

* * *

The Misses Marjorie and Genevieve Joy, of Syracuse, spent the week-end with Miss Isabella Diamond, of 557 West First st., and attended the Oswego County Fair races Friday.

* * *

Miss Elsie McIntosh, cashier of the New York shop, is enjoying a two weeks' vacaiton.

* * *

Irving Galusha, correspondent of the Syracuse Journal, spent the week-end at Auburn. During Mr. Galusha's absence Harold F. Keeler was in charge of the Journal office.

* * *

Only 1 day more — $5 installs the SCIENTIFIC STERLING in your kitchen

THE LAST DAY YOU CAN SECURE THE "SCIENTIFIC STERLING" ON CLUB TERMS

CLUB CLOSES AT 6.30 O'CLOCK ——— TUESDAY, AUGUST 24th

For Twenty Days we have been telling the housewives of Ful-[ton] about the "Scientific Sterling"—the marvelous new "Gas Range [th]at Burns Coal."

For Twenty Days we have been building the Co-operative [Cl]ub, offering every purchaser of a "Sterling Scientific" terms and [va]lues that they were never before able to secure on any range, [an]d will never be able to secure again.

The response has been astonishing even though we knew that [th]e "Scientific Sterling" is far in advance of any gas, coal, or "com-[bi]nation" range previously manufactured. The "Scientific Sterling" [ha]s taken Fulton by storm.

On the last day this number will be largely increased. [M]ore housewives will inspect the "*Scientific Sterling*" than on [an]y other one day. More members will be added to the Co-op-[er]ative Club—for this is positively the last day the money-[sa]ving Co-operative Club will be in force.

The "*Scientific Sterling*" appeals to every woman who wants [m]odern appliances in her kitchen. Summer demands the use [of] gas—the "*Scientific Sterling*" is a perfect gas range for all [p]urposes. Chill, wet days, fall weather, and winter's cold often [m]ake the use of coal in any kitchen a real comfort—the "*Scien-[ti]fic Sterling*" is a modern "*Sterling*" coal range complete in [ev]ery detail. Cleanliness is an essential in the modern home—[th]e "*Scientific Sterling*" is easy to clean, and easy to keep clean. [E]fficiency in the kitchen makes housework easier—the "*Scien-[ti]fic Sterling*" cuts labor, and cooking costs to a minimum. The ["S]cientific Sterling" is the most economical range for any fuel—[bu]rns less gas than the average gas range, and less coal than the [av]erage coal range—but it gets the maximum amount of heat [fro]m the coal that is burned. In summer's heat—in winter's [ch]ill—every day is vacation day for the woman who owns a ["S]cientific Sterling".

The "SCIENTIFIC RANGE" is the Different Range

It is the first range ever built with a single oven baking as [w]ell with gas as with coal.

It is the first two-fuel range in which the gas burners and [th]e coal fire box are inbuilt—an integral part of one construc-[tio]n. The "*Scientific Sterling*" is not a "combination"—it [bu]rns both gas and coal in a single range.

In the "*Scientific Sterling*" the oven is not cramped in order [to] obtain space for air circulation. The "*Scientific Sterling*" [ov]en is standard size. It bakes with gas better than most gas [ra]nges because the heavy walls hold the heat—for the same [re]ason it uses much less gas. When used with coal heated air [flo]ws around five sides of the oven—it bakes evenly—there is [no] obstruction because of the gas burners. No changes are [ne]cessary to bake with either gas or coal. All baking is done [dir]ectly on the oven bottom. The products of combustion are [dra]wn off through one flue—there is no stoppage in the draft, and back drafts are impossible. No fumes can escape into the kitchen. With a properly constructed chimney, the draft is always perfect.

The Safety Oven Damper makes the "*Scientific Sterling*" accident proof. You cannot light the oven burner without providing an outlet for all fumes. Gas cannot be turned on without providing a safety exit into the flue and out of the house. The gas flame is always in sight, but no gas from the oven burner escapes into the kitchen. The Safety Damper is always on guard. Use gas for baking, and a slow fire for comfort—it is perfectly safe. The Safety Damper is another feature found only on the "*Scientific Sterling.*"

The "*Scientific Sterling*" takes up no more room than the average gas or coal range, though it serves all the purposes of a standard five burner gas range, and a standard six hole coal range—and it has an extra deep fire box, combustion chamber, and ash pan for cleanliness and fuel economy.

One giant burner, three small burners, simmering burner and oven burner for gas; two griddles directly over the fire, and four indirect for coal. Extra large water front—more hot water with less time and less fuel.

THE BEST GAS RANGE, AND THE BEST COAL RANGE, SET SIDE BY SIDE, ARE NOT AS EFFICIENT AS ONE SINGLE OVEN "SCIENTIFIC STERLING" THAT BURNS BOTH GAS AND COAL.

OUR CLUB PLAN IS YOUR OPPORTUNITY

The "*Scientific Sterling*" is the one range equally adaptable for summer comfort and winter convenience. It does the work of two other ranges, and costs less.

$77.00 buys the "*Scientific Sterling*" when sold for cash. It will not be sold for less under any circumstances.

But for one day more, and one day only,—you can take advantage of our money-saving Club Plan—you can buy the "*Scientific Sterling*" on terms that will not again be duplicated to anyone. You will save money by buying your "*Scientific Sterling*" now.

We have cut our profit to a shadow; we have made an immense number of sales in a short time; we have cut selling expense lower than it will ever be again. We have saved money on freight, rent, hauling, storage, handling, and salesmen—these savings we pass along to the Club Purchasers.

A Liberal Credit Offer

We cannot reduce the price on the "*Scientific Sterling*", and we are not selling the "*Scientific Sterling*" on installments, with a discount for cash. In granting credit to Club Purchasers we have added nothing to the cash price; no interest, collection charges, or other items usually added for time payments. All charges are covered by the savings we make for you. The Club Plan allows us to make terms that demand no sacrifice from anyone.

$5.00 First Payment—$2.00 a Week

That covers the whole cost. For a payment of only $5.00 we put the "*Scientific Sterling*" in your kitchen. You pay the balance at the rate of only $2.00 a week until the regular cash price is paid. We grant you credit for eight months. You have the use of the "*Scientific Sterlong*" now, in the summer when you need it most, paying only a little at a time. The "*Scientific Sterling*" is worth more than it costs to anyone.

Free Trial and Free Installation

As soon a the first payment is made we deliver the "*Scientific Sterling*" to your home, and set it up complete in your kitchen. You may take 30 days to test the Range, and return it if it is in any way unsatisfactory.

There are no other costs. Later purchasers will pay $10 at least for gas, water, and stove pipe, connections, and labor of installation. Club Purchasers get their installation absolutely free. We furnish all material and labor for connections above the floor. We cannot offer free installation to anyone after the Club is closed—this offer holds good for only one day more. No free trial after the Club is closed.

Insurance Contract Feature

One great objection to installment buying is the hardship that the payments may impose in case of accident. Club Purchasers are absolutely protected against misfortune—we assume the risk. In case of death or disability, all future payments will be cancelled, and a clear bill of sale issued for the Range. This removes the last objection to the payment plan. But we will not assume any liability after the Club is closed.

Guarantee and Service

The "*Scientific Sterling*" is sold to Club Purchasers with the strongest guarantee that we can write, signed by the manufacturers, the Siil Stove Works of Rochester, and by ourselves.

We guarantee the "*Scientific Sterling*" to perform its work in an efficient way—guarantee against any defect in material, workmanship, or installation—and against the possibility of repairs for one year. This we can do, because we make the installation for the Club Purchasers—those who buy the "Scientific Sterling" before AUGUST twenty-fourth. We cannot guarantee proper installation except to Club Purchasers. In addition to making the installation, we have all ranges inspected after they have been in service—just to show you how to get the best results with the greatest economy of fuel.

Consider These Terms

We know that you have never before been offered such liberal terms on any range—just as we know that no other range has ever been equal to the "*Scientific Sterling*".

You must buy now to take advantage of these terms. You can delay no longer. One day longer—then the Co-operative Club is closed.

You have every reason to buy the "*Scientific Sterling*" now—we confidently believe that this one last day will be the greate t day in the sales history of our store.

[P]HONE YOUR ORDER

Phone orders for the "Scientific Sterling" will be received until 6:00 P. M. August 24th and on such orders a range will be held subject to the terms of the Club Plan until 12:00 o'clock noon August 25th.

Mail orders, when accompanied by a remittance of $5.00 to cover first payment, will be received if mailed before 12:00 midnight, August 24th, and a "Scientific Sterling" will be held subject to the terms of the Club Plan for the buyer.

We expect August 24th to surpass all records in the history of our store, in the number of visitors who will be interested in the demonstration of the "*Scientific Sterling*"—the Gas Range that Burns Coal. The store will be open at 6:30 o'clock A. M., and will close at 6:30 o'clock P. M.

We make an extra effort to show everyone as much attention and courtesy as possible—the "*Scientific Sterling*" is well worth the attention of every housewife in Fulton, and it will be a pleasure to show you wherein it is superior to any range you know, and the extra advantages offered by the Club Plan.

L. P. SMITH COMPANY

13 EAST FIRST STREET—Main Store   Branch Store—312 WEST BROADWAY

CUT OUT THIS COUPON

L. P. Smith Co.,
Fulton, N. Y.:

The $5.00 enclosed is for the purpose of establishing membership in the Co-operative Club, and is to apply as a first payment on a "Scientific Sterlaing" range.

In consideration of the fact that this Application is mailed before 12:00 o'clock, midnight, August 24th, I am to receive all the benefits of the Club Plan, including term payments, free installation, insurance contract, guarantee, and inspection service.

CONVENTION IS FINISHING UP

Digest No. 2 of Proposed Amendments Appears, Which Includes Emergency Messages; to Be Submitted

Albany, Aug, 23.—Providing the people of the state sustain it, the proposition introduced by Delegate Almet R. Latson, a Brooklyn attorney, which refers to the power to be given the governor to appoint military officers, will be somewhat qualified.

The proposed amendment to Section Four, Article Eleven, seeks to give to the legislature of the state the authority to prescribe the number of major generals and aides-de-camp and take from the executive the power to name the chiefs of the several staff departments.

Article Eleven, Section Four, as adopted by the Constitutional Convention reads as follows in its amended form:

"The governor shall appoint his aides-de-camp and military secretary, and the adjutant general of the state, all of whom shall hold office during his pleasure, their commissions to expire with the term for which the governor shall have been elected; he shall also nominate and with the consent of the senate appoint, all major generals. The legislature may prescribe the number and qualifications of major generals and aides-de-camp."

The Latson amendment is designed to correct an incongruous situation that exists regarding the military law of the state and the acts of congress. This explanation is given by Delegate Latson for the necessity of the amendment: "The National Guard of the State of New York is administered under the military law of the state. In the proposed amendment the words 'the chiefs of the several staff departments' are omitted from the present Constitution and it is of interest to look back and see just what those words mean.

"The Constitution of 1894 followed in this regard the provisions of the Constitution o f1846. These words were in the former Constitution and they were retained in the present Constitution, but under the Constitution of 1846 a different condition of affairs existed. Our present Constitution contains, I think, the first reference in any Constitution of this state of a classification of our militia."

Delegate Latson then points out that under the present Constitution it is mandatory only that the active militia shall be equipped and disciplined and that it therefore comes about that this reference to chiefs of staff departments was introduced in the former Constitution, when they had in contemplation the entire militia as opposed to the active militia, and as a result there sprang up in this state a great many divisions and under these divisions a great many brigades.

"This was divided into certain division districts, each under the command of a major general. The division districts were sub-divided into brigade districts under the command of a brigadier general. There were other subdivisions down to the grade of captain."

Delegate Latson further explains that under former Constitutions the governor was empowered to appoint chiefs of the staff departments to the number of ten in addition to the adjutant general, each with the rank of brigadier general to hold office during the term of the governor appointing them. This meant that each incoming governor could create from civil life ten or eleven additional ones. This meant that men without military experience were given the title of brigadier general and in addition the national guard every two years passed into the hands of a new administration. The result was that ludicrous situations sometimes occurred.

JONES-KETCHAM CASE SETTLED OUT OF COURT

The case of John Ketcham, an electrician, against Mrs. F. K. Jones, in which Mr. Ketcham made claim for payment due on electrical work on the building owned by Mrs. Jones, at 210 Cayuga st., after four days' session, in which experts were called from out of town to testify, terminated Saturday afternoon when announcement was made that a settlement satisfactory to both plaintiff and defendant was made out of court.

The evidence given at the trial tended to show that for a specified sum Mr. Ketcham was to wire, equip with lamps, and make other necessary improvements on the building. The sum agreed upon was tendered in payment by Mrs. Jones, but an additional claim was rendered by the electrician for work and equipment which Mrs. Jones claims was not authorized. Attorney Hillick appeared for Mrs. Jones.

Up-to-date Fall styles at Mrs. F. K. Jones, 210 Cayuga St. Adv 212

The consistent advertiser wins in the end. It may cost a dollar to get a dollar, but the deal wins prestige.

TOPPLED FROM PORCH LANDING ON HEAD

While sitting on the porch of his home at 413 Broadwell avenue, Saturday night, Floyd Merritt, the 10-year-old son of Mr. and Mrs. Charles Merritt, lost his balance and fell backward to the sidewalk, several feet below. The boy struck on his head and was rendered unconscious.

Dr. F. E. Fox was called and he restored the lad to consciousness after a time. Dr. Fox fears concussion of the brain, but the lad is resting comfortably today.

PRASHAW'S HEARING.

The case of Orin Prashaw of the West Side, charged with assault by Edward Boudin, will come before Judge Wilson in City Court tomorrow morning. Boudin alleges that Prashaw beat him badly on West 1st st. last Tuesday night, without provocation. Shortly after he had sworn out a warrant charging Prashaw with assault, Boudin was himself arrested for intoxication.

A trial subscription for The Evening Times costs little and gives you much in return. It is the people's paper. adv

Y. P. B. CORN ROAST WEDNESDAY AFTERNOON

Sandwiches for three persons.

One cup and one spoon for each individual.

Corn, as much as you can eat.

These are the specifications of the corn roast to be held under the auspices of the Y. P. B. of the W. C. T. U. on standpipe hill, at the eastern end of Broadway, Wednesday afternoon and evening. Suppertime is named between 6:35 and 8 o'clock and the twilight hour for other pleasing diversions incidental to an outing of this nature. Everybody invited to join the festive throng, provided all specifications, appetite included, are named in the contract and article of agreement.

John Wanamaker would have us buy Belgium. It would be interesting to know also what he thinks of Huerta would be willing to take for Mexico.—Terre Haute Star.

STEVE, AFRAID OF HIS COUNTRYMEN, HAD GUN

Officer Pare arrested Frank Moore Saturday morning for public intoxication and when arraigned before Judge Wilson this morning Moore pleaded guilty and was sentenced to 20 days in Oswego jail, sentence to be suspended pending good behavior.

Steve Contos, arrested by Officer Bray, charged with carrying a concealed weapon, was fined $15 and sentenced to 60 days in jail this morning. On paymen of the fine, Judge Wilson suspended the jail sentence. Contos was carrying a 38 calber revolver and a box of cartridges when arrested. He claims someo f his countrymen were out to get him and he was protecting himself. Chief Dyer has taken charge of the gun.

There Is a Military Truth:

"Modern Fortifications Crumble Beneath Modern Guns"

The fortification built up by the Mail Order Houses will not stand the fire of the 45 centimetre directed at them by the series of Home Trade Boosts appearing daily in this newspaper. Here as one specimen:

HAS CITIZENSHIP A VALUE?

CITIZENSHIP has a definite value. This value cannot be computed in dollars and cents, but it is worth fighting for.

Citizenship grows out of communities. Were there no communities there would be no citizens. We would then be merely unprotected individuals—entirely at the mercy of all other individuals who might wish to destroy any weaker or less ferocious one.

By dwelling in communities we have many advantages. Some of us value and appreciate these advantages while others selfishly accept the advantages but refuse to do their share toward maintaining the community.

Laws have been enacted to compel us to pay taxes—used for the financial support of communities for our protection.

BUT THERE ARE NO LAWS WHICH COMPEL THE MEMBER OF ANY COMMUNITY TO SHOW APPRECIATION OF THE BENEFITS DERIVED FROM LIVING IN A COMMUNITY.

One of the benefits of living in a community is the opportunity furnished us to buy merchandise required for our comfort and indulgence, right here in our own town. This facility permits us to buy what we need when we need it. We can step into a store, lay down a dollar and buy a dollar's worth of goods. Perhaps we can get the goods without paying the dollar down in cash—that is, if we have the credit.

What a genuine benefit it is to be able to do this. In the olden days our forefathers were compelled to drive many miles to a store where the merchandise might be obtained. Large quantities were bought at a time because the trip to the store could not be made at frequent intervals.

As our citizens increased in numbers and gathered into communities, stores were established at the various centers of the increasing population until now we can buy, right at home, our necessities and luxuries.

That which we value we endeavor to protect. If we value the facility for purchasing goods at home we should protect it.

The best way to protect it is to make it possible for the storekeepers to continue to do business. If we do not help them to continue to do business here in our community the natural consequence will be for them to close up their stores and go out of business.

If we buy from our local storekeepers only such merchandise as we cannot buy conveniently elsewhere, we will soon discover that the stores will carry only such restricted lines of goods as are in demand by the people who live here.

Then we will find out that we are not much better off than our forefathers were. We must send away for such merchandise as we require. We must wait until the order has been received in the mail order house and filled in the due course of time by the employes of the concern we are patronizing.

There are many disadvantages in this method. We do not fully realize them now. But they will come home to us when conditions arrive which compel us to buy everything by mail—if such a time does come. However, if we look at the matter in the right light we will not permit such a contingency to arrive.

Why should we be deluded into sending our money away from home because of the fulsome and flattering descriptions in a mail order catalogue? Why should we prefer the questionable qualities in merchandise as exploited by a catalogue writer to the honest, dependable goods which we can see before us in our own local stores?

Do we save money by buying from the mail order houses? When the matter of freight and express charges have been figured out, when the question of delays, unsatisfactory shipments, breakage, damaged goods, etc., have been answered, where is the profit, if any?

ON THE OTHER HAND, THE LOCAL MERCHANT IS ALWAYS RESPONSIBLE FOR ANYTHING HE SELLS. The purchaser can examine any article for sale in the local store and buy only that which is satisfactory. It will be delivered without delay. If there is any imperfection it will be quickly remedied. If there is any shortage in the delivery it will be supplied at once. A personal call or a telephone message will arrange everything quickly.

And when it comes to prices you will always get full value for your money when dealing with the local storekeeper. He buys his merchandise in the market and he sells it at a profit to us. He asks only a modest profit and he is entitled to it. We should be perfectly willing to pay him a profit for his investment, for his labor and for his ability to save us time, trouble and money.

IF WE ARE NOT WILLING TO DO THIS, WE SHOULD BE HEARTILY ASHAMED OF OURSELVES. AND WE WOULD NOT BE ENTITLED TO THE ADVANTAGES AFFORDED BY HIS STORE.

NEY AS A FIGHTER

Napoleon Called His Marshal the "Bravest Man I Ever Saw."

THE RETREAT FROM MOSCOW.

Where the Heroic Commander With a Mere Handful of Men as a Rear Guard Fell Back, Facing the Foe. Miner Heroes of the Great Conflict.

Three towering personalities came to the clinch on the field of Waterloo. There are perhaps a half dozen names remembered in connection with that epoch making battle, but they are little more than names; only Bluecher, Napoleon and Wellington have contrived to outlive the memory of their contemporaries.

Yet there were some at Waterloo who were not only brave fighters, but vastly interesting individuals, and it is more than unfortunate that they should have suffered eclipse. There is perhaps one exception. One cannot scratch the history surrounding any of the three great commanders who met at Waterloo without encountering Michael Ney, Napoleon's "bravest of the brave."

It is impossible to think of Ney except in superlatives. It is impossible to collect dry facts about him; the temper that matched his hair smolders through and sets them ablaze. Even Napoleon, always so unpleasantly eager to shift the blame for failure to other shoulders, wrote from the solitude of St. Helena, "Ney was the bravest man I ever saw."

One of his officers once asked him if he ever felt fear. "Never had time," was the curt reply.

The tales of his daring, his hair-breadth escapes, his unbelievable indifference to shot and shell, are legion.

He was always calmest in time of the greatest peril, and it was this quality that Napoleon appreciated. Again and again France and the crown were in Michael Ney's hands. Whenever Napoleon saw that the issue of a battle turned on a single point he sent Ney to that point. At the battle of Bautzen the emperor lay on the ground which is sheltered by a height from the town. He heard Ney's guns on the left. A bomb burst over his head. He sat down and wrote Marie Louise that the victory was gained. He waited only to learn that Ney was where the crisis turned to be sure of victory.

But the most dramatic chapter of this gallant fighter's life is that headed "The Retreat from Moscow." Meissonier might better have painted the rear of the Corsican's army than the van. He would have had a more appealing, a more gallant subject in Michael Ney, retreating with his face to the enemy. With a mere handful of men he flung himself between the fleeing French and the Russian army and backed slowly, stubbornly from Moscow.

This is the man who a little later was publicly shot as a traitor to France.

Ney's fellow marshal, Grouchy, does not fare so well. Grouchy was a loyal French patriot, and he had a record of engagement in 200 battles, which offered copious proof that he was no coward. But light headed, irresolute, vacillating he surely was. The Waterloo mistake is merely a repetition of earlier failures of judgment.

One of the most interesting of the minor heroes of Waterloo was the soldier-musician Graf Friedrich Wilhelm Buelow. He had been thrown a little in the shade by the vehement personality of his chief, Bluecher, and the intrepid Gneisenau. But the man who at the head of his 30,000 emerged at 1 o'clock in the afternoon of June 18, 1815, from the wood of St. Armand and turned the tide of the battle of Waterloo stands out as a romantic figure. Probably no one of Germany's brave fighters of that racking period, excepting not even "Old Forward" himself, was so well loved, so vigorously admired, as Friedrich Buelow. He was a gentleman and a man of well seasoned culture.

But to find the most truly picturesque in the group of lesser generals at Waterloo one must go over to the English side. "As rough, foul mouthed a devil as ever lived," said Wellington himself of Sir Thomas Picton. "But," he added, "no man could do better in the different services assigned to him."

He always carried a stick to tap on the horse's mane when he felt over impatient and wave in the air to emphasize his commands. Sometimes he carried an umbrella, as at Vittoria, where he used it to beat Wellington's butler over the head. The unfortunate man was escorting the headquarters baggage and got in the march of Picton's division.

The visitor to the field of Waterloo, even though he know little of the personality of this fine old fighter, feels a thrill when the guide says, "Here Picton fell."

There could be no sharper contrast to Tom Picton than Sir Rowland Hill. The mild eyed, sweet tempered, ruddy cheeked general, soon to become the most influential politician in Europe, was the complete picture of an English country gentleman.—Chicago Herald.

His Honesty.

Tourist—What sort of landlord have you got here? Irish Native—He's the sort of man if he was put on an uninhabited island that would stick his hands in the pockets of the naked savages and rob them of what they hadn't got.—Chicago Herald.

Never spend your money before you have it.—Thomas Jefferson.

MONT PELEE AS IT IS TODAY.

Its Appearance Thirteen Years After Its Fearful Eruption.

Since its outbursts in 1902-3 Mont Pelee has simmered down to a commonplace volcano, and now vegetation has re-established itself to the summit of the mountain, and even the forest is beginning to reassert itself. The whole aspect of this side of the volcano is verdant and peaceful and gives no indication of the devastation of thirteen years ago. Even the rocks of the new cone are more or less thickly coated with moss, while the sides and top of the old cone are covered with grass, ferns and bushes in addition to the moss and lichens.

On the summit plateau are found an abundance of red raspberry bushes bearing flowers and green and ripe fruit. Sugar plantations on the west side of Mont Pelee have been reinstated as far as the Roxelane river, within the border of the original zone of annihilation, while the ruined city of St. Pierre now contains about thirty new buildings of durable construction and a resident population of between 200 and 300 people.

The zones stretching down the southwest side of the volcano lying between the Seche and Blanche rivers, which was the route traversed by hundreds or perhaps thousands of destructive eruption clouds, still lie drear and desolate, because the soil was completely swept away by the blasts, and the material left behind as well as that added by the eruption is too porous for the retention of the water necessary to restore it to fertility.—Argonaut.

Bernhardt's Wish.

Mme. Sarah Bernhardt, whose leg was recently amputated, is cured. To see her walk one could doubt that she had been maimed, thanks to the miracles of surgery and mechanics. She is much more courageous than heretofore. She looks at her articulated leg and smiles. "It pleases me," she says, "and it would please me entirely if it should be celebrated by two of my best friends—one a poet and the other a painter. I wish that the adorable Edmond Rostand would celebrate it in a little poem and that my faithful Clairin would make it the subject of a beautiful drawing." Rostand and Clairin have been apprised of the wish of the grand tragedienne and it is said that they will not delay to respond to it.—Cri de Paris.

An Expert on Volcanoes.

Frank Alvord Perret, whose knowledge of volcanoes is probably unique in the world, is an American, a native of Hartford, Conn. After volcanic outbursts he has been able to accurately forecast their conduct for some time to come, and in this way his labors have been of inestimable value to residents of volcanic districts. He has visited and studied practically every volcano of note in the world. He was the first to reach Messina after the devastating earthquake of 1908. In 1904 he took up volcanology and became honorary assistant to Professor Matteucci in the Royal observatory, Mount Vesuvius, and was later decorated Knight of the Italian Crown.

Our Agricultural Possibilities.

With improvements which are steadily being made in American agriculture under the stimulus of a number of helpful agencies, including the department of agriculture and the land grant colleges, the chances for successful competition from abroad will become smaller and smaller. We must remember that not over 45 per cent of our arable land is yet under cultivation and that not more than 12 per cent of that is yielding full returns.—David F. Houston in American Review of Reviews.

Wishbones and a Wedding.

During the twenty-five years of wedded life of Mr. and Mrs. Grossenbach of St. Louis they used 800 chickens and turkeys, and at their silver wedding recently the 800 wishbones which had been accumulated were dipped in silver and strung about the dining room on silver hued ribbons.

Stars in the Flag.

There were thirteen stars in the United States flag at the time of the revolution, fifteen in the war of 1812, twenty-nine during the Mexican war, thirty-five at the time of the civil war and forty-five in the Spanish-American war. Now there are forty-eight.

PRACTICAL HEALTH HINT.

Loss of Weight.

One of the early symptoms of tuberculosis is a loss of weight. Any decided decreases should be watched with suspicion. It often means that the general bodily functions are not all that they should be. It is certain, under any circumstances, to indicate that one's physical resistance is being lowered, and this in itself opens the way to unusual chances of disease.

If this loss in weight is accompanied by loss of appetite, night sweats or a persistent cough or cold a physician should be consulted and nourishing food, plenty of rest and long hours of sleep in the fresh air should be resorted to in an effort to build up the body.

People will neglect themselves for months when decreasing weight should warn them as surely as the falling barometer denotes a coming storm that their physical well being is in jeopardy.

DUTY OF UNIONISTS.

The principles of unionism must become the principles of the life of a true trade unionist, for they are founded upon fundamental concepts of justice. He must think unionism, feel it, live it, bring it into the lives of those with whom he works, for unionism is human welfare. He must read, study, talk, act, for the cause of unionism.

This is a question that must come home to the consciences of all those who labor. Are you doing your part?

Are you able to defend the cause of labor, to explain its principles, or do you avoid discussions because you have not prepared yourself to maintain your position?

Let each member of organized labor and every labor organization take up the intensive work of a labor forward movement for America.—Samuel Gompers.

PINCHOT BACKS LABOR.

Industrial Absolutism Rules by Brute Force, He Says.

"Labor and the Future" was the subject of an address by Amos Pinchot of New York at a labor mass meeting held recently at Denver. The meeting was held as a protest of the conviction of John Lawson of the United Mine Workers.

Mr. Pinchot said he was not an apostle of labor and really belonged to the "other camp." His address was filled with denunciation of the methods of certain employers.

"Industrial absolutism," he said, "ushers in a reign of blood and horror and turns to the world and cries, 'How long, O Lord, will labor raise the sword and perish by the sword?' The unlawful violation of the strikers' rights or liberties to a point beyond endurance has become a trump card that is almost invariably played to divert the controversy from the real issue.

"If the great employers of labor in Colorado had even a brief sparkle of vision or imagination they would see by the conviction of John Lawson that they have gone too far. They are sowing the wind. In trying to bind down labor by brute force without regard to justice absolutism is weaving a rope of sand which will part even before it is securely in place."

Mr. Pinchot also said that in the Colorado act authorizing the appointment of a special judge to try the miners' cases "and the selection of a Colorado Fuel and Iron company partisan the full height of hypocritical unfairness has been reached."

Dollar Patriotism Derided.

In an editorial defense of the seamen's law the Los Angeles Tribune says:

"Ever since the enactment of the La Follette-seamen's law a portion of the press has been shrieking that the statute will destroy our merchant marine and drive our flag from the seas. If that flag can be shown in alien waters only at the cost of the hideous injustices that were pepetuated upon seamen under its folds—if our merchant marine can be maintained only through national connivance with the heartless treatment accorded the sailors—then even the dire results the pessimists predict were preferably endured."

Steel Workers Get Raise.

A voluntary increase in wages which will average about 10 per cent has been granted the 17,000 employees of the Bethlehem Steel company. The increase went into effect Aug. 1. The monthly payroll of the local company is now about a million and a quarter. It is believed that the Bethlehem Steel corporation will take similar action with its subsidiary plants, the Union Iron works, San Francisco; Fore River shipyards, Quincy, Mass.; Harlan & Hollingsworth, Wilmington, Del., etc. The increase is expected to quiet whatever unrest among the workmen there may have been and also to attract skilled mechanics, some 2,000 more being needed.

Strike Guards Held.

Ten of the 129 guards of the Standard and Tide Water Oil companies in the recent strike in Bayonne, N. J., who were arrested by order of Sheriff Eugene F. Kinkead, were held for the Hudson county grand jury by Recorder William F. Cain, sitting in Jersey City. Each was charged with inciting to riot, but it is probable that the grand jury will consider other charges against them. Four men have died of wounds inflicted in strike riots, and many are suffering injuries.

Accident Board Ruling.

The California state industrial commission has awarded benefits under the compensation law to the heirs of a worker who was suffocated in a tank even though the worker had contributed nothing to the support of his mother and sisters during the nine months preceding his death. The board held that this was probably due to lack of employment. Benefits were awarded based upon his average contributions for three years prior to his death.

One Cent an Hour For Women.

Wages at the rate of a ½ penny or 1 cent an hour are paid to many women workers in the Belfast linen factories, according to a statement made by Miss M. Galway of the Textile Operatives' Society of Ireland. One cent an hour, she says, is paid to women who clip the threads of machine embroidered cushion covers.

STUNNING COSTUME.

Brown Faille Silk Makes Handsome Foil For Furs.

FOR THE AUTUMN MAID.

Why has ultra modish femininity worn furs all summer? No one will ever know, and now the fox has slyly crept into the fashionable picture for autumn, and we see him everywhere—in the shop windows and prowling about milady's neck and hanging over her arm in the shape of a muff. Shown here the beautiful color of the fur is an excellent foil against the background of golden brown faille silk, of which the one piece frock is built.

WHO PAYS HER SALARY?

Miss Charlotte Rumbold's Request Refused Because She Is Not a Voter.

Miss Charlotte Rumbold, supervisor of recreation in St. Louis, has been refused a salary by the St. Louis city fathers, has rejected the offer of the women to have her salary made up by donations from the City club and has resigned her position. She believes the workman is worthy of his hire.

She believes that a workwoman is worthy of her hire also—that is, she thinks that salaries should be paid according to the task and not according to the sex of the worker.

She brought the municipal playground and recreation facilities of St. Louis up to their present standard, which is the boast of St. Louis. The work has grown from one playground—instituted, by the way, by the Wednesday club (of women)—to many playgrounds. The first was given on the condition that some woman approved by the Wednesday club be put in charge of it. Now there is an entire system of recreation grounds serving nearly every part of the city.

Miss Rumbold has not taken a vacation since she began work. Recently, however, she asked that her salary "be raised to what it is reasonably worth as measured by salaries paid for similar work in other cities." This the board of aldermen decided it could not do because "Miss Rumbold is not a voter. The taxes of the city are paid by men, not women," said the board, and that fact governed it in refusing Miss Rumbold's request.

The women of St. Louis sat up then and began to take notice. They asked each other: "How about this question of taxes? Do we not pay them?" These are some of the things they have found out about themselves:

The state of Missouri has between a third and one-half as many single women paying an income tax as it has single men. "Of the 9,500 married men who pay income taxes, do not their wives share in this payment?" they asked the wives. The wives uttered just one word—"Yes."

St. Louis out of its 350,000 women permits nearly 75,000 to work as wage earners for the increase of its wealth. "Where do these women belong in the city's economic development?" asked the roused St. Louis women.

Out of all the great number of housekeepers in the city who pay taxes indirectly on everything their households eat and wear, who save out of their household budgets for the tax collector's demands, only 947 receive wages—that is, less than 1,000 housekeepers are counted self supporting.

Now the women of St. Louis are gathering themselves into a Woman Voter league, and it is said that some of St. Louis' biggest women taxpayers will rally to its banner.

Before Miss Rumbold left for New York the Town club gathered to bid her farewell. The president of the club, Alma Gibson Robb, called upon all her members to come and assure Miss Rumbold of their unqualified approval of her stand on the woman question. "As a woman of whom we are all proud we bid her godspeed."

Care of the Baby In Summer

Helps For the Country Mother in the Care of the Baby.

[Prepared by the children's bureau, United States department of labor.]

Thousands of young mothers living on the farms and in the sparsely settled rural communities of this country have to meet the problems of motherhood with little help. City mothers may have doctors and nurses without number at their service, as well as hospitals and dispensaries. In addition the infant welfare station has proved of enormous help to mothers situated so as to be able to avail themselves of it.

But the country mother usually lives too far away to make use of these stations, while hospitals and doctors are resources to be used only in illness or emergencies. Thus the country mother usually has had to learn from her neighbors or from her own, sometimes sorrowful, experience what to do or what not to do in the care of her baby. In this situation the mother should have at least one good book on this subject. If she will apply to the chief of the children's bureau, United States department of labor, Washington, asking for the publication called "Infant Care" it will be sent free of charge. This bulletin contains simple directions for the care of the baby and in addition gives references to the standard books dealing with the subject.

An encouraging prospect for the relief of the country mother has lately opened up in the coming of the rural visiting nurse, who travels about the farming communities with a horse or an automobile. She is employed by the families in her district, who contribute to pay her salary. The town and country nursing service maintained by the American Red Cross association, with headquarters at 1624 H street, Washington, will be glad to send literature and answer questions about such service.

The nurses ride about their districts, calling at each house where there is need of their assistance. They work under the direction of a doctor, helping the family to carry out his instructions in cases of illness or accident. Thus the nurse does dressings, gives baths, takes temperatures or whatever may be required in the case. If there is a baby she advises the mother as to his care, shows her how to give him a bath and how to prepare his food if he is already weaned. But in addition to giving bedside nursing and home care the rural nurse does many other things. If typhoid makes its appearance she may look about for a polluted water supply or trace back the milk the family uses to its origin to see whether this is the source of the infection and urge methods which will prevent further spread of the disease.

She stops at the country schools and looks over the children and sometimes detects beginning cases of infectious disease in time to prevent an epidemic. She also notes cases of probable adenoids, deafness or weak eyes and calls the attention of the child's family to the need of care by a physician.

In all of this she carries on a continual campaign of education toward a better standard of community life by showing the mothers how flies can be exterminated or at least be kept out of the house; how to take care of the milk and the baby's bottles; how to clean up the premises, dispose of the refuse and how to keep the streams of the community pure. Such a nurse is therefore, if she is as useful as she may be, far more than a nurse. She is teacher, hygienist, dietician as well, and her salary will be saved many times over in the course of years by the prevention of illness and suffering through her work.

A rural woman's club may be the nucleus from which the movement for a community nurse starts. Clubs of this sort interested in such a movement will find many suggestions in a bulletin published by the children's bureau on work of this sort which is carried on in New Zealand. This pamphlet is published by the New Zealand Society For the Health of Women and Children and is sent free by the children's bureau, Washington, to all who ask for it.

Yellow Is Popular.

Yellow is an extremely fashionable color this season, as is evidenced by the number of pale yellow dance frocks at every opening of importance and by the hats trimmed with yellow daisies and pale yellow frosted grapes. A particularly charming hat noted the other day at luncheon hour was of black milan in elongated sailor shape, with a trimming of white petaled, yellow centered daisies of exaggerated size all around the base of the crown and a simple bow of black moire ribbon across the back. Two short amber headed pins held this hat to the hair, which, by the way, was dark, and around the edge of the brim was draped one of the graceful sanpan veils, the latest veil notion of fashion. These veils are square or circular affairs, cut out in the middle to fit over the hat crown and with an elastic run through a casing, so that the veil holds itself on without aid of pins.

Fresh Beets Valuable.

Fresh beets are quite rich in food properties and may be eaten hot with a dressing of butter or cold with an oil and vinegar dressing. Pickled beets, one of the best loved picnic dishes, are invaluable as an appetizer and deserve a place on every table.

Easy & Practical Home Dress Making Lessons

Prepared Especially For This Newspaper by Pictorial Review

FUR TRIMMINGS APPEAR EARLY.

The vogue for brown and green combinations is splendidly carried out in this costume of green serge trimmed with bands of beaver. The back is cut in princess effect.

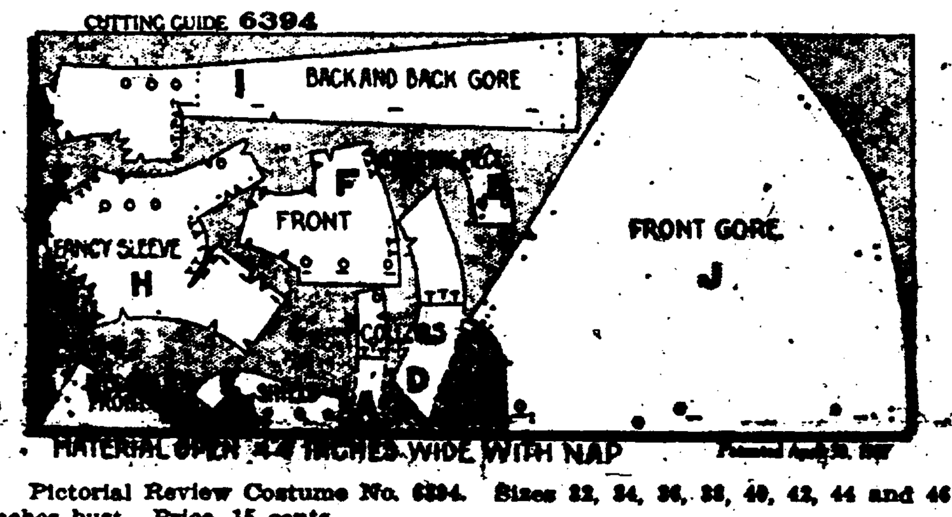
Frocks trimmed with narrow bands of fur have the floor at present, and designers are paying a great deal of attention to the one-piece frock of serge or velvet ornamented with beaver, mink or opossum. The model shown here is carried out in bottle green serge trimmed with black velvet collar. Collar and sleeves are outlined with beaver and the back gore and back of the waist are cut in one to emphasize the princess effect.

In medium size the dress requires 4½ yards 44-inch material, with ⅝ yard velvet for the collar and 1 yard fur banding for the trimming.

Because of the irregular shape of several sections of the pattern it will be necessary to cut the costume from an open width of the serge. There is no reason, however, why two open widths should not be placed together (two right or two reverse sides facing) so that each section will be cut in duplicate.

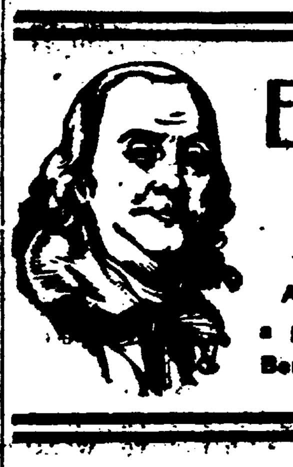
When the various pieces are placed over the surface of the material it will be found that there is left the veriest minimum of unused space. The piecing for the front gore is first placed into position on the selvage edge nearest the cutter. Proceeding toward the opposite selvage, place the sleeve (there are two styles, plain and fancy), then next to this the back and back gore. To balance the long panel of the back gore arrange into position (returning toward the selvage nearest the cutter) the front, the trimming piece that falls over the hips and the collar. Finally comes the front gore of the skirt. All of the various sections are placed on a lengthwise thread of material.

Embroidered medallions may be effectively used at either side of the dress, as well as tabs of self-material.



Pictorial Review Costume No. 6394. Sizes 32, 34, 36, 38, 40, 42, 44 and 46 inches bust. Price, 15 cents.

Economy Hints



A penny saved is a penny earned.—Benjamin Franklin.

THE housewife makes a great moan because she has so many interruptions from tradesmen, so many calls from delivery boys and that her day is one long reception line to the grocer, the iceman, the butcher, the baker, the vegetable boy, etc. But viewing this reception line from the other end of the glasses, how about the time and trips the housewife wastes for each of these who bring her supplies? Is the delivery boy's time not worth something? Does it make no difference to the iceman if he has to stop the wagon, go round the entry and up the eight back steps for nothing?

Dealers in various lines have figured out the daily cost for their delivery service. Every call, every knock at the back door, has a definite cash value. The dealer ostensibly pays it, but ultimately it is the housewife consumer who pays it in higher prices. The more unnecessary delivery service the more the running expense of the dealer and hence less profit which he must make up somewhere else.

It is truly only the inefficient housewife who cannot master the daily tradesman situation. Phone calls demanding four or five deliveries a day indicate the sloppiest of wasteful management. Even with such itinerants as vegetable peddlers a definite understanding can be made as to the two or three special days on which they are to call. The writer lived for the winter months in a somewhat fashionable suburb. Every day at about 8:30 a. m. an order boy called from each butcher, grocer, fish and vegetable store. What a waste of good shoe leather, because certainly if we need a box of cornstarch and a bottle of olives tomorrow we can perfectly well order them today. Or if we are living in any way removed from barbarians who know not where they are going to rush out and catch their next meal we can and must plan meals ahead.

But perhaps it is a poor iceman for whom our pity surges at this season. We hesitate to think that any woman looks with envy on the economic independence of the average iceman. Starting on his rounds at 3 a. m., alternately driving a clumsy wagon and handling and carrying hundreds of pounds of frozen water until late at night, sometimes as late as 10 o'clock on summer Saturday nights—cannot the housewife assist in alleviating his lot?

How many times we permit the iceman to come all the way around only to tell him (as we take his time to look while he is there) that we do not need any ice today. The card system is gaining foothold, but it should be more universally and strictly adhered to. If we need ice let us put out the card, but do not let us waste the iceman's time and that of his team in fruitless calls at our back door.

Hot Weather Comfort.

The pores should be left as wide open as possible if you do not wish to suffer excessively from the heat. This does not mean that you should never try to stop perspiration, because if your glands excrete too rapidly you will have to take some means of reducing your condition to a normal one.

Perspiration should not be allowed to remain on the body any longer than necessary, as it is not only unpleasant, but unhealthy. During warm weather bathing can scarcely be too frequent. Tepid baths are best of all during the hot weather, for hot baths are much too heating, and cold baths stimulate the circulation to such a degree that the after effects are positively glowing.

To regulate the flow of perspiration an astringent in the bath is less harmful than applying it directly to the skin. Alcohol is, of course, cooling and refreshing, but it is very apt to produce tiny wrinkles because of its drying effect. Toilet waters are less inclined to do so, but if the skin shows any indications of dryness after using one a good cold cream must be rubbed in at once to restore the natural grease which the toilet water has absorbed.

Never apply powder till the skin is dry. Powder and moisture paste up skin pores, which should be kept open in order to excrete perfectly.

His Qualities.

"What makes you think Dauber will succeed as a painter?"

"He has the soul of an artist and the perseverance of a book agent."—Philadelphia Ledger.

Woman's Tact.

Rev. Mr. Gassington—Honestly, Miss Deering, do you think my sermons are too long? Miss Deering—Oh, dear, no! I merely think that life is too short.—Puck.

Cookery Points

Don't Cry Over Sour Milk.

At this season sour milk is often a source of unnecessary household waste. Though sour milk has not as many uses as sweet milk there is no good reason for throwing it away, since there are at least one hundred delicious dishes in the making of which sour milk is better than the sweet. When these dishes are wanted, if there is no sour milk on hand, sweet milk is often soured by the use of rennet.

In the southern states, where hot biscuits are found on every breakfast table, only families who keep no cow or are unable to get sour milk use baking powder. These sour milk biscuits when made by a good cook who knows how to handle soda, are not only lighter, flakier and more tasty when hot than those made with baking powder, but when cold there is an even greater difference. A baking powder biscuit will be dried and more tasteless two hours after getting cold than the sour milk biscuit in two days. Besides, the biscuit made with sour milk may be split and toasted and so made to taste just as good as when first taken from the oven.

Besides biscuits there are numerous kinds of griddle cakes and batter breads, including those utilizing cold hominy or cold rice, for which sour milk and the proper proportion of soda is to be preferred to sweet milk and any brand of baking powder. There are also two varieties of sour milk pies and two kinds of sour milk raised bread. In one of these cornmeal is used, and it is called corn light bread. Doughnuts and gingerbread are almost exclusively made with sour milk.

In the genuine johnnycake baking powder is not to be thought of. Only sour milk with the cream well beaten in should be used for mixing the meal before the beaten eggs are stirred in. Such a johnnycake will be eatable at the end of seven days if kept in a dry receptacle. Of course it must be thoroughly cooled before being set away.

For waffles the southern cook refuses any substitute for sour milk with a pinch of soda, which, being measured, means an even teaspoonful of soda to each pint of thick sour milk. To get the best results waffles, both light and crisp, the eggs must first be beaten light, then the milk in which the soda has been thoroughly dissolved beaten in. After this comes the flour, also beaten in until the batter is light both in color and weight.

Sour milk salad dressing when properly mixed and cooked cannot be distinguished from that in which sweet milk is used. The same is the case with sour milk ice cream and of fruit cake. Chocolate gingerbread, chocolate crullers and coffee squares are all improved by the use of sour milk. So are sugar cookies and all of the fruit breads in which graham flour is used.

The one and only secret of using sour milk in cooking is getting the soda in the right proportion. For thick sour milk an even teaspoonful of soda is sufficient for a pint of milk. Where the milk is thin, which means that more of the curd has been eaten up by the whey, slightly more soda should be allowed.

For whitening the hands and face there is nothing better than milk sufficiently sour to bite the tongue. This applied to the face, hands or neck with a soft cloth every three or five minutes is a sure cure for tan and for sunburn where the skin is not blistered. For removing tan and for cleaning silver the milk should have the cream removed.

Chicken Shortcake.

This very unusual dish must be put together at the last possible moment and served immediately. Make a good shortcake of biscuit dough. When done, split the cake and butter it. Have ready a plate of thinly sliced boiled chicken which has been cooled, but not iced. Fill the shortcake with the chicken and spread thickly with a good mayonnaise, lay on the upper half, lightly butter the top, then spread it with a small bottle of macedoine vegetables that have been drained, chopped and marinated in French dressing for one hour, then drained again and mixed with mayonnaise. Serve the shortcake hot and as quickly as possible garnish with sprays of parsley drawn through thin slices of lemon. This is a rich, but most satisfying dinner dish.

Potato Dumplings.

Scrape small new potatoes and stew with a small piece of meat. When done drop in dumplings made of one cupful of flour to which has been added one teaspoonful of baking powder and one teaspoonful of salt, with enough sweet milk added to make a stiff batter. Add one cupful of sweet milk and a little butter and cook fifteen minutes longer without raising the cover in order that the dumplings may be light.

Baked Pea Soup.

Baked pea soup is recommended as very rich in flavor. Cut fine one pound of shin of beef, add half a pound of veal trimmings, a pint of split peas, two carrots, diced; two onions, sliced thin, and one ounce of rice. Season with pepper and salt, adding four quarts of water and one finely chopped stalk of celery. Put the whole in a jar, cover closely and bake for four hours.

TODAY'S FASHION NOTE

A delightful dinner gown in white radium silk, white net and lace. The surplice bodice has large armholes and thel ower edge of the front is finished in pointed outline. A full, accordion-plaited skirt serves as a dainty foundation for the one-piece skirt made in tunic effect. The costume requires, in medium size, three yards 45-inch net, 5 1-2 yards 36-inch silk, 1 yard 27-inch lace and 3 yards 20-inch accordion plaited chiffon.

Pictorial Review Costume No. 6390. Sizes, 32 to 44 in. bust. Price 15c.

Accordion Plaited Skirt No. 4744. Sizes, 21 to 34 in. waist. Price 15c.

Pictorial Review Patterns may be procured at the M. Katz & Co. Department Store, Fulton.

The KITCHEN CUPBOARD

ONE DAY'S MENU.

BREAKFAST.
Stewed Prunes.
Milk Toast.
Corn Bread. Butter.
Tea, Coffee or Milk.

LUNCHEON.
Creamed Salmon on Toast.
Macaroni, Italian Style.
Corn Bread. Tea.

DINNER.
Cream of Celery Soup.
Veal Ragout.
Baked Corn. Vegetable Salad.
Maple Mousse.
Tea or Coffee.

Cream of Celery Soup.

CLEAN thoroughly the outer pieces and tops of celery. Cut in bits, cover with water and boil until tender. Put through a sieve and add amount of milk you like. Thicken with cornstarch.

Creamed Salmon on Toast.

Make a white sauce by melting two tablespoonfuls butter in a saucepan. Add one tablespoonful flour and stir until it is a smooth paste. Now add one and a half cupfuls of warm sweet milk and season to taste. Mix this with one small can of salmon and pour over hot toast.

Corn Bread.

To the required amount of coarse white cornmeal add just a pinch of salt and enough sweet milk and cream to make a moderately stiff batter. Make into small cakes half inch thick. Put on a buttered griddle. When brown on both sides put in oven for a few minutes and serve hot.

Veal Ragout.

Grease a saucepan with a large tablespoonful of butter. Add three finely chopped onions and fry slowly until brown. Wash a piece from the neck or breast of veal and lay in a saucepan without drying it. Add two carrots cut in dice, two tablespoonfuls chopped parsley, salt and pepper to taste and one tablespoonful sugar. Cover and stew slowly for two hours.

Maple Mousse.

Mix two cupfuls heavy cream and three-fourths cupful maple sirup. Whip until thick and add one cupful chopped nuts. Put in mold and pack in ice and salt. Let stand two or three hours and serve.

Cheese Salad.

Wash and clean a head of crisp lettuce. Quarter and add plenty of grated American cheese. Garnish with stoned ripe olives. Make a rich oil and vinegar dressing and pour over salad.

For Rent—A flat at 504 Pine street. $10 per month. H. L. Crandall.

INDIGNANT AT ITALY'S NEW WAR DECLARATION

Amsterdam, via London, Aug. 23.—The German newspapers, copies of which have been received here, express indignation at Italy's declaration of war on Turkey, asserting that Italy is merely acting on the orders of Great Britain.

The Tageblatt says that although Italy has not yet declared war on Germany, she is ready to act whenever she is ordered by the Allies.

"The declaration of war on Turkey," says the Vossichf Zeitung, "is the natural consequence of Italy's vassalage to Great Britain and France but Turkey need not worry, as Italy will break her teeth on the Dardenelles, like Great Britain and France have done."

ITALY BEGINS WAR ON ALCOHOLIC DRINKS

Milan, via Paris, Aug. 23.—The authorities withdrew 1,800 licenses to sell alcoholic drinks, beginning a campaign against alcoholism. Many bars, inns, saloons and refreshment houses have closed.

Moderate south to southwest winds, partly cloudy tonight and Tuesday, with possible showers.

GEORGE FISHER SUSTAINS SOME SERIOUS INJURIES

George Fisher, whose place of residence is on the West Side, hired this noon to go to work at the Dilts Machine Works in North First st. and within an hour he was removed to the hospital suffering with a broken right leg, a number of bruises and perhaps internal injuries. An X-ray examination is being made by Dr. Gladman, who is the mans family physician, at the hospital this afternoon to ascertain if there are any internal injuries.

At the time of the accident Mr. Fisher was engaged with others in removing pig iron from freight cars at the rear of the Dilts Works and in some unaccountable way a mass of the metal toppled over on him. The injured man was taken from his position and removed to the shop. Dr. Fox and Dr. Gladman were immediately summoned and after temporarily treating the man's leg had him removed to the hospital.

ITALY GREETS NEWS OF NEW WAR WITH CHEERS

Rome, Aug. 23.—Italy's declaration of war against Turkey has been greeted enthusiastically from the Alps to the Ionian sea and across the Mediterranean to Lybia, from which the Governor General has sent a telegram directing that his troops claim the privilege of being the first to enter into the new campaign.

General Codorna, commander in chief of the Italian army, says men received the news with great cheering. In the places along the war front where the Italian trenches are separated by only a short distance from those of the Austrians, it is declared that the shouts of "Long Live Italy,' and "Down with Austria and Turkey," were so loud that they were heard by the Austrians who hurried to arms, thinking they were about to be attacker.

The general staff has discussed with King Victor Emmanuel the plan of the new campaign against Turkey. The government has received assurances that the American authorities have taken the necessary steps to protect Italians in Ottoman territory.

It looks now as though the kaiser may decide to extend his Warsaw parade to Petrograd so the Romanoff girls can see it.—Grand Rapids, Mich., Press.

FIGHTING DRUGS AND ALCOHOLISM; WHAT ONE MAN DID IN 14 YEAR BATTLE

Charles B. Towns Tells How One May Be Permanently Cured of Habit.

Ravages of Narcotics and Liquors in United States Are Worse Than Tuberculosis.

THIS is the story of a modern St. George and his titanic struggle with a herd of modern dragons.

The St. George is Charles B. Towns, American citizen born and bred, resident of New York, and the dragons are those deadly and devastating habits which have put such an alarmingly large proportion of humanity in this day and age under their subjection, to wit—the drug habit and alcohol addiction.

But Mr. Towns goes further than the valiant St. George of mythological fame. St. George simply fought with the dragon and laid him low; Mr. Towns fights his dragons and their ubiquitous progeny. He also spends his might and main in reclaiming some of the human devastation wrought by those foul fiends, besides instructing and inspiring states and legislatures in the science of preventing through wise laws their further rise and frightful dominance in the fair field of human life.

The writer of this article has been privileged to see the advance proofs of Mr. Towns' forthcoming book, which deals with the menace of drugs, alcohol and tobacco and the remedy for those habits.

Charles B. Towns—the Man.

One expects to find Charles B. Towns an unusual personality. For a layman to have taken new principles like his, to have developed them into a practical method, to have perfected a technique which physicians seem unable to improve, to have struggled for years against professional prejudices and tradition, to have at length won the approbation, admiration and support of the most eminent men in the medical world, to have established a big institution, to have attracted the attention of the heads of some of the greatest industrial enterprises in the world—the great captains of industry—and to have become the trusted counselor of states and the instigator and virtual author of laws regulating the deadly traffic in drugs—these are things that could only be accomplished by an unusual personality. One is not disappointed.

How Towns Began His Great Work.

Mr. Towns has handled some 6,000 cases of drug and alcohol addiction and is at the present time handling between 1,000 and 1,500 a year. His taking up the work in 1901 was due almost entirely to an investigation into the methods employed to restore those who had lost control through the use of habit forming drugs. At that time such cases were supposed to be hopelessly incurable, and the victims drifted from bad to worse until they arrived either at the madhouse or the morgue.

On making inquiries from some of the leading medical men who had been dealing with the various types of mental and nervous diseases Mr. Towns learned that they were virtually unable to name any case of a confirmed drug user who had been permanently benefited by institutional or any other treatment. It seemed incredible to him that a skilled physician could not eliminate the craving or desire for the drug or restore these unfortunates to the point where their systems would not demand or feel the need of it. He soon found out why this was so. Investigation showed him that the drug habit is a mental as well as a physical condition; that the physiological action of an opiate is to tie up the functions, which results in a deterioration of the vital organs when the victim has taken the drug sufficiently long to set up a definite tolerance.

The medical world had apparently been unable or had not attempted to bring about, first of all, a definite physiological change and to put such patients in a physical state in which their systems would not demand their customary poison. To his further surprise he found that the medical world had been depending entirely on deprivation or gradual reduction of the dosage as a means of treating such cases.

Treating 4,000 Patients In China.

In 1908, when the Chinese government was carrying on its great fight against the use of opium, Mr. Towns with characteristic energy put his New York affairs in good hands and betook himself to China. He was sure that terrible mistakes would be made in such a campaign unless some one who knew the alpha and omega of drug taking were on the spot to point out the pitfalls and to throw light on this much misunderstood subject. He remained in China nearly a year, and at his own expense and in the face of obstacles that would have broken the will of any man only a little less determined he established four hospitals, at which 4,000 Chinese were successfully treated, passing on his method to others there when he returned to continue his work in America.

Some of Towns' Latest Exploits.

Apart from this remarkable exploit and from the regular work that is being carried on at his hospital in New York Mr. Towns has recently been the chief figure in two noteworthy undertakings—undertakings that are likely to be the forerunners of sociological regeneration on a large scale in respect of drug and alcohol addiction. Henry Ford, the automobile manufacturer, having become acquainted with Mr. Towns and having acquired a complete faith in his method of treating drug and alcohol victims, conceived a desire to install in his new hospital whatever might be necessary for the treatment of drug addiction and alcoholism. Accordingly he sent five patients from his factories to New York to take the Towns treatment, with a physician to learn the Towns technique. The patients were reported cured of their craving in less than a week, and the Towns method has now been definitely adopted by the Henry Ford hospital.

Mr. Towns has just finished the conducting of a clinic for a national committee working on the subject of prison reform, the results of which are expected to bring about a complete revolution throughout the country in the handling of prisoners addicted to drugs and alcohol.

A Much Misunderstood Matter.

Everybody knows something of the ravages of alcohol, though few realise the full extent and the ramifications of the scourge and tragedy of alcoholism. As to drug taking and its consequences, it may be said that the general public knows nothing of them beyond having a vague notion that there are some drug fiends, as they are called, in every large community and

CHARLES B. TOWNS.

that they are usually looked upon as being degraded beings, beyond hope of regeneration.

It will come as a great surprise, therefore, to read the following lines in Mr. Towns' authoritative work: "Discussion of the drug problem in the press has until recently dealt wholly with those phases which make themselves manifest in the underworld or among the Chinese. * * * The world heard nothing of the blameless men and women who had become drug users as the result of illness. This seems strange since there are in the United States more victims of the drug habit than there are of tuberculosis. It is estimated that 15 per cent of the practicing physicians in the country are addicted to the habit, and, although I think this is an exaggeration, it is nevertheless true that habit forming drugs demand a heavy toll from the medical profession, wrecking able practitioners in health and reputation and, of course, seriously endangering the public."

Of the many physicians who have gone to Mr. Towns for help 99 per cent of them explained to him that their use of drugs was the direct outgrowth of their ignorance. And "if the man who has studied and who practices medicine is unaware of what will bring about the habit," pertinently asks Mr. Towns, "what can be expected of the medically uneducated citizen who is started on the dangerous road by those in whom he puts his faith—his doctors?" Clearly humanity must be protected from such an evil. "And the physician must be saved from it, for saving him will fulfill in a large measure the demand for the protection of the public."

Victims Unfairly Treated by Society

Mr. Towns is strongly of the opinion that up to the present time most drug takers have been unfairly treated by society. They have not been properly safeguarded from forming the habit or properly helped to overcome it. "It is criminally easy," he says, "for any one to acquire the drug habit. Few physicians have recognized that it is not safe for most persons to know what will ease pain. When an opiate is necessary it should be given only on prescription, and its presence should then be thoroughly disguised. A patient goes to a physician to be cured. When his pain disappears he naturally believes this is due to the treatment he has received. If the physician has used morphine in a disguised form the patient naturally believes that the cure was effected by some unknown combination of medicines, but if he has received morphine and knows it he realises at once that it is this drug which is responsible for easing his pain. With that knowledge he will be tempted to resort to the same means of relief again.

The system rapidly begins to tolerate the drug, and as soon as toleration begins a craving is set up which becomes irresistible and the habit which leads to perdition is established. Not more than 10 per cent of the drug consumption in this country is applied to the purpose of blunting incurable pain. Thus 90 per cent of the opiates used are, strictly speaking, unnecessary. In the 6,000 cases that have come under my observation 75 per cent of the habitual users became such without reasonable excuse, beginning with small doses, beyond which they fondly supposed nothing could induce them to go, and inevitably soon losing control of themselves."

Alcoholism Much Misunderstood.

Alcoholism—that is, chronic addiction to indulgence in spirituous liquors—is also much misunderstood, both in its physiological and its psychological processes and particularly in the measures usually adopted for its alleviation and cure. One of the many discoveries that Mr. Towns has made and is doing his best to impart to the world at large is that the alcoholic, like the drug victim, does not get a fair deal from society—society whose experience has demonstrated that it must in some way protect itself from him.

"At present," says Mr. Towns, "the only public recognition of the alcoholic is manifested through some form of penalization. He loses his employment; he is excluded from respectable society; in extreme cases he is taken into court and subjected to reprimand, fine or imprisonment. Society does virtually nothing to awaken his will or free it from its slavery so that it may operate normally. The man whose drinking has so disarranged him physically or mentally that he is obviously ill is taken to the alcoholic ward of some hospital, but even there no effort is made to treat the definite malady of alcoholism. The victims are merely 'sobered up.' When they have achieved sufficient steadiness of nerve to make their discharge possible they are turned out again into the liquor ridden city, with their craving for alcohol no weaker, with their resolution to resist it no stronger than they were before the crisis in their alcoholic history engulfed them.

"There is as yet no public institution in even such a city as New York where a man, either as a paying or as a charity patient, may go for medical treatment designed to alleviate the craving for liquor. No organized charity makes provision for the medical treatment of the alcoholic. There are no clinics devoted to the study of alcoholism, although it is the ailment of probably one-third of the sick people in the world today. A large proportion of the cases of disease other than inebriety treated in all public hospitals have histories more or less alcoholic, and the insane asylums are crowded with those gone mad through drink. It is the demand of common sense, not of sentiment alone, that this situation should be altered. Society has continually made the mistake of maintaining, when encountering the alcoholic, that it has crime, not disease, to deal with; hence the crudely ineffective idea of penalization as a preventive. The attempt at remedy almost invariably made is by means of sudden enforced abstinence. This remedy is worse than the disease. It rarely helps and sometimes kills. I have seen many men who have been driven stark mad after they had been deprived of alcoholic beverages without proper treatment. They had been pronounced definitely insane, but their minds became perfectly clear as the result of the medical care their cases required. By merely depriving an alcoholic of alcohol without eliminating his desire for it, he is likely to be forced into something worse."

The First Principles of the Cure.

"The turth is," emphatically declares Mr. Towns, "no man who has become addicted to the use of alcohol can possibly abandon it unless he has first undergone a complete mental change, and in ninety-nine cases out of a hundred this alteration of the mental state will not come until he has experienced a physical revolution. The only chance of reforming most alcoholics lies in giving them opportunity through this physiological change to re-establish confidence in themselves. But nothing of any durable value can be accomplished until you have before you a man whose system is no longer crying out for liquor, with every nerve aquiver for it, every tissue thirsting for it. There have been reforms from alcoholism which were not preceded by this physiological change, but they have been rare."

The Basis of the Towns Method.

In the treatment of cases of both drug addiction and alcoholism, then, the first thing that is done under the Towns method, the basis of the treatment, is to unpoison the patient. The drug poison or alcohol poison which has been accumulating in his nerve and brain cells and in his tissues must be eliminated entirely from his system, and this must be accomplished without entirely depriving him in the first stages of his customary narcotic or alcohol. This process usually takes four or five days, and the entire treatment rarely occupies more than a week.

RUSSIANS SAY GERMANY LOST 11 VESSELS

Squadron Covered Landing of Troops at Riga and Suffered Heaviest Blow of War to Kaiser's Navy.

London, Aug. 23.—A despatch to the Daily Telegraph from Petrograd reports that the president of the Duma announces that the German fleet has fled from the Gulf of Riga after a great naval battle, in which the Germans lost the battle cruiser Moltke, three cruisers and seven torpedo boats. In trying to land near Pernpvin four barges of enormous dimensions crowded with troops were captured and thel anding force annihilated. It is believed here British submarines played an important part in the defeat of the German fleet

The announcement to the Duma was made public in these words:

"The German fleet has withdrawn from Riga Bay.

"The Germans tried to make a descent near Pernpvin (Pernigel, on the east shore of the Gulf of Riga, some thirty-five miles north of Riga.) Four barges crammed with soldiers took part in the descent. They were repulsed by the Russian troops without the co-operation of artillery, the Germans bein exterminated and the barges captured."

The statement made in the Duma by the president elicited unbounded enthusiasm and was accompanied by touching scenes. The Deputies of all factions mutaully congratulated one another.

The news spread through the city and the people gathered at the newspaper offices awaiting the hanging out of the official bulletin concerning the battle. The people regard the reported victory as the turning of the tide in favor of Russia.

The loss of Moltke is the most severe blow yet suffered by the German navy. There is no question here that the ship was the victim of either torpedo or mine. It is evident from all accounts of the operations in the Gulf that the Moltke was one of the ten first line vessels engaged in clearing the gulf of the Russian units and later convoyed troop ships bearing forces to co-operate with Field Marshall von Hindenburgs army west of the City of Riga by engaging in a turning movement from the northeast.

The Russian Ministry of Marine last night announced that the German war ships had left theg ulf, but there is a disposition in naval circles here to believe the manoeuvre more of a strategic move than a defeat. There has been no question that the Germans had a vast superiority in number and size of ships in the Riga waters. The reports from Berlin and Petrograd on Saturday indicated that the Russian craft had withdrawn into the Gulf of Finland, with the exception, as it develops, of submarines left to oppose landing operations.

In view of this fact, it is believed the Germans have taken the outside course around Osel and Dago islands, where there is a depth of water sufficient for all ships, and are endeavoring to find the Russians who took advantage of their shallow draught to use the passage through Moon Sound and Wormser Channel into the Gulf of Finland. These craft are believed to have joined the main Russian Baltic fleet at Sveaborg, or further to the east, at Borgic. This would be in accordance with Russian naval manoeuves as worked out in recent years and explained in another special despatch to the Herald this morning.

The Moltke, which will be remembered in New York as one of the German squadron which steamed to the United States to return a call made by the American battle ship squadron at Kiel during its trip around the world, was a battle cruiser of 23,000 tons. She was a sister ship of the Goeben, transferred to Turkey at the beginning of the war. Her normal complement was 1,197 men.

In the battle in the North sea last January with a British battle cruiser held second place in the German line. At that time she was reported as having suffered minor damage, but this was denied in Berlin. According to the latest available German naval list she was commanded by Captain von Levetvow.

The Moltke was 590 feet long and was armed with ten 11-inch and 12 6-inch guns and 12 24-pounders. In addition her armament included four 20-inch torpedo tubes. She was built at a cost of about $12,000,000 in 1911, and had a speed of about 28 knots.

Torpedo Sank Arabic Without Warning, Says British Foreign Office

London, Aug. 24.—Official and unofficial statements were made today bearing upon the precise status of the steamship Arabic at the time she was sunk, the purpose being to show definitely that she was an unoffending merchant ship proceeding on her course, and that without question she was struck by a torpedo fired by a German submarine. The latter point became increasingly important owing to cable reports from the United States stating that some Berlin officials maintained that since there was no proof any one aboard the Arabic say the submarine, the sinking might have been the result of striking a mine.

The Foreign Office issued a brief statement summing up the facts within its knowledge without disclosing all the details in its possession. The statement said definitely that the Arabis was sunk by a German submarine without warning and without any attempt on the part of the steamship to attack the underawter craft or to escape. The announcement also declares the Arabic was unarmed and was proceedin to a neutral port, and therefore carrying no contraband. This is considered a summing up of the British official view of the essential facts and as showing the culpability of the German submarine in sinking the vesals.

The most important direct testimony came, however, from men of the crew of the Dunsley, who gave circumstantial evidence of seeing the German submarine while she shelled the Dunsley. They declared thatd uring her maneuvring astern of the Dunsley the subhersible came so clearly into view that it was possible to note she showed no number or distinguishing mark. Later, they declared, the submarine submerged and rounded the Dunsley's stern, showing only the periscope.

These statements are considered to fill the gap in the testimony given by Captain Finch, the passengers and crew of the Arabic, who did not see the submarine because she was astern of the Dunsley. Those aboard the Arabic have declared they saw the torpedo speeding toward the vessel, and the Dunsley's survivors now assert the torpedo was fired from a German submarine they saw maneouvring behind them.

All the affidavits made by the American passengers on board the Arabic now have been cabled to the American State Department. These statements give every detail available from American sources. They relate chiefly to individual experiences, but all agree that no warning was given. The approaching torpedo was seen but not the submarine.

The funerals of some of the men of the Arabic's crew, whose bodies have been recovered were held at Queenstown today. The services were attended by membrs of the City Council, the Royal Irish constabulary, representatives of the White Star line and a great crowd of citizens.

ITALIAN SHIPS LEAVE PORTS FOR DARDANELLES

Paris, Aug. 24.—Troopships, loaded to capacity and convoyed by war ships, left four Italian ports yesterday. The War Office made no announcement of their destination and the commanders of the transports weighed anchor with their orders sealed. Naples, Syracuse, Taranto, and Brindisi were the ports from which the flotilla steamed.

While there is no official statement of the uses to which these troops will be put, there is no question in Rome or in Paris but they will be heard of next at the Dardenelles. It was generally understood that Italy's declaration of war against Turkey meant the immediate dispatch of an expeditionary force to aid the Entente Powers in their effort to break the barrier to the Balck Sea.

All arrangements for joint artillery action by Italy with Britain, France and Russia against the Turks were completed in July when the Italian General Pirro made a tour of the Anglo-French front. A series of conferences were held at that time and plans were prepared for the utilization of an Italian force the moment Italy entered the lists against the Sulton. Naturally the details of these plans were carefully kept secret, but there is a belief in military circles that the Enos route to the Sea of Mamora may be the object of the Italian force. The Port of Enos, on the Gulf of Saros, is almost on the Bulgarian-Turkish border. An advance from there would strike the Marmora Sea just north of its outlet to the Dardenelles and would cut off the entire Turkish army on Gallopoli peninsula. When the FrancoBritish land force was sent to Gappapoli there was a general impression that Enos would be one of the points of invasion. The news dispatches at the time told of the capture of the

RUNNING A CITY LIKE A BUSINESS

No. 3—How the People of Buffalo Will Keep Track of What Their New Commissioners Do

The commission charter which goes into effect in Buffalo on January 1 vests the entire executive and legislative power in five men. Naturally, however, such a concentration of power would not be established without some checks. The commissioners are to be elected by a system which is calculated to eliminate party politics so far as party politics can be eliminated. Each commissioner will owe his nomination and election to the people alone. No party boss or organization can help him except by controlling a majority of the whole people.

But the responsibility of the commissioners to the people does not end with the election. That is one of the strong points of commission government. The system attempts to keep the officials under the public eye all the time and to make them feel that the public eye is upon them. One check imposed is the requirement that nothing shall be done in secret.

ALL COUNCIL MEETINGS PUBLIC

All meetings of the Council must be public. It will be the right of any citizen to step in at any time and see what is going on. Every vote must be by ayes and nays and must be recorded. Every resolution or ordinance must be signed by the mayor and at least two councilmen—that is, by the majority which passed it. A journal must be kept and published, and four times a year there must be published a full, clear and complete statement of the financial operations of the city ruding the preceding quarter.

But a more important check is the referendum. Public knowledge of a mischievous act is small satisfaction after it has been accomplished. The Buffalo charter prevents any act from being accomplished without giving the pubic full opportunity to know about it and to block it if they wish. With a few specified exceptions, no ordinance can go into effect until thirty days after its final passage. If during these thirty days opposition develops, a petition of protest may be filed. The protest need be signed by only 5 per cent. of the entire number of votes cast for all the candidates for mayor at the last preceding election. On receiving such a protest the Council must reconsider its action. If it does not decide to repeal the ordinance it must, within twenty days, refer the matter to vote of the people at either a special or general election.

Resolutions appropriating money except for regular pay-rolls incurring any expense or disposing of any property or city rights shall be subject to the same rule or ordinances. Public utility franchises must be referred to a vote of the people, in any event, and the cost of any special election held for that purpose must be borne by those seeking the franchise.

Publicity and the referendum, therefore, are the two great popular checks held over the powerful governing commission. In most cities having commission government there is also the recall, but that has been left out of Buffalo's charter. Neither has Buffalo the intiative. The idea of the Buffalo charter is to hamper the governing body no more than is absolutely necessary to prevent it from going wrong.

(No. 4 of this Series Will be Published Tomorrow.)

(Copyright, 1915, by S. S. McClure.)

Sir Lan Hamilton, in supreme command of the allied expedition, decided to direct his armies from the tip of the peninsula and the landings all were made near the entrance to the straits.

There has been the wildest enthusiasm among the Italian soldiers for another brush with the Turks, and the utmost confidence prevails that the Ottoman hold on the Golden Horn will be torn loose now that they are to join their French and British allies in that theatre.

GERMANS TRYING TO OVERCOME RIGA DEFEAT

London, Aug. 24.—The German center is pressing forward steadily on the Bug River-Brest-Litovsk line of the Russian defense in an effort to balance the handicap that has spread itslef over the operations in the Dvinsk sector by reason of the failure of the naval wing to obtain control of the Gulf of Riga. Prince Leopold of Bavaria and iFeld Marshal von Meckensen are closing in on the intrenched camp of Brest-Litvsk and there was a feeling in London last night that its bombardment may be expected any day. As before the fall of Warsaw, the Petrograd dispatches have prepared the way for the news by referring to the gradual encroachment of the Austro-German armies and thed angers confronting the position.

Ossowetz yesterday was occupied by the Germans, leaving in Russian hands only Grondo and Brest-Litovsk of the central strongholds.

The siege of Ossowetz was one of the most interesting of the

Resolution to Widen East First St. Goes Through By a Fluke

The several property owners who were opposed to the plan of the Board of Public Works to widen First st. between Rochester st. and Broadway to 38 feet when it is paved, neglected to read some of the charter provisions carefully in order that they might take the proper steps to forestall any such action, and therefore did not succeed in holding up the resolution passed by the Board of Public Works in session last night, that the street be paved 38 feet from curb to curb. The charter, according to the reading by President Stevenson of the Board of Works, distinctly states that the board "may, on its own motion," pave any street or change any street in the city, and adds that it may also be influenced to this action by a petition signed by two-thirds of the abutting property owners favoring the improvement. It does not state, as F. A. Gage seemed to believe, that a two-thirds consent of all abutting property owners was necessary to any such action, and it further states that two-thirds of the property owners must petition against the action of the board in order to prevent it.

According to the newspaper notice, the meeting last night was to be called at 8 o'clock. Mr. Gage and George E. Mason, accompanied by another gentleman, said to be an attorney, appeared at 8:15. Mr. Gage then handed his petition to City Clerk Scudder saying, "I wish to file that with you."

Mr. Gage Was Too Late

Picking up the charter, Mr. Stevenson read to Mr. Gage the provision which stipulates that such a petition must be filed before the meeting, and told Mr. Gage the meeting was already in session. Mr. Gage said City-Attorney Fanning told him Sunday evening that the meeting would be called at 8:15, but presented the petition nevertheless, and the clerk took charge of it.

The petition is signed by O. C. Breed, Catherine Parsons, L. Fowler Joy, Mary Mead, Sarah C. Pratt, Harriet Nelson, F. A. Gage, G. E. Mason, William MacNamara, Almon Bristol, E. H. French and F. C. Ashe, as secretary of the Oswego Falls Pulp and Paper Co. Mr. Ashe's signature was for the property owned by H. Lester Paddock, or the company, near Broadway. Mr. Stevenson questioned the signature of the company, saying that Mr. Paddock had promised he would neither sign for nor against the paving loan.

However, City Engineer Hill told the board there were 3.802 feet along the section to be paved, of which the state owned 1,050. The state land could not be included in the total and in order to defeat the plan of the board, Mr. Gage and his conferees were obliged to show signatures covering two-thirds of the 2,752 feet that remained. The petition was signed by property owners of 1,310 feet frontage, and when the Library tract, as city property, had been subtracted from the total of frontage, the petition showed a little more than half of thep-roperty owners in opposition, and not two-thirds, as was necessary.

Was Short a Few Names

Mr. Gage could not credit this announcement and seemed to think there was a mistake somewhere. He examined the document closely and tallied the number of feet, but the total number remained the same. When he was finally convinced that the petition could not defeat the action of the board, which was now waiting for the arrival of City-Attorney Fanning, Mr. Gage told Mr. Stevenson "Well, if you think youre all right, go ahead and pave the street."

"Personally, I don't care how the street stands, but I have had any number of taxpayers come to me and ask me to insist that this matter go through right, and I'm going to do it," said Mr. Stevenson.

"I don't believe anyone ever asked you to do it," said Mr. Gage, "Your statements aren't reliable, John."

"Well, that may be, too," said Mr. Stevenson, "but I'm not considered the village jester. Now you go ahead with your lawsuits, if you want to bring any. We welcome them; they cost the city nothing."

After Mr. Fanning arrived, Mr. Gage asked him if a two-thirds consent of the property owners was not necessary in order to pass the improvement, and Mr. Fanning told him no consent was necessary. Messrs. Gage and Mason made a last attempt to prevent the resolution when it came to a vote, by demanding that they be registered as voting against the resolution. City Clerk Scudder was in a quandary for a moment, as Mr. Gage was insisting that his vote be registered, while Mr. Stevenson was just as insistent that Mr. Gage had no vote, inasmuch as the board convened as a Board of Public Works and not as a paving board. The motion carried with Messrs Stevenson and Garrett voting for it, and Commissioner Wiltsie against it.

Would Relieve Manufacturers

J. J. Jordan appeared before the board as a representative of the Industrial Division of the Chamber of Commerce, which asks that the manufacturers of the city be permitted to connect their fire sprinkling systems with the water mains without paying the sprinkling tax exacted in such cases. Mr. Jordan argued that the sprinklers saved the city a great deal of water, inasmuch as it assisted the firemen materially in extinguishing fires, and said some of the manufacturers were paying as much as $40 a year tax for their system. Mr. Stevenson agreed that it aided the fire department, but did not think the manufacturers should have the water privileges without

Pope Benedict's appeal for peace was well timed. The fall of Warsaw seemed a foregone conclusion, and that event was a turning point in military operations, one to cause belligerents to stop and think. The appeal dealt mainly with generalities, as was proper when addressing the Christian conscience of Europe. Several detached sentences summarize, each a whole sermon which the author might have preached, but wisely left to statesmen to preach to themselves. He said "thousands of young lives are being snuffed out daily," "the price of the struggle is too high" and "the bloody carnage which for a year has dishonored Europe." All of this he might have expanded to show how not alone the flower of youth is being destroyed, but that womanhood, old and young, is turned aside from normal paths and the progress of our best civilization checked for an indefinite period. Already it has been broached in the allied camp that polygamy can be revived to repair the wastage of productivity caused by bullets and shells. This is but one of many problems to be faced. "A fight to the death" is what the wrong headed and mad brained belligerents are pledged to persist in. Is not this an hour when the "higher law" of right should prevail over man made precedents and technicalities and national pride?

Co-operation by neutral South American countries with this country in the pacification of Mexico seems to be the most natural plan which has been proposed. Aside from the antipathy which the Mexican factions have for each other and which is a drawback to getting together themselves, there is the distrust, when it is not hatred, of the people and power north of the Rio Grande. If the leaders of other South American states—as, for instance, the A. B. C. powers—guarantee to those of their own blood our sincerity and good faith and stand ready to co-operate for the good of Mexico, the long standing suspicion of us may be allayed to the extent that our true position and friendship will be understood.

Naturally the idea suggests itself that the warring of factions in Mexico can be stopped or the end hastened by stopping the exportation of munitions and arms, as was done once before. But the allies in Europe practically confess that they cannot continue the war there without our arms and munitions. Unless it be assumed that this country wishes the European war to continue to the bitter end the difference seems to be about that between tweedle-dum and tweedle-dee.

It really seems that moving pictures which do move, joy rides, yellow journalism and the "best seller" problem novels are indispensables to make life worth living for a great many people, a great many. Tell this to grandma, but be sure to have the smelling bottle handy, extra strong at that.

They have improved war methods almost beyond recognition, but the ancient type of general who burns his bridges behind him to "win or die" could probably get a job in the czar's outfit.

Mexico's complicated money trouble recalls the plowboy's remarks as to the "grub" the thrifty farm wife set before him—"good enough what there is of it" and "enough of it sich as it is."

The British premier says "England can laugh at the invasion peril." That is all right for the center of the "tight little island," but accounts from the wide seacoasts tell a different story.

It is estimated that the cotton exports from this country for the year will fall but little below that of 1913-14 notwithstanding the disturbance of trade by the war.

Huerta is learning English. But it's no matter to us what language he speaks, so that he thinks the vital questions over in United States terms.

The stinger belongs in the head of this one, not in the tail: "In hands of men entirely great the pen is mightier than the sword."

A rose of any old size would smell as sweetly, even if not as mightily, as that newly bred nineteen inch freak in Canada.

BOSSING

One of the favorite campaign buncombe statements of the opponents of the Commission-Manager form of Government—the Business Men's League, is that out of the reform system a little monarchy shall arise that will have nothing to do with the people—those who support our schools, churches and every form of public utility. Some rather clumsy arguments have been used in support of the League's contention in trying to get around the point that the Commission-Manager form of Government is a truly democratic institution, from the fact that it has salaried bosses whom the taxpayers can trust, and consequently the paid political advertisements appearing over the name of the League have made the most of every bit of nice-looking falsity they can discover.

But when you try to pin the Business Men's League down to an open argument, to give facts and statistics, then it's a different matter. The talk in the political advertisements under such conditions makes the position of the League more foolish than ever. It is not hard to shoot to pieces the foolish statements. The M. M. Wilmer articles as far as they have appeared on the front page of The Evening Times have succeeded in puncturing the old, frayed and silly statements about the necessity of looking ahead to an epoch of Darkest Russia under a newer and better system. Mr. Wilmer has shown the readers of The Evening Times that no matter how well-meaning the average man in city politics may be, or no matter how many fairly definite ideas as to what he wishes to do or what ought to be done he rarely has force enough to bring about the desired conditions and he automatically submits to taking orders, hence the city boss. One boss, mark you and not four or five bosses, as would be the case under the Commission-Manager form of Government. Is it not plain as plain can be to anybody that wants to know the truth of the matter, that it is preferable to have the boss-ship removed from a centralized power—for instance, one man? What is the government of "Darkest Russia' but a centralization of power? Is there anything democratic in a system of municipal government that gets its orders from one man?

Next time the Business Men's League tries to tell you that the Commission-Manager form of Government is an attempt to create a new monarchy here, just spring the thoughts suggested by the Wilmer articles, one of which is that if a city must be bossed let the bossing be done by the men who compose the government and not by some irresponsible and, perhaps, inefficient bosser.

GET ON OR GET OFF

Work is never work when you are really in earnest, when you truly, honestly, sincerely are in sympathy with what you are trying to do.

Play proves nothing but a bore, tedious and tiresome, when your heart is not in the game.

It's not how much you work, but how much you want to work. You never will do well until you want to do well.

Your success depends on your mental attitude toward the task on hand, the business before you.

It is not the number of hours that you devote to your work, it's the number of earnest hours, and the amount of enthusiasm, that you put into your work.

Get into the game mentally. The field is filled with muffers, bluffers and grandstand players. If you cannot warm up, get off the track, and give the trail to some one who can show speed without a windshied.

Nobody cares much what happens to the indifferent man, so long as he does not hang around and get in the way of those who would work.

Your life is your own, and you can do with your life as you please; but you have no right, no legal or moral right, to put your front feet in the trough and refuse to let any one else get there.

When you get discouraged, disheartened, and you feel that everything is going out and nothing coming in, just go down to the dock and watch the tide at its lowest level, and then watch it come back in again.

Your failure is of little importance to the world. The world is lumbered up with failures. If you refuse to work, you are in the way. Get on or get off.—Silent Partner.

Youngest Leading Lady in World Tells of Her Experiences in Support of Selig Movie Stars

"You See? He Does Not Love You!"

By GRACE DARMOND.

My home is in Chicago. One day about two years ago I walked into the Chicago studios of the Selig Polyscope company. The studios are not so very far away from my parents' home. Maybe that was the reason I walked into them. The superintendent of the studios needed 'extra people.' I had visited the studios in curiosity; I remained to take part in a Selig feature film. That was the beginning of my motion picture career. One must protograph well in order to attain any degree of success in motion picture work. I was told that I photographed well. My profile is clear and my features are adaptable to the animated screen. I was asked to take other minor parts. I liked the work—there is a fascination about it—and I accepted.

That was about two years ago. Today I have the honor of being assigned to many important roles in Selig Red Seal plays. I have assumed leading feminine parts in "A Texas Steer," "The Millionaire Baby," "The House of a Thousand Candles," "A Black Sheep," and other productions which have won further fame for the Selig company.

I have been asked the reason for my rapid success in a difficult profession. The only answer that I can give is 'hard work.' There were other incidents that also contributed to my success. One of the most important is that Col. William N. Selig, president of the company which bears his name, gives everyone a fair opportunity. He appreciates close attention to work and loyalty on the part of his employees. I was fortunate enough to please him and the directors and was assigned to more important roles as time passed, and I gave my entire time and thought to them.

Perhaps there is another qualification connected with my promotion that should be mentioned here. I had had stage experience. I appeared in the spoken drama when five years of age, taking the title role of Editha's Burglar.' Later I appeared in stock companies. This experience in the art of acting was certainly of untold benefit to me.

I have been told that I am the youngest leading woman in motion pictures. Maybe I am, but I have earned the parts I play. Working in motion pictures is not pastime—it is hard work. In motion pictures, as elsewhere, work counts.

Long hours fall to those who engage in motion picture acting. They report at a studio at a certain hour in the morning. They do not leave until a certain hour. Their day's work is just like a day's work in any other occupation in life. In warm weather the sun beats through the glass enclosure of the studio and the thermometer sometimes registers 150 degrees. Perhaps in this warm atmosphere one must be compelled to appear as a character heavily bundled in clothing, and you can imagine one's discomfiture.

There are many recompenses, also, and I think, on the whole, that the work is ever so much more enjoyable than the speaking stage. Girls who wish to enter motion pictures, however, should pause and think over the fact that they are embarking on a career—a branch of art which requires talent, intelligence and hard work. There are many girls who feel that if they could only appear before a camera they would be an instantaneous success, yet who would go to a business college for many months in order to become a stenographer. It stands to reason if one considers that preparation for such a position is necessary that ever so much more time must be devoted to learning an art which entertains millions of people daily. From my own experience I do not feel justified in advising any girl to try to become a screen actress.

There are times, of course, when I enjoy the excitement of being a player. An example of this was during the filming of the big Selig Red Seal play "The House of a Thousand Candles," at the Chicago studio of the Selig Polyscope Company. Doubtless most of my readers heard of the big car strike in Chicago, but few of them knew what havoc it played with the motion picture producers. We had many players who were working in the "Loop," Chicago theatrical center, and as the studio is quite a way from this place, and there was no auto service, Mr. William N. Selig ordered a huge truck in which all the players were taken to the theaters in which they were working.

There were other excursions, too, during the time I was appearing in "The House of a Thousand Candles." One of these was made to find a house which would correspond to the director's ideal "house" in which the "thousand candles" were supposed to be. All the players who had friends with homes which might serve the purpose told the director about them, and one day we all got into a big touring car and started our search. We covered almost all of the city of Chicago, and when we were all beginning to despair of ever finding an ideal "House of a Thousand Candles," the director suddenly called the chauffeur to stop. We were in a part of Wheaton, a suburb of Chicago, and none of us could see any "house" that might prove available. The director, however, made us all get out of the machine and tramp up a hill. As we rounded a curve in the road we saw beyond a clump of trees, which had been obstructing our view, the exact "House of a Thousand Candles" we had all been hoping for.

When we returned to the studio to take the interior scenes, we found that we needed many more times as many candlesticks for the "big set" as our property room had. We started a search for candlesticks and candelabra, and gathered them from every conceivable source—our own homes, homes of our friends, small shops near the studio and large stores in the business district of Chicago. After getting them all together we sorted them out and the director arranged them about the "set." The effect is beautiful in my estimation, and I am sure that those who see "The House of a Thousand Candles" will agree with me.

Mr. Harry Mestayer and Mr. John Charles, who have the two leading male roles, and Mr. Backus, who plays the "character" lead, were all cast in parts which fitted them perfectly and enjoyed the work fully as much as I did. The other players were also at their best, so we went through the entire production like a well-oiled machine. Mr. Heffron, our director, kept us all working together, and while no exciting accident happened to distinguish it from other pictures in which I have worked, I shall remember "The House of a Thousand Candles" for a long, long time, because of the pleasure I experienced in working in it.

LEGAL NOTICES

SUPREME COURT—County of Oswego. Fulton Savings Bank vs. Mary Brooker, James Brooker and Charles F. Brooker.

In pursuance of a judgment and decree of foreclosure and sale duly granted in the above entitled action on the 21st day of August, 1915, at a Special Term of the Supreme Court, held at the Court House in the City of Syracuse, New York, and duly filed and entered in the Clerk's office of the County of Oswego on the 23rd day of August, 1915, I, the undersigned, Referee appointed in and by said judgment and decree to make such sale, will sell at public auction the mortgaged premises in and by said judgment and decree directed to be sold and described therein as follows:

"All that Tract or Parcel of land situate in the City of Fulton, County of Oswego, and State of New York, known and distinguished as thirty-seven (37) feet in width off from the south side of Lot Number three (3) of Block Number one hundred and sixty-two (162) as the same is laid down on the map of the Town Plat at Oswego Falls, made by Peter Schenck for Col. James L. Voorhees in 1848, and being the same premises conveyed by John Burns to James M. Brooker by deed recorded in Oswego County Clerk's office in Liber, 236 of Deeds, at page 130" at the office of Piper & Pendergast, in the Fulton Savings Bank building, 75 South First Street, in the City of Fulton, County of Oswego, New York, on the 18th day of September, 1915, at 10 o'clock in the forenoon of that day.

Dated Fulton, New York, August 23rd, 1915.

W. S. HILLICK,

Mother Can Largely Prevent Diseases

By F. G. Anderson, Philadelphia, Pa.

The mother is the real doctor of the family. This does not mean she can cure diseases or should try her hand at doing so. It does mean, however, that she can very largely prevent them, which is a much easier task and has no magic about it except daily attention to the rules of cleanliness.

Doctor Hygiene, in one word, means keeping clean. It is one of the happiest signs of these times that the best aids science can give are brought to the door of the humblest home. But cleanliness does not mean merely washing a child's face and hands. It must go in downright fashion all through its habits and surroundings. It means clean air, clean food, clean clothing, clean things to handle with its deft and busy fingers. It means a house so cleanly from top to bottom that a youngster will find it the hardest job imaginable to get his "peck of dirt." It is no longer a sign of genius that a child can make mud pies in the gutter.

No mother wishes to see her children pale, puny, weak and ailing. She has genuine pride in seeing them with eyes bright as daisies and brimming over with mischievous laughter. They can have limbs clean as a filbert and the soul of a sunbeam in their gaze. The scientists who have swept whole territories free of dread plagues by sanitation tell what is good for a continent is good for the household.

THE FIRST TELEGRAM.

It Was Not the Famous Message Sent by Morse's Daughter.

Hidden away in the archives of the Tennessee Historical society at Nashville is the account of the first actual message ever sent over a telegraph line. That dispatch differs materially from the solemn message that passed over the wire between Washington and Baltimore in the year 1844. It illustrates well; however, the lack of seriousness with which Mr. Morse's invention was taken when he first offered it to the world.

According to the account preserved at Nashville, Hon. Robert L. Caruthers of Lebanon, Tenn., was a member of Congress in 1843, and a member of the committee to which was referred Mr. Morse's application for an appropriation to build a telegraph line from Washington to Baltimore. Most of the members of the committee looked upon Morse as a visionary, and his proposal as impracticable.

On the last day of the session Morse went to the committee room and told them that he had stretched a wire to the top of the capitol building and had a young man up there. If they would write a message he would send it up, and the young man would bring them a copy of it. None of them believed it could be done. Judge Caruthers, however, pulled the envelope of a letter out of his pocket and wrote a message. Mr. Morse, who had his instrument with him, sat down and sent the message. In a few minutes the young man walked into the room with an exact copy of the message. The committee reported favorably, and recommended the appropriation.

The bill passed just before the adjournment. Some one went to Mr. Morse's boarding house to inform him that the appropriation was made. The daughter of the landlady went to Mr. Morse's room, waked him and gave him the welcome news. He said to her, "My daughter, you shall send the first message that goes from Washington to Baltimore." That promise was fulfilled when she sent the famous message: "What hath God wrought!"

Judge Caruthers was an ardent Whig, and in 1843 the Whigs were very angry with President Tyler, whom they accused of betraying the party. The message that Judge Caruthers sent from the committee room to the young man at the top of the Capitol was "Tyler deserves to be hanged."—Youth's Companion.

Tree Planting.

A good tree well planted will usually grow whether the work is done in the spring or fall.

WARNER'S STORE

Why not trade there? You will find it one of the best family stores in town. While we do not advertise to give goods away, we will sell you first-class groceries on as small a margin of profits as is consistent with safe business. You know that some goods are so cheap in quality that they are dear in price. We deliver goods and take orders when requested and we give valuable presents with tea and coffee; also movie coupons with each cash purchase.

CORNERED HIMSELF.

There Was Only One Way Out, and He Just Had to Take It.

William F. Cody one day engaged in a spirited talkfest with a white haired, gray bearded trapper, who was by way of being the greatest and most unsuccessful liar in the locality.

"Sho, Cody, that there b'ar story o' yours ain't puppy high to a little seance I had with a ol' she grizzly back some twenty years ago. I come on that pizen critter at th' mouth of a canyon. Bing! I plops a shot f'om my ol' muzzle loader into her, but she don't even tarry. On she comes 'thout givin' me nary chanst t' load. I th'ows th' gun at her, hits her on th' snoot an' takes out up th' canyon with th' old gal, plum' mad, pitty pattin' after me.

"We runs fer 'bout a mile, she paddin' along behind an' gainin' a bit. Them canyon walls kep' gettin' higher an' smoother an' narrower 'ntil they was about a thousan' feet up, an' I c'd most touch each side. I couldn't a-clim' 'em if I'd tried, an' that she varmint wasn't givin' me no chanst. All of a suddint th' path got still narrerer till me an' the b'ar had to most squeeze through, an' then I come slap into a straight up wall in front o' me. There I was, slick as glass walls on three sides and th' mad b'ar pitty pattin' ten feet in m' rear. Couldn't go ahead, turn round ner go straight up."

The trapper paused, enjoying the deep silence of the crowd.

"Yes, but what did your bear do?" asked Cody.

The old man's face began to take on the purplish hue of pent emotion. His features strained and twitched as his brain sought a way out of his own mendacious cul-de-sac. Looking helplessly around and meeting no friendly glance from the audience, he finally blurted out:

"By gum, she killed me!"—Samuel J. Lewis in Harper's.

Transitions.

Transitions are ever full of pain. Thus the eagle when he molts is sickly and to attain his new beak must harshly dash off the old one upon the rocks.—Carlyle.

A Social Tragedy.

Jean's mamma is not particularly active socially. She is kept pretty busy with Jean, who is just over three years old. But she keeps in touch with

STARTLED THE LADY.

friends who still mingle in the smart set, and just a night or so ago she ran over to see how Mrs. Nexdore looked in her war paint for some affair or other.

She took Jean with her.

Mrs. Nexdore was dressed in the manner that once tempted Nora Bayes to say of herself, "I don't know whether I am dressed for an opera or an operation."

And gathered about her was a flimsy sort of a wrap or cloak that seemed to bring something to little Jean's mind. The latter looked up at Mrs. Nexdore wonderingly and startled the lady by saying:

"Is oo goin' to take a bath?"—Detroit Saturday Night.

By Comparison.

"Dubkins is a great comfort to me."

"I don't see how you can say that. He's the most tiresome chump I have ever met."

"That's just it. Although I don't amount to much, it's true, every time I look at Dubkins I feel that I could amount to less."—Birmingham Age-Herald.

HOME TOWN HELPS

CONTROL OF STREET TREES

Municipal Oversight Imperative Is Conclusion Arrived At by Student of the Subject.

After many years' study of the street-tree problem, digesting reports from the principal cities in this country, viewing such work done in California, one can form but one opinion as to how the work may be properly instituted and prosecuted. No satisfactory permanent improvement in street planting may be done except under direct and strict municipal control.

But very few property owners are competent to choose the right tree for a specific street, and not one such may live in your block or in your street. It is all a question of fitness, of which its natural ability to thrive under the hard conditions prevailing in city streets is by far the most important point. Then comes longevity, for a tree should stand for centuries.

Even after the right tree is planted it must have intelligent care bestowed, and all trees on one street should be watered and pruned alike, set at the same distance apart and given the same general care, the latter consisting of numberless little things that make an important factor as a whole. Even the control of insect and other pests becomes a serious matter early in the life of any tree. Individual property owners are possessed of too great a variety of tastes, interests, ideas of responsibility and degrees of hanging on to the purse strings ever to make unorganized effort more than a failure or even organized effort much of a success.—Los Angeles Times.

PAYS TO SAVE THE TREES

They Add to Attractiveness and Comfort of Home, Is Declaration of Writer.

It is a rare case when we cannot give the following admonition, says a writer in the Minneapolis Journal. Save all the trees possible on your land. If a tree insists on standing in the way when you are building a road, let your road take a way around. Even a tree left standing at the side of a road or in the sidewalk may add picturesqueness to the land, which in itself in an attraction to buyers.

If the land bordering the road in a residential tract is thickly wooded, trees may not be needed in the planting strip. Indeed, leaving all planting out of the street tends materially to widening its appearance. It is unusually, however, a good idea to plan for street trees. Their presence makes for coolness and comfort and the general attractiveness of the region.

Forty feet apart is the best distance for street trees and a safe one to follow. Planting at closer distance gives the trees scant room for mature development. It is also more expensive for the real estate man. Trees may be planted opposite each other, if the distance between trees on opposite sides of the street is forty feet. Should the distance be less, the trees had best be "staggered"—that is, placed alternately.

Small Town's Beauty.

Austin, Minn., with a population of about 8,500, has the usual activities of a little western town. Five divisions of the C., M. & St. P. railroad center there for repair shop facilities. It has a large packing house, its own electric light and water works, worth $300,000; a good-sized cement plant, brick and tile works, etc. But this prosperous community is especially notable for its "city beautiful" idea. Not content with its parks of forty-five, fifteen and five acres, it has established a floral decorative scheme. The well-paved streets are arranged on a floral plan. The wide parkings of one street are beautiful at one season with a profusion of the wild crab tree's bloom; another presents a ribbon of color from geraniums; another street presents a line of catalpas, snowy with blossoms, and so on. The workmen at the shops and railroad station at their own expense annually employ a landscape gardener, and the bare, dusty patches of waste ground thereabouts have been transformed. Spires, phlox, lilacs of all kinds and flowering shrubbery, as well as annuals, are used.

An Original Scheme.

A tramp who drifted into Elkhart and "registered" as Pat Mahoney put over a clever deal in a crowded street in the business district, until the police got wise and locked him up for public intoxication.

Pat noticed a woman in modest attire and timid demeanor as she stood holding her baby in front of a barber shop, waiting till her husband got shaved. Pat took up his station about thirty feet away from her.

"Say, pardner," Pat would whimper, "that's me woman an' kid over there. I'm broke and I'm tryin' to get them down to her folks' place. I wanna git 'em there so's I kin git out alone an' find some work. Co[illegible] you help us wid a little piece o' c[illegible]"

It is said he raked [illegible] many nickels and dimes—and spent them in a nearby saloon.—Indianapolis News.

While other nations shoulder the cost and sacrifices of the big war Japan craftily gobbles up all that war tosses her way.

A Wise Precaution.

Very few people are ambidextrous—that is, able to use the left hand as readily and skillfully as the right—but there is an amusing story of one Irishman who was careful to cultivate that art. When he was signing articles on board a ship he began to sign his name with his right hand and then changed the pen to his left hand and finished it.

"So you can write with either hand, Pat?" asked the officer.

"Yis, sorr," replied Pat. "Whin I was a bhoy me father always said to me, 'Pat, learn to cut yer finger nails wid yer left hand, for some day ye might lose yer right.'"

Making It Plain.

An Irish drill sergeant was instructing some recruits in the mysteries of marching movements and found great difficulty in getting a countryman of his to halt when the command was given. After explaining and illustrating several times he approached the recruit, sized him up silently for a couple of minutes, then demanded his name. "Fitzgerald, sor," was the reply. "Did you ever drive a donkey, Fitz?" "Yes, sor." "What did you say when you wished him to stop?" "Whoa!" The sergeant turned away and immediately put his squad in motion. After they had advanced a dozen yards or so he bawled out at the top of his lungs: "Squad, halt! Whoa, Fitzgerald!"

The Silkworm.

The silkworm is three inches long and is well provided with legs, having no less than sixteen of them.

It happens many times that we seem much deceived in others because we first deceived ourselves.

MAKING LAND VALUES

THAT which is not desired cannot be said to possess a value.

But that which is desirable and in demand possesses a value according to its desirability—the value being regulated by the demand.

Farm lands vary in values according to their location, their productive qualities and their accessibility to the markets.

The character of crops must be regulated according to the market at hand and every community necessarily directs the character of the product brought to town by the farmers.

There must be a market for the farmer. There must be some place where he can realize on his crops and receive in exchange a fair value in money or in such merchandise as will supply the necessities of those dependent on his efforts—to say nothing of the luxuries that have become practically necessities.

The day has gone by when the farmer and his family raised and produced by home manufacture all the things needed. We have become creatures of conditions entirely new. We must have stylish clothing to take the place of the home-spun worn by our forefathers. We must have pianos and organs, upholstered furniture, chinaware, crockery, tinware, aluminum utensils, self-binding harvesters, threshing machines, together with modern machinery and tools of all kinds. Our wives and daughters must have millinery and all sorts of fol-de-rols which, bless them, they are entitled to have and to wear.

Our day is no longer a period of appreciation of beauty unadorned or a disregard for the good things of life. We need, or we think we need, which is the same thing, a lot of things which cannot be produced on the farm, therefore we incline our motives and our endeavors to obtain such things.

In answer to the demand for such things we have established communities for a general exchange of these things; for the exchange of the farm products for money and for merchandise. Now that we have established a standard of values for everything we figure everything in dollars and cents and if we are dealing with a storekeeper who carries a stock of the things we require and wish to buy and who wishes to buy that which we have to sell, there is no bother about making the deal.

In our community we have storekeepers who have equipped their places of business with everything we need. They have invested their money in merchandise just as the farmers have invested their money and their time in lands and machinery and cattle and in crops.

In this manner there has been created a certain market for a proportion of the crops raised by our farmers. The marketing of the balance of the crops is readily attended to by the mere fact that we have a community, a headquarters for buying and selling; the greater the size of the community the better facilities.

IF A COMMUNITY IS POOR AND UNPROSPEROUS, THEN THE FARMER CANNOT MARKET HIS CROPS SO PROFITABLY.

The prosperity of a community rests entirely with the people in that community, this, of course, including those who live on the outskirts and who really form a part of the community, because of the fact that they do their marketing there. If they bring their products to the community market and sell them there and then spend their money with the local business men, the community will grow and prosper. Land values will increase and the earnest toilers and workers will become wealthy.

But if either the farmers or the storekeepers fail to do their full share in the way of complying with the business requirements then there will be a lack of success and the community will not grow or prosper. Land values will not increase.

There is a division of responsibility, practically equal. The interests of the storekeepers and of the farmers must come together. Without a due appreciation of these requirements, no community can look for progress.

If the storekeepers do not carry the merchandise ready to meet the requirements of the farmers they realize that they cannot expect to do the business. But the failure is not here.

The great trouble in our community, now, is that the shower of mail order catalogues has descended on the land and the farmers are inclined to believe that no harm can come of diverting their trade from the local storekeepers to the mail order houses in the big cities.

We must keep our money in circulation in our own town. We must protect our local storekeepers. We must create and build up conditions of prosperity right here at home or there will be no increase in land values. In fact, they will decrease if we send our money to the mail order houses.

IF WE DESIRE PROSPERITY, WE MUST HELP TO CREATE IT OURSELVES BY SPENDING OUR MONEY AT HOME.

WEST SIDE WOMEN HAVE ADAMLESS EDEN

Yesterday's Oswego Palladium is responsible for the following description of a Fulton camping party:

"There is a new camp at Burt's Point. It has been christened the "Hennery" and Mayor Davis is being beseiged with telephone calls as to the meaning of the new sign. So acute are conditions becoming that he threatens to resign his office, as he doesn't like the idea of an Adamless Eden being organized right in the heart of a progressive country. The ladies, who are all from Fulton, laugh and enjoy the delights of the lake and the prospects of the big camp fires that to be seen blazing at night on the beach when they will hold their corn roasts

"Among those present are Mrs. Henry Palmer, Mrs. Nettie Palmer, Mrs. Smith, Mrs. A. W. McCoy, Mrs. Frances Schaff, Mrs. Mertie L. Summerville and half a dozen others.

"Their camping equipment arrived by automobile on Saturday and has been installed in one of the largest and most commodius cottages at Davistown

"This morning thec olony dotted the landscape in search of mushrooms and they got a goodly number of fine ones.

"This afternoon the ladies told Mayor Davis that they are all club women, members of the Friendly Nine Birthday Club, that they are here to enjoy themselves and that they are going to do it Bisdes those mentioned above, Mrs. E. F. Farmer, Mrs. D. C. Case, Mrs. W. Ellis, Mrs. Alvina Greenwood, Mrs. P. M. Sweeney are in the party."

IRISHMEN LEAVE HOME TO AVOID CONSCRIPTION

New York, Aug. 23.—Conscription may at any moment be used by the British government to swell the fighting forces of England, according to reports which Mr. Edmund L. Baylies, a wellk nown lawyer, heard when he was in London. He arrived here yesterday afternoon on board the Philadelphia, of the American line, after business trip to England. The Philadelphia left Liverpool on August 14. The following day, according to Mr. Baylies, was set by the government for the completion of ac omplete registration of all men in England, Ireland, Scotland and Wales, who are of military age.

'Of course this may have been merely a precaution," he said, "but in the London clubs I heard talk that indicated that conscription might be a matter not of months but of weeks or days. England is now at the full realization of what thisw ar is going to cost her. She regrets the cost, but is determined to pay, and for this reason I heard little criticism against a resonable enforced enlistment."

Because the Philadelphia was the last vessel to eave Great Britain before the Registration act went into force young Irishmen availed themselves of the opportunity to quit the country before it was too late to avoid service. There were 120 of them in the steerage aboard the steamship.

STRONG WATER

The correspondent of a morning paper, describing yesterday's flood in Fulton, said small stoves and coils of barbed wire were found floating around in the basement of a flooded business place.—Palladium.

Angel Food, Sponge Cake, Crullers and Pies at Keller & Wilson's. adv

CITY CHURCHES SOON ACTIVE

Pastors Have About Completed Their Vacations; Another Week Will See Most of Them at Work.

Within two weeks practically every Fulton clergyman who has been away from his church during any portion of the Summer will again be in active chargeo f his parish. With the termination of the vacation season approaching, ministers and church workers are turning their thoughts again toward the field of active service in their usual places and making plans for another year.

In Fulton most of the churches have had supply preachers and in certain instances the churches have reduced the number of services.

One feature to be accounted for by the comparatively cool weather that has prevailed this summer was that congregations did not fall off as in other years. Another reason for the good attendance at the churches during the heated period was the excellence of the supply pastors who have preached in the city pulpits.

The Rev. H. D. Holmes, who was camping during July, returned to his charge, the State Street M. E. church just long enough to get started the activity and now he is attending camp meeting at Dempster Grove, but soon this meeting shall be of the past and his congregation will get down to work. The Rev. Charles Olmstead's church, the First Congregational has not been closed during the summer weeks, Mr. Olmstead remaining so far at the helm. He may when traveling can be done with comfort enjoy a brief vacation. The Rev. J. W. Barrett has returned from his vacation spent touring through the glorious north country. He is looking hale and hearty and ready for activity, as soon as his people again are ready for work to promote the welfare of the First M. E. church. Many of the parishioners of the First M. E. are yet in camp and touring and many others of the same church and the State Street M. E. are attending the out-of-door meetings at Dempster Grove. The Rev. Mr. Buck has not yet come back from Cleveland, N. Y., where he and his family are disporting themselves along the sands of Lake Oneida. Mr. Buck's return will be made about Sept. and then will begin renewed activity with the assistance of a woman experienced in church work in the homes of the people. The First Baptist church Mr. Buck has announced, will be the center this winter of a near Y. M. C. A. as it is his hope to convert the large basement of the church into a gymnasium, reading rooms, etc. The Rev. C. C. Watson has not taken a vacation. His congregation, that of the Free Methodist church, in State st., regret the loss the members must suffer by reason of his departure following the coming conference to be held here. The Free Methodists have been active in spite of the general lassitude in many churches, as the congregations attending Sunday and mid-week services testify. The Rev. Charles Robertson, accompanied by Mrs. Robertson, is about the last of the city pastors to temporarily cease work. Mr. and Mrs. Robertson left the city yesterday in their automobile bound for different points in the state. During the two weeks that Mr. Robertson will be away from the city the First Presbyterian church pulpit will be supplied by able pastors. The Rev. Minor J. Peters, rector of Zion Episcopal church, does not expect to leave his work for a vacation. His recent illness is unfavorable to carrying on the work that is to bring about a new church building in East 1st st., but with his recovery there will ensue a lot of activity in that direction and the fall months should be productive of great strides. Last Sunday Mr. Peters was forced to remain indoors and as a result Zion church was not opened at all for services.

The Church of Immaculate Conception has as usual remained open the entire summer, with the exception of a portion of last week when the rector and his assistant were in retreat at Rochester.

No date has yet been set for a termination of the union services which have been held in East Side Park and on the lawn of the First Congregational church, but it is probable that immediately following the first Sunday in September the several congregations will feel that they should return to their own places of worship. These union services have done much to cement a strong feeling of brotherhood and community interest and there are many worshipers here who regret the eding of the feature.

MINISTER OBJECTS TO GIRLS IN BATHING SUITS

Herkimer, Aug. 23.—Rev. A. E. Love, who owns some real estate at Lake Pleasant, adjoining the property which is rented year after year to the Setag school, is under arrest at that place for attempted assault or threatening assault upon some of the young women who are attending the school there this summer. As the report is received here, Rev. Love has rented the beach which the young women have used for bathing purposes for a year or more, and this year he advanced the price so that the ones having the matter in charge refused to pay, but still have beeng oing across the property to reach the water. One day this week he took his boat and rowed o ut among them and, as he considered them not properly dressed in the clothing they were wearing. The young women, not wishing to be hurt or molested, had a warrant sworn out for his arrest and a hearing was had in which Attorney E. D. Scribner of Gloversville appeared for The People, in whose name the arrest was made. Thew arrant was issued by Justice James S. Slack. At the hearing an adjounment was taken until next Tuesday when the case will be tried by a jury, which has been drawn to hear the case. While nothing serious is expected from Rev. Love as to bodily harm, it is expected that he will be placed under peace bonds not to injure or molest the young women while using the water. A question has arisen whether he is the owner of the land which the young women pass over in order to reach the water or not as the state owns close to it, and while the line wase stablished several years ago it is thought that the marker has been either moved or destroyed. The outcome is looked for with a great deal of interest and no doubt when the case is called next Tuesdry the atendance will fill the court house, if it should be called there.

ELETRIC CO. STOPS COURT PROCCEDINGS

Justice Ross signed an order of discontinuance in Syracuse Saturday in the case of the Fulton Light, Heat & Power Co., vs. the City of Fulton and the order was filed in the office of the County Clerk yesterday.

This order discontinues the certiorari proceedings brought by the company against the city in the matter of the assessment of $60.000 made on the old plant of the company at the lower falls in 1911. The company claimed the assessment was not justified as the preceding year the plant was assessed at $40,000. In consideration of a recent action of the Common Council changing the assessment to the former amount for the years 1911, the company agreed to stop its certiorari proceedings.

LABORERS' STRIKE WAS OF BRIEF DURATION

A number of Italian laborers doing the concrete work for the Bradley construction company on the new Oswego Falls Pulp and Paper company plant declared themselves on strike yesterday noon. A higher wage scale was demanded, the strikers stating that offers had been made elsewhere of more money, but when the superintendent after the dinner hour engaged men to take the strikers' places, the entire gang decided on returning to work without their demands having been met. Practically no time was lost by the men.

MISS CHARLOTTE HAHN WANTED; CHANCE TO SWIM

Miss Dorothy Hahn of Evans Mills entered a swimming race Sunday with John J. Fisher of Rhode Island as her competitor. The race took place at Utica and Miss Hahn was out distanced after going a mile. She gave up but said before leaving the crowd that she has a sister in this city who is willing to swim a twelve mile race with anyone.

CONCRETE FOUNDATON SOON TO BE DONE

Work on the concrete foundation for the paving at Oneida and First sts. began this morning under the direction of the state engineering squad. A Ransome concrete mixer is used and those in charge said the concrete work would be completed in four days after which the laying of brick will commence.

Cookies and cakes and all things baked by the Black company, fresh every day, at your grocer's. adv

UNIVERSITY ATHLETE AND MUSICIAN IS HERE

Mrs. R. K. Sanford of South 4th st. is entertaining her grandson, Richard S. Ferris, who is a graduate of the musical course at the University of New York. Mr. Ferris' friends delight in the young man's ability to participate in athletic events, but his prowess in this direction sink somewhat into significance in comparison with his accomplishment as a soprano singer. His voice is described as especially sweet and will at an early age develop into a splendid basso. So far the young man's local friends and acquaintances have had little opportunity of hearing him in song, but unless there comes a change of plans Mr. Ferris will sing at one of the morning services in the Presbyterian church. The young man is only 16 years old, is tall and erect, with a clear skin, clear eyes that look one full in the face and a fine broad chest development that indicates much for the singer and athlete. His athletic ability was shown on the fair ground track last week when, without any previous training, he made a running broad jump of 16.11 and a high jump of five feet. In the century dash Mr. Ferris landed third. The Evening Times anticipates a brilliant record for they oung man in his more serious side of life—as a singer.

LANGDON WILL OFFERED YESTERDAY FOR PROBATE

Letters of probate were issued on the wills of two former Fultonians in the Surrogate's Court in Oswego yesterday. Mrs. Faustina H. Langdon, who died here, left an estate valued at $8,000 real and $2,000 personal, according to the petition for probate of her will. Letters of probate were issued to Eliza H. Merriam, a sister of the decedent.

Mrs. Langdon made a will in 1908, by which she left part of her estate to a sister, Fannie C. Bristol. Mrs. Bristol died shortly after the will was made and in a codicil to her will, Mrs. Langdon leaves the estate to be divided among Mrs. Eliza Merriam, a sister; May Bristol Palmer, a niece, to whom is bequeathed certain articles of furniture; Fannie Rive Thompson, a niece; Dudley F. Darling, James E. Bristol, Cameron Bristol and Harold Bristol, nephews.

The will of Sophia Dresser, deceased, of this city, was filed for probate and letters were issued to her husband, John C. Dresser. The estate, valued at $1,700 personal, is left entirely to him.

NEW TALENT ENTERS WOODMENS' ORCHESTRA

Following the announcement in yesterday's Evening Times of the rehearsal of the orchestra comprising members of the local council, Modern Woodmen of America, on Sunday, comes another one that the musicians will meet again tomorrow night for practice. George W. Roy, who is greatly interested in the success of the orchestra, says that additional talent has been added and that hencefores the musical events will take on greater interest. The committee in charge of tomorrow night's entertainment adds that quite a lengthy program is in store for those who present themselves.

REAL ESTATE SALES MADE RECENTLY

Streeter & Van Sanford report three important sales of real estate, as follows:

The Watson homestead, corner Buffalo and 7th sts., to Robert McKay. Daniel C. Cox of Oswego has bought the West River Road home formerly owned by Tilden Gifford of Litchfield, Conn. This property Mr. Cox will improve and convert it into a splendid summer home. Almon J. Rogers, jr., has sold to Leo H. Perkins his house and lot at 509 Pratt st. Mr. Perkins will take possession at an early date.

QUIRK THEATRE

Bobby Hagan and company presented a very funny musical comedy entitled "A Night Out," which met with the instant approval of the big audience. The chorus worked like a clock with pretty Ethel Hagan, the clever little singing and dancing soubrette, at the head. Miss Howard has a beautiful voice and knows how to sing. Bobby Hagan is a fast-working, surefire comedian and his support is perfect, with Bert Howard and Bert Page keeping pace with the star all the time. The company makes a complete change of program daily. Six reels of feature picturesw ill be shown each day.

A trial subscription for The Evening Times costs little and gives you much in return. It is the people's paper. adv

Those You Know

Mrs. F. A. Summerville is at Beach Oswego for the remaining days of this week. She is the guest of Mr. and Mrs. Gilman Davis.

* * *

It doesn't make any particular difference what you do—you can do it better.—The Boss.

* * *

Mrs. Wilbur Dodge of 11 South 3rd st. is entertaining the Misses Mary and Hazel Kavanaugh of New York City The guests will remain here for several weeks.

* * *

Russell D. Draper is a delegate to the National Council of the Order United American Mechanics which is meeting at Concord, N. H.

* * *

The Rev. Charles Olmstead is visiting friends in Walton, N. Y.

* * *

Drill will occupy much of the time tonight when the degree team of Nehasane Rebekah lodge meets at the Odd Fellows' temple.

* * *

Alderman and Mrs. J. W. Distin have been entertaining a number of guests recently, among whom were: Mrs. Keene of Syracuse; Miss Hoyt of Auburn, and Professor Perry of Cazenovia Seminary

* * *

Mr. and Mrs. George L. Pratt are entertaining Dr. and Mrs. H. J. Grant of Buffalo.

* * *

Mr. and Mrs E. J. Petrie of West 6th st were in Oneida and Syracuse recently The trip was of a business nature and occupied two days.

* * *

James Kinney of South 1st st is in Prescott, his former home, where he will remain two weeks.

* * *

Mr. and Mrs. J. H. Stewart of 842 Utica st. spent Friday and Saturday at Sylvan Beach.

* * *

Mrs. J. Rude has returned from Sylvan Beach where she spent all of last week.

* * *

Mr. and Mrs. Leon Baker and children spent last week at their cottage at Sylvan Beach. They returned Sunday evening.

* * *

Miss Eva Rude spent Sunday with her grand parents, Mr. and Mrs. J. H. Stewart of Utica st.

* * *

Frank Stewart of West River road is spending a few days with his parents, Mr. and Mrs. J. H. Stewart.

* * *

Mr. and Mrs. John Painter and Mr. Painter's sister, Ethel, are camping on the West Rvier road at the Gillard camp.

* * *

William Burck, of New York City, is visiting J. F. Fernandez of the Patterson company.

* * *

Willis Munger, arrested last night in Oneida st. by Officer Lewis, was fined $5 or five days in jail by Judge Wilson this morning. Munger pleadguilty t ointoxication.

* * *

Peter Kostyn, arrested on a serious charge, was remanded for further hearing.

* * *

Watson A. Butts of Oneida st has returned from an extended auto tour in Thousand Islands and vicinity.

* * *

Thomas Kopos, who cut the tires on a bicycle owned by Mike Smith, was arraigned before City Judge Wilson this morning, charged with injuring personal property belonging to another. Mike was inclined to be lenient with his fellow countryman, and Judge Wilson allowed the men to compromise the case.

* * *

Miss May Hawks of Emery st. has returned from her vacation spent at Brewerton and Syracuse.

* * *

Miss Lillian Murray, who has been the guest of her cousin, Mrs. Merton Reynolds, of Utica st., for a few weeks has returned to her home in Canada.

* * *

Mrs. B. J. Millard of Chicago is spending some time with her parents, Mr. and Mrs. W. H. Westover, of Oneida st.

* * *

Mrs. Frank Fowler of Mexico is spending a few days with Mrs. Ray W. Westover.

* * *

Dr. and Mrs. H. H. Williams of Mohawk, N. Y., are spending their vacation with Mrs. Williams' parents, Mr. and Mrs. W. H. Westover.

* * *

An interesting feature of the convention of the International Grand Lodge of Good Templars will be the address given tonight by the National Secretary, Williard O. Wylie, of Boston, who will be introduced to the audience at the First M. E. church by Dr. Fox.

* * *

A pleasant surprise party was given last night on the West Side. when a number of the neighbors of Mr. and Mrs. A. H. Parke, of West 4th st., gathered on the porch of the Parks residence, the event celebrating the erection of the new porch. An interesting program, consisting of games, etc., was laid out.

* * *

Mr. and Mrs. Joseph Caire of East 4th st. were the guests Sunday of Mr. and Mrs. W. E. Parke at Syracuse.

* * *

Mr. and Mrs. J. Bargey and Mr. and Mrs. Otis Hessell of New Haven were guests Sunday of Mrs. Louisa Bargey and friends.

* * *

E. G. Bennett of Oswego returned home Sunday with his mother, Mrs. Martha Bennett, who has been visiting her sister, Mrs. George DeForest, of West 4th st.

* * *

Work was started today on concreting a sidewalk in West 2nd st. in front of the home of M. Brayes.

Your appetite for fresh-every-day rolls increases every time you eat the Black company's article. adv

For Rent—Offices and apartments in the Waldhorn block, 1st st. tf

To Rent—Rooms in Waldhorn block. Offices and living rooms. tf

ARRAS A HEAP OF DEBRIS; 120 OF 26,000 PEOPLE LEFT

Belgian Minister Discribes Desolation of Historic City.

"I have just visited what remains of Arras and Soissons, along the Aisne scarpe. Of Arras, like also some of the first line trenches Nieuport and Ypres, our poor villages along the Yser, nothing remains but a heap of debris," writes Emile Vandervelde, the Belgian minister of state, to papers in the United States.

"The city hall, that gem of medieval architecture, has undergone the most grievous mutilation. In many streets not a single house is intact.

"Arras had before the war 26,000 inhabitants. There are now 120. In a small shop near the city hall I found a little old man cheerfully selling funeral crowns and post cards depicting the ruins. The bombardment continues daily. Most people are living in cellars.

"At Soissons I was entertained by a general at tea and at breakfast in the cellar. Bombs continuously passed over Soissons in the direction of Arras. The allied troops constantly are busy extending and strengthening the trenches and barbed wire defenses. At certain places the hostile lines are within sixty feet of each other.

"When not exchanging shots and grenades the soldiers enjoy the intervals of comparative calm, during which newspapers weighted with stones are thrown from one trench to another.

"One day a dog crossed to the French lines bearing the message, 'Please tell Corporal Blank that his wife and children at Lens are well and send him love.'"

ACCUSED OF MURDER IN 19013

Wyoming Man Would Escape Death Because of Clerk's Error.

Because through an error of a court clerk he is charged with committing a murder 17,098 years in the future, Grange Wilson White of Wyoming has appealed to the United States supreme court to save him from the hanging to which he has been sentenced.

White was convicted of "killing one Anderson Coffee on or about the 12th day of August, 1913." That was the way the information should have read, but after he had been condemned to hang on June 4 of this year White's lawyers discovered that the official papers returned by the grand jury gave the date of the murder as "Aug. 12, 19013."

Because of that "0," which, it was alleged, made the information insufficient and defective, White appealed to the Wyoming supreme court and before the day of the hanging arrived obtained a writ of supersedeas under which the case has been brought to the United States supreme court.

CONVENTION IS FINISHING UP

Digest No. 3 of Proposed Amendments Appears, Which Includes Emergency Messages; to Be Submitted

By Frederic T. Cardoze

Albany, Aug. 24.—Although merely a remedial amendment, like that which aims to give the legislature power to prescribe the number of and the duties of major generals and aides-de-camp, the proposition of Delegate Latsen to make a second amendment to the Military law which has been adopted by the Constitutional Convention is of interest to all members of the national guard.

This proposed amendment would affect Section Five of Article Eleven relative to the manner of election of military officers as prescribed by the legislature. The specific language of this amendment which the people will be called upon to either accept or reject, follows:

"All other commissioned and non-commissioned officers shall be chosen or appointed in such manner and shall have such qualifications as the legislature may deem most conducive to the improvement of the malitia, provided, however, that no law shall be passed changing the existing mode of election and appointment unless two hirds of he members present in each house shall concur therein."

According to Delegate Latson this proposition is closely interwoven with that relative to the qualifications of major generals. In explaining the proposed amendment he said in open convention:

"This bill is closely interwoven with the one relative to the number of major generals and aides-de-camp and there may be room for the contention that in view of the fact that we have introduced in the bill with refgrence to which I have just spoken, the provisions that the Legislature shall have power to prescribe the qualifications of major generals and aides-de-camp that the legislature might be deemed not to have such power with reference to commissioned officers.

"I may say in this connection that the Miitary law of the State prescribes qualifications now for major generals and for all commissioned officers, and that the governor of the State in making his appointments has, ever since the enactment of that law, recognized ahtt qualification, and there has never been any doubt that the qualifications prescribed by the legislature in this regard were reasonable, the only doubt being whether such a law were strictly constitutional and in conformity with the provisions of the sub-divisions which we now seek to amend."

As can be readily seen by the explanation made by Delegate Latson, the proposed change is merely to strengthen the provisions of the constitution, so far as the Military article is concerned, and make that document plain in its meaning,

The fact that the high officials of the national guard were in favor of the above amendment as adopted by the delegates to the Constitutional Convention, illustrates that it was needed and tends to remove any technical flaw in the Military law.

There was no opposition to the above amendment when it came up for final passage, as its provisions had been amply exploited upon the advancement from the general orders to the third reading calendar.

The Comrade In White

Before the guns at Neuve Chapelle
A gallant soldier fighting fell;
Lost in the swirling tide.
Woke from black dreams at dawn's gray light
To find a comrade clothed in white
Was kneeling at his side.

With tender care each wound he bound
And wrapt with clean, soft linen round,
And oh, his zeal was such
That all the horror, all the pain
The soldier would have faced again
To feel that gentle touch!

From fire and shell the storm swept field
Next morning no defense would yield
When the new fight began.
The guns would start at break of day,
What friend was this who dared to stay
And tend a dying man?

What friend was this? For where he knelt
In silent prayer, the soldier felt—
Or did he dream anew?
That on his hands and feet and side
Were drops of blood and, starting, cried,
"But you are wounded too!"

Sad were those mystic, wondrous eyes
That watched another morning rise
Over the scene of hate;
Yet smilingly stooped to say,
"These are old, world old, wounds, but they
Have troubled me of late."

—Harry Bowling in Los Angeles Times.

Resolution to Widen East First St. Goes Through By a Fluke

(Continued from Page One)

paying for them, as they were only protecting themselves by the installation of sprinkler systems. An underwriters' law forbids the installation of a water meter between the systems and the mains. The board took no action on the question.

May Get a Pole by Subscription

George E. Mason, as chairman of the City Planning Committee, broached the subject of an ornamental light pole at the intersection of Onedia and Firsts ts. Mr. Stevenson agreed that the pole would aid greatly in handling traffic and would be an ornament to the city, but added that the Board of Public Works had no money to purchase one. Mr. Mason said the cost would be small and ridiculed the idea of lack of funds, and when he had concluded Mr. Stevenson said, "Well, we can get the pole by subscription and save the city money. Now let's see how many public-spirited citizens are willing to go down in their pockets to do anything. I'll give $5, what will you give?" addressing this remark to Messrs. Gage and Mason. Mr. Mason said his taxes were large enough to justify such a small improvement, but Mr. Stevenson said his were just as large. Samuel Waldhorn offered an additional $5, but no one else came forward with a donation. It is very probable, however, that the pole will be purchased by subscription.

According to thep lans submitted by the City Engineer, an ornamental pole, with four clusters of lights, is desirable, the pole to be placed before the paving work is completed, at the junction of the streets. A concrete platform, to be used as a neutral ground by persons waiting for trolleys, would be erected at the base of the pole, and the pole would carry the street signs, traffic rules and state road directions.

GERMANS TRYING TO OVERCOME RIGA DEFEAT

(Continued from Page One)

port by the British. This report proved untrue, however. General minor events of the campaign. The resistance, out of all proportion to its strength as a fortress, drew the attention of all observers to it. The fortress, only twenty miles from the east Prussian frontier, has been under an intermittent bombardment by German guns since last February. The real siege operations against it began with the inception of the successful drive from the north of the Warsaw salient early in July. It was on a cliff, high above the Bobe river, and faced a wide expanse of marsh land that heaches into the Masurian lake country of East Prussia. This terrian prevented the character of attack that has proved so fatal to all the other fortresses on the eastern and western fronts, and it is regarded as certain that Ossowetz could have held out indefinitely had it not been that the retirement of the Russian line to the north, necessitated by the fall of Kovno, compelled either its evacuation or the bombardment of its garrison at the fate that awaited the garrison of Novo Georgevsk.

Ossowetz derives its strategic importance from the fact that it guards the railway approach to Bialystok and the great Warsaw-Petrograd trunk line.

ROBERTS WORKS IN LAUNDRY

Former Mayor of Terre Haute Complained of Way Clothes Were Washed.

When Donn M. Roberts, ex-mayor of Terre Haute, Ind., convicted of election frauds, was brought to the federal penitentiary the officials tried to show him all possible leniency by putting him at clerical work.

Roberts' laundry was not done to suit him one day, and he went to the prison laundry to complain.

"Do you think it could be done any better?" the superintendent asked.

"I see no reason why it shouldn't," the ex-mayor replied. "I'd think anybody could do better work than this."

"Well, then, you're just the man we want. Get to work."

Ex-Mayor Roberts now washes prisoners' clothes.

ELEVEN CENT STAMP OUT.

Bears Head of Franklin and Is For Parcel Post Use.

The new eleven cent postage stamp has appeared. It bears the head of Franklin in profile, from Houdon's bust, and is printed in dark green ink. It is the same shape and size as the ordinary stamps, series of 1911.

The new stamp is issued primarily for use in prepaying postage on parcels and postage and insurance fee on insured parcels amounting to 11 cents.

A Discredited Leadership

Mr. Barnes appears to be having no great measure of success with his measures before the constitutional convention. He lost out on the plan to deprive the Legislature of the power to grant immunity in special cases, he now loses on his proposition to srike out the section providing that retired judges shhall act as referees.

Mr. Barnes calls this "special privilege," and denounces the convention for its failure to see things his way. Whether there may or may not be merit in his contentions, the fact remains that the delegates, in the majority at any rate, seem to view his proposals with distrust Doubtless this is in consequence of Mr. Barnes' political career, recelations in which have stamped him as wholly "reactionary." Beyond question he has abilities, and some of his suggestions have borne evidence of merit and have been defended with sound logic. But—"give a dog a bad name;" Mr. Barnes labors under the handicap of being popularly discredited. The fact makes his further prominence in the party councils undesirable. His continued attempts at a reassumption of political leadership have met so far a rather dismal failure.—Auburn Adv.-Journal.

OSWEGO DRY GOODS FIRM IS BANKRUPT

Oswego, Aug. 24.—The dry goods store of Walter H. Pulver, in West Bridge street, was closed this morning after Under-sheriff Richard Schultz had levied on the stock under an execution secured by a Buffalo concern. Shortly after the closing a dispatch came from Utica announcing that Attorney George N. Burt had filed for Mr. Pulver, in United States Court, a petition in bankruptcy givin liabilities of $27,000, and nominal essets, consisting of stock and accounts receivable of about $29,000. The only Oswego creditors are the First and Second National Banks, both secured. Harold N. Pulver, secured for $700; Frost & Johnson, H. J. Karpinski and Webb G. Cooper. The rest of the creditors are wholesale dry goods houses in various parts of the country and the bankruptcy proceedings were started, it is understood, because they were pressing for payment. The only large creditors from out of town are John Avisleld & Company, Cleveland, Ohio, $1,072.98; J. H. Dunham & Company, New York, $1,478.57, and H. B. Claflin, New York, $524.03.

RHEUMATISM CURED BY LIGHTNING BOLT

Berlin, Con., Aug. 24.—The medical faculty was put to shame by a bolt of lightning which last night struck the farmhouse of Charles A. Burdick, on Worthington Ridge. The electric bolt destroyed articles in all eight rooms of the house and did damage exceeding $1,000, but it cured Mrs. Burdick of rheumatism, from which she had suffered for many years.

Mrs. Burdick was about to put wood in the kitchen stove when the bolt struck her, knocking her down and rendering her unconscious. One of her feet was on the zinc beneath the stove. The lightning took a nail out of the sole of her shoe and her foot was burned severely. Dr. Thomas Mulligan, of New Britain, soon revived her.

Today Mrs. Burdick, although suffering from the burns on her foot, was free from rheumatic pains. She does not thing the price her husband must pay in repairs to the house too high, but Mr. Burdic is discreetly silent.

THOMAS EDISON ISSUES WARNING

While He Sees Seven Years of Prosperity Ahead, Afraid of Overdoing by Expansion in Good Times.

New York, Aug. 24.—The United States has embarked on a voyage of prosperity to last seven years and longer if the amnufacturers and public do not overdo things, declares Mr. Thomas A. Edison. The inventor dropped his manifold tasks in West Orange, N. J., for a few minutes yesterday to discuss the brilliant outlook for better times.

Incidentally Mr. Edison expressed in characteristic fashion his disapproval of the submarine activities of the German navy, yet said he did not expect the United States to plunge into war over the action of a "war mad" group. He deprecated the lynching of Leo M. Frank as a reversion to barbarism.

Mr. Edison expressed confidence in the success of the new inventors' board to assist the United States government. The veteran head of the big industries in West Orange and Silver Lake, in New Jersey, which carry his name, who stod on the upper floor of a factory building planning new structeures for his industries last winter while firemen fought flames which threatened the big Edison plant in West Orange, is an optimist, and in his talk say beyond the scarred walls of the world's wars a new era of prosperous content; a spirit of broader democracy in Europe, with monarchies and empires giving place to republics, in which the people and not Kaisers, Tsars or Kings will rule, and prophesied for the United States seven years of plenty; a more extensive period of good fortune if industrial leaders do not commit the familiar error of overdevelopment.

Mr. Edison's factories, ever growing to house his extensive manufactures, claim most of his hours, and it was with reluctance that he was induced to give a few minutes for an interview In addition to his usual tasks he has been active for some time seeking to modify odors arising from chemical plants at Silver Lake, N. J., and as his days are crowded with manifold labors his resting hours are now all but consumed by additional work.

GOOD TEMPLARS OPEN SESSION

51st Annual Session Began at 10 O'clock This Morning, Presided Over by G. W. Johnson, Chief Templar.

The first meeting of the delegates to this city of the I. O. Good Templars occurred this morning at 10 o'clock. The meeting was held in Odd Fellows' temple and was presided over by G. W. Johnson, Grand Chief Templar. The Grand Sentinel was the only absent officer at the time of calling the roll.

The Credentials committee reported that forty-one subordinate and ten district lodges are represented at the convention.

Last night's session was on interesting one from the fact that eleven candidates were adopted in the Grand Lodge degree. Some very fine work was exemplified at that session. At this same session the Grand Chief Templar appointed the standing committees for the convention.

When the reports of the officers were presented special mention was made of the fine representation at the recent "Made in America" exposition held in New York City in connection with the National Grand Lodge and the lodges of the metropolis.

Following the noon recess the veterans' association held a business meeting. At 3 o'clock this afternoon Miss Marjorie Bowerman conducted the department of juvenile work. The afternoon sessions closed at 430. Tonight ap ublic meeting will be held at the First M. E. church and Mayor Fox will welcome the delegates.

Following is the program for tonight's meeting:

Selection by quartet—Messrs. Z. Newell, Arvin Case, Charles Chesbro, Clare Case.

Prayer.

nstrumental music — Ruth McEwen.

Address of welcome—Mayor Fox.

Response—Ben D. Wright, N. C. T.

Solo—Mrs. William Barrett.

Address—Hon. Willard O. Wylie, National Secretary.

Selection—Quartet.

Benediction.

Tomorrow's Program.

8:30 a. m.—Prayer and Praise Service, conducted by the Rev. G. W. Sisum, Grand Chaplain.

9:00 a. m.—Opening ceremonies. Roll call of officers. Roll call of representatives. Report of the Credentials committee. Reception and introduction of visitors. Unfinished business. Reports of Committees—Finance, New York Templar, Prohibitory Action, Temperance Literature, etc. Miscellaneous business. Presentation o fcommunications. Resolutions, etc. Announcements. Reading of the Journal.

12:00—Recess.

2:30 p. m.—Call to order. Roll call of representatives. Reception and introduction of visitors. Report of the credentials committee. Unfinished business. Report of committees; special, revision, juvenile work.

4:00 p. m.—Veterans' half hour.

4:30 p. m.—Presentation of communications, resolutions, etc. Announcements. Reading of the Journal. Recess. Meeting of the Committees. Recreation hour.

8:00 p. m.—Call to order. Reception and introduction of visitors. Report of the National Grand Lodge. Report of obituary committee. Memorial services. Announcements. Reading of the Journal.

9:00 p. m.—Adjournment. Special session fo the International Supreme Lodge to confer the I. S. L. Degree. W. H. Crampton, D. I. C. T., presiding.

A THOROUGH TEST

One To Convince the Most Skeptical Fulton Reader.

The test of time is the test that counts.

Doan's Kidney Pills have made their reputation by effective action.

The following case is typical.

Fulton residents should be convinced.

The testimony is confirmed—the proof complete.

Testimony like this cannot be ignored.

Mrs. M. Guyer, 413 Cayuga st., Fulton, says: "Doan's Kidney Pills have been used in the family frequently and they have always acted as represented. They were taken for kidney trouble and lame back, and brought most satisfactory results. I publicly recommended Doan's Kidney Pills some time ago, and all I then said still holds good."

Price 50c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. Guyer recommends. Foster-Milburn Co., Props., Buffalo, N. Y. adv

D/34

There Is a Military Truth:

"Modern Fortifications Crumble Beneath Modern Guns"

The fortification built up by the Mail Order Houses will not stand the fire of the 45 centimetre directed at them by the series of Home Trade Boosts appearing daily in this newspaper. Here as one specimen:

WE WANT A LIVE TOWN

LET'S all get together and help to make our community a live one.

We all realize the consequences of poor business, stagnation in commercial affairs, depression of real estate values, low wages, etc.

What we want is plenty of business, money in circulation, a live interest in the building of houses, the sale of lots and acre property and a genuine healthy condition of business in our community.

HOW SHALL WE ACCOMPLISH IT?

The easiest thing in the world. Just keep our money in circulation, right here among ourselves, and we will create our own prosperous conditions.

In other words, LET'S PATRONIZE OUR OWN BUSINESS MEN, INSTEAD OF SENDING OUR DOLLARS TO THE MAIL ORDER HOUSES. Let's be loyal to our own best interests instead of helping to bolster up the big monopolistic establishments that are draining our resources of all the ready money in sight.

It is the aim of the big city mail order houses to drive the small town merchants out of business, so that we will all be compelled to send to the cities for our merchandise. The big mail order houses are spending thousands of dollars every month to accomplish this object.

THEY WILL DO IT, TOO, UNLESS WE ARE SENSIBLE ENOUGH TO STOP IT.

It is up to us to prevent the big mail order houses from driving our storekeepers out of business, for several reasons, the greater of which are that our community will be rubbed off the map if we have no business concerns and that our ownership of property here will not amount to anything, in this event.

The local stores, to a very large extent, make this town. The taxes paid by our business men are the principal support of our schools and churches. It is the taxes paid by our storekeepers that pay for the local improvements, for the street lighting, for fire protection and for all other communistic privileges and protection.

If we permit the big mail order houses to drive our business men out of competition, what will we have left? A place of empty store buildings, an undesirable place in which to live.

If the mail order houses accomplish their purpose it is possible that railroad interests will decide there is not sufficient business to warrant the stopping of trains here—because there will be no reason, then, for traveling men to stay over in our town, no freight to be delivered to our stores.

In such cases we will be trying to sell our property, but will find no buyers, for who will think it a good investment to buy property in a dead town?

But this is just what we must expect if we keep sending our dollars to the mail order houses, for it is only the business of the town that makes the town possible.

When we send practically all of our business to the mail order houses in the cities there will no longer be a necessity for, or a reason for, a town here.

It all resolves itself into the question: SHALL WE HAVE A PROSPEROUS TOWN, WITH GOOD LOCAL BUSINESS, GOOD REAL ESTATE VALUES, GOOD WAGES AND GOOD MUNICIPAL DEVELOPMENT, OR SHALL WE HAVE A DEAD TOWN, WITH PIGS ROOTING IN THE PRINCIPAL STREETS, STORE BUILDINGS EMPTY AND WITH "FOR SALE" SIGNS HUNG UP, NO LIGHTS AND NO FIRE PROTECTION.

IT ALL RESTS WITH US. WE ARE THE ONES TO DECIDE.

Common sense and good judgment tell us to protect our own interests. If we don't, who will?

What can we expect from the mail order houses after they shall have received our money and the local storekeepers have been put out of the running? Shall we expect help and assistance from the mail order monopoly?

We all know that the mail order houses do not pay any of our local taxes. They do not support our schools, or churches or help to pay for our lighting the streets or for our fire department.

Every dollar spent at home means added wealth, added prosperity, added real estate values and added facilities of all kinds.

Every dollar sent to the mail order houses means more unfair competition for our storekeepers and less taxes toward the support of our community.

Which do we prefer? We must make the decision. Are we for or against our community?

LET'S MAKE IT A LIVE TOWN BY KEEPING OUR MONEY IN CIRCULATION AMONG OUR OWN BUSINESS MEN.

MANY QUESTIONS WILL BE SETTLED

Voters to Pass on Woman Suffrage and Barge Canal Needs.

CANAL WANTS $27,000,000.

New Constitution Will Also Be Voted On by People of State—About 90 Per Cent of Construction Work of Canal Is Completed and All Great Engineering Problems Have Been Solved.

Voters at the coming election in November will be confronted by an unusual ballot, and the election will be unique in that the number of questions to be settled by referendum will nearly approximate the number of persons to be voted for. Undoubtedly the work of the constitutional convention, now in session in Albany, will be before the people for their acceptance or rejection. The woman suffrage amendment will be voted upon, and last, but possibly most important to the state, the barge canal referendum, calling for a further appropriation of $27,000,000 for the completion of the barge canal system, will be before the people at the polls.

Barge Canals 90 Per Cent Finished.

The barge canals which have been under construction since 1905, are nearly finished. Reports of the engineers show that about 90 per cent of the construction work has been completed and all of the great engineering problems have been solved. It is doubtful whether the people of the state appreciate either the magnitude of the work or the difficulties met with in construction. In order to build these canals, it has been necessary to harness ten great rivers. It also has been necessary to drain vast areas of swamp land, to create enormous water storage reservoirs, acquire water rights, rebuild railroad bridges and to do many other difficult things seemingly outside of canal construction.

It must be remembered, also, that this work has been done in a thickly settled community, and not as at Panama, where land was of no value, Plans were made and estimates adopted for the barge canals in 1903. Since that year there has been a great increase in the population of the state and, consequently, an advance in real estate values. This advance has cost the state $20,000,000 in higher prices of these lands. It has, however, added immensely to the state's assets, as will become evident when the the abandoned portions of the old canal are sold. Furthermore, on account of the increased cost of labor and materials, the expense of the reconstruction of railroad bridges, as well as on account of the increase in land values, and because the canals have been built larger than was at first contemplated, $27,000,000, in addition to the original appropriation voted by the people of this state, will be required to complete the work and pay the increased cost of labor and materials and for reconstructed bridges and for all the lands which it has been necessary to take, and it is this question which the people are asked to determine at the coming election.

Since most of these expenses have been incurred and the additional lands have already been taken the state is bound, in any event, to pay for them, and, if this proposed bond issue should be defeated, the cost will have to be paid for by direct tax. It is clear, therefore, that the real question before the people of the state this fall is not solely whether this money shall be spent, for most of it has been spent, but whether it shall be paid by direct annual tax within the next two or three years, thus increasing the burden on real estate, or whether it shall be distributed over a longer term of years by means of a bond issue.

The barge canals, now so nearly completed, are a much greater work than at first contemplated. They have cost, including terminals, $144,000,000. The locks were built nearly twice as wide as provided for in the first plans. Terminals for the use of shippers have been, and are being constructed at all the principal points between Buffalo and New York. The Seneca-Cayuga canal has been extended into the finger lakes of Central New York, making Geneva, Seneca Falls, Waterloo and Ithaca canal ports.

Should Approve Canal Referendum.

Water power has been developed to operate the locks and light the canal. Bridges in the Oswego canal were constructed so as to allow lake steamers to go up as far as Fulton. All of these extensions of the original plans and the additions have cost money, and, while the original appropriation included a considerable surplus, the general advance in all these values has compelled this further appeal to the people.

Because all of the money invested in the canals and the canals themselves will be useless unless this work is completed, it is anticipated that the people will approve of the canal referendum providing for the final appropriation to finish the canals. This proposed bond issue will distribute the cost over a long term of years, instead of making it necessary to levy a direct tax immediately to pay for expenses already incurred. It also will assure the early completion of the canals, so that the state can begin to reap the great advantages which will accrue as soon as the improved canals are completed and open for traffic.

REASON FOR BOND ISSUE

Increase In Amount of Land Damage Was Greater Than Expected.

One of the principal reasons why it is necessary to make a further issue of bonds to complete the barge canal is the increase in the amount of land damages over what was expected. A very small amount was originally estimated for land damages, and it was thought that the state would be able to sell off the abandoned lands in time to pay the remainder of the claims. So far, however, none of the abandoned lands have been sold and the state has, therefore, a very large asset, consisting of lands in Buffalo, Rochester, Syracuse and through the Mohawk Valley, some of which are immensely valuable.

The good work of the court of claims and of the board of claims in holding down the land damages, which the state has had to pay, is shown by the fact that up to the present time only about 15 per cent of the face of the claims have been allowed. In other words, the claims have been settled for about one-seventh of their face value. On the completion of the canal, the sale of the unused portions of the old canal will, undoubtedly, reimburse the state treasury to an amount equal, at least, to the additional $27,000,000 which is now needed, and which the voters are asked to grant this fall.

GREAT TONNAGE AWAITS COMPLETED BARGE CANAL.

Production of heavy freight in the region bordering on the Great Lakes has greatly increased since 1903. The manufacturing of goods to be shipped west from the seaboard has also increased in the Eastern cities of the country since 1903. All of the estimates which were made 12 years ago as to the possible traffic on the barge canal are now too small. The business to be done on it and the benefit to be gained will be much greater than was believed possible when it was ordered built.

Canal Enthusiasticaly Supported.

When New York state decided to build the barge canals in 1903, there was very little interest in waterway construction in the United States. That campaign aroused many enthusiastic supporters of waterways all over the country. Associations have been formed to promote an improved waterway down the Mississippi valley, between the Ohio river and the Great Lakes, and along the Atlantic seaboard, from Massachusetts to Florida. The barge type of boat, which was adopted by New York state, is the ideal of all these associations, and campaigns are now being conducted for the improvement of the various routes named. The only great waterways, however, which have been actually constructed up to the present time are the New York state barge canals, which are now 90 per cent completed.

Canada Rushing Welland Canal.

Canada is taking advantage of our delay in finishing the barge canal system by enlarging the Welland. This work was started last year and is being rapidly pressed to completion. When finished large vessels from the upper lakes can get down as far as Kingston. Traffic over the Canadian route will be greatly increased, if this work is finished before the barge canal is in operation.

WHY BARGE CANAL MUST BE COMPLETED.

The original barge canal appropriation was $101,000,000. The terminal appropriation was $19,800,000. The Cayuga and Seneca canals appropriation was $7,000,000. The total of these appropriations is $127,800,000. This money has all been spent or contracted for, and the state also is liable for land damages to about $17,000,000 more. Unless the proposed bond issued be voted upon favorably, the canals will be useless and all of this money will have been wasted.

Water Route to Lower Rail Rates.

The grain rates between Buffalo and New York have been nearly doubled in the last 15 years. In fact, they are so high at present that the great commercial organizations in Chicago, Toledo, Buffalo, Boston and New York united last year in a petition to the interstate commerce commission to reduce them. No action has yet been taken by the commission, and, in view of the previous decisions, it is doubtful whether the commission will feel that it can do it. In the meantime, immense quantities of grain are going via the Montreal route and via the gulf route, and New York state is losing its transportation business. The only way in which these rates can be reduced to a point low enough to bring back this business is by the completion of the barge canal.

Welcome Speech.

When money talks it seems always
To make a hit;
At least nobody ever says
"Shut up!" to it.
—Boston Transcript.

BARGE CANAL ASSURES MINIMUM FREIGHT RATES.

The opening of the Panama canal makes it possible to bring lumber and grain from the Pacific coast to the Atlantic coast and even as far west as Buffalo, at lower freight rates than by rail. With the barge canal in operation all of the canal cities in New York state can obtain Western goods and can ship to California to better advantages than the cities of Canada or the cities of any of the other Eastern states. This should tend to build up in New York state the greatest manufacturing district in the world.

CANAL COMPETITION THE ONLY SAFEGUARD

Railroads Boost Rates In Spite of Promise of Reduction.

At the election in 1903 the people of New York state voted in favor of building the new barge canals. This decision was based very largely on the desire to control transportation rates. It was not expected, and, indeed, it was argued many times during that campaign that the canals would not carry all of the heavy freight, nor perhaps any large percentage of it. It was, however, believed that the influence of the canals would reduce the rates by rail.

In 1903 there was no public service commission in the state of New York, and the interstate commission had not at that time power to make rates, so that the railroads were subject to no real control. The argument against the canals in 1903 was very largely to the effect that with the increased size of engines, heavy rails and larger cars, the rates by railroads could be and would be very largely reduced and that the building of the barge canal was a waste of money.

Even before 1903 the railroads had started to increase their rates. Instead of the reduction which had occurred up to that time and which anti-canal men were arguing would continue, there began a time of constantly increasing railroad rates, which is still continuing. Thus the main argument, which was used in 1903 against the building of the barge canals has proved, within a very few years, to be utterly false. Rates have not decreased by rail, but have increased.

Since 1903 the people of the state and of the nation, becoming impatient with the constant increase in railroad rates, have created the public service commission and have given to the interstate commerce commission the power to fix rates. This action had to be taken in New York because the barge canal was not completed, and even the creation of these commissions, with all the power that has been conferred upon them by law, has not stopped and will not stop increases in railroad rates. It is much more evident now than it was in 1903 that the only method of regulating transportation rates, which can be made at all effective, is through water competition.

Much good has been accomplished by the commissions, particularly in the way of preventing fictitious capitalization, but the competition of the different routes outside of New York state, between the Mississippi valley and the ocean, has been continually increasing and over that competition the commissions have little or no power. The last 10 years, therefore, has proved beyond doubt that the state of New York, in order to hold its transportation business, must be able to control rates through its barge canal.

This same 10 years has seen the completion of 90 per cent of the work on this great undertaking. The additional amount which is needed to complete the canal is $27,000,000. The last legislature passed a law recommending the issue of bonds for that amount and leaving the matter to the people at the next election. With nearly $150,000,000 already invested, it is the duty of the state to complete this work as speedily as possible. The importance, therefore, of a decisive vote at the coming election can hardly be overestimated.

This will be the final stand of all those enemies of cheap transportation who have fought so many years to keep the people of the state from enjoying water competition. If this referendum bill be adopted there will be no necessity for rate reduction by the public service commission—the barge canals will hold the rate down to a fair basis.

Save Money by Completing Canals.

Considerably over $100,000,000 has been spent by New York state, and enough more work is under contract to make the total cost nearly $150,000,000 for the new canals. At 4 per cent this means an interest loss every year of $6,000,000 until the canals are completed. A vote for the referendum this fall means a vote to stop this interest loss, and begin to use the investment which the state has made.

NAVY BLUE SUIT.

Smart Tailleur Not Complete Without the Inevitable Fox Set.

AN AUTUMN COSTUME.

The gowns for autumn show many ripples. The coat is rippled and also the skirt, though by no means is it overdone. In fact, the autumn tailleur is nothing if not conservative. This suit is developed in navy blue gaberdine. The shoes are black and white and also the hat, while this magnificent set of red fox completes a very nobby and fashionable costume.

SUMMER NOVELTIES.

Hit "The Trail of the Lonesome Pine" With These Bags.

Pine needle bags are a splendid reminder when autumn and winter come of the healthful days spent in the mountains where the pines rear their towering heads to the skies.

TWO PINE BAGS AND A ROSE LEAF BAG.

These bags and also the bag of rose leaves pictured are splendid in their medicinal effect upon the tired nerves of the dweller in towns. These pine bags are hand embroidered, and the rose leaf bag has an appropriate covering of rose figured cretonne.

To Clean Feather Pillows.

Open one corner of the ticking cover and pour boiling water in. This renders the feathers a kind of pulpy wet mass, which can be easily handled. Take them out and wash in soap and water thoroughly. Put back into the washed cover and hang out in the hot sun, where the feathers will swell to fill the cover and be wonderfully light and perfectly clean without having been scattered at all, as is bound to happen when dry.

FIG FANCIES.

Beat to a cream one cupful butter and two cupfuls white sugar. Add two eggs well beaten and one teaspoonful of baking powder sifted with enough flour to permit easy olling. Roll thin and stamp out in any desired shape. Wet the edges, place a teaspoonful of fig filling on one side of the shape, turn out the other half, press the edges together and bake about ten minutes in a hot oven. To make the filling add to two cupfuls of figs, chopped fine, one cupful white sugar and one-half cupful water. Boil thirty minutes, cool and use.

LIKE A MONEY TREE.

Simple and Profitable Scheme of a Kongo Trading Company.

The possibilities of a really enterprising trading company are realized at Kifiku, central Africa, where the Kongo Oriental company owns all stores, where money can be spent and fixes its own prices for ivory, rubber, labor and trade goods. "It was as if by planting a few francs in the ground money bearing trees had sprung into existence." The lucrative procedure is explained in James Barnes' "Through Central Africa."

"As soon as a native was paid cash for anything, either as an advance or for services rendered, he hastened hotfoot to the company's stores and bought anything from a harmonicon to a secondhand gold braided uniform, and as the profit in these articles ran from 100 to 250 per cent it can easily be seen where the money trees come in.

"The man who had brought in ivory was paid for it in cash at a rate that insured a profit of about 150 per cent. and immediately he repaired to the store, where he bought things he had no use for, giving another profit of cent per cent at least. The money was sent from the store to the company's offices, where the native was paid for carrying the ivory on the first stage of its long journey to the coast. The money received was the same that had been paid for the ivory in the first place, and the bearer would surely come back and spend his wages at the store again.

"It was a lovely system, and the only real chance for loss was the wear and tear on the money itself and the expense of bookkeeping. If the native demanded an extra price for ivory or labor there was very little trouble made over it—the extra cost was added to the articles in the store."

TOO HAUGHTY TO WORK.

English Servants Will Not Do What They Think Beneath Them.

The Lowells lived at 31 Lowndes square, having moved there from another house in the same square. Their establishment was not magnificent, but adequate, with a sufficient complement of servants. These servants were engaged for special posts in the "service," as is always the custom in England, and each was a stickler for his prerogatives and perquisites and quick to resent any demand that did not fall in the province of his sharply defined duties.

It so happened that in moving a carpet from the former house had been put down in the new one, leaving a few inches uncovered in a corner, which the furnishers had overlooked. As there was a dinner party at the embassy that night and Mrs. Lowell possessed a piece of the carpeting to cover the bare spot on the floor, she rang for one of the menservants and asked him if he would kindly tack it down for her. He drew himself up, distinctly offended in his pride.

"I beg your pardon, your excellency," he said, "but it is not my place to do that. I will ring for Alfred."

Alfred appeared, and his answer to the same request was:

"I beg pardon, your excellency, but it is not my place to lay carpets. I will call Charles."

And Charles came with the same answer. Mrs. Lowell called up, I think, every male servant in the house, but one and all stuck their noses in the air and looked with disdain upon the humiliating hammer and tacks. She then had them stand in a row while she herself proceeded to nail down the small corner of carpet and instantly dismissed them from her service.—Princess Lazarovich in Century.

Wood Pulp.

Observation of nature has often suggested ideas to business men. Many years ago James G. Blaine said to Dr. Hill that there was a rapidly diminishing supply of rags and cotton for papermaking. That set Dr. Hill thinking. One day he came into the office of a paper manufacturer holding a hornet's nest in his hand. "Why cannot you make paper like this?" he said. Dr. Hill's trained eye had seen that the hornet began making its nest by chewing up particles of wood into a fine pulp. That illustration led to the use of wood pulp for making paper.

Killed by Fear.

Frederick I. of Prussia was killed by fear. His wife was insane, and one day she escaped from her keeper and, dabbling her clothes with blood, rushed upon her husband while he was dozing in his chair. King Frederick imagined her to be the "white lady" whose ghost was believed to invariably appear whenever the death of a member of the royal family was to occur, and he was thrown into a fever and died in six weeks.

A Henpecked Bird.

The male rhea, a feathered inhabitant of South Africa, is very much put upon, for four or five hens combine together and lay their eggs in one nest till the total reaches twenty or more, when the females depart, leaving a male bird to sit on the eggs and attend to the wants of the young birds.

Mean Retort.

"He says he intends to be the architect of his own fortune."

"I predict a terrible stagnation in the building line."—Judge.

Good Reason.

Indignant Customer—Barber, why did you drop that towel on my face? Barber—Because it was hot, sir."—Boston Globe.

Prejudice squints when it looks and lies when it talks.—Abrantes.

Easy & Practical Home Dress Making Lessons

Prepared Especially For This Newspaper by Pictorial Review

A LOVELY DANCE FROCK.

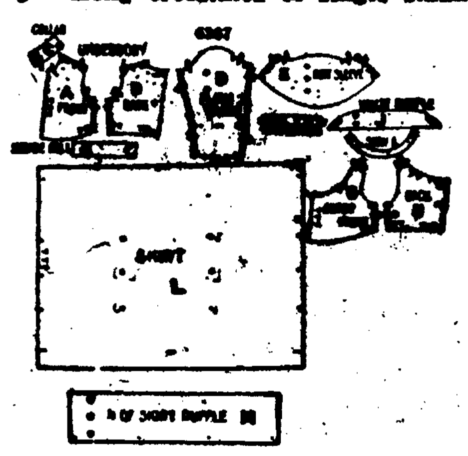
6367

Dance frock for a young girl. It is charmingly developed in cream colored Georgette crepe trimmed with apple-green silk.

Delicate cream Georgette crepe is used for this simple dance frock. The ribbon-edged ruffles, crush girdle and lace yoke are dainty features of trimming.

Apple-green silk is a charming color to use in connection with the crepe as a trimming. In average size the dress requires ⅞ yard material 27 inches wide for the underbody, ⅝ yard all-over lace 18 inches wide for the yoke facing, ¾ yard belting 2 inches wide for stay and 5½ yards Georgette crepe.

To make the skirt, close the back seam from large "O" perforation to lower edge and finish the edges above for placket. Turn the hem at lower edge on double "oo" perforations and gather upper edge between double "TT" perforations. Close seams of ruffles and gather entire upper edges. Adjust on skirt, stitching gathered edges along crosslines of single small



"o" perforations (seams at back seam of skirt); stitch the narrow ruffle along the upper crossline of perforations. Sew skirt to lower edge of waist over belt, center-fronts and back edges even, small "o" perforation in skirt at under-arm seam.

The outer front and back are in one and the under-arm and shoulder seams should be closed as notched before the hem is stitched. Next, gather upper and lower edges of front and back between double "TT" perforations. Adjust stay to position underneath upper edge of front and back, center-fronts and backs even (large "O" perforations indicate center-back), double "oo" perforation at shoulder seam. Arrange the two ruffles together (small one on top), corresponding edges and perforations even. Gather between double "TT" perforations. Adjust to position on front and back (large "O" perforations indicate front of ruffle), stitch gathered edge to position between single small "o" perforations in stay, small "o" perforation in ruffle at shoulder seam.

Pictorial Review Costume No. 6367. Sizes 14, 16, 18 and 20 years.

Hints for Housewives

French Toast Sandwiches.

French toast sandwiches are among the favorite tea room novelties that housewives find it easy to duplicate at home. These sauted slices of bread, put together in pairs, with any preferred filling have the advantage of being adaptable to any of the three meals of the day, while their particular mission is to afford something a little out of the ordinary for the Sunday night tea table or the after theater supper. The occasion must decide what filling is appropriate and whether the French toast sandwich shall be served crisp and dry from the griddle or accompanied by a suitable sauce.

The novelty consists in the fact that after the sandwich is made it is pressed closely together and then dipped in a thin batter made in the proportion of one beaten egg to a half cupful of milk. If the filling of the sandwich is a savory mixture of egg, cheese, fish, meat or fowl, a pinch each of pepper and salt should be added to the batter. If, however, the sandwich has a sweet filling, the batter should be slightly sweetened and flavored with a teaspoonful of sherry. Cook the moistened sandwich on a hot, well greased griddle, browning first on one side and then on the other. A shallow iron frying pan will answer the same purpose and olive oil will be found an excellent substitute for butter.

For those who like something more than the ordinary breakfast of fruit, cereal and eggs several variations of the French toast sandwich will be found appropriate to accompany the morning coffee. Flaked salt codfish, made a little less moist than in the popular dish known as creamed codfish, is an excellent filling for a breakfast appetizer of this kind. Half fish and half finely chopped hard boiled egg makes an equally good mixture, or a little finely chopped cold boiled potato may be used. Season well and dip in batter. When thoroughly browned on the griddle serve hot, either with or without a little white sauce.

A particularly appetizing combination, suited to serve at breakfast, luncheon or Sunday night supper, calls for equal parts of finely chopped cold boiled ham and tongue. This should be seasoned with either French or English mustard and moistened with a little cream or rich milk.

Lovers of cheese will enjoy a hot cheese sandwich with filling of softened cheese moistened with cream and highly seasoned with Worcestershire sauce and paprika. The batter should also be seasoned, and the finished sandwich when toasted and served piping hot should have much the flavor of a Welsh rabbit.

As a simple sweet course at luncheon or family dinner French toast sandwiches with fresh fruit or jam filling will be found delicious.

The story goes that we are indebted to a thrifty housewife for this particular brand of toasted sandwiches. In her endeavor to utilize an oversupply of dainty sandwiches prepared for an afternoon tea the idea occurred to her to brown a few of them on the griddle for her luncheon the next day.

A French Dainty.

Tenderloin and mushrooms is the plain name in this country, but this way of doing the cookery is purely French.

Peel six mushrooms and take out the stems. Then drop them for five minutes in cold salted water. Take them out, dry on a fresh cloth and put them in the plat with a teaspoonful of butter. Cover the plat with a saucer or breakfast plate, set it over the blaze and saute the mushrooms for fifteen minutes without uncovering. Then dump them in a hot little vessel, cover that and keep warm until the steak is cooked.

Scrape the tenderloin steak with a knife, rub it over with the cut side of a lemon and put on a faint dust of salt and pepper. Then place the plat with all the mushroom taste and a little of the sauce over the fire and when piping hot put in the steak. It should brown a little on either side, but still be pink inside. When cooked pour the mushrooms back into the pan, add a pinch more of butter if the sauce has dried out, cover the plat, set it in the oven for three minutes and serve at once. As mushrooms draw their own juices, only enough butter to start them cooking must be used when they are first prepared.

Chocolate Cake.

One-half cake of chocolate, one-half cupful of sugar, one-half cupful of milk, one egg yolk and a pinch of salt. Cook in double boiler until smooth.

One cupful of sugar, one-half cupful of butter, creamed together well; add two eggs beaten light, one cupful of milk and one level teaspoonful of soda dissolved in milk, two level cupfuls of flour and one tablespoonful of vanilla. Mix this with the other, beat well and bake one-half hour.

Tomato Eggs.

Beat one-half dozen fresh eggs lightly. Rub one-half cupful of tomatoes through a colander and mix with the eggs. Stir in one tablespoonful lemon juice, one small onion finely minced, one tablespoonful minced parsley, one teaspoonful each salt and celery salt and a generous dash of sweet paprika. Pour into a double boiler, place over boiling water and stir constantly until thick enough to serve on toasted bread.

Woman's Tact.

Rev. Mr. Gassington—Honestly, Miss Deering, do you think my sermons are too long? Miss Deering—Oh, dear, no! I simply think that life is too short.—Puck.

HIS FRIEND T... RAT.

The Mine Disaster Story That Went With a Stuffed Rodent.

Any man who will keep a stuffed rat in his room wherever he goes must have a story to tell about the rat. This man has.

"This story," he said, "concerns an experience that made my hair curl. I am an engineer. I was once retained to report upon the working of a mine in southern Arizona. The mine was called the Barbara. On an adjoining claim was another mine called the Hyperion. A dispute arose. The Hyperion people claimed that the lower levels of the Barbara had been bored into their ground and half a dozen fortunes in ore taken out of their mine.

"The first thing to do was to make a survey of the Barbara. The Barbara people, of course, objected. Finally, an order for the survey was secured from the court, and I was sent, with a man named Jim Banks, to make the survey.

"There are tricks in all trades, and the Barbara representative knew a few in his. When we reached the mine he said that the tunnel we wished to explore was in a dangerous condition. There had been a cave-in, the timbers were rotted, and so on.

"We classed him as a liar, though he turned out to be right. We worked our way into the tunnel until we ran against a jam of fallen timbers. The timbers, however, were sound and had plainly been arranged to stop our progress. Banks went back for an ax, while I worked at the roof with a pick to dislodge the center pieces.

"I succeeded and had climbed halfway over into the other side of the tunnel when there came a terrific crash of loose ore from the roof. It fell on both sides of the timbers, pinning me in a hole which would have been a grave but for a few sticks which held the mass of ore above.

"The place was barely large enough to move in, and I knew it was certain death in a few hours unless Banks could dig me out.

"The foul air was getting into my brain, and I think I was actually insane with the fearful dread of being buried alive.

"I had given up all hope and was almost swooning when I heard a strange, scraping sound above me. I yelled, but received no answer. With new energy I threw my body against the walls and tried to pick out the ore from between the lodged timbers. Still came the queer scraping noise, which seemed to come nearer and sounded not unlike the steady grinding of a saw. It seemed to last for hours, though it could hardly have been a minute after when a bit of earth dropped to my feet from the upper end of the wall, and along with it came a big gray mine rat.

"That rat saved my life, for he left a clear hole for his trail, and through it came a breath of fresh air that gave life to me. The fellow had bored his way through from the shaft side of the cave. I stayed there two hours after that, until Banks found the cave, got help and dug me out without breaking the airhole.

"I caught the gray rat too. I kept him fed up like a king until he died, and I wouldn't take a lot of money for his skin now."—New York Times.

The Curse.

An Irish authority thus defines as an expert the effects of a well delivered curse: "The belief among the ancient Irish was that a curse once pronounced must fall in some direction. If it has been deserved by him on whom it is pronounced it will fall on him sooner or later, but if it has not then it will return upon the person who pronounced it. They compare it to a wedge with which a woodman cleaves timber. If it has room to go it will go and cleave the wood, but if it has not it will fly out and strike the woodman himself who is driving it between the eyes."—London Globe.

Enough Knowledge.

"Did you ever stop to think," said the shopkeeper recently as he measured out half a peck of potatoes, "that these potatoes contain sugar, water and starch?"

"No, I didn't," replied the boy, "but I heard father say that you put peas and beans in your coffee, and about a pint of water in every quart of milk you sell."

The subject of natural philosophy was dropped.—Chicago Herald.

Astounding Memories.

Horace Vernet is the best example of visual memory. He could paint a striking portrait of a man, life size, after having once looked at his model. Mozart had a great musical memory. Having heard twice the "Miserere" in the Sistine chapel, he wrote down the full score of it. There are soloists who during twenty-four hours can play the composition of other masters without ever skipping a note.

Pike's Error.

Lieutenant Pike, whose name adorns a lofty peak, was once sent to build a fort near our Mexican (Texas) border. He slipped up on his geography so badly as to place the structure well within foreign teritory. It has been believed by many that his orders made ample allowance for such an error.

Entertaining.

Willis—Did they have a good time at your reception last night? Gillis—Yes, the guests enjoyed it hugely. All my wife's arrangements went wrong.—Boston Journal.

The word "tomorrow" was invented for irresolute people and for children.—Turgenev.

TODAY'S FASHION NOTE

Paris is using the long coat suit this Fall to emphasize its idea of economy, for later in the season the coat may be worn separately as a winter garment. The model pictured here is carried out in black broadcloth, the collar and cuffs being of velvet. The three-piece skirt has an inverted plait at ach side. The entire costume requires 6 3-4 yards 54-inch material. Pictorial Review Coat No. 6009. Sizes, 32 to 44 in bust. Price, 15c. Skirt No. 6076. Sizes, 22 to 34 in. waist. Price, 15 cents.

Pictorial Review Patterns may be procured at the M. Katz & Co. Department Store, Fulton.

The KITCHEN CUPBOARD

WITH FRESH FRUIT.

EVERY refrigerator has its quota of fresh fruit leftovers. Perhaps you have a bit of pineapple left from last night's dinner, either cut in blocks or shredded. With this mix banana cut in dice, a few strawberries, and over all squeeze a goodly measure of orange juice. Serve very cold in glasses or sherbet cups.

Sweet Fruit Salad.—Three ripe yellow pears, one bunch of white grapes, one blood orange, two red bananas, one glass of maraschino cordial or the same quantity of rum, and sugar to taste. Peel the pears and quarter them, taking out seeds; seed the grapes, peel and slice the bananas and cut the orange in slices through the skin, dividing the slices then or leaving them whole. Put all the fruit together and sugar it liberally, then put it away on the ice; when ready to serve put on the liquor used. If this salad is served in a glass bowl and the red orange slices are left whole the effect will be very ornamental.

Salad Creole.—Orange, romaine, lettuce, green peppers and chives are the ingredients of this refreshing dish. Choose young and delicate lettuce, strip the leaves, wash carefully and dry each piece with a napkin. Put them in the bottom of a mixing bowl and add the pieces skinned and broken in halves, of one or two oranges. Over these shred a large green pepper finely and add from one to two teaspoonfuls of chopped chives. Season with olive oil and salt, and if more acid is liked add a light squeeze of lemon juice. Instead of orange, grape juice could be used with this salad, and the beauty of it will be much improved with strips of Spanish pimento.

Fruit Appetizers.—Almost any kind of fresh fruit can be used as an appetizer. Watermelon cut in cubes and served sprinkled with a very little sugar and lemon juice, ice cold, in grapefruit glasses, is one good appetizer. Another is cherries dipped in lemon juice, pitted, chilled and sprinkled with sugar. These should be piled in glasses with a little shaved ice and a sprig of mint. Strawberries on the hull arranged neatly on plates around little mounds of powdered sugar are always welcome.

Sweet Sandwiches.—Sweet sandwiches can be filled with many summer fruits. Sliced strawberries, sprinkled with sugar and arranged between slices of buttered bread, are good, and raspberries, slightly crushed and sweetened, are also good.

[illegible] DESTROYS HIS HAPPY HOME

[illegible]e Never Had Best of Temper, But Spiritualism Sends Her Amuck.

[L]EFT HIM 22 TIMES

[illegible]tered at the Sink Because Water Didn't Run Fast Enough to Suit Her, Says Exasperated Husband.

Detroit, Mich.—Twenty-two times in [the] last fifteen years Mrs. [illegible] [has] packed her clothes, the family [pictures] and china and quit her job [as] the wife of John F. Ward, a middle-[aged] druggist and violin [maker].

Twenty-one times John Ward [illegible] [his] books [illegible] a partly finished violin, [illegible] [might] have been, and bought out [the] wife [illegible] until she returned [illegible] put [them] back into [illegible] places the [china] and family portraits.

A few days ago, in a dingy back [room] of his drug store, with a partly finished violin across his knees, he [told] the story of how his home, his business and seven years of his life [had] been wrecked. "It was seven years ago," he said slowly, "that a woman entered my home with this spiritualism tomfoolery. I tried to [stop] it, but I was too late.

"Mother took it up and wouldn't [drop] it.

"She never had the best of a temper, but we got along fairly well until she was medium-stricken. After that [her], well! temper is a weak word after all.

Spirits Bad-Tempered.

"The deeper mother got into spirit[ualism] the [worse] she became. She [never] seemed to get an amiable [spirit]. It wouldn't have been so bad [if] she had. I think it was either [Black] Hawk' or 'Red Eagle,' depart[ed] Indians, whose spirit possessed [mother]. I've seen her, when she had [him], mutter at the sink because the [water] didn't run fast enough to suit [him].

"When I protested she would fly [into] a rage, pack the china and fam[ily] pictures and quit. Often it took [two] weeks to find her. When I did, sometimes she was sorry and ready [to] return. At other times she was [ugly] and I had to coax her.

"Once I thought she was nearly [cured]. A daughter by my first wife [attended] a seance. The next day she

[illegible] Smashed Vases Valued at $150, While the Officer Looked On.

[was] possessed of the spirit of her [departed] mother. Her stepmother [didn't] like that a little bit and the [spirit] she summoned from below or [above] made the other spirit retreat [over] the divide.

Smashed the Vases.

"Two or three years ago, when the [hobble] skirt had its inning, mother [made] one. After she put it on she [came] downstairs, twisted herself be[fore] the mirror and said, 'How do [you] like it, John?'

"'It's all right, mother,' I answered, '[but] put your foot on the chair.' She [did], and then I said, 'You will make [a display], mother, when you get on a [street] car.'

"[That] night when I went upstairs [after closing] the store, mother, her [clothes], the pictures and the china [were gone]. I found out where she [was], but she wouldn't return. She had [left] the china and several hand[painted] vases at a friend's, and I got [a writ] of replevin to get them back.

"When the officer went to serve the [writ], mother was there. What could [I do] with the spirit of Black Hawk [in my] mother that night?

"In addition to breaking up our [home] it has taken money to keep [mother] traveling with the spirits of [Indians] and doctors who died a hun[dred] years ago.

"Mother has had to tip Caesar, Bru[tus] and those other fellows who are [conductors] on the transcelestial trains, [or maybe] they're in the subways; I've [forgotten], though mother told me [often]. I've paid the bills; I need money [now], but—no, I don't believe that [mother] had a good time out of it."

[illegible] REPAIR OF CUTS

Repairs Are Also Cut and Saving in Tire Bills Is Made Greater.

SHOULD WATCH SMALL CUTS

Tiniest Abrasions Pick Up Particles of Dirt Which Gradually Destroy Fabric and Cause Blowouts Which Are the Dread of Every Motor Devotee.

"By repairing your cuts you cut your tire bills," says R. S. Wilson, manager of the service department at the Goodyear company in Akron. "A little glass cut, a nail hole or any abrasion that penetrates the rubber tread to the fabric of the tire opens a way for dirt and moisture to creep in. In many an apparently perfect tire when removed from the wheel and deflated is found a loose tread, under which are dirt and moisture, rotting the fabric.

"If you have ever found a tire in this condition you know you have had a strong temptation to call it defective. Did you ever select a nice, rosy apple, apparently a perfect specimen, and discover after the first bite that it was pitted with worm holes? If so, you were tempted to call it a poor apple, and yet, generally, investigation would have shown somewhere down on the side a small hole where the worm crawled in.

"Almost without exception the tire having a loose tread and rotting fabric is no more at fault than the apple into which the worm bored its way.

"As the tire revolves a suction is produced which draws particles of dirt into the cut. Gradually these particles work under the rubber, grinding and cutting it from the fabric. If neglected this grinding process will work around the tire and separate the whole tread from the fabric. The fabric under the tread soaks up some of the moisture, which causes it to weaken, and a blowout soon follows.

"A tire cut is the most common and most destructive of all tire troubles, and yet is the easiest to remedy if taken in time. It is a good plan to look over your tires every few days. It will pay you to repair any cuts, however insignificant they may appear.

"You can do this quickly by cleaning out with gasoline and filling in with quick repair gum. A can of this is inexpensive and may save many dollars' worth of tires and lots of trouble. Rapid deterioration invariably follows a neglected cut."

Automobile Tire Invention.

Preventing puncture of inner tubes of automobile tires is one of the most prolific fields for the inventor. Hundreds and even thousands of schemes have been devised, some of them working very satisfactorily. One of the latest, which is as unique as it is said to be effective, is the placing of three separate and distinct ribs on the inner tube. The shape of these ribs is such as to form small airspaces when the tube is blown up, thus adding considerably to the resiliency of the tire. The greater thickness of the inner tube and the difficulty which a nail or tack would have to penetrate the entire tube recommend this invention to the attention of the motorist. The few tubes made according to this design are stated to have given great satisfaction.

Wheel Tax Law in Illinois.

Illinois cities now have the privilege of affixing a wheel tax to all automobiles and other vehicles if they see fit. The supreme court set aside the previous law, declaring it unconstitutional on a case appealed from Lincoln. Owing to the importance of this tax to Chicago and the larger cities, the legislature changed the law to meet the objections of the court. The revised bill became a law when Governor Dunne signed it. The tax in Chicago on automobiles is $10 to $20, in accordance with the horsepower.

AWARDED A CROSS FOR BRAVERY, BUT IS DEAD

London, Aug. 24.—Lieutenant Frederick William Campbell, of the First Canadian Battalion, has been awarded the Victoria Cross for conspicuous bravery at Givenchy, though he has since died.

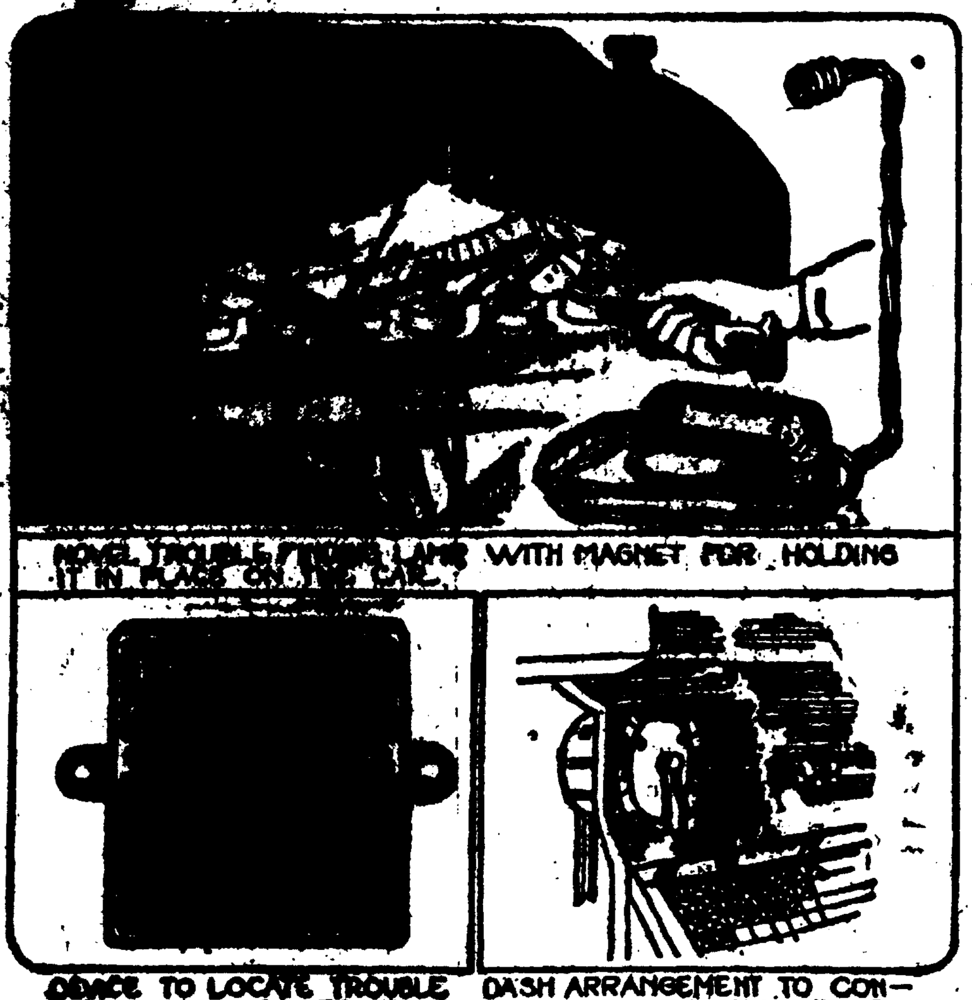
Lieutenant Campbell took a machine gun to the first German line and maintained his position there, despite a heavy rifle fire, machine gun and bomb fire. His whole detachment was killed or wounded.

When his bomb supply was exhausted Campbell advanced still further, firing 1,000 rounds from his machine gun, and held back the German counter atack.

Doesn't it strike you that the Lord is mighty patient, not to make any demonstration against being classed as an ally in the European war?—Wichita (Kan.) Eagle.

Give The Evening Times a trial. It has all the news about all the people you know, and then some more.

HANDY HELPS FOR THE AUTO TOURIST



NOVEL TROUBLE FINDING LAMP WITH MAGNET FOR HOLDING IT IN PLACE ON THE CAR.

DEVICE TO LOCATE TROUBLE IN ELECTRIC CIRCUITS ON AUTOMOBILES.

DASH ARRANGEMENT TO CONTROL INTENSITY OF LIGHT FROM HEADLIGHTS.

An Indianapolis concern has brought out what is termed a thermo cutout, which is attached to the dash of the car and which is designed to indicate whether a circuit is complete or whether there is a leak or short. Crossed wires or a ground will cause the cutout to turn off all circuits. Difficulty on any circuit may be found by resetting the cutout so that when the switch is turned to the various circuits the faulty one will operate the cutout.

With the proper use of electric headlights there should be no objection on the part of pedestrians, and there need be no glaring headlights, for several devices have been brought out to use smaller lights when desired. The use of electric lights permits the operator to turn the lights on or off at will, and so while using the side lights to conform to the law's requirements it is only necessary to switch on the headlights for an instant if a particularly dark piece of roadway is encountered and turn them off at once their work is done.

In the use of the headlights an improvement has come whereby a switch is located on the dash and the lever may be operated by the foot. This is designed to regulate the intensity of the light and may be set at low, medium, high, or out, thus permitting the operator to regulate the lights according to road conditions or the necessity for having more or less light.

Those who have electric lights have no excuse for using glaring headlights in the city except occasionally when a light circuit is out of commission, which is seldom and usually only for a few hours after a severe storm. The streets and boulevards are generally speaking so well lighted as to require only the side lights, and their use alone would go a long way toward the ultimate end of the "safety first" crusade.

Another handy little device which can be used in connection with the electric system is what is called a stickalite lamp, which has a magnet attachment to secure the lamp to any steel part of the car while adjustments are being made or a tire is being changed. This operates from an ordinary six volt storage battery such as is used for ignition purposes. It is only one inch in diameter, has a reflector tube which acts as a protector to the bulb, and weighs but three ounces.—Chicago Tribune.

CARRANZA MAN CHARGES A PLOT

Says General Scott Proposed to Villa That Troops Attack Texas City as Aid to Intervention.

Havana, Cuba, Aug. 24.—The charge that Major General Hugh L. Scott, chief of staff of the United States army, proposed to Villa that the conventionist troops atack Laredo, Texas, and provoke American intervention in Mexico, is contained in an article published in El Paso, one of the official newspapers of the Carranza government in Vera Cruz. A copy of the newspaper was received here today by a prominent business firm from its agent in Vera Cruz.

El Puebla charges that Major General Scott in his conference with Villa told how it would be possible for the "reactionaries" to force the Washington government to acti n Mexico.

"The Carranza government has absolute knowledge that this proposal was made," the newspaper said. The article is headed "Connivance Between Traitors."

El Puebla and El Dictamen, the two Carranza newspapers in Vera Cruz, are publishing inspired editorials in commendation of the atitude of the First Chief in refusing to agree to the peace scheme for a constitutional convention, according to a letter which came with the newspapers.

"These newspapers declare that it is ridiculous to believe that Carranza will accept the suggestion of Secreary Lansing and the six Latin-American powers that he treat with Villa and Zapata," the agent said in the letter. "They insist that 'Carranza will never treat with traitors except on the battlefield' and that 'it is absurd o ask the victors to hold conventions with the vanquished.'

The writer said famine conditions in Mexico City were worse than ever before and that Carranza official reports said an average of seven persons a day were dying there of starvation. "These reports only show the number of registered deaths in hospitals," he said. "Hundreds die in their homes or in the strets and no reports is made of it.

"The Red Cross Society and the International Relief Committee are almost at the end of their resources in supplying food overy day to 140,000 starving persons whose lives depend upon the rations they get from these two organizations. Carranza official reports to the effect that large quantities of food are being sent there are purefi ction.

"Reports received here by a courier from Mexico City said that on Aug. 18 the police found in the strets the bodies of 158 persons who had died of hunger there that day."

He declared that theo nly solution of the food problem there was to be found in the United States sending a supply train to the capital under the protection of armed convoys.

"Even should this be done at once thousands of persons will die of hunger before the food can reach them," he said.

QUEEN VISITS BOXER MONROE IN HOSPITAL

London, Aug. 24.—Queen Alexandria visited the Netley Hospital this afternoon and conversed with the men of Princess Patrica's Regiment, especially Jack Monroe, well known boxer.

The Queen expressed the hope his wounds would not prevent him from resuming boxing when the war was over.

The consistent advertiser wins in the end. It may cost a dollar to get a dollar, but the deal wins prestige.

If birth statistics are any indication, Roosevelt might find more truth than poetry in his sarcasm: "I never raised my girl to be a mother."—Bismarck (N. D.) Tribune.

"How can I like work, mum?" said a tramp the other day, according to the Smith County Pioneer. "Work's what killed my poor wife."—Austin (Tex.) American.

A third of a million Germans have gotten the Iron Cross and the Russians feel that they have gotten the double cross.—Florida Times-Union.

The sanatarians have denounced the borrowing of powder puffs, but what else can a girl do if she forgets or loses her own?—Indianapolis News.

CARE FOR YOUR CAR

Some Facts That Will Help in the Direction of Practical Economy.

LOOK OUT FOR DRY BATTERY

Removal of Wheels Easily Accomplished by Aid of Simple Tool—Small Hand Vise Is Valuable Addition to Tool Kit—Emergency Valve Lifter.

During the last few weeks automobilists utilizing dry cells for ignition or lighting have noted that the price has advanced. The standard type of dry cell formerly retailed for 25 cents. It now sells for 30 cents, and in some cities the price is 35 cents.

This increase in cost is due to the war abroad as a certain material utilized in the cell is imported. And it is not unlikely that a still further advance will be made in the price of batteries. For this reason the motorist should be as economical as possible of the battery. When employed for supplying current for ignition, the vibrator should be adjusted as lightly as possible so that the minimum amount of current will be drawn. If dry cells be utilized for lighting, using as small candlepower lamps as possible will effect a saving in current. Unfortunately, dry cells cannot be utilized as other automobile material for they depreciate in time, even when not used. Care should be taken in installing the cells to avoid the possibility of a short circuit. The high cost of dry cells will boom the storage battery industry, as storage batteries may be recharged at a nominal cost.

The rear wheels of some cars cannot be easily displaced without the aid of a wheel puller. The tool is simple and easily operated, provided a few precautions are observed. Displace the wheel or hub, cap, and if the puller be provided with arms or jaws, these are slipped between the spokes and clamped to the brake drum. Care must be taken that the jaws do not grip or come in contact with the flags of the axle housing. Set the point of the screw member of the puller in the center of the axle, and set up the screw. By tapping the head of the screw with a hammer, the wheel may be started, after which it is an easy matter to displace it. If the wheel puller be of the hub cap type, the set screw should be set up snugly before tapping it with the hammer.

Owners of brand-new cars should examine the brake drums after operating the car a short distance to note if the bands drag. If the drum be unduly warm it indicates a dragging lining which not only wears the material but takes a certain amount of power to overcome the resistance.

A small hand vise, one that can be clamped to the running board of the car, is a valuable addition to the tool kit. It can be employed for a number of useful purposes on the road, and does not take any room to speak of in the tool kit. The vise can be utilized for clamping a patch to a tube while the cement is drying, for holding small material to be filed, and for many other purposes. Hand vises are not expensive. A certain type marketed is very useful for assisting in replacing a bent or twisted locking ring of the quick demountable type of rim. It has jaws four inches wide with an opening of one and one-fourth inches. Sufficient to meet ordinary road requirements. In selecting a hand vise one having hardened jaws is preferable to ordinary material.

If caught upon the road with a broken valve, and it is necessary to displace it, and no lifter is handy, take a good sized file and a block of wood. By using the wood as the fulcrom and the file as the lever, the valve spring may be easily compressed. The writer employs this method when removing valves and finds that it is adaptable to practically every type and size of motors employing poppet valves. The tang of the file is placed between the coils close to the collar. A little practice will demonstrate the practicability of the method.

How They Will Vote

About 600,000 metal trades workers in factories producing arms and munitions, is officially announced in New York, will demand more pay and shorter hours. They base their move on the prosperity of the factories affected.

How will these 600,000 workers vote next year? For a Tariff policy that assures low wages or a Tariff program that renders higher wages probable?

They are undertaking now to take advantage of an abnormal situation. How about a few months ago when they were unable to get any wags at all? Peace wages, not war wages, is the prize worth striving for.

The workman who wants to Protect his wages will vote so Protect the factory that pays it.—Philadelphia Evening Ledger.

LURE OF ORIENT RUINS HER LIFE

Pathetic End of Young American Girl's Dream of Love.

SQUALOR MARKS END

Daughter of Wealthy Massachusetts Parents, She Succumbs to Wiles of Chinaman Through 15 Years of Torment.

New York.—Only a glassy-eyed Chinese idol looked on this week when Kitty Powers, cast-off wife of Fong Pong, former president of the Hip Sing Tong of New York city, and said to have been the daughter of wealthy Massachusetts parents, breathed her last after a vain effort to get opium with which to stifle the thundering in her brain.

Catherine Powers died in a two-by-four cubby hole in a rotting shanty in the Chinese district of the metropolis. Too proud to beg, too sick to go out of her room, with detectives constantly watching the house, Kitty died alone and forgotten. Chinatown had little use for Kitty, and had offered $5,000 for Fong Pong, now supposed to be in Chicago. Vain efforts were made to locate him to tell him of the illness of the wife who forsook her home, relatives and Americanism for him 15 years ago.

The Dream That Faded.

Kitty Powers came from Roxbury, Mass., 15 years ago. She was smuggled into Chinatown and remained there in seclusion for four years. According to the police, she never left the house. Her parents, wealthy and respected, made every effort to locate her. At the end of the four years, when her body and soul had been sufficiently tortured by the delights of opium and other drugs, she decided to become the legal wife of Fong Pong.

Several detectives were always near Kitty. The district attorney's office protected her, for she knew Chinatown. But it did not know that Kitty had no money, that it was only what

Kitty Died Alone and Forgotten.

a few white wives of Chinamen gave her that enabled her to keep her soul in her body.

BEAR BESTS BULL IN FIGHT

Fight Occurs in Pasture, and Noise of It Wakens Farmer's Family in Minnesota.

Floodwood, Minn.—O. H. Gjora, a farmer in Fine Lakes township, about seven miles south of Floodwood, reports that a bear attacked his two-year-old bull recently and lacerated the animal so badly that it had to be killed. The fight between the bear and the bull occurred in the pasture near Mr. Gjora's house and awakened his family, but by the time they reached the scene of battle the bear escaped into the woods. The same day a she-bear was killed by John Foote, an Indian, who lives on the west shore of Prairie lake. The old bear was accompanied by a cub, which Mr. Foote captured, but had to let him go, as he got too frisky.

COW MOTHER OF TRIPLETS

Three Calves Born in Iowa Are Healthy—Triplets Rare Among Cattle.

Webster City, Ia.—One of the greatest rarities in "cow families" is owned by Stanley Conklin at his farm southwest of this city. The "family" consists of a cow and triplet calves. Twins are a frequent occurrence among cattle, but triplets are so rare as to attract attention. The triplets are healthy and normal.

Black Snake Got His Kittens.

Amity, Ga.—When the Rev. W. A. Fitzgerald saw a plump blacksnake sliding away from an outhouse, where five kittens made their home, he was suspicious and looked into the building. Sure enough, the kittens had disappeared.

BOSTON MAN SAYS ABOLITION ONLY REMEDY FOR EVIL

Mayor Fox Welcomes Delegates to I. O. G. T. Convention and National Chief Declares Address Unique---Herbert O. Wiley Reviews Abolition in All Its Phases.

The ctiizens of Fulton had the privilege last evening of seeing and examining one of the bronze memorial placques presented by the Exposition at San Francisco to organizations holding conventions in that city. It was exhibited by Willard O. Wyle, National Secretary of the National Grand Lodge of Good Templars in connection with his address on the "Progress of the Water Wagon" at the First M. E. church.

The Good Templars and their friends gathered in large numbers, an audience that nearly filled the church greeting the speaker of the evening.

William Stewart, of the local committee of arrangements, introduced Garret V. Johnson, M. D., of Schenectady, G. C. T. of New York, as presiding officer. Dr. Johnson welcomed the audience and expressed the hope that the principles of Good Templary would be so presented as to win aid and support for the order in Fulton.

The musical program consisted of a piano solo by Miss Ruth McEwan, vocal solo by Mrs. William H. Barrett, and songs by a male quartet consisting of Z. Newell, Arvin Case, Charles Chesbro and Clare Case.

Prayer was offered by Rev. W. G. Bassett and an address of welcome was made by Mayor Fox, who gave the delegates in the name of the city a hearty welcome. He spoke of the great progress of the order and its work for suffering humanity throughout the world. His welcome was a very hearty one.

Ben D. Wright, National Chief Templar and Past Grand Chief Templar of New York, responded, saying in part:

Response to Welcome Address

"It is always a plesaure and honor to respond to a welcome of this kind. We have greatly enjoyed the unique address just delivered and it is the first time I have heard in such an address the work and principles of our order so clearly presentd. It shows that the Mayor is interested not only in the city of Fulton but in our order. I wish every citizen could read the Mayor's address and that the order in this city during the next year might receive tremendous accessions. The facts stated by him are irresistible."

After singing America, Chairman Johnson introduced Willard O. Wylie, the speaker of the evening, as National Secretary of the Good Templars, chairman of the allied temperance organizations of

(Continued on Page Five)

"GREATER FULTON," NEW MARCH TO BE PLAYED AT EAST SIDE CONCERT

The next band concert of the Chamber of Commerce-Stevenson series will be held tomorrow night at East Side park, if the jinx which has camped on the trail of all East Side park concerts so far this summer can be persuaded to absent itself. An interesting program has been arranged by Business Manager Richardson of the band, and the popular song hits are plentiful. "Greater Fulton," another march from the pen of F. Jesse Newton, the talented composer of the Elks' band, will be played as a finale. A request selection from the "Maritana Overture," by Wallace, is also included in the program.

There have been any number of inquiries regarding another vocal solo by Bernard T. Jones at tomorrow's concert. Mr. Jones sang "Dublin Bay" at the Elks' festival last week and the innovation met with universal approval. Mr. Richardson said today that no decision had yet been reached regarding another solo tomorrow evening.

The program follows:

March—Independentia .... Hall
Selection—Chin Chin .... Caryll
Overture—Morning, Noon and Night in Vienna .... Suppe
Waltz—First Love .... Holzman
March—Coronation form the Prophet .... Meyerbeer
Medley Overture—Remicks Hits 1915 .... Remick
Intermezzo—Wedding of the Rose .... Jessel
Selection—Maritana .... Wallace
Popular Hits:
(a) Chinatown .... Remick
(b) I'm on My Way to Dublin Bay
Selection—Bohemian Girl .... Balfe
March—Greater Fulton .... Newton

RUNNING A CITY LIKE A BUSINESS

No. 4---A System for Keeping Municipal Salaries Out of the Politicians' Hands.

By M. M. WILNER

The greatest force in government is patronage. The practical side of politics is the disposal of patronage. The great object of political strife is generally patronage. The difference between the practical politician and the theoretical reformer is usually merely a matter ofh andling patronage—whether it shall be used for the public good alone or whether individual benefit or party advantage shall be the considerations.

Probably every one who has had experience in affairs of government will say, offhand, that the success of the commission plan as applied to cities must depend largely on the manner in which the patronage is safeguarded. Itm atters little to the practical politician what the form of government may be if the patronage is left where he can get his hands on it. Give him the patronage and he can control a commission of five or a council of fifty with equal sucfess and with equal indifference.

The principle which the Buffalo charter has adopted for the solution of the patronage problem might be called the multiple-appointing power. The old plan was to divide up the patronage among the various department heads, who usually passed some of it along to deserving aldermen, andp ublic salaries were made to help party organizations so far as civil service laws could be dodged.

Under the new plan the appointing power will be the whole council. The corporation counsel, superintendent of education, assessors, street commissioner, water commissioner, building commissioner, health commissioner, chief of the fire department, chief of the police, superintendent of markets, [illegible] board of education, city engineer, city treasurer and city auditor are all to be appointed by the council, them ayor having the privilege of nominating them. The city clerk will be appointed by the council independently.

Remembering that the members of the council must be nominated and elected without party designations and in such a manner as to eliminate party politics, so far as that is possible, it will be seen that this plan leaves very little chance for mere political appointments.

But beyond that, the Buffalo charter stipulates that all appointments and promotions except those named shall be under civil service rules. Thec ouncilmen shall appoint the municipal civil service commission in accordance with the provision of the state law Hence, assuming that there should be chosen a mayor and majority of the council who belonged to same political party or faction and wished to build up a machine, there will be so few places exempt from competitive examination that it hardly would be worth while to grab them if the general record of the mayor and commissioners concerned were likely to suffer by the unfitness of appointees thus chosen.

The wiles of politicians are devious and there are prophets of evil regarding this feature of the commission charter, as there are of most other features, but the friends of commission government have confidence in it.

(No. 5 of this Series Will be Published Tomorrow.)

MR. EARL S. BROWN EXPECTS A WALKOVER

The Police-City Officials baseball team, headed by Detective Michael Bray, will meet the Pathfinder Boat Club team at Pathfinder Island this afternoon in a game of baseball. Although the weather is anything but favorable, Captain Bray, speaking for his team this morning, was optimistic and said the high wind woulda id very greatly in carrying the long hits far into the outfield. Captain Earl Brown, of the Pathfinder team, has been keeping very quiet regarding the contest, and it is rumored that he will spring a shut-out twirler on the coppers today.

All of the police and city officials have been practicing faithfully for the contest. Mrs. Holmes has prepared an extraordinarily large chicken supper for the delectation of the tired athletes tonight.

ITALIAN SOCIETY PLANS LABOR DAY PARADE

The Societo Vittorio Emmanuele III, through Frank Zaia, applied today for a permit to march through the streets Labor Day. It is very probable that the permit will be granted. The Societe plans a big celebration on that date and the only organized Italian band of this city and a large Italian band from Syracuse will furnish music.

SCHENCK STREET OPEN; REMOVAL OF GRANBY STICKS

Board of Works Takes Time by the Forelock, Before Arrival of Season's Supply of Wood and Clears Contested Ground of Obstructions.

A long controversy between the officials of the Granby Pulp and Paper Co. and the Board of Public Works of the city reached its climax yesterday shortly after noon, when a squad of twenty men under the direction of Mr. Frank Rumsey, superintendent of Public Works, and Mr. F. Clayton Hill, city engineer, arrived at Schenck st., near the Granby plant, and began to remove the large piles of pulp wood belonging to the company from the city property. Mr. Harry Howe, of the company, attempted to restrain the workmen and demanded that the proceedings cease until the question of title to the land had been settled, but the work went on and before evening most of the company's wood had been moved off the street. The gang of city workmen were busy again this morning removing the wood and Superintendent Rumsey expects to have the street open for traffic some time today.

The dispute over the possession of Schenck st. started several months ago, when the Board of Public Works, at that time comprising John W. Stevenson, Frederick G. Spencer and Lou E. Garrett, ordered the company to remove their wood piles from city property. The question of title was settled by a deed in which the Schenck estate turned over the property to the city. The paper company took no action and the matter hung in abeyance until yesterday.

Mayor Fox has been agitating the opening of the street for some time and men were ordered to keep close watch on the lumber piles. Monday the piles were comparatively low, it is said, while awaiting new shipments and the members of the board decided that the time for action had arrived. At Monday night's meeting of the Board of Public Works there was some discussion of the matter and yesterday Mr. Rumsey's squad was ordered to report at the street.

The men had not been at work more than ten minutes before Mr. Howe and [illegible] on the scene. The men were ordered to stop work and were threatened, it is said, with legal proceedings if they did not quit. The company officials sought legal advice and the service of an injunction was momentarily expected by the city officials. No injunctions were served last evening, however, and none were in evidence this morning when the men resumed work.

The city officials claim that undisturbed tenancy by the company for very few months longer would give the company a squatter's right to the land. The street runs from West First to West Second sts., and is about 50 feet wide, with a D. L. & W. track along the north side of the street, The D. L. & W. freight house is only a short distance away, and the street is considered valuable property.

In view of the claims made by the Board of Public Works that the paper company refused to move its wood when ordered to do so, the city will collect the amount necessary to cover the cost of removing the wood, through the city attorney, Mr. G. M. Fanning. It is very probable that the company will contest this claim vigorously.

Mr. Harry Howe, of the company, steadfastly refused this morning to make any statement whatever for publication, beyond saying that he was not interested in the operations of the city workmen this morning.
JAPAN

GEORGE McCOY ARRESTED; SOLD "BEERINE;" OTHER ARRESTS MAY FOLLOW

Chief Dyer made a flying trip to the Sandy Creek fair yesterterday and arrested George McCoy, of Watertown, on a charge of violation of the Liquor Tax law, committed in this city last week during the Fulton fair. The information alleges that McCoy sold a drink known as "beerine" at the local fair with no license or permit, to sell alcoholic or intoxicating liquors. McCoy was brought to this city last night for examination and held under $1,000 bail which he furnished.

The arrest follows an investigation which began at the Fulton fair last week among several concessions which were selling drinks known as "beerine," malt mead" and "ginger beer." Some of the beverages have been proven within the pale of the law, but the Chief and his assistants decided to warn the venders nevertheless. Some of the men stopped selling the stuff immediately, but others, including several Fultonians, did not heed the warning and continued the sale.

A chemical examination has been made of the drink sold by McCoy and the evidence secured resulted in the issuance of a warrant for McCoy's arrest yesterday. Several other arrests on the same charge will follow, according to Chief Dyer, and some Fulton men may be caught in the drag net.

A Farm Excursion

Manufacturers, merchants and others occasionally take excursions ing roups to investigate how other manufacturers and merchants carry on business, and sometimes these excursions go as far awaya s Argentine at the foot of the South America continent. More frequently these manufacturers and merchants go on scouting expeditions by themselves to learn what is new and to see what improvements may be made.

Just such an expedition was made by a group of farmers in Herkimer county the other day. They went on an automobile ride and while they had ag ood time and were entertained in a social way, the mainb usiness was to see whot other farmers were doin and how they did it. They were accompanied by the county's "farm doctor" who knew the methods practiced by many of the farmers and was able to tell how thingsw ere accomplished. In other instances, the farmers themselves told how they raised their crops and cared for their stock. Failures and successes were spoken of, and thus the experience of one wasm ade to some extent the experience of others.—Utica Observer.

For Absentee Voters

Leroy A. Lincoln, Buffalo delegate to the constitutional convention, has put forward ap rovision which, if adopted, would enable more than 100,000 absentee voters to register and not be open to objections urged against thep roposal recently rejected by the convention.

Mr. Lincoln's plan is to provide special registration days for the class ofv oters, compelled to be absent on the regular days, notm ore than five months prior to the day of election The voters registering on these special days will be required to declare under oath they are engaged in an occupation which will occasion their absence from the county during the regular days of registration. Those who register on these special days will also be required to declare by affidavit on the first regular day of registration that they are still entitled tov ote in that election district.

Mr. Lincoln believes that this plan will permit traveling men to register and at the same time prevent fraudulent registration, meeting objections urged to former efforts to stretch existing status so as to bring about the same results. This being so there appears to be no good reason for longer disfranchising theg reat army of commercial travelers. — Buffalo News.

When Farmers Get It In the Neck

Sometimes the Underwood Tariff is an aid to the manufacturer, though rarely. In such an event it is the farmer who gets it in the neck.

Many Illinois farmers, in the rich corn belt thath as made the State so wealthy andf amous, have had their ideaso f the Tariff severely jolted by Argentine corn.

Argentine is an excellent corn—though small—in itsp lace. But it doesn't add to the welfare of the Illinois farmer.

The Government reports state that from October 3, 1913, when the Democatic Tariff law was handed to a grateful public—oh you know you wanted it, you farmers included—to June 30, 1914, nearly 12,000,000 bushels of corn were imported into this country free of duty. Ninety per cent. of this corn camef rom Argentina.

Since June 30, 1914, 9,000,000 additional bushels of Argentina corn have been imported to the United States.

The Argentinec orn is not pretty to lok at. It doesn't resemble the fat, golden ears from Illinois, Iowa, Indiana and other corn States. It has a small, hard berry, resembling pop corn. But it makes first rate corn starch.

Mosto f the Argentine corn is used by a great manufacturing company that supplies the corn starch of this country. It contains about 2 per cent. less starch than the more expensive American corn.

Youc an't blame the manufacturers for utilizing the cheaper imported corn. They would be perfectly willing to use American corn—if they could get it at the same price.

Under the Republican Tariff there was a duty of 15 cents a bushel on corn. Naturally there was little Argentine corn imported to this country. During the fiscal year of 1913 the total importation of corn amounted to but 900,000 bushels.

If this 15 perc ent. duty had not been removed at least 20,000,000 bushels of American corn would have been bought from American farmers by corn starch manufacturers. When corn was placed on thef ree list the manufacturers were able to pay the freight rate from Argentine on corn producing 2 per cent. less starch and still find it more profitable.

A seat on the Boston Stock Exchange was sold for $15,000, a reduction of $1,000 from the last previous sale.—Manufacturers' News.

PUBLIC SERVICE

It was not so long ago that William Amherst Ott in his famous lecture here said to Fulton people in the course of his expression, "There are too many rascals and too many good people who don't know anything."

This was the thought used by the speaker to illustrate why cities, towns and even nations fail to accomplish definite plans for better things. The accusation used is a just one, and can be applied to any place, which by the way might include Fulton, in a greater or less degree, according to one's viewpoint.

Fulton's needs are not few yet the number of persons who take an active interest in meeting our home problems are decidedly few when it is noted the city has a 12,000 population. Too many good persons prefer to stay at home and toast their toes by the fire instead of attending a public meeting designed for arousing interest and intellect on some local issue. There is too much of the suggestion of "letting George do it," and then making a fist at George's back when he does do it. There is too much suspicion of the other person's motives and too severe an absence of back bone when it comes tos tanding by one's own convictions. Too many persons are allowing some one else to do their thinking for them, and then moan in distress when the pot boils over.

Fulton needs more real men and women in the front seat of her public life. Fulton needs more people who are not afraid of criticism when they know they are in the right. Fulton needs more positive characters.

It is far more admirable for two persons to come into the public light and fight openly through a difference of opinion than it would be if they remained two neutral gray blots upon the landscape.

When people learn as a community or as individual to be something, to do something, the machinery of progress will be set in true motion.

Mr. Taxpayer, do you know whether a change in city government would be a good thing or a bad thing for Fulton?

Wellington had wonderful persistency of purpose, and Wellington won. Grant was a determined, bull-dog fighter, and his soldiers used to say of him that you might as well try to snub the sun.

Persistency is a jewel in the crown of success.

The beginning and the end of all enterprise depend on your power to stick.

When you feel like quitting, just think of men who are compelled to face real trouble. You are not having half the trouble Wellington had when he won.

Everyone that wins, sticks. Everyone that fails to stick, fails to win.

The point is, stick.—Silent Partner.

POLITICAL COMMENT

There is only one way in which the nation will ever get a tariff commission and a "prosperity compelling tariff," which Mr. Perkins desires so ardently. Mr. Perkins is not a fool, and he knows the answer. Not through the rapidly dying Progressive movement will a tariff commission and national prosperity come. It will come in 1916 when thep arty ofp rosperity resumes control of the government. — Schenectady Union-Star.

* * *

We are living in times when strong men are needed, men who think and are not afraid, men who have views in regard to our responsibilities and destiny, and the faith to stand firm for them. It is apparent thats mall men in the National Congress are out of place. We need statesmen of large caliber and it is thec onstructive force of the Republican party which has furnished us with such men when a national crisis has demanded them. —Rochester Times.

* * *

The conditions throughout the state are discouraging to the Democrats. More Republican mayors will be elected in 1915 than ever in the history of the state. — Watertown Standard.

* * *

The voters are not going to divide their opposition to Democracy next year in order to let a minority President slip in, as they did in 1912. And being twom illion votes stronger than the Democratic party is about like being two minutes faster than a hearse in a mile race. — Brooklyn Standard-Union.

Youth's Education Is His Foundation

By A. T. MERRILL, Wheeling, Ill.

The public schools should be brought up to the highest possible efficiency and everything should be done to allow boys and girls to receive a good education without hardship to themselves and their parents. The farmer does not try to economize in the attention and care that he gives the crop while it is growing, for he knows that he will harvest accordingly. The children of this country are the crop of the nation. The harvest will be the future generation, and any economy that is practiced on the growing crop is false economy from which the harvest will suffer.

The majority of children can attend school for only about seven or eight years of their lives. During this time they must get the foundation and a large amount of the material with which they are to go through life. How careful is the contractor who erects a skyscraper that his foundation shall be solid and true! The boy's education is his foundation whereupon to build his character and manhood. Instill in the boy self-respect, teach him to do things whereby he will also gain confidence in himself, teach him to occupy his mind by thinking useful and uplifting thoughts of his own, and when evil influences are brought to play upon him his moral muscles will be developed and strong to resist the attacks.

Upon the school depends also our standing as a nation and the people's patriotism. The bearing that schooling has upon the progress of a country is illustrated by the fact that the United States and Germany have on an average one inhabitant out of every five in their schools, while a country like Russia has only one in every thirty-three in school.

In the schools is also about the only place in which the people in this country can be taught "America first" and that this country is not a mixture of different countries, but that it is truly American. Whether the illiterate should be excluded from this country may be debated, but the children that come here and those who are born here must be educated and taught to be good American citizens, who are proud of their country.

Children must be taught to be Americans first and should be taught the American language before any other. The American flag should be found displayed in all the schools and its significant meaning of justice, righteousness and liberty should be taught impressively.

How to Write Advertising Copy

By HERBERT KAUFMAN

Author of "Do Something! Be Something!"

A SKILLED layer of mosaic works with small fragments of stone—they fit into more places than the larger chunks.

The skilled advertiser works with small words—they fit into more minds than big phrases.

The simpler the language the greater certainty that it will be understood by the least intelligent reader.

The construction engineer plans his roadbed where there is a minimum of grade—he works along the lines of least resistance.

The advertisement which runs into mountainous style is badly surveyed—all minds are not built for high grade thinking.

Advertising must be simple. When it is tricked out with the jewelry and silks of literary expression, it looks as much out of place as a ball dress at the breakfast table!

The buying public is only interested in facts. People read advertisements to find out what you have to sell.

The advertiser who can fire the most facts in the shortest time gets the most returns. Blank cartridges make noise but they do not hit—blank talk, however clever, is only wasted space.

You force your salesmen to keep to solid facts—you don't allow them to sell muslin with quotations from Omar or trousers with excerpts from Marie Corelli. You must not tolerate in your printed selling talk anything that you are not willing to countenance in personal salesmanship.

Cut out clever phrases if they are inserted to the sacrifice of clear explanations—write copy as you talk. Only be more brief. Publicity is costlier than conversation—ranging in price downward from $10 a line; talk is not cheap, but the most expensive commodity in the world.

Sketch in your ad to the stenographer. Then you will be so busy "saying it" that you will not have time to bother about the gewgaws of writing. Afterwards take the typewriten manuscript and cut out every word and every line that can be erased without omitting an important detail. What remains in the end is all that really counted in the beginning.

Cultivate brevity and simplicity. "Savon Français" may look smarter, but more people will understand "French Soap." Sir Isaac Newton's explanation of gravitation covers six pages but the schoolboy's terse and homely "What goes up must come down" clinches the whole thing in six words.

Indefinite talk wastes space. It is not 100% productive. The copy that omits prices sacrifices half its pulling power—it has a tendency to bring lookers instead of buyers. It often creates false impressions. Some people are bound to conceive the idea that the goods are higher priced than in reality—others, by the same token, are just as likely to infer that the prices are lower and go away thinking that you have exaggerated your statements.

The reader must be searched out by the copy. Big space is cheapest because it doesn't waste a single eye. Publicity must be on the offensive. There are far too many advertisers who keep their lights on top of their bushel—the average citizen hasn't time to overturn your bushel.

Small space is expensive. Like a one-flake snowstorm, there is not enough of it to lay.

Space is a comparative matter after all. It is not a case of how much is used but how it is used. The passengers on the limited express may realize that Jones has tacked a twelve-inch shingle on every post and fence for a stretch of five miles, but they are going too fast to make out what the shingles say, yet the two-feet letters of Brown's big bulletin board on top of the hill leap at them before they have a chance to dodge it. And at that it doesn't cost nearly so much as the sum total of Jones' dinky display.

Just so advertisements attractively displayed every day or every week for a year in one newspaper will find the eye of all readers, no matter how rapidly they may be "going" through the advertising pages, and produce more results than a dozen piking pieces of copy scattered through half a dozen papers.

RUEF LEAVES PRISON, DODGING SNAPSHOTS

San Refael, Cal., Aug. 25, — Abraham Ruef, under 14 years' sentence for offering a bribe, left San Quentin penitentiary on parole today, departing by a side gate while photographers and reporters stood about the main gate in the rain.

Ruef will spend ninety days on his ranch near Ukiah, Cal., at his own request, because a city election is pending in San Francisco, in which he does not care to participate. Later he will enter the real estate business. He is said to be worth $450,000.

ENGLISH AND THE LAW URGED UPON ALIENS

Washington, Aug. 25.—The Bureau of Naturalization in a statement issued on thep roper training of aliens in American citizenship, declared the prime requisite is ability to speak English.

"Above all," adds the statement "they should be taught the supreme authority in this country is the law and the first duty of an American citizen, obedience to that law."

WIDOWS WARNED OF PENSION GO-BETWEEN

New York, Aug. 25.—A warning to widows seeking pensions under the widowed mothers'pension law against persons soliciting money to aid them, was issued yesterday by William Matthews, secretary of the Board of Child Welfare.

Such aid cannot be given by go-betweens as the board will deal direct with applicants.

HUDSON RIVER APPLES EXCEL

Commissioner Dillon Shows How Prices Are Raised by Market Garden Auctions in New York.

Farmers of the Hudson River Valley have organized a public auction sale of their supplies to be conducted under the supervision of the New York State Department of Foods and Markets. The first three sales will be held in the orchards of Red Hook, Milton and Gardner. The first sale will be held on September 1st in the orchard of Mr. William E. Treator, Red Hook, N. Y., and the second and third sales on the following day at Milton and Gardner. Mr. Teator has an orchard of some fame. He usually wins more than his share of the first prizes for fruit, and his fruit this year is especially celebrated as he won the Grand Sweep State first prize for all varieties of apples at the apple shippers exhibit in Chicago, in the early part of this month. The amount of sale at the three actions is estimated to be not less than 100,000 barrels of apples. The fruit is exceptionally fine. The orchards will inspect 90 per cent. perfect fruit. Experienced and competent judges class this Hudson River crop as the best line of apples grown this year in America.

The sales are organized by John J. Dillon, Commissioner of the Department of Foods and Market, and will be conducted under the department's supervision. A complete catalog of all the orchards represented in the sales will be presented to buyers so that the orchards may be inspected in advance of the day of sale. These catalogs may be obtained at the Department of Foods and Markets, 71 West 23rd st., New York City.

These assembled auction sales are organized for the benefit of both growers and wholesaleb uyers. Heretofore there was no given time when all the large growers were ready to sell and no definite price for standard grades. The buyers was obliged to spend considerable time in the inspection of the orchards, and always had to wait the timew hen a grower was willing to sell; neither of them had much guide as to the price that should be asked or paid. For example, Mr. Philip DuBois of Gardner asked $6,000 for his crop aw eek ago. On the receipt of information furnished by a representative of the department he raised the price to $7,000, and when the auction was proposed he increased the price to $8,000, and sold at this figure. Mr. Lewis Andrews in the same neighborhood not being advised sold a larger orchard for $3,000, something less than one-half its actual value. The auction sale will give buyers an opportunity to get their apple at a given time and at the market price. The growers should receive prices regulated by the supply and demand. If successful, the plan of public autcion markets will be probably adopted all over the state, not only for apples, but for all such other farm products as wholesale operators care to buy in bulk at the farm.

PAINT.

Every gallon costs a painter's day's work.

Poor paint, more gallons; good paint, less gallons.

Every extra gallon adds to your job its price and the painter's day's work; not far from $5 a gallon.

There are a dozen good paints and hundreds of poor ones. Devoe is one of the dozen. The chances are; there isn't another in this town.

L. P. Smith Co. sells it.

To stop bleeding use Hanford's Balsam. adv

Most Children Have Worms

Mrs. Bert Hollenbeck has been entertaining guests from Central Square.

* * *

Roy Trimble was the guest of his aunt, Mrs. E. S. Brown, a few days last week and attended the Fulton fair.

* * *

Mrs. H. R. Collins and Mrs. H. D. Collins were Sunday guests of Mr. and Mrs. Frank Jennings and family.

* * *

Mr. and Mrs. Albert N. Graves and family attended the funeral of their grandson, Howard M. Graves, at Mexico last Tuesday.

DEAFNESS CANNOT BE CURED

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condititon of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

SAM'L WALDHORN RAISING FUNDS

In Aid of Europe's War Sufferers---Business Men of City Contribute Their Mite---Total Reaches $25.

Following closely on the announcement carried exclusively in Monday's issue of The Times, to the effect that a subscription list for the benefit of the water sufferers would be started in Fulton at once, the Central committee for the relief of Jews suffering through the war appointed Mr. S. Waldhorn yesterday chairman of the local committee, and within an hour Mr. Waldhorn was successful in raising the sum of $25 among the business men. The officers of the national committee are: Louis Marshall, the well known constitutional lawyer, chairman; Felis Wailing, treasurer; Cornish Sulgbeyer, secretary. Each subscriber on the list pays one dollar, and from Mr. Waldhorn's statement, several hundred dollars will be realized in Fulton. Mr. Waldhorn announces subscriptions from people, whom the committee is unable to get in touch with, will be gladly taken care of in his place of business.

Two hundred and fifty dollars was realized last night at the package party held in Oswego for the benefit of the war sufferers, the packages consisting of gifts in the form of household articles, personal ornaments, etc. As much as $70 was bid on a package, all of which were "blind." David Richardson of Fulton acted as auctioneer, while a number of other Fulton people had charge of the floor arrangements. Three hundred people attended the affair, the Fultonians, in order to remain to the last dance having all motored to Oswego. Mr. and Mrs. I. Alderman, Mr. and Mrs. A. Alderman, Mr. S. Waldhorn and family, the Misses Bessie Murskey, Lena Kaplan, Jennie Komovitz, Celia Komovitz, Beatrice Blumberg, Theresa Jacobs, Pearl Lazarus, Belle Castle, Lulu Sherman, Mrs. I. Fox, and the Messrs. Julius Kemp, Henry Murskey and Mr. Draper motored to Oswego and returned at an early hour this morning. As stated previously, the affair is the first of a series of benefits which will be attended and promoted jointly by residents of Fulton and Oswego to aid the war sufferers, and there is no doubt but what considerable support will be rendered the National committee from this neighborhood.

WILD ANIMAL EXHIBIT FESTIVE OF CIRCUS

The News of Gardiner, Mass., says of the LaTena circus:

About the best circus that has amused Gardner patrons in years, La Tena's wild animal circus played to a well filled tent on the Conant street grounds yesterday afternoon and evening and the big crowds were thoroughly satisfied that they had gotten their money's worth.

There were 24 big acts all of which found favor. There were pony drills, performing lions, trained seals, elephants, acrobats, performing bears, bareback riders and wire walkers,and they all deserved the applause that was accorded them.

The elephants, as is usually the case, were objects of interest and the tricks that they performed with alter Allen and two assistants showed remarkable intelligence, Capt. Wesley's seals were a novelty.

Another act which furnished thrills was by Capt. Haggen, who put five lions through numerous stunts, not withoutd anger. One of the beasts had a spring that carried him to the top of the cage.

MISS MARY MATSON TO BUILD HOME

George De Forest has been awarded the contract for constructing a residence in Fultonian park by Miss Mary Matson, the house to be used by Miss Matson as a home.

Mr. De Forest recently completed the construction of a house for E. Le Pine in West 2nd st.

VEGETABLE GROWERS' ASS'N TO MEET AUG. 28; LOCAL MEN FIND READY MARKET

The Fulton Vegetable Growers met last night at Grange Hall with more than fifty produce growers of this section of the county present. The association listened to short addresses by several of the members, and representatives of New York commission merchants, who are handling the sale of the produce shipped from this locality.

Messrs. Meany and Sasilein of New York City and Covert, Drost and Whitehead, of New York and Philadelphia, the commission merchants to whom Fulton goods are exclusively shipped, were represented by produce experts who addressed the meeting on the question of shipping facilities, metohds of shipment, prices and production. The consensus of opinion among the commission men seems to be that Fulton produce is netting the best returns at present in the lettuce market because unsatisfactory weather conditions elsewhere in the state where lettuce raising is produced. Top prices are predicted for local growers during the balance of the season and the speakers made some good suggestions regarding the packing and shipping of the supply.

Statistics in possession of local muck land operators show that nearly 1,000 acres of muck land in this vicinity are already under cultivation with celery, lettuce and onions and 500 acres additional are being prepared for cultivation next season.

Several of the members of the association spoke of the plans for a cold storage plant, under consideration by the Chamber of Commerce and commended the movement. The Chamber of Commerce has secured a speaker who will describe the plans of the plant at a meeting to be held in the near future before the Agricultural division of the Chamber,

The New York State Vegetables Growers' Association will hold a field meeting at the Western New York Farms Company's "OO" ranch at Elba N. Y., Saturday, August 28. The association members will be the guests of the Farms company, and will spend the forenoon in looking over thed evelopments which this corporation has under way. Several hundred acres have been drained by means of ditching machines and dynamite, and crops are growing. The afternoon will be devoted to round-table discussions on many topics of interest to muck land men, among them, rotation of crops on muck, grading and packing celery, present condition of crops, and others.

The morning trains at Batavia and Elba will be met by motor trucks. Motorists should drive to Batavia and turn north on Oak st. through Elba to the farms offices, or to Albion and turn south through Barre Center to the farms offices. All who are interested in vegetable production, particularly on the muck lands, will be very heartily welcomed by both the association and the farms company. The association states that ample accommodations and entertainment will be provided for those who will address a post card signifying their intention to attend to T. E. Knowlton, Elba, N. Y.

WEATHER FORECAST.

Fair and cooler tonight. Thursday fair.

LONDON BANKER WRITES OPINION ON WAR

A recent letter from W. N. Hibbert of London, England, to his friend H. N. Gilbert of this place expresses the tense feeling in that country over the war.

Mr. Hibbert expresses himself of the opinion that our president should aid Britian in "bringing to a close this war which is the curse of the country."

The appeal is not without its grim sense of humor that England, "proud Queen of the Seas" should turn to the country of the Stars and Stripes and ask its protection and assistance. It is próbable neither the King of England or Patrick Henty could in 1775 have foretold this day.

Successful State Business

The state's venture into the insurance business under the workmen's compensation act has been wholly successful in its first year. The State Insurance Fund report shows that employers who took out their insurance through this agency obtained it 20 per cent cheaper than those who bought it from private casualty companies. Its expense was only 17 per cent of the earned premiums. The report declares that it is now operating at an expense ratio of 12 per cent and expects to make even a further reduction in the next year. The Insurance Department allows casualty companies to devote 33.3 per cent of premiums to expenses, although the experience of the state fund has shown that 14 per cent would be a pretty accurate allowance. With all this the state fund has set up a loss reserve of over $620,000, a catastraphe surplus of $109,000, and established a surplus of $370,000.

This success may have been due to two things—the absence of politics and a distrust by many employers of the casualty companies, instilled by their policy of fighting claims before the compensation law was adopted. When the state fund was established technical experts were put in charge of it, and in spite of the direful injection of politics into other phases of the compensation work, administration of the insurance fund was kept on a clean, scientific basis. It is encouraging to realize that this could be done. Itg oes to prove that what some choose to call "socialistic" activities of the state needn't be half as bad as they're labelled.—N. Y. Tribune.

Rubbish In City Parks.

A vigorous campaign has been instituted in New York city against the throwing of rubbish in city parks Mayor Mitchel, Police Commissione Woods and the park commissioners instituted the crusade, and the city magistrates have co-operated, with good results. Numbers of malefactors in this respect have been admonished while others have been arrested and fined. A great improvement has resulted, and the arrests now are few and far between.

Dr. William T. Hornaday, director of Bronx Zoological park, gives the following testimony:

"For fifteen years we have been trying to educate the persons who come to the zoological park on Sundays into the knowledge that the park was not built for a big rubbish can. Now on Monday the park employees can put all the peanut shells into a silk hat and the waste paper into a receptacle just as small. The result is very satisfactory."

GRANGERS ARE GOING TO PACIFIC COAST

State Grange Master W. H. Vary of Watertown announces that the next session of the National Grange will be held at Oakland, Cal., beginning Nov. 10. Mr. Vary continues as follows:

"The next session of the National Grange will be held at Oakland, Cal., opening session November 10.

"It is very desirable to have a large number of New York patrons attend this session, and visit the great exposition in San Francisco. To that end arrangements are being perfected to have a special coach run through to the coast with convenient stops to visit places of interest along the route. A very low rate has been secured. The railroad fair from Watertown and return is $91.70 with equally as good rates from other points along the line. Sleeping car accommodations in first-class Pullman lower birth are about $17; upper berth 20 per cent less. Meals according to what you eat.

"This is an opportunity of a lifetime tov isit the National Grange, and a great exposition at the expense of one. We already have several names booked for the trip. We anticipate starting about October 20. All will take the same route going, but may choose different routes returning. Any one interested will correspond with Ira Sharp, Lowville, or W. H. Vary, Watertown, N. Y."

FIRST VOTERS MUST FILE DECLARATION

Young men who have come of age since last election day and who wish to vote at the coming primiaries may do so if they file a declaration with the Commissioners of Election before Tuesday next, Aug. 31. The following affidavit must be sworn to before a notory:

I, ..., do solemnly declare that I reside at .... and that I am a resident and duly qualified voter of the .... ward, Fulton, N. Y., town of .... in the county of Oswego; that I came of age since the last preceding general election; that I am in general sympathy with the principles of the .... party, and that it is my intention to support generaly at the next election, State or national, the nominees of such parties for State or national offices; that I have not heretofore enrolled with or participated in the primary election of any party. I hereby request that I be specially enrolled with the .... party.

In regard to first voters who come of age after thep rimaries, legislation provides that there shall be a special registration for them, extending even up to election day itself, so that any young man who comes of age, up to or even a few days later than November 2d, will not be deprived of the privilege of voting.

The first day of filing petitions for party nominations with the Election Commissioners is this week Thursday and the last day September 7th. It is probable that most of the candidates will file their petitions early.

HANNIBAL HAS $6,000 CREAMERY

Hannibal, Aug. 25.—The Brighton Dairy company of Rochester is locating a six thousand dolar creamery at Metcalf station. This company has 40 wagons retailing milk and cream in Rochester, with the business still growing. A fine spring with a daily increasing capacity of 400 barrels of water, that was tested absolutely pure by the Rochester Board of Health, has been located within a few rods of the station. The farmers are very much pleased over the location of the plant in this vicinity because of the good prices paid by this company for milk.

CHARLES MILNES BURIED

The body of Mr. Charles Milnes, who died Sunday night at the family home, 259 West 2d st., was buried this afternoon at 2:30 o'clock, the Rev. Charles Olmstead officiating. Interment was made in Mt. Adnah cemetery.

William Deveson of White Plains, N. Y., says: "Hanford's Balsam gives satisfaction to every one of my customers. adv

URGES CONTROL OF UTILITIES

Walsh Commission Finds the Wages Too Low to Provide a Decent Standard of Living.

Chicago, Auf. 25.—Government acquisition and operation of telephone and telegraph companies and political equality for women are strongly urged as remedies for existing industrial unrest in the report of Research Director Basil P. Manly to the United States Commission on Industrial Relations. The second section of this report is made public today. The first section was made public on Sunday night.

The report that deals exhaustively with conditions in mine, field and factory, as well as among telegraph, telephone, railroad and Pullman workers A special chapter is devoted to women and children in industry.

A strong feature is the state ol feudalism alleged to exist in many industrial communities controlled by corporations.

The report, which is signed by Frank P. Walsh, John B. Lennon, James O'Connell and Austin B. Garretson says:

"The property o fthe telegraph companies, or such part of their equipment as may be necessary for the efficient operation of a national telegraph system, should be purchased after proper valuation and placed under jurisdiction of the Post Office Department for operation. In transferring the service to the Federal Government all employes, including officials and other persons, necessary for successful operation, should be retained. Those whom the elimination of the duplicate service renders unnecessary should be absorbed into other branches of the Federal service as far as practicable.

"At the time of the transfer a special commission should be appointed to revise the salary rating and other working conditions and place them upon a proper basis."

With regard to political equality for women, the report makes these recommendations:

"The recognition both by public opinion and in such legislation as may be enacted, of the principle that women should receive the same compensation as men for the same service.

OSWEGO REPUBLICANS HOLD CONVENTION

At a conference of Republican workers held in Oswego Monday evening a number of pobable mayoralty candidates were suggested. The names of the probabilities: Norman S. Bentley, David Page Morehouse, Jr., Gilbert S. Graves, Frederick B. Shepherd, F. A. Emerick, eorge E. Farrell, H. D. Pierce, Frank Sayer, John S. Parsons, eorge H. Hunt, Carl Bechstedt and Clair K. Light.

Has Delivered One Lecture Over 5,000 Times

In the "Interesting People" department of the September American Magazine appears an article about Russell H. Conwell, the famous Philadelphia preacher and educator who has delivered one lecture, "Acres of Diamonds," over five thousand times. He has appeared all over the world. The proceeds from his lectures he devotes to sending poor boys through college. Following is an extract from the article about him:

"Doctor Conwell has delivered this lecture over five thousand times. All the way from the Dardanelles to the Yangtze, from Cairo to Saginaw, he has been flinging out its optimistic philosophy as prodigally as the harvest moon pours down her silver flood. One year he delivered it two hundred times; another, he filled half a hundred dates so near to Philadelphia that he returned home each night.

"The remuneration for his famous lecture has varied greatly. A Virginia committee once recompensed him with a smoked ham. (This occurred before the pork trust had put hams on a diamond basis.) At another time a preacher gave him a promissory note for $4.50—Conwell still has it.

"He devotes all of his lecture proceeds to assisting poor students through college. Usually one delivery of the lecture will pay a student's expenses for a year.

He has known many literary and historic men. John Brown, when about 50 years of age, used to visit his boyhood home, milk the cows, and play in the hay with the future lecturer."

Boston Man Prescribes Abolition for all Evils

(Continued from Page One)

Massachusetts, twice prohibition candidate for Governor of Massachusetts, and last December a mayoralty candidate in Beverly, Massachusetts, where, with 4,000 votes cast, he lost by 29.

Mr. Wylie said in part:

"There is that in every man which responds to the heroic. Whether it be the heart beneath the broadcloth of the wealthy or the denim of the laborer, it will respond to this appeal. The pages of history are full of the sacrifices made by men and these deeds have compelled our respect and admiration.

"As a mere lad I came to know Charles Sumner. I journeyed to Mt. Auburn to pay him at his grave my tribute of respect. It was in appreciation of those tears and anguish and pain that marked his labors for the abolition of slavery.

"The abolition movement had many such heroes. Lovejoy at Alton, Ill., with his printing press twice thrown into the river nearby and subsequently murdered; Garrison, mobbed in the streets of Boston; Wendell Phillips, who was fired by this scene to hate the slavery of the black man with a bitter hatred—this was the kind of men the abolition movement made.

"History repeats itself in the temperance movement. Only one hundred years ago since we had the first organized movement. In 1908 we celebrated the event at Saratoga when a stone was dedicated in honor of Dr. Billy Clark.

"In 1908 Billy Clark lived in Morean, N. Y. Drink ruled the town and it was fast becoming a community of drunkards, so he organized the first temperance society with a pledge against the use of distilled liquors, except in cases of illness, doctor's prescription, banquet or church communion. Beer and wine were not included in the pledge.

"A weak pledge but a beginning and from it dates the great growth of the temperance movement. Then came the Washintonian movement, the Sons of Temperance and 1852 the Good Templars. I wish I could pay a tribute to our order that would properly present its merits but language fails me.

"It has had the greatest influence in shaping public sentiment of any organized temperance body that has existed in the past or exists today.

"It gave the country the first platform for total abstinence and prohibition a platform that has not been changed to this day.

"It gave birth to the Prohibition party at the Oswego convention of the world's body of Good Templars.

"It gave birth to the W. C. T. U. by training its early leaders in our lodge rooms and to Mrs. Mattie McC. Brown through Grand Chief Templar of Ohio was given the honor of planning the W. C. T. U. form of organization.

"Our years have been full of progress. The election of Charles H. Randall to Congress as representative from the Pasadena, California, district, was a great achievement. He takes his seat as a party prohibitionist."

Mr. Wylie then spoke of the Good Templar day at the Exposition and the presentation of a memorial placque by Arthur Arlett one of the exposition directors. In the course of his talk Mr. Arlett declared that "unless democracy kills the drink traffic, the drink traffic will kill democracy," expressing the conviction that we were fighting a battle soon to be a victory.

Mr. Wylie closed his talk by inviting the audience to become Good Templars and help clean up the business and knock out certain props. He mentioned:

Alcohol used as medicine.
"Infernal" revenue system.
Beers and wines as foods.
Liquor advertising.
Federal permits.
Lukewarmness.

Turing suddenly to his hearers he asked sharply:

"What are you doing? It's not sympathy we want. It's action. Join the Good Templars and let your whole being get on fire with zeal for the overthrowing of the drink traffic."

The address was well received. At 10 o'clock the meeting closed with benediction by Rev. Mr. Durkee. Mr. Wylie leaves Fulton tonight on his way to Boston.

At the close of the meeting A. P. Bradt arose and, asking the privilege of the floor, stated that the "American Issue" had put the Observer in the ranks of newspapers controlled by the liquor interests. The speaker went on to say that in reply to a liquor communication he had requested the literature offered but he had never used it. He merely wanted to see the stuff offered.

Tomorrows program follows:

8:30 a. m.—Prayer and praise service, conducted by Rev. G. W. Sisum, Grand Chaplain.

900 a. m.—Opening ceremonies. Roll call of representatives. Reception and introduction of visitors. Reports of the credentials committee. Selection of place of next meeting. Nomination and election of officers. Unfinished business. One minute reports of committees; subordinate lodges, district lodges, state of order. Presentation of communications, resolutions, etc., announcements. Reading of the Journal.

12:00—Recess.

2:30 p. m.—Call to order. Reception and introduction of visitors. Unfinished business. Reports of committees. Prize awards, revision resolutions. Installation of officers. Appointment of standing committees. Miscellaneous business. Good of the order. Final reading and approval of the Journal. Closing ceremonies.

CONGREGATIONAL CHURCH CLOSED NEXT SUNDAY

Because of the absence from the city of the Rev. and Mrs. Charles Olmstead the First Congregational church will remain closed all day next Sunday.

It was the intention of Mr. and Mrs. Olmstead to leave the city Monday last accompanied by Mr. and Mrs. George B. Fairman, in the latter's automobile for a trip to Walton, Delaware County, N. Y., but the death of Mr. Charles Milnes detained them until tomorrow. The return trip will be made about the middle of next week.

CONSECRATION SERVICES TO BE HELD IN BALTIMORE

The election of Dr. Charles R. Fiske, the rector of St. Michael and All Angels Protestant Episcopal bishop of the Central New York Diocese, which includes Auburn, has been endorsed by the whole Church, He received the consent of the standing committees and the votes of a majority of the bishops.

Bishop Fiske will be consecrated on September 29 in his church in Baltimore. The consecration of Bishop Fiske will occur just six years after the consecration of Bishop Murray, the present head in Maryland, which occurred in the same church. Bishop Fiske was elected on May 2, just six years after the election of Bishop Murray. The coadjutor has the right of succession in this diocese and will become bishop on the death or retirement of Bishop Charles Tyler Olmstead.

All details for the consecration will be arranged by Bishop Tuttle. The ceremonies will attract a large number of bishops.

PULP LOAD TIPPED OVER ON GEO. NUSBAUM

Geo. Nusbaum, of West 1st st., who draws pulp for the Granby Paper company, narrowly escaped serious injury yesterday afternoon when the heavy truck wagon upon which he was seated capsized and threw Mr. Nusbaum heavily to the ground.

At the time of the accident Mr. Nusbaum was hauling a heavy load of pulp piled high on the wagon and, being therefore "top heavy," the outfit turned over in an instant when the wheels on one side slipped into the ditch at the corner of Second and Hart sts. Although most of the load was scattered on the ground, Mr. Nusbaum fortunately escaped being buried in the mass. Mr. Nusbaum was able to rise and gain control of the team of horses before they could run away. An inventory of the damage showed a broken wheel on one of the wagon, a number of cuts on one of the horses, and a few minor bruises to the driver.

The consistent advertiser wins in the end. It may cost a dollar to get a dollar, but the deal wins prestige.

There Is a Military Truth:

"Modern Fortifications Crumble Beneath Modern Guns"

The fortification built up by the Mail Order Houses will not stand the fire of the 45 centimetre directed at them by the series of Home Trade Boosts appearing daily in this newspaper. Here as one specimen:

WHOM DO WE SUPPORT?

WHAT if we should go to one of our local storekeepers and say: "Here is a ten-dollar bill; I want you to buy for me such-and-such an article, made so-and-so, this color, that size, and deliver it to me at your convenience—say 30 days."

Along comes another townsman, and another, still another, until 50 of us, all living here in our community, shall have placed in the hands of the storekeeper a sum amounting to a thousand dollars, with similar instructions.

We would then have treated our local storekeeper with the same liberality as we, who have been buying of the mail order houses, have treated these monopolistic concerns. We would have then supplied him with cash capital sufficient to buy what we ordered and give him a fair profit on his deal.

Yes, we would thus enable him to take a trip to the city, buy from the manufacturers the articles desired, ship them to us, spend a day or two enjoying himself if he so pleased, and leave him a fair percentage of profit over and above the cost of the articles and his expenses.

DO WE DO THIS? YES, WE DO—NOT.

But this is exactly what we do with the mail order man in the big city. We send him the money in advance. He has the use of our cash for the purchase of his merchandise. He sends us whatever he chooses and if we do not like it we can whistle for our money.

He takes our money and buys that which we have ordered. Then he may take a trip to Europe if he so wishes, all at our expense.

Few of us realize that we, the people outside the big cities, furnish the capital for the conduct of the big mail order houses. We do not stop to think that it is our money which is building those great structures which are the pride of Chicago and some other cities. We do not stop to consider that we are the capitalists who are supplying the sinews of war against our own local business men.

JUST THINK OF IT—DIVIDENDS OF FIFTEEN MILLIONS OF DOLLARS PAID TO THE BIG MEN IN THE MAIL ORDER BUSINESS AS A PROFIT EACH YEAR ON OUR MONEY.

We send the cash in advance to them. They require practically no investment except for the printing of their catalogs and other stationery. They are doing their business on the money which we, poor, deluded country dwellers, send to them, when we are only cutting our own throats and helping to diminish the prestige and strength of our local tradesmen.

What would be the result if we should hand our dollars, in advance, to our local storekeepers and give them the same chance to make profits, without investment? What would be the effect on our community?

It would mean prosperity for us all. It would mean more taxes to be paid by our business men, improvements of a municipal character, better school facilities, better street lighting, better paving, etc.

Of course, our local storekeepers do not expect us to do business in this way. Yet why should we not? We do it with the mail order houses and when we are fooled we take our medicine because we are ashamed to let our friends know how we have been buncoed.

But we should do this—we should give all of our business to those men who have made their investments in our town, who are trying to build up the community, who are paying the taxes and who are helping us to increase the value of our real estate holdings. *We all know that the value of our houses and lots, here in town, will be increased as the community advances in prosperity, and the only way for the community to advance is for our business men to do an increased business.*

WE SHOULD PATRONIZE THE MEN WHO ARE TRYING TO HELP OURSELVES. We all hope to advance. We all hope to become prosperous.

When we buy from the mail order house we are helping monopoly to put our storekeepers out of business. When we send a dollar to the big city, instead of spending it at home, we are depriving our children of some of the opportunities for education which they are entitled to.

Let us spend our dollars here at home, with the merchants who are trying to keep up the schools and other local advantages which we cannot have for our children unless we have a prosperous community.

Let us not forget that the mail order man does not pay any of our taxes in this town. The taxes are paid by the local business men, at least the greater proportion, and the more business we do with them, the more taxes they must pay.

LET US WAKE UP TO A CONSIDERATION OF OUR BEST INTERESTS.

LET US SUPPORT THOSE WHO HELP US, AND OUR CHILDREN.

The above is only one of the features printed in

The Home Paper of Fulton

Measured by inches The Evening Times carries more original local news than any other daily circulated in Fulton's trade territory.

Advertisers are not slow to appreciate the advantage to be gained by using a medium like The Evening Times to reach trade.

Fulton's "Herald of Progress" is The Evening Times

400,000,000 Cigarettes Must Be Delivered by Sept. 1.

The allies have signed a contract with a large American manufacturing firm for 400,000,000 "coffin nails." They are not metal nails to tack up coffins with, however, but are the good old "coffin nails" of the text books on physiology, the same old "coffin nails" dear Aunt Maria warns small Billy about.

The 400,000,000 cigarettes are to be delivered to the allies on or before Sept. 1. The order will keep the factory handling it busy night and day, it is stated. In order to get the "smokes" completed on time the factory will have to turn out cigarettes at the rate of 10,000,000 a day, or about 7,000 for every minute of the day, which is "goin' some," every man who "rolls his own" will admit.

If the allies smoke the cigarettes at the rate of manufacture, a cloud of smoke forty feet high should engulf the German empire, statisticians figure out.

Four hundred million cigarettes would form a tobacco bridge covering the Bug river from bank to bank from source to mouth. The "papers" used would carpet Europe as with a white pall. If laid end to end those 400,000,000 cigarettes would stretch from Paris to Berlin and from Berlin to Paris nineteen times.

TO END COUNTERFEITING.

Prisoner Offers to Make Money Safe In Return For Liberty.

If the claims of Peter Feldkamp, now a prisoner in the Wayne county (Mich.) jail under a seventeen year sentence to Fort Leavenworth for counterfeiting, are correct, he may be the means of revolutionizing the entire issue of United States paper money.

Feldkamp wrote to Secretary of the Treasury McAdoo offering in exchange for his liberty and a job with the treasury department a chemical secret he had discovered which, according to him, will make counterfeiting impossible.

Feldkamp is a photographer and an amateur chemist of no slight attainments. While experimenting in raising one dollar bills to ten dollar ones he stumbled on his process, which since his arrest, he asserts, he has perfected.

Feldkamp's process so colors the bill that it cannot be bleached and thus halts evildoers from making even the paper. Even with the paper they would still be up against a stone wall, unable to duplicate his tint.

That the Washington authorities are taking Feldkamp's assertions seriously is shown by the fact that James Sloan, head of the treasury department at Detroit, has been instructed to interview Feldkamp.

Percentage of Boats Sunk.

Out of almost 20,000 vessels which had entered or left the port of Liverpool since the German submarine blockade began only twenty-nine were sunk by German submarines. These figures were given in a speech at Liverpool by Sir A. Norman Hill, secretary of the Liverpool Steamship Owners' association.

While other nations shoulder the cost and sacrifices of the big war Japan craftily gobbles up all that war tosses her way.

How to Use the Succulent Onion as Medicine.

Onions supply a complete cure in themselves for cold, as well as being a wonderful remedy in cases of insomnia. An onion cure breakfast includes a poached egg on toast, three tablespoonfuls of fried onions and a cup of coffee. Luncheons of sandwiches made of brown bread, buttered and filled with fine chopped raw onion, seasoned with salt and pepper, make the second meal on the schedule. For the supper the onions may be fried as for breakfast and eaten with a chop and a baked potato. The efficacy of onions is well known to the singers of Italy and Spain, who eat them every day, to improve the quality of their voices and keep them smooth. Onion plasters are prescribed to break up hard coughs. They are made of fried onion placed between two slices of old muslin. The plaster is kept quite hot until the patient is snugly in bed, when it is placed on the chest, to stay overnight. Onion sirup is claimed by some to be unequaled as a cure for a bad cold in the chest.

$10,000,000 A MONTH IS SENT TO BELGIUM.

Whereas Edward J. Williams, the treasurer who disbursed the funds to meet the cost of the construction of the Panama canal, paid out $2,000,000 per month on the average during the years 1905-13, he, as assistant treasurer of the commission for relief in Belgium, has been distributing $10,000,000 per month since the German occupation became effective, says the Chicago Christian Advocate. The economy with which this fund has been administered by the commission and its splendid system of distributing food, regularly, promptly and economically, suggests to William B. Parker, the official historian of the commission, that we have here a practical illustration of how successful collective marketing for an entire nation may be.

For crossing a bay 20 miles wide connected at each end with a fine driving beach along the seashore, a motorist of Aberdeen, Wash., uses a barge built for less than $100 and so equipped that it can be driven by the automobile that it transports across the water. A propeller wheel, that is housed for safety, is located at each side of the barge near the stern. The axle of each wheel is at the right height to come in line with the rear car axle when the end of the car is raised a few inches above the deck of the barge, and is capped with a hardwood wheel, 18 inches in diameter and 2 inches thick. On each wheel are leather clamps for securing it to the spokes of the car wheel. With the rear of the car raised so that the wheels are clear of the deck and these wheels connected with the propellers by the straps, the barge is ready for operation by the engine of the automobile. The work of placing the car aboard the barge and making it ready for use requires about eight minutes. The barge can easily make eight miles an hour when propelled by a light car and considerably more than that rate of speed, when it is driven with a high-power car.

CONTROLS SPEED RATE

DEVICE TO PREVENT DRIVING FASTER THAN SET FOR.

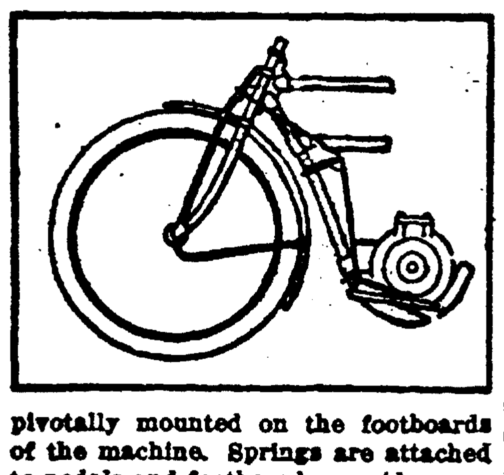
Can Be Adjusted From 0 to 60 Miles an Hour, and Acts Automatically by Electric Contact.

Inventive ingenuity along the line of combining mechanical accessories has reached the point of making a speedometer which not only indicates the speed of a vehicle, but also regulates that speed. The device, which prevents a driver from going faster than it has been set for, consists of a Yale lock which can be set at any desired speed from zero to 60 miles an hour. When the indicated speed is reached by the speedometer hand an electric contact is established, which energizes a magnet contained in a small box through which the rod from the carburetor throttle passes. This rod is split within the case and one end passes freely in a sleeve fitting tightly over the other end of the rod. Normally, connection between the two is made by a pin that passes through an opening in the sleeve and free end of the rod. The closing of the electric contact when the speed limit is reached lifts this pin out of engagement and breaks the connection between the rod and the sleeve. This causes the throttle to close slowly of its own weight, and no amount of manipulation of hand or foot control will be communicated to the carburetor. When the car has fallen below the speed limit, however, the speedometer contact is released, the magnet permits the pin to fall back into its place and the throttle rod is again continuous.

TO STEER MACHINE WITH FEET

This Device Will Enable Hard-Pressed Motor Cycle Rider to Have Hands Free for Other Uses.

Motor cyclists know how difficult it is sometimes to carry bundles, dodge street cars, open up the oil flow, and put on a coat or light a cigar all at the same time, says Farming Business. Here is a device, recently patented by a South Dakota man, to enable the hard-pressed rider to steer the machine with his feet. Pedals are



pivotally mounted on the footboards of the machine. Springs are attached to pedals and footboards, a guide member being attached to the forward bar of the frame of the machine and having outwardly inclined arms. There are pulleys on the ends of these arms, guards for the pulleys, and a bar is secured to the fork of the machine above the mud guard, ropes being secured to the ends of this bar and to the forward ends of the pedals.

Twisted and Broken Axles.

The hub nuts that hold the rear wheels snugly to the tapered rear axles are always tight when the car is sent out from the factory, but after a variable amount of wear the wheel will get a little loose, and if not soon tightened up the pounding on the key and key-seat will tend to twist the axle or even break it. Keep the hub nuts tight.

Cylinder Gases.

If all the gases produced by the combustion of gasoline in the cylinders of a motor could be condensed, among them would be almost a gallon of water for every gallon of gasoline. To be exact, the burning of a gallon of gasoline produces .89 gallon of water in the form of steam.

PRICE OF OLD CAR

To Get Fair Values New Car Purchaser Must Consider Several Factors.

LESS THAN ONE-HALF VALUE

Average Purchaser Doesn't Know All Conditions Entering Into Disposal of Used Machine by Dealer and Should Make Liberal Allowances for Them.

The new car purchaser, who would obtain a fair price for his old car as partial payment, must consider several factors that enter into the transaction.

His old car, no matter how short a time it may have been cared for, is nevertheless a second-hand machine, and therefore possesses an actual market value probably scarcely more than half that credited to it by its owner. When taken in exchange, it probably will need overhauling to a greater or less extent, and possibly painting and varnishing. It will occupy space in the dealer's showroom or repair shop during the time that it remains unsold, and this can be represented in actual dollars and cents costs for rent; "carrying" second-hand cars constitutes no small portion of the cost of doing business on the part of the dealer who takes many such vehicles in exchange. In addition to these costs, the dealer has a cold cash investment equal to the amount allowed for the second-hand car. He must pay interest on this; and the transaction is the same as though he had loaned this sum to the purchaser of the new car and had taken the second-hand machine as security. Furthermore, it is only fair that the dealer should expect a small profit on the resale of the used car that will not only cover the actual expense of overhauling, but that will represent the legitimate profit of doing business.

The average purchaser cannot, of course, know of all the conditions affecting the disposal of his used car by a certain dealer. He should not, however, allow the difference of $50, $100 or even $500, that might be offered on the exchange of the new car, to stand in the way of the selection of the machine which he has decided will be best suited to his requirements. It may generally be assumed that a reliable dealer handling a reliable car will offer a fair price for a used car in exchange for a new one.—H. W. Slauson in Leslie's.

The Spark and the Starter.

It is just as important to retard the spark when using a starter as when hand cranking an engine.

STUNG BY HIS CONSCIENCE

Paroled Convict Asks to Be Sent Back to Prison at Michigan City, Ind.

Vincennes, Ind.—Charles Bays, fifty-one, walked into the police station here and asked whether he was wanted at Michigan City for violating his parole. Chief of Police Adams could find nothing in the records from Michigan City, but a telegram from Warden Fogarty stated that Bays was wanted and to hold him.

Bays was sentenced from one to eight years from Dubois county in 1910 for the theft of a half gallon of whisky. He has served three years, but his term was lengthened when he failed to report while on parole. He said he became intoxicated several months ago, failed to report, and his conscience has been hurting him ever since. He was returned to Michigan City, but local people have become interested and may appeal to the governor for a pardon.

Care of the Baby In Summer

Baby's Worries.

[Prepared by the children's bureau, United States department of labor.]

People are often exasperated at the fretfulness of some baby, and even mothers lose patience when a baby persistently worries, forgetting that it is only in this way that the baby can express his discomfort. Babies do not cry without cause, and when a baby cries a great deal it is a pretty good sign that something is the matter. The cause of the crying may be a very slight one in itself. A baby compelled to wear knitted wool bootees on a hot day may be utterly miserable, and another may be tormented beyond endurance by a woolen shirt or starched cap strings. Very thin, lightweight cotton garments and the fewest possible number are all the baby needs on hot days. Other sources of worry are:

Prickly Heat.—This appears as a fine red rash usually on the neck and shoulders and gradually spreads to the head, face and arms. It is caused by overheating, due either to the hot weather or to the fact that the baby is too warmly dressed. The rash comes and goes with the heat and causes intense itching. The remedy for it is to take off all the clothing and give the baby a sponge bath in tepid water in which common baking soda has been dissolved. Use a tablespoonful of soda to two quarts of water. Use no soap and do not rub the skin, but pat it dry with a soft towel. After the skin is thoroughly dry dust the inflamed surfaces with a plain talcum powder.

This ailment, like all others, is more readily prevented than cured. Frequent cool baths, very little clothing, simple food and living in cool rooms or in the open air will probably save the summer baby from much of the annoyance of prickly heat and other more serious ills.

Chafing.—Fat babies are very apt to suffer from chafing, especially in hot

THIS BABY IS COOL.

weather. It appears as a redness of the skin in the buttocks or in the armpits or wherever two skin surfaces persistently rub together.

Much the same treatment is required as in prickly heat. Never use soap on an inflamed skin. Instead use a soda, bran or starch bath, as advised in a former article. Directions for these baths are given in a publication called Infant Care, which may be had free of charge by addressing a request to the chief of the children's bureau, United States department of labor, Washington.

Great care should be taken not to let the baby scratch the skin when it is irritated. Sift together two parts powdered cornstarch and one part boric acid and use it freely on the chafed places. Remove wet or soiled diapers at once. Wash and dry the flesh thoroughly, then dust and powder freely between the legs.

Milk Crust.—This is a skin disease affecting the scalp, in which yellowish scaly patches appear on the baby's head. These patches should be softened by anointing them with olive oil or vaseline at night and the head washed with warm water and castile soap in the morning.

If the crust does not readily come away repeat the process until the scalp is clean. Never use a fine comb or the finger nails to remove the crusts, as the slightest irritation of the skin will cause the disease to spread further. The scales will usually disappear after a few days' careful treatment.

Constipation.—If the baby does not have at least one full bowel movement in twenty-four hours or in thirty-six at the outside he is in need of such care as will bring about this result. Breast fed babies often respond to an increased supply of laxative food in the mother's diet. If this is not sufficient a six-months-old baby may have a tablespoonful of strained orange juice between two of his morning feedings.

Perhaps the best preventive of constipation is to teach the baby to move the bowels at the same hour every day. This training should be begun when the baby is three months old and should be faithfully continued until the habit is firmly established.

Directions for carrying out this training are given in the pamphlet on infant care, already mentioned. Do not use enemas for the relief of constipation save in emergencies and do not resort to purgative medicines except with the doctor's advice.

TONNAGE OF A VESSEL.

Just What It Is and the Methods by Which It Is Measured.

To find the tonnage or displacement of a ship is rather puzzling. The tonnage of a ship is the measure of its cubical or carrying capacity expressed in tons. At the present time there are four methods in use of expressing the tonnage of a ship, known respectively as the gross tonnage, the net register tonnage, the deadweight tonnage and the displacement tonnage.

In calculating the gross tonnage the whole interior capacity of the ship below the tonnage deck is found, including that of all covered in spaces on deck used for stowage, and the result in cubic feet is divided by 100.

The net register tonnage is the gross tonnage minus all the spaces used for the accommodation of the crew and instruments and the working parts of the ship. It is on the net register tonnage that almost invariably dues are paid.

The deadweight tonnage is the measure of the exact amount of cargo that a ship can carry without sinking too deep in the water.

The displacement tonnage is the space occupied by the ship in the water. The amount of water displaced by a ship is, of course, equal in weight to the ship and all it contains. As one ton is equal to thirty-five cubic feet of water, the displacement tonnage is found by dividing the number of cubic feet of water displaced by thirty-five when the ship is immersed up to its draft or load line.—London Standard.

GEOLOGIC PERIODS.

Stories of Time Told by Fossilized Plants and Animals.

Scientists hesitate to estimate geological time in terms of years. Such estimates have, however, been made, and one published by Professor Charles Schuchert in 1910 states that about 12,000,000 years have elapsed since the close of the carboniferous age, an age, as the name suggests, in which great deposits of carbon, in coal, were being formed in many parts of the world. This age has been divided by geologists into the Mississippian, Pennsylvanian and Permian epochs, of which the Mississippian is the oldest and the Permian the youngest. The Pennsylvanian epoch alone is estimated by Schuchert to have covered 2,160,000 years, and animal life is supposed to have existed on the earth for over 14,000,000 years before that time.

Geologic periods are recognized primarily by the animals and plants that lived in them, so that the study of fossils plays a very real and important part in the progress of geologic knowledge.

Rocks of carboniferous age, as shown by their fossils, have a wide distribution in the United States, and they are apt to be found in these remains of plant and animal life. The fossil shells which are found in them, however, may vary greatly from point to point, because the animals they represent lived in different periods of geologic time or in different regions in the carboniferous ocean.—Argonaut.

Languages.

The principal languages of the world are listed in order as follows: English, spoken by more than 150,000,000 people; German, more than 120,000,000; Russian, more than 90,000,000; French, more than 60,000,000; Spanish, more than 55,000,000; Italian, more than 30,000,000, and Portuguese, more than 30,000,000. These seven are the principal languages of Europe and America. There are said to be 3,424 spoken languages or dialects in the world—1,624 in America, 937 in Asia, 587 in Europe and 276 in Africa. Among other important languages are the Chinese, Japanese, Scandinavian branches, Slavonic speeches and dialects and the various languages of India, Persia, Arabia and modern Greece.

A Poor Present.

A wounded soldier explained his grievance to his nurse.

"You see, old Smith was next me in the trenches. Now, the bullet that took me in the shoulder and laid me out went into 'im and made a bit of a flesh wound in his arm. Of course I'm glad he wasn't 'urt bad. But he's stuck to my bullet and given it his girl. Now, I don't think that's fair. I'd a right to it. I'd never give a girl o' mine a second 'and bullet."—Exchange.

New York City's Pensions.

New York city has eight pension funds. They are the public school-teachers' retirement fund, the police pension fund, the fire department relief fund, the department of health fund, the College of the City of New York fund, the supreme court appellate division fund, the street cleaning department fund and the city of New York employees' retirement fund.—New York Mail.

Diplomacy.

"Johnny," said the indignant parent, "why didn't you come home when I called you?"

"I didn't hear you," replied truthful John.

"Then why did you run away?"

"Because I was afraid that I might hear you."—Richmond Times-Dispatch.

Family Joys.

"When you were courting me," said his wife, "you declared there wasn't another woman in the world like me."

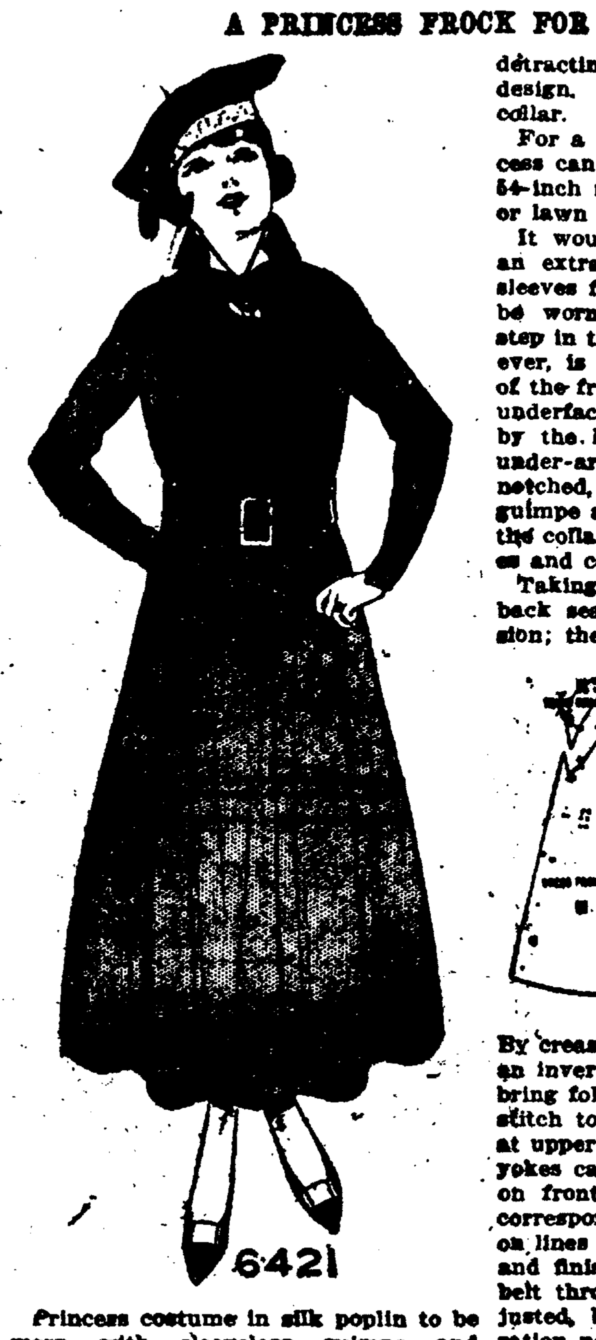
"Yes," replied her husband, "and I'm glad of it—for the sake of other men."

In common things the law of sacrifice takes the form of positive duty.—Froude.

Easy & Practical Home Dress Making Lessons

Prepared Especially For This Newspaper by Pictorial Review

A PRINCESS FROCK FOR MISSES.



6421

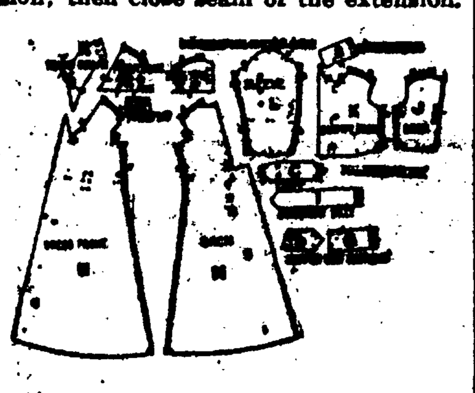
Princess costume in silk poplin to be worn with sleeveless guimpe and straight or shaped belt.

The princess mode about which one hears so much is charmingly adapted to the uses of designers who specialize in frocks for misses and small women. The model shown here is carried out in silk poplin and is worn with a separate sleeveless guimpe. The belt may be straight or shaped. If the home dressmaker considers the management of a shoulder yoke too much for her abilities this may be ommitted without detracting from the effectiveness of the design. The guimpe has a convertible collar.

For a miss of average size the princess can be reproduced with 3¼ yards 54-inch material and 1 yard of batiste or lawn for the guimpe.

It would be a practical idea to add an extra yard of material and make sleeves for the guimpe so that it could be worn with any frock. The first step in the making of the guimpe, however, is to turn under the front edge of the front on slot perforations for an underfacing, locating the center-front by the large "O" perforations. Close under-arm and shoulder seams as notched, hem the lower edge of the guimpe and insert a drawstring. Face the collar and sew to neck edge, notches and center-backs even.

Taking the princess, close the center-back seam from neck edge to extension; then close seam of the extension.



By creasing on line of slot perforations an inverted pleat can be formed; next bring folded edge to center-back seam; stitch to position invisibly underneath at upper edge of pleat and press. The yokes can now be adjusted to position on front and back, center-backs and corresponding edges even. Slash front on lines of three small "o" perforations and finish edges for openings to pass belt through; or the belt may be adjusted, bringing the large "O" perforation near upper edge of belt to corresponding perforation in back. Close under-arm and shoulder seams as notched. Turn hem in front on small "o" perforations.

For the sleeves, first pleat, placing "T" on corresponding small "o" perforations; then close seam as notched. Finish the lower edge with piping, a stitching of braid or a ruffle of lace. The sleeve should be sewed into the shoulder, easing in the fullness, with the small "o" perforation at the shoulder seam.

Pictorial Review Costume No. 6421. Sizes 14, 16, 18 and 20 years. Price, 15 cents.

Cookery Points

Don't Cry Over Sour Milk.

At this season sour milk is often a source of unnecessary household waste. Though sour milk has not as many uses as sweet milk there is no good reason for throwing it away, since there are at least one hundred delicious dishes in the making of which sour milk is better than the sweet. When these dishes are wanted, if there is no sour milk on hand, sweet milk is often soured by the use of rennet.

In the southern states, where hot biscuits are found on every breakfast table, only families who keep no cow or are unable to get sour milk use baking powder. These sour milk biscuits, when made by a good cook who knows how to handle soda, are not only lighter, flakier and more tasty when hot than those made with baking powder, but when cold there is an even greater difference. A baking powder biscuit will be dried and more tasteless two hours after getting cold than the sour milk biscuit in two days. Besides, the biscuit made with sour milk may be split and toasted and so made to taste just as good as when first taken from the oven.

Besides biscuits there are numerous kinds of griddle cakes and batter breads, including those utilizing cold hominy or cold rice, for which sour milk and the proper proportion of soda is to be preferred to sweet milk and any brand of baking powder. There are also two varieties of sour milk pies and two kinds of sour milk raised bread. In one of these cornmeal is used, and it is called corn light bread. Doughnuts and gingerbread are almost exclusively made with sour milk.

In the genuine johnnycake baking powder is not to be thought of. Only sour milk with the cream well beaten in should be used for mixing the meal before the beaten eggs are stirred in. Such a johnnycake will be eatable at the end of seven days if kept in a dry receptacle. Of course it must be thoroughly cooled before being set away.

For waffles the southern cook refuses any substitute for sour milk with a pinch of soda, which, being measured, means an even teaspoonful of soda to each pint of thick sour milk. To get the best results waffles, both light and crisp, the eggs must first be beaten light, then the milk in which the soda has been thoroughly dissolved beaten in. After this comes the flour, also beaten in until the batter is light both in color and weight.

Sour milk salad dressing when properly mixed and cooked cannot be distinguished from that in which sweet milk is used. The same is the case with sour milk ice cream and of fruit cake. Chocolate gingerbread, chocolate crullers and coffee squares are all improved by the use of sour milk. So are sugar cookies and all of the fruit breads in which graham flour is used.

The one and only secret of using sour milk in cooking is getting the soda in the right proportion. For thick sour milk an even teaspoonful of soda is sufficient for a pint of milk. Where the milk is thin, which means that more of the curd has been eaten up by the whey, slightly more soda should be allowed.

For whitening the hands and face there is nothing better than milk sufficiently sour to bite the tongue. This applied to the face, hands or neck with a soft cloth every three or five minutes is a sure cure for tan and for sunburn where the skin is not blistered. For removing tan and for cleaning silver the milk should have the cream removed.

Chicken Shortcake.

This very unusual dish must be put together at the last possible moment and served immediately. Make a good shortcake of biscuit dough. When done, split the cake and butter it. Have ready a plate of thinly sliced boiled chicken which has been cooled, but not iced. Fill the shortcake with the chicken and spread thickly with a good mayonnaise, lay on the upper half, lightly butter the top, then spread it with a small bottle of macedoine vegetables that have been drained, chopped and marinated in French dressing for one hour, then drained again and mixed with mayonnaise. Serve the shortcake hot and as quickly as possible garnish with sprays of parsley drawn through thin slices of lemon. This is a rich, but most satisfying dinner dish.

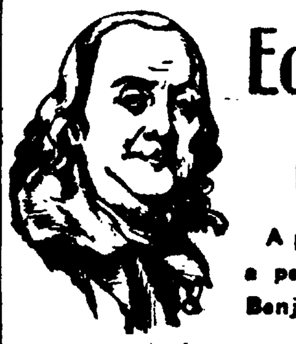
Potato Dumplings.

Scrape small new potatoes and stew with a small piece of meat. When done drop in dumplings made of one cupful of flour to which has been added one teaspoonful of baking powder and one teaspoonful of salt, with enough sweet milk added to make a stiff batter. Add one cupful of sweet milk and a little butter and cook fifteen minutes longer without raising the cover in order that the dumplings may be light.

His Favorite Play.

Edith—That Mr. Phan is conversationally impossible. Ethel—Why so? Edith—We were talking about the theatre, and when I inquired what was his favorite play he said if he had any favorite it was seeing a man steal second.—Boston Transcript.

Economy Hints



A penny saved is a penny earned.—Benjamin Franklin.

DID you ever stop to think that good care of the toothbrush is almost as essential as good care of the teeth? Yet how few persons really take the proper care of either! Nothing spoils a pretty face so quickly as bad teeth, and the girl who has any regard for her appearance will watch both her brush and her teeth.

It never pays to invest in a cheap toothbrush. In the first place a bad set of bristles leave their work half done. They have not the necessary stiffness and resistance to clean the teeth well. Then the bristles in a cheap brush are not well fastened and are apt to fall out. This makes a cheap toothbrush a real menace, for if the bristles come loose in the mouth they are apt to slip down the throat, catch there and decay, or they may pierce through the walls of the digestive tract.

Buy a good brush and then take care of it. Before you use a brush for the first time soak it in a weak solution of bicarbonate of soda for two hours. This not only serves to disinfect it from shop handling, but it sets the bristles so that they will not fall out so readily.

It is better not to use a toothbrush for a longer period than three weeks at a time, and it is wiser to keep two brushes going at once. In this way one can be drying out and airing while the other is in use. Be sure that the brush is well rinsed and thoroughly clean of all tooth paste or dirt before hanging it up to dry. Once a week let it boil in clear hot water for about five minutes to kill any germs which may be lingering in the bristles and to disinfect it well.

The teeth should be brushed after each meal, before retiring and upon arising in the morning. The nightly cleansing, so often neglected, is in reality the most important of all. It is essential to brush the teeth both inside and out before retiring, so that the food particles will not stay in the crevices and decay overnight. Once a day or twice at the most is often enough to use tooth paste or powder. At other times wash the teeth with clear water.

Very often after a long illness it will be found that the teeth have begun to decay. This is usually laid down to the nature of the illness. In reality it is more often due to neglect of the teeth than to the ailment itself. During illness the teeth should be cleaned often, especially as they cannot be attended to by a dentist.

The best mouth wash, one which will help to harden the gums and will keep away tartar, can be made by dissolving a teaspoonful of bicarbonate of soda (ordinary baking soda) in a pint of water. Bottle this and keep it on hand for use. It is quite as good a cleanser as peroxide, and it is not so hard on the teeth. The peroxide is said to wear the enamel away.

The Care of Foodstuffs.

As soon as meat or fish arrives from the market it should be examined in the folds and crevices to make sure there are no eggs left by intruding flies. A wire safe in the cellar is the best place to hang meat. In mutton or in lamb the marrow or soft, fatty substance should be taken from the backbone, as also the thin membrane which appears under steaks and chops, as these decay quickly and, therefore, are liable to taint the whole piece. Never leave meat in paper, but put at once on a clean plate if it is not hung.

Fish should not be laid directly on artificial ice, as the ammonia used is apt to combine with the fish and cause ptomaine poisoning. Do not cover meat or fish tightly before being cooked and never cover cooked food such as soups, meats and vegetables while still hot. Let them cool as rapidly as possible, then cover. Bacons and hams may be kept in any cool place where there is plenty of cold air in circulation about them to prevent mildew. They are best hung, protected by bags of cloth or paper.

Fruits should be kept in a cool, dark place and separated as much as possible. Berries should be poured on large plates or platters and spread out. If the watermelon is too large for the ice chest cover with a wet piece of sacking and place where the wind will blow over it. The evaporation will make it delightfully cold. Lemons are best kept by wrapping in tissue paper and hanging in an openwork bag in a cool place. A bag made of netted white string is admirable for this purpose and can be washed when necessary.

Homemade Towels.

A fad has developed among fastidious women for making their own towels. They buy for the purpose fine French birdseye and French huck for their own personal use and German huck for general family use. Of course the fancy towels, which are lace trimmed and embroidered, are not honestly practical.

But those hemstitched are, and either the family initial or some quaint emblem in cross stitch, white or colors, makes a charming finish.

TODAY'S FASHION NOTE

Eminently smart is this suit in a checked serge, with long, loose coat and five-gored skirt. The coat may be buttoned up to the throat if desired. Much of the success of the decorative art is embodied in the fancy buttons and machine stitching. Four and a half yards 54-inch material make the suit.

Pictorial Review Coat No. 6056. Sizes, 14 to 20 years. Price, 15 cents. Skirt No. 4489. Sizes, 14 to 20 years. Price, 10 cents.

Pictorial Review Patterns may be procured at the M. Katz & Co. Department Store, Fulton.

About Sandwiches.

EACH season brings its new crop of varied sandwich fillings, and it is a good idea to jot down as one hears about them and then after a trial specialize on those that are found to be the best. Remember that in sandwich making the bread is better when it is a day old and that butter should be softened with a little whipped cream and warm enough to spread on the slices without breaking them. Brown bread, whole wheat and raisin loaves make a variety in themselves, while the rye is always good with the cheese mixtures.

Sandwich Filling.

Chicken Livers.—Take the chicken livers, gizzards and hearts that have been boiled tender with the chicken and chop them very fine, add one stalk of celery, one gherkin, a strip of green pepper, three olives and two tablespoonfuls of walnut meats, all chopped fine. Then moisten one package of cream cheese with cream, add pepper, salt, a tablespoonful of chutney sauce and work all smoothly together, using as much sweet cream as is needed to make a good spreading paste. Lay up the sandwiches on white bread.

For chicken salad all of the white meat may be used. Save the dark meat for sandwich material, with the giblets. Tuna, salmon or cold boiled codfish make good and quick salads, and the Macedoine vegetables that come bottled need only to be drained and have lettuce shredded and French dressing added to make delightful salad.

Japan Opposes Sending Her Troops to Aid the European Belligerents

Tokio, Aug. 25.—Unusual importance is attached to conferences now in progress between the Premier and the War Minister. They are understood to have a connection with the appeal believed to have been received direct from the highest source in Europe for the despatch of Japanese troops to the western theatre of war.

Japan has already been sounded on this point, but her replies always have been evasive so far. Now she is obliged to give a final answer.

I learn from the highest authority that the very principle of the constitution establishing Japan's military service, which is compulsory, makes it impossible to employ the army and navy for any purpose other than the defense of the honor, the safety or the interests of the Throne and State. Should the government recommend to the Throne to send troops to fight in the European theatre of war there would be an outburst of national indignation.

The operations against Tsing-Tao were purely in pursuance of the obligations entailed by the alliance with Great Britain. Japan now entertains no grudge or hatred against any nation in Europe, therefore is does not want to fight in the absence of a direct menace to national interests.

Compliance with the present appeal for military assistance, embarrasing as it is because of the source from which it comes, is thought utterly impossible.

FIRMLY ESTABLISHED POLICY

GRANBY CENTER

Maurice Scanlon left Sunday for [illegible] after spending a week with his parents

The Ladies' Aid Society will meet this week Friday, with Mrs. David [illegible]ling.

Viola Davis will leave this week for Bay City, Mich., to visit her sister and friends of that place.

Leila Huggins spent the most of last week visiting in Phoenix and Syracuse.

The Rev. Greenfield preached at the church Sunday night. His sermon was very interesting as well as instructive.

The Rev. J. J. Johnson left Sunday night for Dempster where he will remain during camp meeting.

Frank Goodrowe, who has been spending the summer with his uncle, Charles Goodrowe, will leave Sunday for Pennsylvania. He graduated in June from Clarion Normal, this will be his first year teaching.

Mr. Charles Allen visited his son, [illegible], Monday.

Mr. Solomon Casewell has ben [illegible] is slightly improved.

Black Baking Company time in Fulton is at all times. Your grocer sells the goods. adv

Give The Evening Times a trial. It has all the news about all the people you know, and then some more.

HANSON EXAMINED AT AUBURN TODAY

John Hanson, who assaulted two men and a woman at Sterling station Saturday morning before he was captured by the police, was taken to Auburn Monday and examined there by a lunacy commission. It is probable that the man will be committed to some institution.

Hanson attempted to steal a bicycle from the home of Mark Howell in Sterling early Saturday morning. When Howell fought with the man Hanson hit him on the head, rendering him unconscious. Then Hanson assaulted Mrs. John Williams, who lives in the neighborhood and fought with her husband when he attempted to chase the man away. He was afterward captured by the police. Hanson said he lived in this city and had been employed at one of the paper mills here. He says he has relatives in Cleveland, Ohio.

"The best seller," is the expression of merchants handling Black Baking Co.'s products. adv.

GOMPERS TALKS ON WAR AT FEDERATION MEETING

Buffalo, Aug. 25.—"No one can tell when the struggle shall end," declared Samuel Gompers, "president of the American Federation of Labor, in addressing the opening session of the New York State Federation of Labor, in convention here today.

"We do know," continued Gompers, "that the time must come when it shall not be in the hands of an autocrat to thrust the people into conflict with the people of another nation"

"I do not believe whether the people within a reasonable span of time will be able to put an end to all wars. Be that as it may, it was for labor to rise againsts uch titanic conflicts as the one now devastating Europe.

"When the time comes for the reestablishment of peace, labor should meet at the same time as the councils of the nations to see that peace is established on lines that will perpetuate the rights of justice, liberty and humanity.

"To have the war end in a draw," said Mr. Gompers, "to have the nations begin anew top repare for another gigantic struggle must not be. The terms of peace must vouchsafe for the people open opportunities for devolopment and the cultivation of brotherhood among men."

NEW CHEMICAL WAGON ON TRIAL TODAY

After a number of trial trips and tests of several weeks' duration, the new chemical wagon was formally placed in active service this morning. The new wagon, which was purchased for the Fire Department about a month ago, is equipped with all the modern fire fighting apparatus, and pride is taken in the fact that the box of the wagon is the product of a local factory, as well as the fact that the entire outfit was painted in Fulton by a local firm.

Fulton Keynotes

G. B. Farley left today for a few days with his family at Big Moose.

* * *

Miss Anna Couse of Oswego has returned from Columbia summer school and is visiting realtives in this city for a few days.

* * *

Miss Evelyn Hayes, who recently resigned as secretary of the library left last night for Detroit, Mich., where she will begin a course in domestic science at the Thomas Training school in that city. Miss Hayes is a graduate of Fulton High school and after completing her training course.

* * *

The Daughters of Liberty of this city will initiate a class of candidates tonight at the Jr. O. U. A. M. hall. A large attendance of members of the organization is expected.

* * *

Mr. Harold Thompson who suffered a slight shock recently is improving at his home in Pratt st.

* * *

Mr. George Washburn was the host for several Oswego friends at a dinner in this city last evening.

* * *

Miss Lila Church has left for California, where she will visit the exposition.

Mr. Harold O'Brien has returned from Old Forge.

* * *

Mr. David Dunn, Seward st., is ill at the local hospital.

* * *

Miss Stella Remington of Phoenix is ag uest of local friends.

* * *

Mrs. Wendell Knowlton of West 2nd st. leaves tomorrow with her daughter, Arlene Shirley Knowlton, to spend several weeks with her sister, Mrs. George H. Found, at Linwood, Livingston county.

* * *

Art Hurwitz, who has been spending the summer at Red Bank, N. J., has returned to Fulton.

* * *

Miss Louise Van Scoy will spend this week with friends at Thousand Islands.

* * *

Miss Loretta Donahue of this city was the guest of Mr. and Mrs. John Donahue of Oswego at dinner given at Lakeside Farm Monday evening.

* * *

The latest reports of the filing of the will of Mrs. Fusitina Langdon, formerly of this city, place the estate at $30,000, of which $8,000 is personal and $22,000 real property. Letters of probate have not as yet been issued to Mrs. Eliza Merriam, the petitioner.

LAST CIVIL WAR VETERAN IN U. S. ARMY RETIRES.

Colonel Clem, "Drummer Boy of Chickamauga," Reaches Age Limit.

The last of the civil war veterans in the active service of the army has retired. Colonel John L. Clem, the "Drummer Boy of Chickamauga," has reached the age limit and retired as a brigadier general.

When President Lincoln issued his first call for volunteers, Johnny Clem, a ten-year-old orphan, offered his services to the Third Ohio volunteers, but he was told to go home.

Johnny, however, hid on one of the cars taking the regiment to the mobilization camp, and when the troops arrived he crawled out and asked the colonel for a drum and a pair of sticks.

He was turned down and thereupon offered his services to the Twenty-third Michigan regiment. Some of the soldiers rigged him up in a uniform and gave him a sawed off gun. Eventually he got a drum.

He was under fire for the first time at Chickamauga. The command was surrounded by Confederates and the drummer boy was found in a cluster of bushes by a Confederate officer, who laughed heartily at the diminutive figure. Thereupon Johnny shot at the officer and escaped.

His fame spread from that day and he was known thereafter as the "Drummer Boy of Chickamauga." He was in the thick of the fighting in half a dozen other important battles, and made such an impression on General Thomas and General Rosecrans that they reported him to General Grant for meritorious service. When General Grant was elected president he gave young Clem a commission in the regular army, where he has gradually risen to his present rank.

The "L" in Colonel Clem's name stands for Lincoln.

"I met President Lincoln in 1864," Colonel Clem explained, "and I thought so much of him that I took his name as a middle name."

SUBSTITUTE FOR COTTON.

Germans Use Wood Pulp to Make Explosives by New Process.

A citizen of a neutral state who has just made a tour through Germany gives to the London Chronicle an account of the work of German chemists in discovering a substitute for cotton as a basis for high explosives. This is found in the shape of ordinary wood pulp. The correspondent adds:

"The experiments still are being carried on, but sufficient progress has been made to enable the substitute to be used freely and successfully.

"Germany is under no difficulty so far as the supply of raw material is concerned. At one time she was dependent upon Scandinavia for supplies of wood pulp, but some years ago she set herself to the task of making her own. Since then she became largely self supporting in this direction. Three of the largest factories are engaged in turning out the new basis for explosives.

"Large reserves of timber have been accumulated from my own country and from Russia, so that there is no fear of any shortage. I was assured that if the supply of raw cotton to Germany was stopped entirely she might be able to tide over the difficulties."

Neuralgia Pains Stopped

You don't need to suffer those agonizing nerve pains in the face, head, arm, shoulders, chest and back. Just apply a few drops of soothing Sloan's Liniment; lie quietly a few minutes. You will get such relief and comfort! Life and the world will look brighter. Get a bottle today. 3 ounces for 25c., at all Druggists. Penetrates without rubbing.

Grand Duke Nicholas Escapes German Net

London, Aug. 25.—Austro-Hungary cavalry has entered Kovel, 35 miles southeast of Brest-Litovsk and an important junction on the railway to Kieff. Kovel has been the objective of the large army that crossed the Bug River at Sokal early in July and that has been fighting since in an effort to rech Brest-Litovsk-Kieff Railroad and cut the communications off from the fortress to the southeast.

While the Germanic allies were drawing still closer to Brest-Litovsk and were dealing smashing blows at the Russian defense in front and on both sides of the entrenched camp Field Marshal von Hindenburg found himself blocked in his enveloping operations in the north. Grand Duke Nicholas again has proved his ability to extricate his armies from delicate and dangerous positions with the mnimum of loss.

The German command was confident, after the capture of Kovno, that the net fruitlesly thrown out at Warsaw would return a great catch when cast again at the northern fortress. Instead, Grand Duke Nicholas directed his troops through the narrow opening between the Niemen and Viliya rivers, drew back the line south to Ossowetz and again is meeting the German ouslaughts on a solid line that runs from Janow east to Kovno.

Some Queer Ones

A woman can dress on $3.50 a week, a Milwaukee court holds.

A will found in an old slipper in Michigan disposed of an $80,000 estate.

Kisses, stolen or otherwise, are worth $11 each in Hammond, Ind., the court decides.

Rat terriers have been shipped by a Delaware man to rid the German trenches of rats.

A couple who wanted "something out of the ordinary" married in a cell of the village lockup at Put-in-Bay, O.

A vagrant told by the Hackensack (N. J.) court he might fix his own sentence discharged himself on condition that he leave town.

Coffee grounds in the food of a Harwich (Mass.) man's chickens made them so wide awake the roosters nearly crowed themselves to death.

Grounds For Divorce.—Wife cast vote as director that ousted Corona (Cal.) man from job, and he is suing for divorce on ground of cruelty in leaving him no means of supporting her.

Belloc Says Final Result Rests Upon Western Campaign

Foremost Military Writer of Europe Says Teutons Miscalculated, Resulting in Von Hindenburg's One Defeat on the Vistula Line, Climax Coming June 22.

By Hiliare Belloc.

The opening of the war in its eastern theatre discovered a heavy miscalculation upon the part of the Teutonic allies. They had calculated that the Russian mobilization would be so slow that 1,000,000 Austrians and a single German army corps would be sufficient to deal with any Russian effort until the French armies were destroyed.

The Russian mobilization had, as a fact, proceeded smoothly and more rapidly than the Teutons thought possible. A series of successful Russian actions in front of Lemberg and beyond were contemporary with the furthest extent of the German advance in France, Von Kluck's blunder in front of Paris, and the battle of the Marne.

Meanwhile the Russians invaded the province of East Prussia.

Though it was evident that something must be done to relieve the pressure upon the defeated Austrains in Galicia, the forces gathered for that purpose were not equal to the task. Von Hindenburg, pressing forward from East Prussia towards the Niemen, between Kovno and Grondo, had been beaten back in thel ast week of September. From the first week of October up to the 16th of that month, Von Hindenburg was trying again, with larger masses, to create a diversion in favor of the Austrians by a direct advance upon Warsaw.

He reached, and even passed, the line of the Vistula, and was fighting, upon October 16, quite close to Warsaw itself. His most advanced bodies upon the Vistula river suffered a severe defeat, and the end of October was occupied by the rapid retirement of the German forces to their own frontier, pursued by the Russian armies.

In other words, the first year of the war may properly be regarded as divided into three [illegible] of nearly equal importance to the ultimate result though the three vary greatly in the time which they occupy.

Poland the Deciding Ground

It is, of all the three phases through which the war has so far passed, by far the most important to comprehend, because upon the issue the general result of the campaign will probably turn.

The great characteristic of the German plan from the middle of last November to the present day has been the determination to obtain a decision against the Russians—that is, to put the Russians out of the field; to disarm them by one great action or by a series of actions. Then the whole of the Teuton's remaining powers could be turned to obtaining a similar decision in the West, after which they could obtain peace.

By June 21 it was clearly apparent to the Teutons' higher command that they could no longer achieve its end or destroy the unity of the Russian organization.

The Teutons therefore turned to the Vistula line, converted the position of Warsaw into a dangerous salient which could be threatened from the north and from the south, and proceeded to exercise such pressure both from the northern and from the southern side of this salient as to compel the evacuation of Warsaw.

It was upon July 18 that the decision was taken to evacuate Warsaw. Again, with deliberation and with excellent organization without confusion, and with complete success, the town to be abandoned was stripped of every gun and every cartridge, every machine, and every ounce of useful metal and stores, an achievement which, in the case of a town of a million inhabitants, deserves the highest admiration. The Teutons entered the city seventeen days later, hardly opposed.

Serbia to Yield Macedonia to Bulgaria and Join the Allies

London, Aug. 26.—At last Bulgaria is about to throw in her lot with the rest of the Balkan states on the side of the allies, according to reports reaching high diplomatic circles here. Serbia is said to have yielded the last point in satisfying Bulgarian demands, and the Balkan League is on the eve of being renewed. This will put an entirely new phase in the southeastern theatre of war and mark a decisive epoch for Turkey.

After the last Balkan war, Bulgaria, defeated, lost a large part of her conquests in the first war against Turkey. "Old Serbia," which included the greater part of the vilayets of Macedonia, was awarded to Serbia. It is the return of this territory which Bulgaria demands as the price of joining Serbia, Montenegro and Greece in the present war against the Teutonic nations and Turkey. The allies for weeks have been urging Serbia to agree to this concession.

Serbia's reply to the note of the allies is expected to reach London today and it is stated in official circles that it will concede the main points of Bulgaria's demands, which the allies have been urging upon Serbia in order to obtain the co-operation of the Bulgars.

RUNNING A CITY LIKE A BUSINESS

No. 5—How the People of Buffalo Have Capitalized Experience in Government

By M. M. WILNER.

One of the lessons that is particularly hard for Americans to learn is the value of experience in the administration of government. The democratic ideal often discounts experience altogether. When it is a question of managing a railroad or a manufacturing plant, every one recognizes that a man must learn something of the trade before he can direct the work of others successfully—that is, profitably. But when it comes to managing the corporations called governments, that is something which every citizen is supposed to know how to do by instinct. The majority of the experiments, however, go to prove that the green man in public office wastes a great deal of time and money before he learns his work.

More and more as governmental corporations, national, state or city, have grown larger, the actual work of managing them has fallen into the hands of the more experienced men. The first-termer in Congress or a State Legislature rarely is able to accomplish anything. The same is true of men in city governments.

There is plenty of room for debate as to whether the American people have suffered the more from too much, or too little experience on the part of their office holders. That, however, is apart from the main proposition that the complicated work of a public office has to be learned before it can be properly done. Clean sweeps in a city or other government by which an old gang is turned out and a new gang put in sometimes produces reforms; more often they lead to blunders and failure and a discouraged reaction on the part of the people.

This is another of the causes of misgovernment which Buffalo has tried to eliminate in her commission charter. There will be no more clean sweeps in Buffalo's local politics after the charter is in operation. The terms of the commissioners are made to overlap, so there always will be at least two commissioners who have had two years' experience.

The present mayor, who was elected in 1913, will serve out his term, which expires in 1917. Of the four commissioners who are to be elected next fall the one who receives the smallest number of votes will have to take a two-year term. Consequently there will be two vacancies in the commission or five to be filled at the election in 1917. After that, all commissioners will have four-year terms. Three of those elected next fall will serve till the end of 1919. Under the state constitution city elections can be held only in odd-numbered years. The alternation in Buffalo, after this year, will be first two commissioners, then three, and so on as long as the charter remains in force.

Aside from the advantage of always having men on the commission who have learned the work, this plan has the further and even greater merit of making a very short city ballot. There never can be more than three city offices to be filled at one election, and every alternate election there can be only two. And there never can be on the official ballot more than two candidates for each office. At the election of 1913 Buffalo elected eight city officials, and there were four full tickets on the ballot. Often the number has been greater.

(*No. 6 will be published tomorrow.*)

(Copyright, 1915, by S. S. McClure.)

STATE AWARDS TODAY FIRST STREET PAVING CONTRACT; WHO WINS?

The contract for the paving of First st. between Rochester st. and Broadway, will be awarded by the State Department of Highways at Albany today. The specifications call for paving 34 feet wide for .36 of a mile, but the recent plans of the Board of Public Works to pave the street 38 feet wide will necessitate another agreement with the contractor who is awarded the work.

It is understood that several local firms have bid for the work. Edward Styring, who is constructing the bridges over the Hunter tail race and Waterhouse creek on Sixth st., has entered bids for other sections of paving in the northern part of the state, and he has been named as one of the bidders on the local work. The local board expects the work to begin about September 1.

SCHOOLBOY SOLDIERS, PLAN OF MITCHEL

Plattsburg, Aug. 26.—"I believe the boys in the New York public schools should have a military training. I shall consult with General Wood on the subject when I return to camp," said Soldier Mayor John Purroy Mitchel, who was here on a day's furlough from Plattsburg yesterday.

The Mayor made the announcement at his Riverside Drive home, where he conferred with city officials.

"I have been studying the Swiss system, which requires a certain amount of military training for every boy," he said. "While I did not say it should be adopted here I shall certainly discuss this and other plans with the Board of Education and see if we cannot arrive at a practicable system of our own. I think General Wood can give me the advice I want and on my final return to the city I hope to have a scheme ready for submission to the educational department."

WEATHER FORECAST.

Probable showers; partly cloudy tonight and Friday, with north winds.

TEMPLARS DECLARE FOR SUFFRAGE AND URGE ACTIVITY

October 12 Distinguished as Poster Day, to Display Fruits of Intemperance Throughout State—Same Officers Were Elected This Afternoon.

The cause of equal suffrage found another strong supporter this morning when the Grand Lodge of Good Templars in convention at the Odd Fellows' temple, placed itself on record as favoring suffrage for women, and asked that all members of the organization work and vote for the passage of the suffrage amendment this fall. The convention considers enfranchisement of women one of the best means of advancing the temperance cause.

A large attendance of delegates was present this morning at 10 o'clock when the convention was called to order by Dr. Garrett V. Johnson, Grand Chief Templar. The convention will close today and the program called for the election of state officers this morning, but owing to the pressure of other routine business, the election has been deferred until this afternoon, and will take place soon after the convention is called to order at 2:30 o'clock. The consensus of opinion points to a re-election of most of the incumbent officers, who have distinguished themselves during their terms by hard, earnest work in advancing the interests of the order.

October 12 has been set apart as Poster Day, and on that date the various committees appointed will superintend the display of posters throughout the state, showing the fruits of intemperance. These posters will be distributed throughout the state and will be placed conspicuously in public places.

It is interesting to note that the resolution that the organization favors woman suffrage received unanimous support, and is in accordance with the policy of the order ever since its institution, as it is the first organization of the sort which has always admitted women to equal rights with the men.

Hearty Resolutions Passed

The report of the Resolutions Committee as presented by Rev. Harry G. Greensmith, P. G. C. T., follows:

Officers and Members of the Grand Lodge:

Your Committee on Resolutions desires to place itself on record, and in doing so, we believe we also express your feelings, when we feebly attempt in resolution to express our appreciation and debt of gratitude to the members of Fulton City Lodge No. 88 and to the citizens of Fulton, for the splendid arrangements which they made for our coming and for the painstaking care they have exercised in ministering to our comforts and needs while here. We have been splendidly entertained, we have been royally treated, we never had a more convenient place of meeting and, in fact, old Sol himself has contributed to our pleasure in no small manner, as he battled with and successfully overcome old Jupiter Pluvius. When we met a few years ago in Watertown we found it a town without water. A sign greeted us as we entered the the city, "Welcome Rainmakers." No sooner had we settled down to business before the rains descended and the floods came and the Grand Lodge received "showers of blessings" from the Watertown civic fathers.

Today we are in session in the City of Fulton—a full town. For weeks and weeks, we are informed, rains have descended, the floods have come, the valleys are full. But our coming has seemingly checked the floods, and once again we are receiving a civic benediction as the "city fathers" are singing our praises.

We also desire to express our pleasure in meeting and for receiving the well-informed greeting which his honor, the Mayor, Dr. Fox, gave to us last Tuesday night. We see a bright day dawning. The day is speedily approaching when all mayors will not only be well informed of the onward march of the water wagon which in its rapid flight is crossing continents faster than any automobile can scorch, and covering the seas faster than the fastest Zeppelin yet made; we see the day coming when all embryonic mayors and all others desiring political preferment, will step more lively than any New Yorker steps in order to catch up to the water-wagon in its lightning march of triumph.

We recognize the laborious endeavors of the leaders of the First Baptist church in meeting the needs of the inner man and we hereby extend to them our appreciation of their kind ministries to us.

The use of this beautiful hall in which we are meeting is granted to us through the courtesy of another fraternal order, the I. O. O. F. Other courtesies have been extended to us by the Daughters of Rebecca. We should be indeed ungrateful if we did not also express to these kindred humanitarian organizations our fraternal greetings and reciprocal desire for their progress, and our heartfelt debt of gratitude for favors granted.

We cannot close these pleasing duties without expressing our appreciation to the trustees of the First M. E. church for the use of their building for our public meetings, and to those who so kindly contributed to successful program of the meeting.

To Bro. Willard O. Wylie, N. G. Secretary, we add only this additional word to the vote of appreciation expressed yesterday. Bro. Wylie is always a welcome visitor. But we have come to look upon our N. G. S. as a friend, one of us, rather than as a mere visitor. But we hereby place ourselves again on record as under added obligations because of his presence at this session and for that masterly address given at our annual public meeting.

To our musical directors, Bro. A. S. Bowerman and Sisters Celia Highbie and Anna Wellman, for their exceedingly helpful ministry in conducting

Opinions

Good Business.

"Americans have four great and good habits upon which their present prosperity is established. These habits are: Health habit, study habit, work habit and play habit." That is what Yozo Nomura, Japanese commissioner to the Panama-Pacific Exposition, said when he returned to Yokohanna from San Francisco and reported to the Japanese business men upon his trip. Yozo Namma is, obviously enough, a diplomat With Americans, he continues, "business is no longer exploitation, but service. The American principle is that business prospers when it answers the needs of the people and enhances human happiness." We don't reprint these compliments because they are deserved; they aren't. And yet, after writing these words we picked up a copy of the directions given to their employes by an ice company in the West:

Be courteous. Remember every iceman is supposed to be a thief until he has proved his honesty.

And again this gleam of advice: If the iceman "happens" to cut the piece a litte short, he should confess to his customer, "and then bring a larger piece next time and draw her attention to that, also" Perhaps the Japanese diplomat isn't so wrong after all: "No longer exploitation, but service." * * * Think it over.—Collier's Weekly.

Make Room for Him.

Make room for the political leader with the foresight and courage openly to espouse the cause of business big and little.

Make way for the legislator, the governor and president whose most earnest effort shall not be to win the favor of voters of any class but to reduce the burden of the taxpayers, and thus win the votes of all classes

Makew ay for the leader who shall have the nerve to oppose schemes of new taxation and to demand that public expenditures be kept within the public income.

Make room for the leader who will declare against every new fad to burden the taxpayers, who will show partiality neither to capital nor labor, to sociologists nor socialists, but who will stand in the old-fashioned way for the bill of human rights embodied in the constitution of the United States and in the Declaration of Independence.

The need of the hour is for this kind of a man. When he appears above the horizon, there will be a scattering of the cheap demagogues, selfish place hunters, bogus reformers and imitation uplifters who are occupying the center of the stage as well as the tops of the soap boxes and barrel heads at street corners.—Leslie's Weekly.

Rubbish In City Parks.

A vigorous campaign has been instituted in New York city against the throwing of rubbish in city parks Mayor Mitchel, Police Commissioner Woods and the park commissioners instituted the crusade, and the city magistrates have co-operated, with good results. Numbers of malefactors in this respect have been admonished, while others have been arrested and fined. A great improvement has resulted, and the arrests now are few and far between.

Dr. William T. Hornaday, director of Bronx Zoological park, gives the following testimony:

"For fifteen years we have been trying to educate the persons who come to the zoological park on Sundays into the knowledge that the park was not built for a big rubbish can. Now on Monday the park employees can put all the peanut shells into a silk hat and the waste paper into a receptacle just as small. The result is very satisfactory."

JUST REMINDING YOU

A recent editorial in this newspaper discussed the merits of the Smith-Hughes Bill which is designed for National Aid to Vocational Education. It was pointed out that the passage of this bill means golden worth to Fulton, and urged that every local person interested in the future educational training in this county write our congressman, Luther W. Mott of Oswego, an approval of this bill.

This bill is an important measure and if any person is "toasting his toes" instead of acting it is hoped another reminder will not be necessary. To "Do It Now" is to write Congressman Mott your approval. Every little aid will strengthen the movement for efficient men and women. When we realize that in this country 93 per cent. of the children leave school before the age of fourteen or earlier it is time we recognize this fact. Let us do something to keep our hundreds of Fulton kiddies, that universal efficiency will mark the banner when their school days are done and finished.

The Smith-Hughes Bill has the endorsement of the American Federation of Labor and the National Association of Manufacturers, also the American Bankers' Association as well as many other leading bodies.

Do it for Fulton; send Congressman Mott your approval. Do it now; the cost will be one cent or two and the satisfaction guaranteed is one hundred per cent.

YOUR MONEY

To the members of the Y. M. C. A. of this country James J. Hill recently delivered a plain, farmer-like talk on thrift. It was full of good things.

Getting down to the individual, he said:

"It requires strength of character to save and to store." And, by way of elaboration:

"The thrifty young fellow may be looked at askance by his associates. The description 'tight-wad' is heard—not always spoken below the breath. He sees his equals participating in all the amusements which the present day makes the main business of life. To do as others do will take all or more than his income.

"The young man," said Mr. Hill, "who puts off until he is earning a larger income or has satisfied some present want, or for any other reason, the effort to spare and accumulate is pretty sure never to begin unless under the pressure of misfortune."

The starting of a thrift fund is hard; the accumulation of the first $100 is slow. The actual income from a saved $100 is small—about $5 a year. But when the owner of the $100 has it, and begins to think of it as an income-producing fund, he will surely develop the ambition to make it grow.

Can you save $100 this year? If you will, thef und will earn enough next year to give you a day or two of vacation, or finance one of your real needs. But remember Mr. Hill's words:

"Thrift is not a virtue of tomorrow, but of today."—John M. Oskinson, in N. Y. Globe.

CAMPAIGN TO LOWER PRICES FOR PEACHES

New York, Aug. 26.—Asserting that housewives are not buying peaches as formerly because of prices demanded by retail dealers are exorbitant, Mrs. Julian Heath, president of the Housewives' League of No. 25 West Forty-fifth street, began a campaign for the cheapening of the prices yesterday. Mrs. Heath states that, owing o the excessive demands of fruit dealers, the peach market is stagnant, with the result that producers are letting their peaches rot on the trees.

Mrs. Heath suggests, as a remedy for improving the market and for overcoming the rapacity of the retail dealers who charge any price the traffic will bear, that housewives buy peaches by the basket at wholesale and preserve those not needed for the table.

Owing to the small market only eighty carloads of peaches came to New York yesterday. Free lectures upon the subject will be delivered at the headquarters of the league.

The time to change your living place is before the fall rush begins. Advertise your wants in The Evening Times.

SOCIETY FOLK START POTATO AND MILK FAD

Southampton, L. I., Aug. 26.—Fourteen women of the Southampton colony have started a new fad, namely a "Potato and Milk Dinner Party Once a Week."

It originated with the members of a fashionable bridge club that meets every Tuesday. Some one decided that Southampton women eat too much. Last week Mrs. Albert Boardman issued formal invitation to members of the club to attend the first attempt at self-sacrifice.

When the fourteen guests surrounded the table, groaning with—beautiful decorations—to each was served a beautifully baked potato and a refreshing glass of cold milk.

DEEDS FILED YESTERDAY.

The following deeds were filed yesterday in the Couny Clerk's office:

Raymond R. Gregg to John Parker, property in West First st., First ward, Oswego, $1,100.

Edmund Lewis to J. P. Miller, Jr., property in New Haven, terms private.

Maria R. S. Spooner to Patrick Harrigan, property in Phoenix, $1,000.

Archie Parker, et. al., to Lucie Spencer, property in Phoenix, $3,800.

Emma Hollenbeck to Ralph N. Dievendorf, property in Schroeppel, $1,000.

Strangle Education With Scholarship

By A. E. Winship, Editor of Journal of Education, Boston, Mass.

Standards are as essential as laws, and as vital as books of pedigree.

The significant feature of standardisation is knowing what is significant in standardization. There is no education that is not standardized; but overstandardization leads to collapse as surely as does overtraining for a college crew; and false standardization leads to disgrace and crime as definitely and in much the same way as buncoing weak, rich women into paying tens of thousands of dollars for de luxe books merely worth dollars on the promise that they can resell them at a fabulous advance.

The danger, and it is a great danger, is that men who are standardising, with millions behind them, are trying to strangle education with scholarship. These men have never seen that scholarship is no more education than a manikin is a man.

Education is a thing of life and scholarship is lifeless. Scholarship deals only with what has been; education deals wholly with what is and is to be. Scholarship faces our grandfathers; education faces our grandchildren.

These modern standardizers are afraid of education because it is alive. It may be uncomfortable. They do not like life because there are all sorts of dangers in anything alive. For instance, a manikin never has blood poison, fever, pneumonia or any other ailment. It can be kept in a closet without danger of petrifaction. It is a beautiful thing to look at, illustrates delightfully, lasts forever.

Scholarship is standardized to death because it deals with the dead. Standardizers have opposed every new idea, and they always will. Standardizers tried to prevent anyone's believing that the earth rotated.

They crucified Jesus, imprisoned Paul, and they drove Sammelweis to insanity in Vienna less than sixty years ago because he reduced the death rate in childbirth from 12 in 100 to 3 in 100 by insisting that the physician should wash his hands before he attended the patient. Standardized physicians insisted that this was a reflection upon the standardization.

They positively refused to do so simple a thing as that because it was new. Sammelweis and his school reduced the death rate so low that they persecuted him to insanity. There was nothing in their scholarship that suggested clean hands.

They fought Pasteur like fiends incarnate because he was conquering hydrophobia, and they fiercely assailed Lister because his theory of treatment was not of their standards.

But all the standardizers of the past were harmless as compared with those of today, because they merely had the gravitation of human nature and inherited prejudice to overcome, while today limitless millions are put in the hands of men for use in strangling every new idea that breathes in an educational institution.

A professor who prefers education to scholarship realizes that the almshouse threatens him while a luxurious old age might await him. An institution that prefers live education to dead scholarship sees its doom.

The standardization of today is a wolf in sheep's clothing. It is using every art and device of bribery to deceive the public. Under the pretense that they are protecting the public from youthful inconstancy the advocates of standardization are infusing germs of senility.

To standardize in the right direction, standardize nothing backward, but standardize everything forward and upward.

The Cellar Hole and the Sewer Hole

By HERBERT KAUFMAN

Author of "Do Something! Be Something!"

A COAL cart stopped before an office building in Washington and the driver dismounted, removed the cover from a manhole, ran out his chute, and proceeded to empty the load. An old negro strolled over and stood watching him. Suddenly the black man glanced down and immediately burst into a fit of uncontrollable laughter, which continued for several minutes. The cart driver looked at him in amusement. "Say, Uncle," he asked, "do you always laugh when you see coal going into a cellar?" The negro sputtered around for a few moments and then, holding his hands to his aching sides, managed to say, "No, sah, but I jest busts when I sees it goin' down a sewer."

The advertiser who displays lack of judgment in selecting the newspapers which carry his copy often confuses the sewer and the cellar.

All the money that is put into newspapers isn't taken out again, by any means. The fact that all papers possess a certain physical likeness, doesn't necessarily signify a similarity in character, and it's character in a newspaper that brings returns. The editor who conducts a journalistic sewer finds a different class of readers than the publisher who respects himself enough to respect his readers.

What goes into a newspaper largely determines the class of homes into which the newspaper goes. An irresponsible, scandal-mongering, muck-raking sheet is certainly not supported by the buying classes of people. It may be perused by thousands of readers, but such readers are seldom purchasers of advertised goods.

It's the clean-cut, steady, normal-minded citizens who form the bone and sinew and muscle of the community. It's the sane, self-respecting, dependable newspaper that enters their homes and it's the home sale that indicates the strength of an advertising medium.

No clean-minded father of a family wishes to have his wife and children brought in contact with the most maudlin and banal phases of life. He defends them from the sensational editor and the unpleasant advertiser. He subscribes to a newspaper which he does not fear to leave about the house.

Therefore, the respectable newspaper can always be courted upon to produce more sales than one which may even own a larger circulation but whose distribution is among unprofitable citizens.

You can no more expect to sell goods to people who haven't money than you can hope to pluck oysters from rose-bushes.

It isn't the number of readers reached, but the number of readers whose purses can be reached, that constitutes the value of circulation. It's one thing to arouse their attention, but it's a far different thing to get their money. The mind may be willing, but the pocketbook may be weak.

If you had the choice of a thousand acres of desert land or a hundred acres of oasis, you'd select the fertile spot, realizing that the larger tract had less value because it would be less productive.

The advertiser who really understands how he is spending his money takes care that he is not pouring his money into deserts and sewers.

(Copyright.)

MUSICIANS FORM INTO CONCERT COMPANY

The Oswego Times announces the formation of a concert company, whose members comprise Mr. Robert Seeley Kelsey, tenor, of the Grace church choir; Miss Rena Farnham, Miss Elsie Farnham and Mr. Charles Bortel, violinist. A series of recitals is promised the various towns and cities of this county this winter.

The consistent advertiser wins in the end. It may cost a dollar to get a dollar, but the deal wins prestige.

OUR OLD LIBERTY BELL.

Text From Which the Inscription It Bears Was Taken.

For fifty years after that July day in 1776, when the old bell rang out its memorable message, it continued to be rung on every festival and anniversary. It was rung on Feb. 22, 1832, in honor of the centennial of the birth of Washington. While being tolled on the morning of July 8, 1835, in memory of Chief Justice Marshall, who had died two days before, the old relic suddenly cracked. On Washington's birthday, 1843, an attempt was made to ring it, but the bell has since been mute.

Finally it was removed from its position in the tower to a lower story, and later it was placed on its original timbers in the vestibule of the statehouse in a prominent position immediately beneath where a larger bell, presented to Philadelphia in 1866, now proclaims the passing hours.

To Isaac Norris, the speaker of the colonial assembly, is ascribed the honor of having originally suggested the prophetic words from Leviticus xxv, 10, "Proclaim liberty throughout all the land unto all the inhabitants thereof," which were cast on the bell. The reason for the selection of this text at a time when there was not the slightest thought of a break with the mother country has been a subject of much conjecture, but the true reason is apparent when the full text is read, "And ye shall hallow the fiftieth year and proclaim liberty throughout the land and to all the inhabitants thereof." In selecting the text the Quakers had in mind the arrival of William Penn and their forefathers in America.—Christian Herald.

LOVE LINKED WITH DEATH.

Where Women Propose and if Rejected Must Kill Themselves.

In the Pacific ocean, between Fiji, New Guinea, New Caledonia and the continent of Australia, lies the Melanesian group of islands, where head hunters and cannibals abound. Strange and grewsome as are many of the customs of the tribes, there are some that are most romantic. For instance, on the island of Tucopia the women propose marriage instead of the men.

When a girl of Tucopia sees a man whom she thinks she would like to have for her husband she does not rush up to him and ask him to marry her. On the contrary, she gives the subject deep thought and often the man a most careful investigation before she "pops the question." The reason is that his answer spells life or death to her.

It is a tribal law that any woman who has been refused must forthwith kill herself. Therefore a woman asks a man's hand only when she feels sure that his answer will be the happy one.

Many are the strange and seemingly inexplicable questions with which the women of Tucopia ply the stranger who cannot realize the personal motive back of the solicitude of the dusky belles who inquire if he is married or not and the state of his wife's health. Romances are consequently very apt to turn out in happy marriage.

But there have been innumerable instances when a poor girl, smitten by the newcomer's charms, has been compelled to kill herself because the man with whom she has fallen in love has had to refuse to marry her.

Baldness with the women of Tucopia is a sign of beauty, and never until she is bald does a Tucopia woman become fully convinced that she is really lovely.

But, bald or not, she takes great care whom she asks to marry her, for the tribal law has never been known to fail. If a rejected woman does not kill herself she is executed under the most dishonorable conditions by the leaders of the tribe.—Buffalo News.

Color Legibility.

In London recently more than a thousand persons participated in tests that gave these average comparative distances at which signs of same size and lettering, but of different color combinations, were readable:

	Feet.		Feet.
Black on yellow.	375	Yellow on black..	352
Green on white...	367	Black on white..	351
Red on white.....	364	White on red....	350
Blue on white....	364	White on green..	341
White on blue....	357	White on black..	340

A Matter of Doubt.

"So Dolblay has decided to get married?"

"I merely said that he was going to get married. Whether the decision was made by Dolblay or his fiancee or some member of his or her family, I am in no position to state."—Birmingham Age-Herald.

Adventurers and dictators have almost always found Mexico City too slippery to hold for long.

Heretofore summers have been known to do the "comeback" act well into October.

The new June brides are just now hearing things about "mother's kind" of cooking.

LOYALTY TO OUR COMMUNITY

AM I A LOYAL CITIZEN?
DO I PERFORM A FAIR SHARE OF MY DUTIES TOWARD THE COMMUNITY IN WHICH I LIVE?

Let us discuss the subject, fairly and openly.

In the first place, we each owe something to our community. We each derive benefits and profits because of our association with the community of which we are each a part, making us each responsible for a fair proportion of the cost of maintaining the support of the community.

The physical responsibility is represented by the taxes we pay. Too many of us are satisfied with the perfunctory performance of that part—leaving the moral responsibility to others.

In other words, WE ARE TOO EASILY INCLINED TO BELIEVE THAT THE PAYMENT OF OUR TAXES RELIEVES US FROM ANY AND ALL RESPONSIBILITIES IN CONNECTION WITH THE COMMUNITY IN WHICH WE LIVE.

We are inclined to forget that the many comforts and conveniences, both in a social and a business way, which we find in our community, are ours because of our association with our kind; with others who have invested their dollars and their efforts here, just as we have ourselves.

We expect our associates to be loyal to us and to our community and we, at least pretend, that we are loyal to them.

Are we loyal?

If we purchase our necessities and luxuries from mail order houses, we are not loyal to our associates in the community, because we then show no appreciation of their endeavors to supply the members of the community with these things. We are not helping our associates to maintain their establishments, which can be successfully operated only with our co-operation and support.

If we send our dollars out of town—to the mail order houses—we can only expect that the time will quickly come when we must send to the mail order houses for everything we require, because it is only natural that our local business houses will become discouraged if we do not patronize them and buy our merchandise from them, and go out of business.

Even now we note that the stocks of some local stores have been restricted to such things as must be bought to comply with emergencies, for the reason that our citizens send to the big cities, to the mail order houses, for so many of the goods which should be found on the shelves of our local stores. And it will be but natural for our business men to continue to restrict their stocks to the merchandise which our citizens do not find it convenient to buy from the mail order houses until we will awaken some day to a realization of the fact that we must send away for practically everything.

Then what will happen? We will discover that the mail order houses, finding little, if any competition for our business in our home community, will be the ones to profit, because we must then send to them for all we require in the way of merchandise.

It is not impossible, although it is admittedly improbable, that when the mail order houses shall have driven competition from the field by eliminating our local merchants, with our aid, foolishly tendered through our sending orders away from home, that there will be a readjustment of prices so that we must pay more for the things we buy. At any rate, we should be compelled to pay whatever prices the mail order houses might choose to charge us, with no competition against them to protect us.

At any rate, we are really trying to cut our own throats when we send our money away from home. Loyalty means more than a mere perfunctory appreciation of the efforts of our local merchants to supply our necessities, for it means that we are conserving our own interests and protecting ourselves against the exactions of monopoly. We are fighting for our own protection against the conditions which are bound to come unless we help our local storekeepers to maintain their business relations with us and to stand between us and the big mail order concerns which are lying in wait to take their business away and compel us to send to the big cities for everything we require in merchandise.

When we pay our dollars to our associates in the community, the storekeepers, let us do it cheerfully and with a feeling that we are providing for our future welfare. Let us forget the attractive and often misleading descriptions in the catalogues of the mail order houses and remember the kindly, friendly spirit of our local dealers who strive earnestly to merit our trade and who, when everything has been carefully analyzed, give us much better service and more satisfaction in the end than we can expect from the mail order house where every customer is known merely as a number and every shipment a mere mechanical transaction made at the convenience of an underpaid employe.

LOYALTY IS THE BEST POLICY.

BIGGEST CROP IN WORLD'S HISTORY

1915 Record In United States Surpasses All Others.

$1,135,100,000 FOR WHEAT

Of This Huge Sum It Is Said That the Farmers Will Get $960,000,000—All Products Except Apples Show Tremendous Increase In Bulk and Value. The Government's Figures.

YIELD, BUSHELS.

	Aug. 1, 1915.	Change from 1914 final.
Wheat	966,000,000	+ 72,000,000
Corn	2,918,000,000	+245,000,000
Oats	1,402,000,000	+300,340,000

Apples	205,000,000	− 48,000,000
Peaches	60,000,000	+ 6,000,000
Hay	*75,000,000	+ *5,000,000
† Pounds.	* Tons..	

The total value of this year's food crops in the United States will be over $5,300,000,000. Of this total wheat makes up $1,135,100,000, corn $1,750,000,000, oats $841,000,000 and hay $975,000,000.

Uncle Sam's harvest for this year would—

Finance the construction of [illegible] Panama canals, complete and ready for operation, at an estimated cost of $400,000,000 apiece.

Pay for the cost of the whole European war for more than three months.

Build the United States a fleet of 310 super-Dreadnoughts at $17,000,000 per ship.

The actual quantities of grain and forage involved would feed every soldier under arms in Europe and supply grain and forage for their horses for rather more than ten years and would similarly feed the entire United States army for nearly 2,000 years.

This year's wheat crop in the United States will probably form one-fourth of the world's total, the year's corn crop three-fourths of the world's total and the oats crop nearly one-third of the world's total.

No nation in the history of the world ever harvested a crop remotely to be compared, either in bulk or in value, with the harvest of grain and fruit which the farmers of the United States are preparing to gather. A large part of it will be sold to Europe's hungry and fighting millions.

Remarkable as was the crop of 1914, in itself far excelling all previous records, the reports of the experts of the department of agriculture show that the harvest of 1915 will exceed it in almost every particular. The apple yield alone among important products will fall below the 1914 harvest.

The wheat harvest this fall may possibly, for the first time in the history of the country, go above a billion bushels. The present and conservative estimates of the department of agriculture call for a yield of 966,000,000 bushels. On the markets experts on prices calculate this crop will stand the country in about $1,135,100,000. The farmers are expected to put $960,000,000 of this directly in their own pockets.

Due to Big Acreage.

The increase in the wheat crop is practically entirely due to the increased acreage under cultivation this year, as the average yield per acre is expected to fall slightly below that of last year, being put at 16.3 bushels to the acre, where last year's yield was 16.6 bushels to the acre.

The corn crop, like the wheat, is threatening to pass another memorable mark by turning out 3,000,000,000 bushels, the advance estimate now being 2,918,000,000 bushels. This is an increase over last year's yield of 245,000,000 bushels. Marketed at 60 cents a bushel, this crop will be worth $1,750,800,000 to the country.

The expansion of the corn crop is due at once to increased acreage under cultivation, and to a better yield per acre, the acre yield having been increased, in spite of the wet weather, from 25.8 bushels to 26.7 bushels. This crop will probably represent close to three-fourths the world's total production.

The oat crop, the third of the three great leaders, has increased over last year's record by nearly 25 per cent, the figures being for this year 1,402,000,000 bushels; for last year, 1,141,000,0000 bushels. Placed on the market the crop will bring, it is estimated, about $841,200,000. Thus these three crops alone represent a marketable addition to the nation's wealth of nearly $4,000,000,000.

Other Record Harvests.

The year's barley crop will, it is estimated, amount to 217,000,000 bushels, or 22,000,000 more than last year; the rye crop has been increased from 43,000,000 to 44,000,000 bushels; the rice crop from 24,000,000 to 30,000,000 bushels. Eighteen million bushels of buckwheat have been raised, as against 17,000,000 in 1914.

Smokers will be pleased to know that the department of agriculture estimates that there will be harvested 1,083,000,000 pounds of tobacco in the United States, where but 1,035,000,000 pounds were gathered in 1914.

LONDON MEAT PRICES SOAR.

Frozen Beef Up 74 Per Cent Since Last Year—Frozen Mutton Fifty.

Great increases in the prices of meat are disclosed in the report of the superintendent of the London central market. He says the supply of meats of all kinds for July, 1915, at the market totaled 29,702 tons as compared with 36,833 tons in July, 1914.

The price of fresh beef increased 43 per cent, while that of frozen beef increased 74 per cent. Fresh mutton increased 13 per cent and frozen mutton 50 per cent.

Her Picture Lands Position.

Picture spoke for itself when Pennsylvania girl applied for job in Metuchen (N. J.) high school, and board engaged her without reading her application.

The Russians can retreat and retreat without risk of backing off on to neutral soil.

A Judge's Decision.

Under the arbitration laws of Australia courts have the power to order that preference be given unionists by employers. In a recent case Judge Cussen of the arbitration court ruled: "I give preference to unionists in this case because I am convinced that the man who gives a considerable portion of his time each week and a considerable portion of his earnings each week to try to improve the conditions in which he lives is justly entitled to more consideration than the man who remains outside and will not give a portion of his time or a fraction of his money to better the conditions of himself and those who are dependent upon his earnings."

Pass Mothers' Pension Bill.

The Wisconsin state assembly has passed the mothers' pension bill, which compels all counties to appropriate aid for dependent children and permits them to be cared for by the mother's relatives or friends in the discretion of the county judge. A monthly aid of $15 for the first child and $10 for the second child is allowed.

Labor Temple Assured.

The Labor Temple Building association of Dallas, Tex., has signed a contract for the construction of a labor temple in the city. The building will have three stories and a basement and will cost $48,000.

NOTES OF LABOR.

The Pond Machine Tool company of Plainfield, N. J., was granted a wage increase of 10 per cent with the eight hour day to its 800 employees.

Wage differences between the elevated lines of Chicago and their operators will be arbitrated, just as the surface line difficulties were settled.

Officials of the American Federation of Labor will conduct an investigation of the capsizing of the steamer Eastland at Chicago with a loss of hundreds of lives.

Nearly 7,000 men benefited by general increases in wages announced by the Standard Oil company for its employees in its three plants in New Jersey. The increase averages about 10 per cent.

The Colt Firearms Manufacturing company of Hartford, Conn., recently announced a generous bonus to its employees, and the Locomobile Company of America, at Bridgeport, announced that it would share profits with its men.

HOME TOWN HELPS

PROPER CARE OF THE LAWN

Grass Plat Must Never Be Neglected If Home Is to Have a Proper Appearance.

One of the most important duties on the home place during the summer is the care of the lawn. There is nothing about a place that makes so much for general attractiveness as a well cared for lawn.

Many people make the mistake of keeping the lawn cut too close. In that case the grass roots are exposed to hot sun and drying winds during the summer. Cut the lawn frequently, but do not set the machine too close. To keep the lawn looking clean at all times have a grass-catcher attachment on the mower. A careful watch for weeds on the lawn should be kept. Cut them out well below the surface with an old knife as soon as they are large enough to be seen.

A roller on the lawn is advisable, but it should be used with care. Lawns that have been rolled for a long time are likely to become over-rolled; there is surface cohesion or close-packing of the top soil, which prevents the admission of air and healthy root development. The remedy is the use of the spiked tamper. A home-made one may be made by taking a piece of two-inch plank, some 12x12-inch timber and inserting four-inch spikes an inch and a half or two inches apart. Bore holes a little smaller than the spikes before driving them in, to prevent splitting the wood. Perforate the whole surface thoroughly with this, give a top dressing, lightly rake it in and water the whole thoroughly late in the afternoon.

HAVE TOP SASH SCREENED

May Be Considered Small Matter, But Is Always Advisable—Advice for Prospective Builder.

Don't forget that you may at some time want to open the top sash of the window, and that flies and mosquitoes are not particular as to through which sash they enter; therefore have the screen run from top to bottom of the window; to do this, side springs will be necessary in the screen frames, but they will cost little more than a screen which can be used only from the bottom sash and which is little better than no screen at all.

Don't forget that there will never be a better time to build than the present; materials of all kinds are cheaper than they have been for several years, and as soon as the European war is over there is sure to be a sharp advance in prices.

Don't say you can't build now because you have not enough money; if you have a little, the co-operative banks and building associations will loan you the balance needed upon terms under which you can pay for the house in monthly installments which would be no more than you would ordinarily be paying for rent.—Exchange.

The City Beautiful.

A one-time mayor of New York, George B. McClellan, said: "In a self-governing community, the ultimate object of the government is the happiness of the governed. Something more is needed to make the happy city than health and wealth and wisdom. The city healthy, the city wealthy, and the city wise, may excite satisfaction, complaisance and pride, but it is the city beautiful that compels and retains the love of people." When last the tree men of the South met at Riverside, in the music room of the famous Glenwood Mission inn, an illuminated sign stretched across the stage, which read: "Make your city beautiful and you will learn to love it."

Standards for Electric Service.

A representative of the United States bureau of standards has been in conference with the public-service commissions and managers of public-service corporations in various parts of the country. The information so obtained has been used in preparing the bureau's forthcoming circular on "Standards for Electric Service." Another representative of the bureau spent the entire month in the South, making measurements of street illumination and electric current in the street-lighting systems of a number of cities and towns. The results of the investigation will form the basis of a circular on street lighting.

Use Only Fire-Resisting Material.

There has been established in Cleveland, O., a society whose object is to disseminate information on the safe, sane and sanitary building of moderate-priced houses. This society recommends only such building materials as will resist the action of the elements, thus reducing to a minimum the fire hazard.

Shade Trees Improve Property.

It has been estimated that within the cities of New York state there are 20,000 miles of streets capable of sustaining a growth of 5,000,000 shade trees, which can be made worth $100,000,000 in increased property value.

Not an Expert in Ice.

"I'm so sorry the cream is sour," said young Mrs. Torkins.

"Everything in the refrigerator appears to be spoiled," commented her husband.

"It's the ice man's fault. He will bring around artificial ice, and I can't tell it from the genuine."—Washington Star.

It happens many times that we seem much deceived in others because we first deceived ourselves.

NEW AUTO RECORD SET

COAST TO COAST RUN MADE IN TWENTY-FOUR DAYS.

Mrs. Lillian Harris Has Moved Up the Mark for Woman Long Distance Drivers.

In making the coast-to-coast drive—New York to Los Angeles—in 24 days, Mrs. Lillian Harris of Redbank, N. J., is considered to have set a new record for woman drivers.

Carrying four other women as passengers, Mrs. Harris drove the entire distance of 4,950 miles without assistance. She reached her destination without mechanical or any other kind of difficulty. One of the things about which Mrs. Harris was particularly enthusiastic was the absence of fatigue during the tour, which she attributes to the smooth running of the car and the ease with which it was handled.

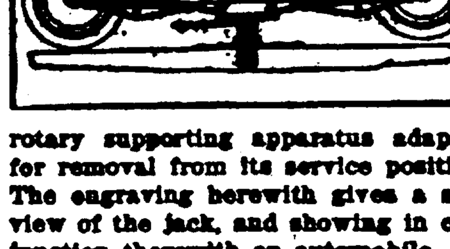
Out of the twenty-four days there were only four on which it was necessary to go into gears lower than high, the use of the intermediate and low gears being occasioned by encountering some unusually bad roads.

After the women have visited the San Diego exposition, toured southern California and have seen the San Francisco fair, they will begin the return trip overland, following the Lincoln highway.

ROTARY LIFTING AUTO JACK

Lifts Vehicle in One Operation and Provides for Swinging It Around on Own Axle.

This automobile jack, invented by a New York man, provides means for lifting a vehicle of the character indicated in one operation; provides means for rotating the vehicle about a self-contained center; and provides a



rotary supporting apparatus adapted for removal from its service position. The engraving herewith gives a side view of the jack, and showing in conjunction therewith an automobile, the same being supported in lifted position thereon.

Makes Poor Lubricant.

Frequent additions to the oil in the crank case are all right for a limited time only. When the oil gets saturated with mineral wear, and has also considerable gasoline which dips past the piston rings combined with it, it is a very poor lubricant.

MOVING BARS YOUR VOTE

If You Have Moved From District Where You Enrolled Last Year You Can't Vote at Primaries.

Now that primary day is a little less than a month away and some lively times are coming in political circles, the question of who is who when it comes to voting is agitating the minds of many seekers for office.

One of the questions which has been in controversy to some extent is whether a person who was enrolled last fall and who has moved out of the district in which he resided at the time of the enrollment is entitled to vote in the primaries. The law has been construed in both ways, some contending that a person who has moved out of the district has the right to vote while others interpret the law otherwise.

Attorney General E. E. Woodbury has, however, given an opinion which seems to settle all disputes in this regard. He rules that a voter who has moved out of the election district where he enrolled at the last election has no right to vote in the primaries this fall.

The impression that a voter who has moved has the right to vote seems to have grown out of the attempt which was made by the last Legislature to amend the Election Law so that voters who moved could vote. Considerable was said regarding the efforts of the supporters of the amendment at the time, but it was defeated and did not become a law. The only radical changes that were made at that time were in the matter of make-up and compensation of some election commissions and superintendents of election.

The ruling of Attorney General Woodbury seems to definitely settle the question regarding those who have a right to vote and those who enrolled but have since left the election district will not be able to participate in the primaries.

REVISION WANTED OF WAY TO MAKE MILK ANALYSIS

The Public Health Reports of the United States Public Health Service for August 13 publishes an article by Prof. H. W. Conn of Weslyan University, Middletown, Connecticut, on the discrepancies in the reports of analyses or supposedly identical samples of milk. This report, which is in considerable length, considers whether these discrepancies are due to the inevitable difficulties in bacteriological analyses, and the improvements which may be in the method of technique of such analyses.

In October, 1914, four of the large laboratories in New York City determined upon a co-operative test by which some of these questions could, if possible, be answered. The planning and co-ordinating of the whole series was in the hands of a referee, and the tests lasted seven months and involved something like 20,000 separate analyses by a variety of methods. The author concludes that the present standard methods of milk analysis are in need of revision; that individual analyses under the best conditions are subject to considerable variations so that no single count can be properly relied upon. The article contains 19 separate conclusions, and will doubtless prove of great value to those interested in the standardization of the purity of milk.

TOBACCO CROP TO BE BANNER ONE HERE

The inclement weather of the past few months has seemed to have no material effect on the tobacco crop in the vicinity of Baldwinsville, a large crop being assured. Yesterday several tobacco growers started harvesting the crop, and within a few days this year's growth will be put to drying.

MACHINIST AT GRANBY MILL SERIOUSLY ILL

Paul Latour, a machine tender at the Granby Paper Mills, was suddenly stricken with heart trouble yesterday afternoon and was removed to his home in West 2nd st. in a serious condition. Doctors Joy and Terpening have been in attendance and today Mr. Latour's condition was unchanged.

Cookies and cakes and all things baked by the Black company, fresh every day, at your grocer's. adv

CITY MAY COLLECT FOR STORAGE SPACE

Although the Board of Public Works expected action on the part of the Granby Paper Company, restraining the board from completing its plans in regard to Schenck st., no action has been taken by the company and the work of opening that thoroughfare for traffic is progressing this morning. Several loads of stone have been dumped upon the roadway and Superintendent of Works Ramsey expects to have the street ready for traffic in a few days.

The paper company used the street for storing its pulp wood until Tuesday, when a force of men employed by the city removed the wood in spite of the protest of Mr. J. Harry Howe, of the company. The Board of Public Works ordered the company to remove its wood some months ago, but the company declined to take any action. The city will attempt to collect for the labor of removing the wood.

LOCAL PEOPLE GIVEN FROGLEG DINNER PARTY

Last night a merry party of fifty local people journeyed to Syracuse where a frogleg dinner was given to the enjoyment of everybody and the especial delight of "Young Buck," one of the popular young men of this city, and who is said to be still suffering from ill effects. The dinner was given under the auspices of the M. W. A. of Syracuse.

Among those in the party were Mr. and Mrs. Oren Palmer, Mr. and Mrs. J. Guile, Mr. and Mrs. Middleton, Mr. and Mrs. John Barkley, Mr. and Mrs. Fred Blodgett, Mr. and Mrs. Patrick Lilly and Mr. and Mrs. A. M. Roy.

WEATHER CONDITIONS FAVOR CONCERT TONIGHT

Everything is in readiness for the concert tonight at East Side park by the Elks' band and the weather today has given those in charge of the affair confidence that the concert three times postponed, will at last be held. A number of popular songs and a march, "Greater Fulton," by F. Jess Norton of the band will feature tonight's concert.

I. O. G. T. PASS RESOLUTIONS

(Continued from Page One)

the musical exercises of those services.

We are notu nmindful of the courtesies extended by the Victoria Paper Mills and we hereby express our sincere thanks for the interesting visit to their works.

Last, but not least, is our desire to express, though we are inadequate to the task of expressing our thanks to the Chamber of Commerce. A unique experience was ours yesterday when the Secretary of the Chamber entered our halls, greeted us with an additional word of greetings and then courteously presented each one of us with a souvenir aluminum folding cup "Made in Fulton." We appreciate the appropriateness of the gift and especially because of its nearness to the historic Oswego. May we not at this time, while the occasion is so fragrant, to memory, pass a vote of thanks for this great courtesy and at the same time breathe a prayer that the time may speedily come when the aluminum cup filled with the filtered water of old Oswego shall be the favorite beverage of the city instead of the intoxicating cup filled with pilfered concoctions which debase, debauch and destroys humanity.

Fraternally submitted,
Harry G. Greensmith,
Will A. Simons,
Mrs. Mansfield.

How to Treat the Sting.

To alleviate the stings given by summer insects first remove the sting with a needle if it is left in the wound; then press a key over the stung part tightly, thus forcing out the poison. Wash the wound and apply a liniment made of finely scraped chalk and olive oil mixed together to the thickness of cream.

Brass Cleaning.

For brasses that have become tarnished an excellent method of cleaning is to use equal parts of vinegar and salt. Smear thoroughly with the mixture, then let it dry on, and when thoroughly dry wash it off with hot, soapy water and polish dry with a soft flannel cloth.

WARNER'S STORE

Why not trade there? You will find it one of the best family stores in town. While we do not advertise to give goods away, we will sell you first-class groceries on as small a margin of profits as is consistent with safe business. You know that some goods are so cheap in quality that they are dear in price. We deliver goods and take orders when requested and we give valuable presents with tea and coffee; also movie coupons with each cash purchase.

RICH BUFFALO MAN DEFENDANT

Action to Recover for Injuries Brought by Mr. Ernest Rowlee, Result of Collision in First Street.

Mr. Ernest Rowlee of Kings Highway has received an order signed by County Judge Coville, appointing him special guardian for his son, Ross Rowlee, who is 19 years old. This is the first step taken by Mr. Rowlee in his action for damages against Mr. Thomas Martin of Buffalo, who ran down Ross Rowlee about two months ago as the lad was riding his bicycle down North First st., near the Victoria Paper Mill. Mr. Martin is a wealthy resident of Buffalo.

Young Rowlee will sue on the ground that he has been seriously injured as a result of the accident. He alleges that Martin's car was running upwards of thirty miles an hour at the time of the accident and that he did not sound his horn. Martin, when held by the police, after Rowlee had been taken to the hospital, said he was running about 12 miles an hour, and had simply gathered enough speed to make the steep hill at the scene of the accident. Rowlee was riding his bicycle up the hill, witnesses said, and turned to see if a car was behind him, when the Martin car was very few feet away. As the boy turned his wheel slipped on some loose earth and he was thrown directly in the path of the car. Martin stopped the car after one wheel had struck the boy, according to his story, and Rowlee was lying between the front and rear wheels when picked up. The police were satisfied that Martin was not driving recklessly and he was allowed to go. At the time of the accident he was accompanied by his wife. Both are elderly people.

WAR ORDERS TO HELP A. W. CO.

John W. Stevenson, Fulton agent for the American Woolen Company, will leave today for Boston for the purpose of a conference with the directors of the company in the matter of contracts for the local mills. It is expected that his trip will result in increased activity at the local mills, although Mr. Stevenson had no statement to make forp ublication today.

The Fulton plant is once more resuming its usual time-schedule and many employes of the company who have not been working steadily for several months have been ordered to report during the past few weeks. One of the departments is working the usual hours, and two hours overtime in the evening, and the work already laid out for the various departments will insure operation on this basis for some months.

The company has secured a war contract for blankets and it is rumored that the conference today will result in the transferring of large orders to the Fulton mills, owing to the fact that some of the other mills are equipped to make blankets while the local mills are not. Mr. Stevenson will return to this city early next week.

Don't Hate the Rich.

"Don't hate a man because he has lots of money," counsels a Eureka philosopher. "Cultivate his acquaintance, and see if there isn't some honest way you can separate him from some of it."—Kansas City Star.

ALBANY GOSSIP DAY BY DAY

Chronicle of Events and a Forecast of What is Doing in Officialdom---Special Correspondence.

By Frederic T. Cardoze.

Albany, Aug. 26.—The third amendment to the State Constitution which has been adopted by the delegates to the Constitutional Convention and which had reference to commissioned officers of the national guard amends Section Six of Article Eleven. Like the two which have already been outlined it was presented by Delegate Latson. The amendment which the people will be called upon to consider is of no material importance except in its application to commissioned officers of the militia. The language of the amendment follows:

"The commissioned officers shall be commissioned by the governor as commander-in-chief. No commissioned officer shall be removed from office during the term forw hich he shall have been appointed or elected, unless by the senate on the recommendation of the governor, stating the grounds on which such removal is recommended, or by the sentence of a court martial, or upon the findings of an examining board organized pursuant to law, or for absence without leave for a period of three months or more."

The most material alteration to the section amended is that provision which reduces to thref rom six months the period of absence without leave. Thus if adopted by the people, there will be a closer link between commissioned officers and those immediately over them in authority since they can only absent themselves 90 days without permission.

According to the explanation made by Delegate Latson the purpose of the change is to bring the Constitution into conformity with the Federal regulation. The President is authorized to drop from the rolls of the army for desertion any officer who is absent from duty three months without leave and no officer so dropped shall be eligible for appointment or re-appointment, and no officer in the military or naval service shall at any time be dismissed from service except upon and in pursuance of the sentence of a court martial to that effect or in commutation thereof.

"By the adoption of the above amendment," says Delegate Latson, "our State Constituion is brought in perfect conformity with the United States regulations."

For the past few years the legislature of this state has disposed of numerous acts which have placed the citizen soldiery on a closer footing with the regular troops of the Nation. Notwithstanding the care with which the bills accomplished this end in part were drawn, certain technical features were omitted either because of lack of time or because it was found necessary to amend the State Constitution in order that their full force would be apparent. Delegate Latson with his several amendments has sought to alter the Constitution to meet the omitted requirements and the result of his group of propositions as affecting Section Six of Article Eleven, Section Five of the same article, etc., will be that minor yet technically important barriers may be removed from the Constitution in relation to the national guard.

In that there is a movement on foot to increase the strength of the national guard in this state, the Latson amendments are of particular significance at this time. Even if the plan to create additional regiments is abandoned, it is the general belief that the adoption of them will make it possible at any future time to move the wheels of military preparations more easily.

The Real Test.

"I don't see how that little Mrs. Grumpy can seem so well satisfied with her husband. He never kisses her or shows her any mark like that of affection."

"Maybe not, but he gives her spending money without her ever having to ask for it."—Baltimore American.

Keeps Busy Hustling.

Wedderly — Of all fool proverbs, "Marry in haste and repent at leisure," is about the worst. Singleton—Why, I always thought it was a fairly good one. Wedderly—Huh; just as if a married man ever had any leisure!—Indianapolis Star.

Mexico has about everything that could serve to complicate its affairs except an energetic peace movement.

PATHFINDERS FOUND THE BALL

Officials Agreed to Second Tilt to Redeem Honor---Lost In Fourth---City Hall in Gloom.

The baseball team composed of policemen and city officials went down to an ignominious defeat yesterday at the hands of the Pathfinder Boat Club aggregation by the score of 12-2. Not content with beating the coppers in the regulation nine-inning tilt, the boat club team suggested another game, insofar as the first contest was finished about five o'clock, and in a four-inning contest they again trimmed the policemen, this time by the score of 3-0.

The city team never had a chance and, although Captain Michael Bray was confident that his collection of ball tossers would snow the boat team under, his predictions were all quite wrong.

Painter was the city team's selection and he got his bumps in the first inning, and continued to receive rough treatment through the game. The Pathfinder nine drove in three runs in the first frame by bunching hits, while the city nine bunched errors, and in the third, fourth and seventh innings, Painter was the target for several hard drives.

Carrol did the twirling for the winners and he held the heavy-hitting city team safe at all times. According to the winners, the two runs secured by the city team were gifts, pure and simple, and only the generosity of Carrol made them possible.

Harry Scudder, who was on the receiving end of the Pathfinder battery, was the star of the game. His home run with three on was the big feature. Andy Brannigan was the mainstay of the city team and he made some sensational catches, including a one-hand stab of a hot liner at third base. His work in the field was gilt-edged at all times. Gordon also handled himself well for the city team at first base.

In the second game H. O'Brien, fresh from a long string of victories in the Adirondack league, took Carrol's place in the box and let the city team down with one hit in four innings. The Pathfinder lads still continued to find Painter easy.

After the game the teams and the guests to the number of 50, enjoyed a chicken dinner at the clubhouse and the return to the city was made early in the evening.

The line-ups:

Pathfinder—Carrol, p., cf.; Scudder, c.; Roberts, 1b.; Brown, ss.; Conkey, 2b.; Buell, 3b.; Gladman, lf.; H. P. O'Brien, cf., p.; Cornell, rf.

City Team—Gordon, cf., 1b.; Dyer, cf., 1b.; Bray, ss.; Pare, 2b.; Lewis, rf.; Guffey, lf.; Allen, c.; Painter, p.; Brannigan, 3b.

INGALLS CROSSING

Mrs. Louise Diefendorf of Buffalo is spending some time with her sister, Mrs. Martha Morgan.

* * *

Mrs. Chester Groat and daughter, Margaret, of Southwest Oswego, spent the last of the week with her parents, Mr. and Mrs. F. S. Thompson, also visited her brother, Harry, at Solway.

* * *

Mrs. Warren and little daughter were over-Sunday guests of her sister, Mrs. John McCarthy.

* * *

Miss Florence Holmes is expected home today from a visit to Buffalo.

* * *

Miss Lena Mae Carrier spent several days last week with her grandmother, Mrs. W. H. Carrier.

* * *

Mrs. Eugene Holmes returned on Monday evening from her vacation at Ilion.

* * *

Mr. and Mrs. Harry Vickery are spending the week camping at Hinmanville.

* * *

A number from here attended the Farmers' picnic at Long Branch.

* * *

Miss Gertrude Holmes entertained the "Campfires" at the last course of their progressive supper Monday evening. All report a fine time.

* * *

Our community was well represented at the fair in the cattle, sheep and swine pens. Ralph E. Owen carried away seven firsts and two second prizes on Tunis sheep. Three firsts and two seconds on grade Holsteins. Jesse I. Carrier won first ribbon on his aged Holstein sire, "Smithdale Segis," also a good share of ribbons on other classes of his Holsteins and on swine.

Where Style Meets Perfect Taste

The charm of style originality lurks within the folds of each of these Printzess coats and suits. Stylish they are, but each is conceived in such good taste, each tailored with such care that the completed garment by its very perfection sinks to a quiet unobtrusiveness, while it casts about the wearer an indefinable air that we recognize as true refinement.

Come in, try on some of the new Printzess models for Fall and a glance in the mirror will show you how this characteristic of Printzess garments will enhance your own appearance.

The first of the New Fall Suits are here, and ready for your inspection—

WE WANT TO SHOW YOU

There Is a Military Truth:

"Modern Fortifications Crumble Beneath Modern Guns"

The fortification built up by the Mail Order Houses will not stand the fire of the 45 centimetre directed at them by the series of Home Trade Boosts appearing daily in this newspaper. Here as one specimen:

WHOM DO WE SUPPORT?

WHAT if we should go to one of our local storekeepers and say: "Here is a ten-dollar bill; I want you to buy for me such-and-such an article, made so-and-so, this color, that size, and deliver it to me at your convenience—say 30 days."

Along comes another townsman, and another, still another, until 50 of us, all living here in our community, shall have placed in the hands of the storekeeper a sum amounting to a thousand dollars, with similar instructions.

We would then have treated our local storekeeper with the same liberality as we, who have been buying of the mail order houses, have treated these monopolistic concerns. We would have then supplied him with cash capital sufficient to buy what we ordered and give him a fair profit on his deal.

Yes, we would thus enable him to take a trip to the city, buy from the manufacturers the articles desired, ship them to us, spend a day or two enjoying himself if he so pleased, and leave him a fair percentage of profit over and above the cost of the articles and his expenses.

DO WE DO THIS? YES, WE DO—NOT.

But this is exactly what we do with the mail order man in the big city. We send him the money in advance. He has the use of our cash for the purchase of his merchandise. He sends us whatever he chooses and if we do not like it we can whistle for our money.

He takes our money and buys that which we have ordered. Then he may take a trip to Europe if he so wishes, all at our expense.

Few of us realize that we, the people outside the big cities, furnish the capital for the conduct of the big mail order houses. We do not stop to think that it is our money which is building those great structures which are the pride of Chicago and some other cities. We do not stop to consider that we are the capitalists who are supplying the sinews of war against our own local business men.

JUST THINK OF IT—DIVIDENDS OF FIFTEEN MILLIONS OF DOLLARS PAID TO THE BIG MEN IN THE MAIL ORDER BUSINESS AS A PROFIT EACH YEAR ON OUR MONEY.

We send the cash in advance to them. They require practically no investment except for the printing of their catalogs and other stationery. They are doing their business on the money which we, poor, deluded country dwellers, send to them, when we are only cutting our own throats and helping to diminish the prestige and strength of our local tradesmen.

What would be the result if we should hand our dollars, in advance, to our local storekeepers and give them the same chance to make profits, without investment? What would be the effect on our community?

It would mean prosperity for us all. It would mean more taxes to be paid by our business men, improvements of a municipal character, better school facilities, better street lighting, better paving, etc.

Of course, our local storekeepers do not expect us to do business in this way. Yet why should we not? We do it with the mail order houses and when we are fooled we take our medicine because we are ashamed to let our friends know how we have been buncoed.

But we should do this—we should give all of our business to those men who have made their investments in our town, who are trying to build up the community, who are paying the taxes and who are helping us to increase the value of our real estate holdings. We all know that the value of our houses and lots, here in town, will be increased as the community advances in prosperity, and the only way for the community to advance is for our business men to do an increased business.

WE SHOULD PATRONIZE THE MEN WHO ARE TRYING TO HELP OURSELVES. We all hope to advance. We all hope to become prosperous.

When we buy from the mail order house we are helping monopoly to put our storekeepers out of business. When we send a dollar to the big city, instead of spending it at home, we are depriving our children of some of the opportunities for education which they are entitled to.

Let us spend our dollars here at home, with the merchants who are trying to keep up the schools and other local advantages which we cannot have for our children unless we have a prosperous community.

Let us not forget that the mail order man does not pay any of our taxes in this town. The taxes are paid by the local business men, at least the greater proportion, and the more business we do with them, the more taxes they must pay.

LET US WAKE UP TO A CONSIDERATION OF OUR BEST INTERESTS.

LET US SUPPORT THOSE WHO HELP US, AND OUR CHILDREN.

The above is only one of the features printed in

The Home Paper of Fulton

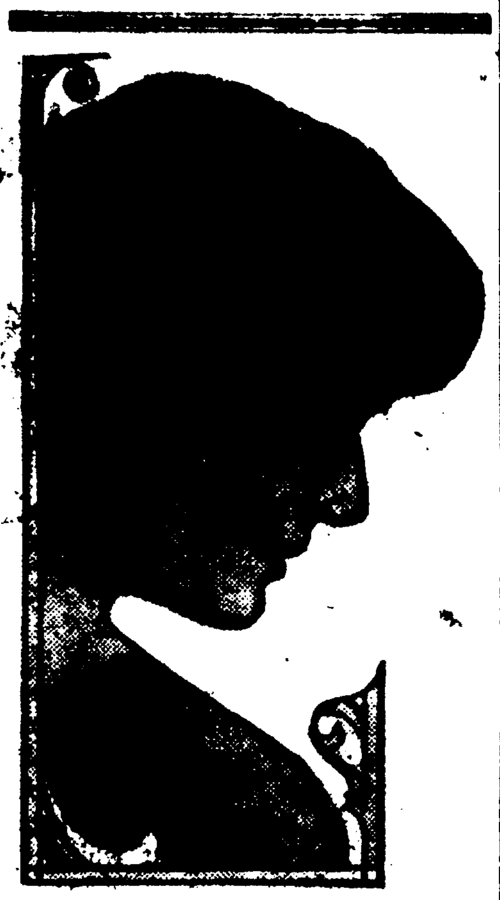
GAIL KANE



Who is the Most Beautiful Girl on The Screen?—Many Say Gail Kane.

Every now and then the old argument breaks out afresh as to who is the most beautiful girl acting in motion pictures. Rival film manufacturers through their various publicity men argue vehemently as to the merits of their respective candidates, for on a delica'e question like this, bias is the publicity man's middle name. Let us whisper it gently,—some of those very ladies whose charms are so loudly extolled are not the raving beauties in real life that we are led to believe. In the case of one of them, however, "the half has not yet been told," as the Queen of Sheba said,—Miss Gail Kane, who stars in "Via Wireless," the well known play by Paul Armstrong and Winchell Smith, now being put into pictures by Pathe, is a stunning beauty whose charms need no qualification.

Miss Kane was born in Philadelphia and if there were many more at home like her, Philadelphia would soon have a vast increase in its male population. Tall, beautifully figured, splendidly gowned and with a peaches and cream complexion mere man can be reckoned upon to follow her in droves like the famous rats of the Pied Piper of Hamlin.

This is Miss Kane's first engagement with Pathe. She comes to her picture work with a splendid reputation gained from leading parts in "The Model", "Anatol", "Seven Keys to Baldpate", "The Miracle Man" and "The Hyphen", all Broadway successes.

CLIFTON CRAWFORD

Noted Broadway Star Joins Pathe Forces—To Star in "The Galloper."

Another famous Broadway favorite has cast his lot to moving pictures. Donald Mackenzie announces that he has signed Clifton Crawford to play the lead in "The Galloper", the great Broadway success of Richard Harding Davis, which is now being produced for Pathe at their Jersey City Studios.

Melville Stewart, who is now playing in the "Follies of 1915," will support Mr. Crawford. The rest of the cast is also decidedly strong.

Mr. Crawford held off a long time before consenting to sign up for the silent drama, but it was the tempting contract offered by Mr. Mackenzie which caused him to decide to enter the field.

Born of actor parents in Edinburgh, Scotland, Mr. Crawford took up the stage at an early age, and after appearing in small parts for some time, became a great favorite in the English music halls. Later he came to America and played in vaudeville, where he always appeared as a headliner. Later he appeared in such noteworthy successes as "The Peasant Girl", "The Quaker Girl", and "The Three Twins." After starring for three seasons in the last named production, he made a tour of the world, and thereby earned the sobriquet of "the man who put a belt of smiles around the world."

Mr. Mackenzie's production will be released in the early Fall, and will be in five reels.

It is Pitched So High That Only Sharp Ears Can Hear It.

The high pitched squeaking or whistling of the shrew is a curious sound and frequently acquires quite a song-like character. More often, however, the voice of the shrew is raised in anger, for it is a pugnacious little animal, and the males have fierce combats in the spring of the year. It is a curious fact that many people are unable to hear the shrew's squeaking, not that the sound is not loud enough, but because it is so highly pitched that only sharp ears can record the vibrations.

Though often spoken of as a mouse, the shrew is of an entirely different species, being insectivorous and having sharp teeth on each side of the mouth instead of front teeth, suitable for gnawing, such as are possessed by mice and other rodents.

Though it exists in very great numbers and can very frequently be observed, much remains to be discovered regarding the life of this little creature, an Italian species of which is our smallest known mammal. It is still a mystery why so many dead shrews should be found about the roadsides and pathways. They are fearless little animals, and even when disturbed in their spring journeys from one place to another they do not allow themselves to be put out of their course by a trifle. —London Spectator.

SIX MEALS A DAY.

This Husky Old Laborer Had a Fairly Healthy Appetite.

Undoubtedly it is better as a general rule to take food sparingly than to eat to repletion, and there are some people who even advocate living on one meal a day and who practice what they preach. But there was no "one meal a day" nonsense about the aged Sussex laborer whom E. V. Lucas met. Thus be described his daily round and common task:

"Out in the morning at 4 o'clock, mouthful of bread and cheese and pint of ale; then off to the harvest field, ripping and moen (reaping and mowing) till 8; then morning breakfast and small beer—a piece of fat pork as thick as your hat is wide; then work till 10 o'clock; then a mouthful of bread and cheese and a pint of strong beer (forenooner—'farnooner's lunch,' we call it); work till 12; then at dinner in the farmhouse, sometimes a leg of mutton, sometimes a piece of ham and plum pudding; then work till 5; then a nunch and a quart of ale (nunch was cheese, 'twas skimmed cheese, though); then work till sunset; then home and have supper and a pint of ale."—London Chronicle.

Arithmetic by Hand.

We shall never be in danger of forgetting that our ancestors did their sums on their fingers so long as arithmetic retains the word "digits." But modern civilization knows nothing of the elaborate developments of this method. It takes a Wallachian peasant to multiply 8 by 9 on his hands. This is how he does it: The fingers of either hand, beginning with the thumb, stand for the numbers from 6 to 10. So the ring finger of one hand and the middle finger of the other are stuck out to represent 8 and 9. Counting the fingers remaining on the side farthest from the thumbs, he finds them 1 and 2 respectively, and 1 multiplied by 2 gives him the units of his product—2. Then he counts from the thumbs to the stuck out fingers inclusive, finds them 3 and 4, adds these and gets 7 for his tens. Answer, 72. All this to avoid knowing the multiplication table beyond 4 times 4!

Napoleon's Temper.

A story is told of a sudden rage into which Napoleon I. fell one day as he was at dinner. He had scarcely partaken of a mouthful when apparently some inopportune thought or recollection stung his brain to madness, and, receding from the table without rising from his chair—his small stature permitted that—he uplifted his foot—dash went the table, crash went the dinner, and the emperor sprang up, intending to pace the room. Quick as a flash his waiter scratched a few magic symbols on a bit of paper, and the emperor's check had grown more than double. Napoleon appreciated the delicacy of his attendant and said, "Thank you, my dear Dunand," with one of his inimitable smiles. The hurricane had blown over.

An Old Verb.

To laze is an old verb. In Samuel Rowlands' "Martin Markall," 1610, we are told that "loyterers laze in the streete, lurke in alehouses and range in the highwaies." The word occurs, I believe, in some of Mortimer Collins' lyrics:

But Cupid lazeth 'mongst the faiery lasses,
Whose clere complexion he oft sweareth passes.

—London Notes and Queries.

Anchovies.

The delicious little fish called the anchovy is found in large quantities in the Mediterranean sea and also on the coasts of Spain, Portugal and France, where extensive fishing operations are carried on during the months of May, June and July.

A Far Cry.

Ella—Miss Antique says she wishes she could step to the phone and call up her happy college days. Bella—If she did she'd have to employ the long distance phone.—Florida Times-Union.

Nothing but the harmony of friendship soothes our sorrows. Without its sympathy there is no happiness on earth.—Mozart.

HEAR CALF MUSIC

Sad-Eyed Heifer Rips Off Selection After Months of Practice.

Winston, Conn.—A calf with a soul, is today the subject of ground and lofty conversation in Winsted. The calf is the property of Mrs. Minnie Snell of Warren. The story of how the calm came into the musical life of Winsted could hardly be stranger. About four months ago Mrs. Snell was seated at the piano playing Melachrino No. 3, when the calf, whose given name is Elizabeth, came to the window near the old trellis and looked

The Calf Was Tapping the Notes With Her Nose.

in. As the melody flowed on, Elizabeth swayed on her hoofs, sighed deeply and said as if from the depths of a troubled soul, the following, to-wit:

"Moo!"

Mrs. Snell turned to the window, and the expression she saw on the animal's face fascinated her. It was as though the mild-eyed calf had seen some cruel farmer placing a gallon of water into a pint of milk for the New York trade.

Two days later Mrs. Snell heard someone picking out notes on the piano. Startled, she ran into the parlor, and there, far from the maddening cowlick, was Elizabeth. The calf was tapping the notes with her nose.

Since then the calf has been allowed to come into the house over a patch of linoleum every day to practice. The other day Mrs. Small gave the first recital for a few friends. It was awful.

PULLS BOY FROM THE TRACK

Brakeman Climbs on Cowcatcher and Makes Rescue at Risk of Life.

Altoona, Pa.—Harry E. Duey, thirty-five, of Tyrone, a brakeman on the Tyrone division of the Pennsylvania railroad, is to be recommended to the Carnegie commission for a hero medal.

Duey was the front brakeman on a heavy freight train which was coming down the mountain from Snow Shoe. When the train shot around a curve at Clarence, a mining village, Engineer A. H. Rowe saw a boy playing on the track. He knew it would be impossible to stop the train in time to save the child.

His cry was heard by Duey, who was in the engine cab. Duey scrambled out on the running board along the boiler and in a flash was at the pilot. Springing lightly to the cowcatcher he was just in time to snatch the lad from death. The rescued lad is a son of Jack Yancy, a miner at Clarence.

KILLED SNAKE BY STRATEGY

Copperhead Enlivens Harvesting by Wriggling Out of Sheaf.

Rehrersburg, Pa.—While unloading wheat in the barn of Edward Bickel, in Tulpehocken township, George B. Gerhard and William E. Oxenreider saw a copperhead snake three feet five inches in length squirm from the last sheaf tossed from the wagon. The snake landed on the back of a horse, fell on the theshing floor and escaped under a grain barrel.

Then the problem arose as to how to get the snake killed. Finally Oxenreider lifted the barrel just the least bit and the snake came forward ready to bite him. Bickel jumped to the floor until Oxenreider could run to the wood pile, get an ax and chop the head of the reptile off.

Hoarded Money in Windmill.

Pleasant Hill, Mo.—Shortly before his death, recently, John Kiersey, eighty-six years old of this place, told a niece to look in the windmill tower. When the tower was searched, $1,500 in cash was found.

Girl Died Trying to Become Slim.

Stanford, Conn.—Miss Mabel Ridabock, who suffered an extreme loss of blood in an effort to become thin, died here, while her father was preparing to sacrifice blood in a transfusion operation.

Woman's World

The Exquisite "Little Lady" Who Interprets Barrie's Plays.

MISS MAUDE ADAMS.

You have seen her—seen her from "the front," as they say in stageland—perhaps as a little lad in green breeches, with a charming, wistful face, in his right hand Pandean pipes and whom the members of his band called Peter Pan, or, perchance, as a gypsy girl with mischief in her eyes and rowan berries in her hair, yclept Lady Babbie, or, again, it may have been as one called Phoebe—Phoebe of the ringlets—whose home was in Quality street. Or was it as the patient Maggie Wylie trying—oh, so hard—to implant just one little spark of humor in the hopelessly humorless John Shand? Besides all these names and more which were thought out by a little man of Thrums and sent across the Atlantic to be made into very real people, she who created those characters so dear to playgoers has still another name.

It's Maude Adams.

Maude Adams and James Matthew Barrie—they are a unique and joyous combination. It scarcely seems that either could get along without the other. To interpret Barrie's subtle and delicious humor, with its ever present strain of tenderness, needs just such a winsome personality as the "little lady," as those who sit "in front" love to call her. And, without the Scotch playwright to build for her the most fascinating roles in the world, what, indeed, would Maude Adams do?

But, though it is Barrie who builds the roles and writes the whimsical dialogue of those who people his plays, it is Maude Adams who sees to it that these characters speak those lines and do those things which make them fully as real and quite as human as they were in the mind's eye of the man who conceived them. And this is not an easy task.

"It is my contemptible weakness," writes Barrie of himself, "that if I say a character smiled vacuously I must smile vacuously; if he frowns or leers, I frown or leer; if he is a coward or given to contortions, I cringe or twist my legs until I have to stop writing to undo the knot. I bow with him, eat with him and gnaw my mustache with him. If the character be a lady with an exquisite laugh I suddenly terrify you by laughing exquisitely. One reads of the astounding versatility of an actor who is stout and lean on the same evening, but what is he to the author who is a dozen persons within the hour? Morally, I fear, we deteriorate. But this is a subject I may wisely edge away from."

And so after Mr. Barrie has played his part as dramatist Miss Adams' work has but begun. How she sets about her task is best told by the director of her stage:

"When Miss Adams first receives a new play from Mr. Barrie she reads it over many times. She commits it to memory in its entirety. When this is accomplished she begins to visualize its characters from the most important to the most insignificant. Mentally she pictures first the segregated situations and then the entire action of the play. Her conception is always subject to subsequent changes, but, as a rule, she adheres to her original ideas. When she has mastered the play in the manner described the rehearsals are got under way. But these are conducted along lines quite different from the usual method pursued in stage work. Instead of dealing with the cast as a whole Miss Adams rehearses the principal characters individually. While this work is going on the minor characters are being taken care of by stage directors, who, for the sake of coherency, impersonate the more important, yet absent characters. Then comes the day when a complete rehearsal is called and the remarkable part of this performance is that every detail of action and every part of the action fits together as splendidly as though the complete cast had been working side by side for a month. And the satisfying result is that enthusiasm has not been dulled nor illusion dispelled by long and tiresome sessions where a more apt individual would often be made to wait upon one not so quick to perceive a given direction."

Care of Books.

To preserve books from becoming musty and possibly moldy in moist weather place a few drops of oil of lavender and Canadian balsam in a back corner of each shelf. This will not injure the bindings of leather books as sulphur compounds do, but helps to preserve the bindings.

HOW TO KEEP YOUR PIANO.

Some years ago a piano expert said that it is a mistake to keep a piano tightly closed. The fall board should be left partly closed when one goes away for the summer. This keeps out the greater part of the dust and, what is more important, permits a circulation of air and helps to keep the strings in better condition. He says that the best way to prevent moths from getting into a piano is to have the piano blown out by a professional piano tuner occasionally in order to keep the dust out. Moths will attack new pianos as well as old ones. It is not always possible to guard against them, but the dust can be kept out by a blower.

Every piano dealer nowadays has piano blowers to sell, and these little bellows arrangements are not expensive. One can be bought for $3. Ordinarily the tuner will blow out the dust for 50 cents. On a grand piano the owner can use the bellows herself, but it is wiser to have a professional use it on an upright piano. If your piano is a player piano you can get a kinetic blower, which will cost you about $5 and which you can operate yourself.

SOUR CREAM.

How to Utilize This Valuable Food In Various Ways.

The idea with most women is not "What can we do with it, but instead tell us some new ways of using it profitably." Many of us have used sour cream for griddle cakes, biscuits of various kinds, cakes, cookies, shortcakes, puddings, salad dressings, meat sauces, fish sauces and, freezing it with fruit juices, have made most delightful ice cream. And did you ever use sour cream in place of milk in preparing a white sauce for codfish? If not, you have a treat in store. Do not cook the cream too long to allow it to curdle the mixture. But you ask for recipes, and here are just a few:

Sour Cream Cookies.—Take a cupful of sugar and a cupful of molasses to two cupfuls of rich sour cream, add two well beaten eggs, a teaspoonful of soda and one of baking powder, tablespoonful of ginger, a dash of cinnamon and cloves and enough flour to roll. Let stand on ice to chill before rolling out.

Chocolate Cake.—Take a cupful of brown sugar and half a cupful of sour cream, half a teaspoonful of soda, one egg well beaten, a cupful and a half of flour sifted with a teaspoonful of baking powder. Dissolve two squares of chocolate in half a cupful of boiling water and add to the cake the last thing. Flavor with vanilla and bake in two layers.

Cabbage Salad.—Shred cabbage very fine and plunge into cold water to crisp. Drain and dress with sour cream, sugar, salt and, if not quite sour enough, a very little vinegar may be added. This is a salad which can be enjoyed at any meal with almost any combination of foods.

Sour cream when mixed with fruit juices and sweetened will freeze smooth and velvety. Orange juice with sour cream and sugar to sweeten is a combination especially tasty and delightful. Mix and freeze as an ice cream. Raspberry, grape juice or peach juice are others. Lemon is such an acid with the sour cream also an acid that the result is not so good unless a sour frozen dish is desired.

Hints For Traveling Baby.

The two most common mistakes made in traveling with children are with respect to their clothes and their food. In the hot summer weather, for a long journey, the little child should be dressed only in the sleeveless gauze shirt and diaper, with one thin outer garment. A sleeveless low necked slip of white china silk is best, since it is much cooler than cotton, sheds the dust and can be washed out in the basin when soiled.

It is well to change the baby's clothing as soon as the journey begins in order to have the regular outfit clean to put on when leaving the train. The little baby may go barefooted, but an older child should have barefoot sandals to protect the feet from the cinders scattered over the floor.

Mothers should observe the same regular hours for feeding their children as at home. One of the worst things she can do is to give the baby cakes, candy, bananas, sweet crackers and the like, as so many mothers do, to keep him quiet in the train. This kind of irregular feeding with unsuitable foods, together with the heat of the train and the fatigue and excitement of traveling, is very apt to upset the baby and make him irritable and restless.

Use a patent bottle to keep baby's milk cool, not warm. The porter will bring you a bowl of hot water to warm the feeding at the regular hour.

How to Renew Worn Tablecloth.

Buy four yards of torchon insertion at a sale; cut it in halves; then cut four squares from the best part of the tablecloth and join to insertion, using the selvages or outside edges for center of cloth, your insertion, of course, to cross the center. Trim edges and hem. Result, a very good looking tablecloth.

Another way is to cut carefully all around, hem it by hand and sew a wide torchon lace edge on the edge, making a round tablecloth to fit the table. The four corners cut from the above make four small hemstitched napkins.

A NOVELTY IN COMBINATION GARMENTS.

6373

Made so that corset cover and chemise can be worn together or in one piece is this newest bit of lingerie. The corset is slipped between the chemise and corset cover.

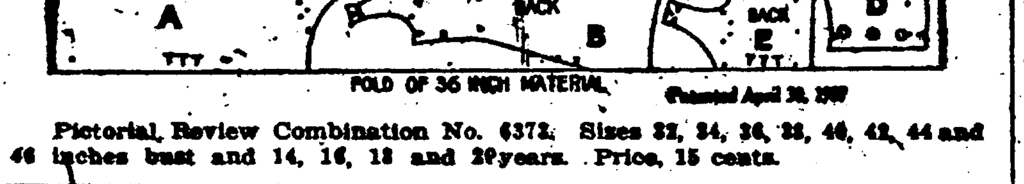
Have you seen this most interesting bit of lingerie of the season? It is a combination undergarment consisting of an envelope chemise and a corset cover. It can be slipped over the head very easily, and the garments may be worn separately, if desired. A round neck-line for the corset cover or straight upper edge with shoulder straps is provided. Lace frills are used for the neck and armholes, while the lower edge of the chemise is trimmed with a bit of hand embroidery.

If made with shoulder straps the combination, in average size, requires 2⅝ yards 36-inch material. For separate chemise, 2¼ yards 36-inch lawn will be needed and for separate corset cover ⅞ yard 36 inches wide.

The corset is slipped between the chemise and corset cover, as shown in the accompanying illustration.

Before cutting out the garment the lawn, linen, batiste or whatever material is used for the model is folded and the chemise front is placed into position first on a lengthwise fold. Next comes the back of the chemise, laid on a lengthwise thread. Opposite this is the piecing. Along the fold, next to the back of the chemise, the back of the corset cover is placed and to the right of this is the corset cover, on a lengthwise thread.

If desired worn as a combination the corset cover will have to be arranged on the chemise, center-fronts, center-backs and upper edges even, omitting the shoulder strap on one garment; after which the upper edges are stitched together.



Pictorial Review Combination No. 6373. Sizes 32, 34, 36, 38, 40, 42, 44 and 46 inches bust and 14, 16, 18 and 20 years. Price, 15 cents.

For the Children

A Sweet Little Girl at the Flower Show.

Photo by American Press Association.

Not long ago there was held at one of the big New York hotels a flower show that was attended by many society folks. Among the visitors was Miss Ruth Atkins, a sweet little miss, whose portrait is shown herewith. Ruth was greatly pleased at the beautiful display of flowers, and many of the people at the show thought Ruth was the most charming rosebud of all the gorgeous display. As she was going about with her mamma the camera man came along, and he was so struck with Ruth that he snapped her picture then and there. If by chance Ruth should see her picture in the paper she would be a surprised little girl.

Kick and Run.

This is a boy scout game and is played in a clearing or open field with a regular association football or basketball. One scout takes his position in the clearing, and the rest seek cover as near as possible. With a scoutmaster acting as umpire, the ball is rolled into the open space and the scout inside immediately kicks it out and rushes out to tag any other scout he can find and catch, but directly the ball is kicked back into the clearing he must return and kick it out. The umpire watches the ball and as soon as it comes to a standstill inside the clearing blows his whistle to indicate the fact. While the one scout is returning to kick it out the others may change their positions or seek fresh hiding places.

The scouts who are caught remove their scarves or wind a white handkerchief around one arm and then help their captor to catch other scouts. They must not kick the ball, but must return to the clearing each time the whistle is blown. The winner is the scout who is caught last. In an open field the "clearing" is indicated by a white mark on the grass or by corner posts and scouts have to elude capture more by dodging than by seeking cover.

As a variation successive patrols may "hold" the clearing and endeavor to capture the rest of the troop in the shortest posible time. The patrol leader only is allowed to kick the ball out of the clearing. The winning patrol is that which takes the shortest time. In this variation the scouts who are caught do not take any further part in the game.—Scouting.

Wall Scaling For Scouts.

The exciting and trying sport of wall scaling is being taken up by many of the more aggressive troops of boy scouts. Wall scaling looks daring, appeals to the eye and gives opportunity for snappy contests. Teamwork counts and fumbles are glaring. Altogether, to the troop which has or can make the necessary equipment wall scaling is well worth the effort. There are few exercises so thrilling with so little of the element of danger of mishap. Many troops are practicing wall scaling at this time with a view to putting on exhibitions at various public gatherings, encampments and the like this summer.

Girlie's Troubles.

My name is little Albertine,
But mother calls me Tommy
Because my clothes are never clean,
My hands are always gummy.

She stops me racing through the house,
She says I make a racket;
Declares she'll dress me in a blouse
And put on pants and jacket.

Because I climb up fence and trees,
Make mud pies in the gutter,
Forget to say "Thank you" and "Please"
When I want bread and butter.

And after I am bathed at night,
She prays, "Lord keep her cleanly,"
But daddy holds me close and tight
And whispers, "Daddy's Queenie."
—Philadelphia Record.

With us it is a question what to do with our ex-presidents; for Mexico, what will the ex-presidents do with her.

Baked Pea Soup.

Baked pea soup is recommended as very rich in flavor. Cut fine one pound of shin of beef, add half a pound of veal trimmings, a pint of split peas, two carrots, diced; two onions, sliced thin, and one ounce of rice. Season with pepper and salt, adding four quarts of water and one finely chopped stalk of celery. Put the whole in a jar, cover closely and bake for four hours.

THE VALUE OF SALT IN THE BATHROOM.

Salt is not only a necessity in the kitchen, but it will work wonders in the bathroom. It is the cheapest and best of nerve tonics and the finest of skin lotions. Salt is to beauty in the bathroom just what it is to food in the kitchen. In fact, it is the solution offered by nature to most of our beauty and health queries.

Every one has heard of the splendid strengthening effects of salt water bathing, but few think of taking salt water baths in their own tubs. Sea salt can be bought in any drug store, and a large bag should be kept on hand in the bathroom.

When you come home tired out and nervous try a salt bath. You will find it invaluable for weakness and nervousness, and you will find that a month of the home salt bath treatment will take away all traces of that "tired feeling." In fact, the woman who bathes in salt water two or three times a week feels too vigorous and strong ever to know that tired sensation.

If the skin on the face or throat is flabby you will find a salt massage of the greatest benefit. This will make the skin firm and strong. Just take a half handful of salt and rub it into the skin—not too hard, for the roughness of the salt will redden and irritate the flesh, but gently and evenly. After a soft but thorough salt massage wash the face off with cold water.

The action of the salt, whether used dry or in the bath, is to enliven the circulation and to stimulate the nerves. This in turn makes the skin clearer, the color better and the general surface firmer and smoother.

Salt as a tooth powder is also at its best, for it whitens the teeth and hardens the gums.

When salt is such an aid to health and beauty and is so very cheap every bathroom should hold it.

FALL CANNING.

Practical Hints on How to Preserve Fresh Fruits.

Generally speaking, preserving means the cooking of fruits in an equal weight of sugar, long enough for the fruit to keep without being air tight. Canning may be done with little or no sugar and just enough cooking to thoroughly heat the fruit, but air must be excluded.

The same general directions apply to each process.

Needed Articles.—Granite or porcelain lined kettles or stewpans, with bales or handles and lips for convenience in pouring.

Perhaps the two quart size is most used, but if one can afford it several sizes will be found very convenient.

A small, sharp steel paring knife or, better still, a silver plated fruit knife ground down to a fine edge, expressly for fruit paring. Other necessary articles—wooden spoons—some with slits, a wire spoon, silver spoons, large and small, a skewer, scales for weighing, a hair sieve, a tin strainer and a supply of cheesecloth.

Preparation.—Observe utmost cleanliness of hands, utensils and fruit. Avoid anything that tends to lessen color or flavor. Use only sound fruits and vegetables. Clean and scald jars and covers. Use new rubbers every season.

Blackberries.—Half cupful sugar to each pint jar, boil ten minutes.

Currants.—Three-fourths cupful sugar to each pint jar, boil ten minutes.

Huckleberries.—One-half cupful sugar to each pint jar, boil ten minutes.

Pineapples.—One-half cupful sugar to each pint jar, boil ten minutes.

Pears.—One-half cupful sugar to each pint jar, boil ten minutes.

Apricots.—One-half cupful sugar to each pint jar, boil five minutes.

Peaches.—One-half cupful sugar to each pint jar, boil ten minutes.

Cranberries.—One cupful sugar to each pint jar, boil forty-five minutes.

Crabapples. — Three-fourths cupful sugar to each pint, boil thirty minutes.

How to Utilize Odd Bits of Soap You Have Saved.

Save the odd bits of toilet soap, the more expensive and highly perfumed ones as well as the ivory. When you have a good collection let them simmer in a little water on the back of the stove. When quite dissolved add violet water or any desired perfume and a few drops of lemon juice. Pour into desired mold and allow to harden. A delightful perfumed soap will be the result. Treat all bits of yellow common kitchen soap by themselves. You will be surprised to see how much good soap you would have wasted had you thrown away the useless bits.

How to Cure Freckles and Not Injure Skin.

Many women acquire what are called summer freckles that appear almost immediately on exposure to the sun and disappear a little while after the victim stays in the house.

The best treatment for these summer freckles is to bathe them frequently with pure soap and water, using a good face brush and rubbing the freckles until they are almost irritated. This friction excites the circulation beneath the skin. A good cold cream should be applied after the scrubbing.

TODAY'S FASHION NOTE

A trim morning frock of soldat blue poplin, with collar of white batiste and bias-cut trimmings of black and white striped silk. The revers-shaped front has a dainty embroidery design and the belt and sleeve trimmings match the collar. Medium size requires 4 1-2 yards 44-inch material.

Pictorial Review Costume No. 6071. Sizes, 32 to 44 in. bust. Price, 15c. Embroidery design No. 11904 Transfer pattern of 36 sprays, 15c.

Pictorial Review Patterns may be procured at the M. Katz & Co. Department Store, Fulton.

The Kitchen Cupboard

CHEESE DAINTIES.

CHEESE SOUFFLE.—Cook together one pint of soft breadcrumbs, three-fourths of a pound of grated cheese, half a saltspoonful of soda and half a cupful of warm milk. Stir in the yolks of two eggs while hot, cool and fold in the whites just before baking. This is a substantial luncheon dish.

Cheese Rounds.—Cut rounds of thin bread, butter them and heap with grated cheese. Brown lightly in the oven and serve at once. They are good with salad for a luncheon or Sunday night supper when the salad course is a hearty one.

Cheese Salad.—Mix cream cheese with a little sweet cream, paprika and salt and form into balls. Roll in ground nut meats and arrange in a bed of watercress. Serve with French dressing made of three parts of olive oil and one part of lemon juice.

Cheese Fondu.—Stir two cupfuls of milk and a cupful of fine dry breadcrumbs together and let stand for half an hour. Then add four beaten eggs, a tablespoonful of melted butter or other shortening, pepper, salt and mace to taste and half a pound of dry cheese grated. Bake in a buttered dish for half an hour with a cover on and then brown.

Cheese Sandwiches.—Spread grated cheese between slices of buttered white bread. Dip the sandwiches in egg and milk (one egg to a cupful of milk) and brown in hot drippings or butter. Serve at once.

Cream Cheese Sandwiches. — Mix cream cheese with cream and dry mustard enough to make it soft and yellow. Then spread between slices of rye bread.

Hot Swiss Cheese Sandwiches.—Put a thin layer of Swiss cheese between two thin hot slices of buttered toast and add mustard to taste. Eat hot.

Rye Bread.

Two cupfuls rye flour, two cupfuls pastry flour, one-half cupful sugar, one-quarter cupful molasses, two and one-half cupfuls sour milk, two teaspoonfuls soda, one teaspoonful salt. Mix and put into a greased bread pan and allow it to rise one hour in a warm place.

Meat Loaf.

A flank piece will do for this meat loaf and should be ground fine. Mix with an equal amount of pork sausage and a cup and a half of bread crumbs. Season to taste, using onion, salt, parsley and sage, if the flavor of it is liked. Moisten with stock and bake, basting with water when dry.

MR. GONZENBACH MAKES DENIALS

Empire United Flouts Allegations Made by Oswego's Common Council in Protest to Commission.

Denial of every allegation made by the Auburn Common Council in its protest to the Public Service Commission against a change of schedule on the city lines and a request for an investigation by the State Commission, is asked in an answer to the Oswego complaint, filed with the Commission and City Clerk Thomas H. McGinnis, of Oswego, by the Empire United Lines through Ernest Gonzebach.

The Oswego Times says: In the company's answer they admit they operate under franchises obtained from the city but claim that prior to the complaint notice was given to the public that a change in schedule was contemplated and that such a change has been made with the accompanying decrease in the number of cars operated on the lines. Futher answering the complaint the company elleges that it has placed in service on the city lines new double track cars of modern type, supplanted the old single truck cars, and that as a result of this improvement the company is able to operate cars at greater speed and at greater regularity. The claim is made that heretofore the number of cars operated on the city lines was in excess of the number reasonably required as shown from resords of the member of passengers carried and receipts.

It is further claimed that the revenue heretofore received was not sufficient for the company to pay the operating expenses of the cars and provide a fair return upon the investment required and furnish a satisfactory surplus for contingencies. The company calims that the present service is sufficient to reasonably serve the convenience of the people of the city and the traveling public.

In view of the facts set forth in the answer the company asks that an investigation be made by the Public Service Commission, Second District, and that an order is issued by the com mission dismissing the complaint and granting the respondent such relief as it may require in the premises.

It is expected that in accordance with the company's request an investigation of local conditions will be made. City Attorney McCaffrey will look after the city's interest and will prepare a brief outlining the council's position in objecting to the charge.

The Garbage Bucket.

If the housewife, after buying a new garbage bucket, will paint the inside black and then shellac it she will find that it will last twice as long. It will hold none of the odors and will rinse out very easily, not requiring the scrubbing which is taken to keep the ordinary bucket clean and sanitary. Then, if she will fold a newspaper, opening it first to the fullest extent, in wide pleats from margin to margin, and, opening it again, pull it into a circle, she will have a perfect lining for the bucket, which will insure its emptying clean each time it is emptied.

Washing Summer Dresses.

In washing summer dresses of colored linen it is an excellent plan to get a package of dye and put it into boiling water, making just the shade of the dress (test it first). And as quickly as the dress is washed clean and rinsed in salted water to set the color; dip it in the dye and let it stand two minutes. Then put it into the starch and hang it on the line in the shade without wringing and iron while it is still damp.

Egg Substitutes.

When eggs are high one hesitates to make white cake, especially if she does not care to use up the yolks for something else. It is not necessary to use egg whites at all. Simply use gelatine instead. One tablespoonful of the dry gelatine equals three eggs. Dissolve it in cold water and add enough boiling water to make a cupful. Beat with an egg beater and add to cake.

Digest No. 5 of Proposed Amendments to be Submitted

Albany, Aug. 26.—A somewhat radical departure from the present financial system of the state is proposed by the Constitutional Conventional committee of finance, which has presented and had adopted by the delegates its proposition for an executive state budget. This will be another of the propositions for the people of the state to consider in November.

Too long to quote in full, the effect of the proposed amendment is that such a budget shall be submitted by the governor to the legislature before the first of February each year. Such budget shall contain a complete plan of proposed expenditures and estimated revenues. The legislature may reduce or eliminate appropriations in the budget appropriation bills thus submitted by the governor, but cannot increase them, and these bills become laws after they are passed by the legislature, thus giving the lawmaking body the final say which reverses the present system which allows the executive to cut out items to suit himself.

The governor is prevented under the proposed budget system to revise estimates filed with him for the judiciary of the legislature, but he has the veto power after they pass. The legislature may summon the governor and heads of all departments to be questioned concerning any item in the budget.

The legislature may pass separate appropriation bills, but not until after the budget has been disposed of and each bill must take a separate appropriation for a single work or object.

Another effect of the budget system if adopted by the people, will be the substitution of serial for sinking fund state bonds with a view of affecting a saving of nearly $35,000,000 in retiring the state debt within the next forty years. The exchange is made attractive to bondholders by permitting an interest rate one-quarter of 1 per cent., which is higher than the present rate of 4 1-2 per cent.

Serious trouble with the sinking funds have been prevalent of late and it is pointed out that while the taxpayers have suffered from too much contribution to the extent of approximately 29,000,000, there was no assurance that in the future they might not suffer from tool ittle contribution and thatw hen the date of the maturity of the debt arrived, the state might not have the money with which to liquidate thhe principal of the debt.

The proposal in dealing with the existing state debt, while it provides that there shall be no raids upon the sinking funds and preserves them inviolate, provides at the same time a correct and automatic method of accumulation. The comptroller is to find out each year the amount actually in the sinking fund by appraising at no more than par the securities and cash in which it is invested. Then he is in a position to figure exactly how much of the annual contribution the state needs.

At the same time the state is automatically shielded from all danger of its sinking funds being raided, diminished, neglected or tampered with.

Another minor reform which the budget system will bring about will be the quiet slipping into appropriation bills of items covering expenses resulting from unnecessary work given out in recognition of the political activity of favored few.

Imperial Chancellor Says Empire Will Make Amends If at Fault in Arabic Case

Berlin, Wednesday, via London, Aug. 26.—If the commander of a German submarine exceeded his instructions in sinking the Arabic the German government will give full satisfaction to the United States, the Imperial Chancellor, Dr. von Bethmann-Hollweg, informed the Associated Press correspondent in an interview this evening.

The Imperial Chancellor made the following statement of Germany's position on the sinking of the Arabic:

"As long as the circumstances surrounding the sinking of the Arabic have not been fully cleared up it is impossible for me to make a definite statement. Thus far we have received no report about it. Now we do not even know whether the sinking of the ship was caused by a mine or by a torpedo fired from a German submarine, nor do we know whether in this latter case the Arabic herself may not by her own actions perhaps have justified the proceedings of the commander of the submarine.

"Only after all these circumstances have been cleared up will it be possible to say whether the commander of one of our submarines went beyond his instructions, in which case the Imperial Government would not hesitate to give such complete satisfaction to the United States as would conform to the friendly relations existing between both governments."

CHAPLAIN STOCK CO. COMING HERE MONDAY

It is with a great deal of expectant pleasure that the theatrical lovers of this community are looking forward to the coming, next week, of Chas. K. Chaplin Stock Company of players, who will present to the amusement lovers of this community the greatest list of plays they have had the opportunity of seeing in any single week during this season.

Mr. Chaplin is a manager of unusual note and he has surrounded himself with a company of actors, all of whom are well known along the "gay white way" of the theatrical metropolises in the East. Their work as a company under the excellent direction of Mr. Chaplin has won for them no end of excellent praises and in stock circles today there are the envy of many companies.

The list of plays they will produce speaks for themselves, so to speak. There is not one that bears the ear marks of the usual traveling stock company, for, from the list there is not to be seen any of the old-time melodramas, with which the smaller cities have had to put up with for so many seasons. Every play in their repertoire has had a long run on Broadway and has been produced by the best players in the company, only recently being released for stock productions. If the praises that were sung in honor of each separate play were to be recorded here it would take columns to tell the whole story.

Then, too, each play will be presented in a most elaborate manner, for special attention has been paid to the scenic and electrical equipment of each production. Nothing that the play-goers of this community has had offered them during the past few seasons has been of such a high calibre.

The engagement of the Chas. K. Champlin Stock Company will begin Monday matinee, August 30. The prices, as always played by Mr. Champlin, will prevail—Matinees, 10 and 20 cents; evenings, 10, 20, 30 and 50 cents.

Give The Evening Times a trial. It has all the news about all the people you know, and then some more.

OUR WASHINGTON CORRESPONDENCE

News Mostly of a Political Nature From the Nation's Seat of Government for Times' Readers.

Washington, Aug. 26.—(Special Correspondence). How one industry in this country has been walloped, due to the lack of plain American horse sense on the part of those gentlemen whom the country, in 1912, inadvertnetly empowered to dynamite our protective tariff wall, is aptly illustrated in an article appearing in a report published by the Department of Commerce. It is the tartaric acid and cream of tartar industry—products extensively used in the manufacture of baking powders, effervescent drinks Seidlitz powders, etc. New York, Pennsylvania, Ohio and California are largely interested in that industry.

Quoting from this article: "Imports of tartaric acid for the fiscal year of 1914 amounted to 848,575 pounds, and of cream of tartar 812,857 pounds, figures that reveal a remarkable increase over the 78,942 pounds, and 66,718 pounds, respectively, recorded for the previous year. This increased importation followed the tariff reduction that became effective in October, 1913."

Those figures may not look very big to the layman, but a pound of such material goes a long ways, and when it is said that the estimated manufacture in this country of tartaric acid is 3,000,000 pounds, the ratio of importation can be appreciated. This is what Mr. Underwood would call a "competing article."

The Harshaw Fuller & Goodwin Co., Cleveland, Ohio, testified that, according to their expert, who for 15 years was superintendent of the largest factory in Europe, the cost of building and equipping their factory was almost double that of a similar plant in France. And, further: "Our minimum wage is $2 per day, and the average wage paid is $2.80 per day. In the French factory, of which our superintendent had charge, the minimum wage paid was 3 1-2 francs per day; the average was 4 francs, or a little less than 80 cents per day American money. In other words, the average daily wage in the French factory is less than one-third of the average wage in our factory. We would nto object to a reduction of the present tariff on the finished goods, provided a corresponding reduction were made on the raw materials, but the parity between the two must be maintained."

A pertinent suggestion was offered by several California firms, who said: "No doubt you will agree with us that ariff provisions should not be enacted which, at best, can produce but a very slight reduction in cost for the ultimate customer by destroying a domestic manufacturing industry, and with it the market for a domestic raw material, with consequent loss to American labor interested in both."

Did the Ways and Means committee heed this advice? Nary a heed. A bunch of Italian importers from New York City, subsidized by the Italian government and designed to promote the industries of Italy, called the Italian Chamber of Commerce, got in their good work, and the 13 Democratic legal lights whose oil came from the White House and whose wicks were trimmed by Oscar Underwood, adopted practically all the recommendations of this chamber. Our manufacturers were required to pay the old duty, 5 per cent., on the crude product, argol, the duty on cream of tartar was cut 50 per cent., tartaric acid 30 per cent., and Rochelle salts 17 per cent.—the Democratic idea of a duty on crude materials for manufacture, and a tariff for revenue only, with resultant competition, on the manufactured product.

But the man who cuddles his Red Raven split the next morning, and the housewife who tempts his appetite with a batch of baking-powder biscuit, reap no benefit from the tariff law which handicapped a legitimate industry.

James J. Hill predicts a population of 400,000,000 by the year 2000. That means four men, four women and four kids for every one in evidence now.

As Mexico's revolution spree has cost that country nearly $400,000,000 it should be glad to have Uncle Sam step in with a cleanup squad.

It's Permysl here and Przemysl there, and you take your choice, but just can't pronounce it either way correctly.

LAST CIVIL WAR VETERAN IN U. S. ARMY RETIRES.

Colonel Clem, "Drummer Boy of Chickamauga," Reaches Age Limit.

The last of the civil war veterans in the active service of the army has retired. Colonel John L. Clem, the "Drummer Boy of Chickamauga," has reached the age limit and retired as a brigadier general.

When President Lincoln issued his first call for volunteers, Johnny Clem, a ten-year-old orphan, offered his services to the Third Ohio volunteers, but he was told to go home.

Johnny, however, hid on one of the cars taking the regiment to the mobilization camp, and when the troops arrived he crawled out and asked the colonel for a drum and a pair of sticks.

He was turned down and thereupon offered his services to the Twenty-third Michigan regiment. Some of the soldiers rigged him up in a uniform and gave him a sawed off gun. Eventually he got a drum.

He was under fire for the first time at Chickamauga. The command was surrounded by Confederates and the drummer boy was found in a cluster of bushes by a Confederate officer, who laughed heartily at the diminutive figure. Thereupon Johnny shot at the officer and escaped.

His fame spread from that day and he was known thereafter as the "Drummer Boy of Chickamauga." He was in the thick of the fighting in half a dozen other important battles, and made such an impression on General Thomas and General Rosecrans that they reported him to General Grant for meritorious service. When General Grant was elected president he gave young Clem a commission in the regular army, where he has gradually risen to his present rank.

The "L" in Colonel Clem's name stands for Lincoln.

"I met President Lincoln in 1864," Colonel Clem explained, "and I thought so much of him that I took his name as a middle name."

SUBSTITUTE FOR COTTON.

Germans Use Wood Pulp to Make Explosives by New Process.

A citizen of a neutral state who has just made a tour through Germany gives to the London Chronicle an account of the work of German chemists in discovering a substitute for cotton as a basis for high explosives. This is found in the shape of ordinary wood pulp. The correspondent adds:

"The experiments still are being carried on, but sufficient progress has been made to enable the substitute to be used freely and successfully.

"Germany is under no difficulty so far as the supply of raw material is concerned. At one time she was dependent upon Scandinavia for supplies of wood pulp, but some years ago she set herself to the task of making her own. Since then she became largely self supporting in this direction. Three of the largest factories are engaged in turning out the new basis for explosives.

"Large reserves of timber have been accumulated from my own country and from Russia, so that there is no fear of any shortage. I was assured that if the supply of raw cotton to Germany was stopped entirely she might be able to tide over the difficulties."

One evening the young minister, who had seemed rather attracted by "Big Sister," Grace, was dining with the family. "Little Sister" was talking rapidly when the visitor was about to ask the blessing. Turning to the child he said in a tone of mild reproof:

"Laura, I am going to ask grace."

"Well, it's about time," answered "Little Sister" in an equally reproving tone. "We've been expecting you to do it for a year, and she has too."—Ladies' Home Journal.

Oswego Construction Co. Wins Bid, Shutting Out Fred D. Dutcher

State and Trolley Co. Share With City Cost of Making Over "Bad Lands" in East First St. Street Must Be Made 38 Feet in Width.

The Oswego Construction Company, with offices in South 1st st., this city, was yesterday awarded the contract for paving First st. between Broadway and Rochester st. by the State Commissioner of Highways at Albany. Ten firms bid for the work and the bid of the local company was something less than $5 lower than that of the William H. Ring Construction Company of Ogdensburg. The Oswego Construction Company's figure was $16,490.80, while that of the next bidder was $16,495.45.

Among other bidders known locally were J. E. Bishop, who is connected with Samuel Rosoff in the canal work here; Edward Styring, who is construction two bridges here; and Fred D. Dutcher of this city.

The state pays for 16 feet of the total of 34 feet specified in the contract, the trolley company pays for 9 feet and the city the remaining 9 feet. The portion paid by the state totals $7,329.24; the city and the trolley company divide the balance of the cost, $9,161.56.

The contract awarded yesterday calls for only 34 feet of paving, but by the new plan of the Board of Public Works to pave the street 38 feet wide, a supplementary contract will be made with the company. The cost of the additional four feet will approximate $3,000, according to the statement of the board, and of this amount the property owners along the street will pay two-thirds and the city one-thrid. The total cost to the city will approximate $6,000.

Work on the street will begin as soon as the local company files its bond for 50 per cent. of the contract price and city officials believe the work will commence about September 1.

The bids and bidders follow:

Oswego Construction Co., Inc., Fulton, N. Y., $16,490.80; Wm. H. Ring Construction Co., Ogdensburg, N. Y., $16,495.45; J. E. Bishop, Syracuse, N. Y., $16,866.15; F. P. [illegible], Long Pond, Pa., $17,261.50; Bison City Eng. and Construction Co., Inc., Buffalo, N. Y., 17,284.00; J. J. Cashin, Fayetteville, N. Y., $17,326.75; Edwin Styring, Syracuse, N. Y., $17,639.80; E. A. Dollard, Syracuse, N. Y., $18,167.50; Fred D. Dutcher, Fulton, N. Y., $18,220.00; Langan Construction Cor., Albany, N. Y., $18,651.80.

CORN ROAST HAD ITS DRAWBACKS

Young Workers Chose What Should Not Be a Dry Neighborhood; Found Water in Pipe Low.

The Fulton Young People's Branch of the W. C. T. U. enjoyed a real old-fashioned corn roast on the standpile hill last night with almost every member of the branch and several guests present. A large bon-fire was lighted and the large succulent ears of Fulton grown corn were allowed to roast until they were just right. Then, liberally covered with butter, and with the addition of pepper and salt, they disappeared in the hands of the youthful temperance workers with a marvelous rapidity. Even the hungriest lad had all that he could handle and the party unanimously voted the commendation to the commissary committee.

The stand-pipe furnished the party with nature's own cooling beverage, although some members of the party advised caution, as it is said the standpipe is only holding about two feet of water at present.

Later in the fall the Branch plans a straw ride, or as one of the winsome young members expressed it, "hay ride." With the prevailing price of hay the more practical ones are inclined to think straw will be the choice But they're going, and several invitations will be extended to non-members to attend.

BALDWINSVILLE SOLOIST PLEASED CONCERT CROWD

Arthur Perkins, the well known Baldwinsville baritone, entertained the large crowd at the city band concert last evening with a vocal solo, "Dublin Bay." The crowd was fairly well chilled by the time Mr. Perkins started, but his solo had the effect of livening up the concert fans greatly. Last night, for the first time, applause was generous and the many auto owners swelled the volume with their warning signals. The program was well received and, in spite of the cold weather, almost the entire crowd remained until the last number. "Greater Fulton," by F. Jesse Newton, which closed the concert.

REV. MR. SAWTELLE TO PREACH IN OSWEGO

The Rev. and Mrs. W. L. Sawtelle, who have been spending a vacation at Osceola, will be in Fulton tomorrow as guests of Miss Alice Tucker, corner Buffalo and East 4th st. They will remain here for a few days, during which time Mr. Sawtelle will have the pleasure of preaching a sermon at Grace Presbyterian church, Oswego, at 10:30 o'clock Sunday morning. Special music will be provided for this service and a number of Fulton friends of the former pastor of the First Presbyterian church of this city expect to go to Oswego to hear the sermon.

Mr. Sawtelle is the pastor of the First Presbyterian church of Troy, N. Y.

OSWEGO AIDS FUND FOR JEWISH VICTIMS

Oswego, Aug. 27.—The package party held for the benefit of the Jewish war sufferers, held in Richardson Hall on Tuesday evening, proved to be a great success. The sum of $72.80 was raised and will be forwarded at once. The committee in charge, J. Karch, I. Lipson and S. Fram, are very much pleased over the support given to the party and express their gratitude to all who attended and to the musicians who played without charge.

WEATHER FORECAST.

Fair tonight and possibly white frost Saturday; gentle to moderate south winds.

RUNNING A CITY LIKE A BUSINESS

No. 6—How a Great Storm Swept Efficiency Into Galveston's Government.

By M. M. WILNER

The origin of the commission government idea is a familiar story, but it is too good not to be retold. The plan may be said literally to have been washed up by the sea. It was swept upon the shores of the United States by a mighty tempest that carried the waters of the Gulf of Mexico to a depth of eight feet over the city of Galveston and drowned 5,000 people. That happened on September 8, 1900. That storm rolled its deliberate way through the entire heart of the United States and left some mark of its fury at nearly every place it touched. The last spot within the United States where it did any damage was Buffalo. There it blew down a stone breakwater which the United States government had just built and landed high and dry on the beach several ships that had trusted to this vain protection. One valuable bit of flotsam which that storm left behind it was commission government.

It happened in this way. Galveston, suddenly confronted by a great disaster, found itself without a government. The aldermen had been drowned or had fled, as had most of the other officials who were legally invested with power. Some wise man has said that if a party of Americans were shipwrecked on a desert island, the first thing they would do would be to elect a chairman and secretary.

This is substantially what the stranded people of Galveston did. They choose a committee of leading citizens, who proceeded to organize the work of rescue and relief and do the manifold things that power and authority have to do in time of great emergency. When the crisis was over the committee went to the legislature to have its work sanctioned.

The committee was ready to quit and turn the city back to the reorganized relics of its old government. The citizens said: "No; [illegible] tion of this [illegible]. We have lost too much by the storm. We can't afford any more government by politicians just now."

So the committee was kept in office to take charge of the work of rebuilding, and after a little the citizens began to ask themselves why it was necessary ever to restore the kind of government that broke down when there was most need for it; why Galveston should not have all the time the kind of government that it had to adopt in emergencies. There was no particular answer to be made to these questions. Consequently, Galveston has kept its storm-blown plan of government ever since.

From Galveston the idea soon spread to other cities. Only one other, Dayton, Ohio, had it forced upon the citizens by a great natural disaster, but many began to argue that a plan of government which worked effectively in a crisis was a good plan to have for ordinary use. And it is interesting to note how commission government has swept up through the Mississippi and Ohio Valleys and down the great lakes outlet in the very path of that storm of 1900.

Of course, many variations have developed, but the basis of all commission charters is a mayor and four councilmen, elected at large and combining legislative and executive authority. That is the plan that is still in force at Galveston, and the new Buffalo charter resembles more nearly the original Galveston plan than the Des Moines, Dayton or other later models.

(No. 7 will be published tomorrow.)

CITY ARRESTS EMPLOYES ENGAGED IN CLOSING UP WEST SIDE HIGHWAY

Under instructions from officials of the company, Charles Vickery and Norman Waugh, both of this city, employed by the Granby Paper Company, of West First st., began to pile pulp wood shipped to the company yesterday on Schenck st., the thoroughfare recently opened for traffic by the Board of Public Works after an order from the board that the company remove its wood piles was disregarded. Vickery and Waugh had only been working a short time, when Patrolman Gordon arrived on the scene and arrested them for obstructing a public highway. The men were taken to police headquarters and were given an immediate hearing before Judge Wilson. Giles S. Piper, attorney for the company, appeared for the men and asked an adjournment, which was granted. The men will be tried Monday.

Chief Dyer was notified by city employes in that section that a carload of pulp wood, consigned to the company had arrived at the Schenck st. spur, and that the company employes were loading the wood upon the street, as before. City Attorney Fanning asked the arrest of the men and Officer Gordon was detailed at once.

The strife between the Board of Public Works and the paper company began several months ago, when the board ordered the company to remove its wood piles from Schenck st., and announced its intention of opening the street for traffic. The company paid no attention to the order [illegible] continued to pile wood on what the board claims is city property. The board kept close watch upon the wood piles however, and Tuesday when the piles were low, a force of men, under the direction of Frank Rumsey, Superintendent of Works, removed the piles from the street, in spite of the protests of the company officials. Mr. Fanning also announced that the city would compel the company to pay for the labor involved in moving the wood.

The company evidently believes it has a legal claim to the street, for workmen were busy piling the wood on the forbidden ground yesterday when Officer Gordon made his appearance. Some sensations are promised when the case comes to trial, and rumors are current that political differences are responsible for the trouble.

Vocational Training Gets Congressman's Strong Endorsement

Mr. Luther W. Mott Gave Mr. George Coffing Warner Valuable Aid When Latter Worked to Get Senate to Pass Smith-Hughes Bill.

A member of the National Vocational Training Association, Mr. G. C. Warner of New York City, has forwarded a letter received by him in reply to an urgent appeal in favor of the Smith-Hughes bill.

Mr. Warner was a member of the committe that went to Washington and helped to get the bill through the Senate. The bill was finally got through by one vote.

That Congressman Mott is in favor of the Smith-Hughes bill is shown in the letter which follows and is the reply to Mr. Warner's appeal. It reads:

HOUSE OF REPRESENTATIVES, WASHINGTON.

Mr. George Coffing Warner,
43 Broadway, New York.

Dear Mr. Warner:—

I have your letter of the 24th. I have also read the editoriol in the Fulton Times to which you refer.

I am familiar with the Smith-Hughes bill, and strongly favor it. As I think I told you meeting you in Washington some time ago, I believe it is time for the Federal Government to aid in the movement for vocational education as it has heretofore done in the matter of agricultural education, and I am ready to aid in any way possible.

If you are in Washington during the coming session I shall be glad to know of it and discuss the matter more fully.

Yours sincerely,
LUTHER W. MOTT.

The Smith-Hughes Bill and purpose.

1. To make the work of vocational training possible in those states and localities already burdened with the task of meeting the requirements for general education.

2. To help the states with their widely varying resources, bear the burden of giving vocational education as a national service.

3. To equalize among the states the task of preparing workers whose tendency to move from place to place is increasing, making their training for a life work a national as well as a state duty and problem.

4. To secure national assistance in solving a problem too large to be worked out extensively and permanently save by the whole nation.

5. To secure expert information from the agencies of the National Government, bringing to bear a country-wide knowledge and viewpoint, which will put the work of the states on a scientific and businesslike basis.

What the Smith-Hughes Bill provides for:

1. National grants to be given to the states for stimulating vocational education in agriculture and in the trades and industries.

2. The Grants to be given in two forms:
   a. For the paying of teachers of agricultural, trade and industrial, and home economics subjects.
   b. For the paying of part of the salaries of teachers, supervisors, and directors of agricultural subjects and of teachers of trade and industrial subjects.

3. Appropriations to be made to a Federal board for making studies and investigations which sall be of use in vocational schools.

Opinions

A Boy's Soul.

Mr. Hearst's American will receive general approbation for these sentiments:

"A small boy left his home on Nostrand avenue, Brooklyn, yesterday and boarded a street car. He paid three cents for his fair and received a transfer. At the first intersecting street he alighted. His father was waiting for him. The father gratefully received the transfer from the boy and boarded another car, after kissing the boy in farewell.

"In this manner two cents had been saved, but at what cost!

"The boy had been taught fraud by his own father. More, he had been made a party to a fraudulent transaction—and he was not yet old enough to pay full fare on a street car!

"If there be any truth in the saying of old: 'Train up a boy in the way he should go and when he is old he will not depart from it,' there will come a day of reckoing. And in that day two cents will have been shown as the price of a boy's soul."

To beat a corporation is regarded by many as no lapse from rectitude. The habit of beating a corporation soon extends so that in the natural order the individual is the victim. But the real victims are those who do the swindling.—Watertown Standard.

Support the Guard.

The Plattsburg training camp of business men has been so successful that it is proposed to follow it by another camp to accommodate the men who have applied and could not join the first camp. It is probably only a [illegible] fad and it is doubtful if such [illegible]tary service can be had another [illegible] that it can be made an annual [illegible]. There is no doubt of the physical good to those who attend and sub[illegible] themselves to the discipline of [illegible] life, but it is hard to make a sol[illegible] in two weeks. Probably the bet[illegible] way to encourage a reserve army [illegible] be to enlarge the national [illegible] and make it a fashionable fad, [illegible] longer and larger and better [illegible]ry drill and discipline and in[illegible] would be given. Interest the [illegible] men in that organization and [illegible] keep fit for a soldier's life. [illegible] much feared that the enthusiasm [illegible] business men's state camp is [illegible]rary and will not produce last[illegible] good. It will not create such a [illegible] and well drilled reserve as [illegible] same character of men attached [illegible]selves to the national guard.—[illegible]town Times.

[illegible] O'CONNOR WANTS TO BE UTICA'S MAYOR

[illegible], Aug 27.—City Judge James O'Connor entered the lists as a [illegible] for the Republican nomina[illegible] Mayor of Utica at the pri[illegible] elections on September 28. For [illegible] it has been understood that [illegible] contemplating such action. [illegible] action upon friendly ex[illegible] from various quarters and [illegible] that he ran second as an in[illegible] candidate for Mayor in [illegible] a field of five.

[illegible] CRAFT SAVED LIFE OF SMALL BOY

Batavia, Aug. 27.—Gerald Hilbert, aged six years, son of Mr. and Mrs. [illegible] L. Hilbert, of No. 10 Chestnut [illegible], was yesterday rescued from [illegible] in the Tonawanda creek by [illegible] Roach, aged 13 years, who is [illegible] of St. Mary's troop of Boy [illegible] in Batavia.

ONE, TWO, THREE, ALL TOGETHER

Music may have "charms to soothe a savage, cleave a rock or bust a cabbage," but it surely seems without power at times to move those who congregate at the local band concerts.

Last night's concert, however, proved the exception, as there was some applause and tooting of horns following the various numbers.

The program furnished by the Elks' band at the concerts given have been excellent. The numbers were well chosen as to variety and the rendition all that could be desired. At a recent concert a local young man of talent sang all the way from the tip of his toes to the tip of his tongue, and even a local man's composition dedicated to "Greater Fulton," received not the faintest ripple of applause. Now ,what is the matter with a crowd of people who can stand like a lot of wooden Indians and not give vent to their enthusiasm on such an important occasion. Lack of interest is the thing that kills towns, nations and even individuals. The reigning silence which is so audibly felt following our local concerts is supreme evidence that something is wrong with us as a Fulton people. What's wrong? Time to analyze, isn't it?

Our local band is one we can be proud of. Other people in other places have applauded it, then why not Fulton people? Is it true we don't appreciate "home product?" Is it true we take too much for granted and expect organizations and individuals to give us the product of their enthusiastic efforts without the ghost of appreciation on our part? If this be true, then let us wake up and do a bit of cheering, a bit of applauding for every blessed thing that stands for Fulton's good and growth. Let's teach the children to get the swing also.

Let's get together, sing together, and applaud together! Let's remember, to start with, that the "band boys" are real human beings with feelings. In the immortal words of Mutt, "Aw, have a heart," boys—and applaud.

PREPARING A PEOPLE

While we are developing plans for national defense let us not forget that progressive social legislation is a necessary requisite in any plan of preparedness. We need a larger and more efficient army and navy, we need more inventions, efficiency and system in our program of keeping the nation able to protect itself; but what good would a military system be to a weak, half-starved people? How long could inventions protect us if their use depended upon a discontented, half-revolutionary working population?

In this matter we may learn a lesson from Germany. The imperialistic militarism of the German war machine is so antagonistic to American ideals of democracy that people in this country are apt to think only of that when their attention is called to Germany these days. But during the last quarter of a century Germany has not only been developing this military machine, Germany has also been developing the human machine. Germany not only saw to it that her young men had an efficient military training, but that their economic environment was conducive to their best development. Germany began to lead the world in reconstructive humanitarian legislation. The government saw to it that labor had a fair chance in its struggle with capital. Policies which American reactionaries would greet with horror as rank "socialism" because the commonplace thing. Reactionaries in Germany once made just such a fight against this social legislation as they have made in the United States. But Bismarck and his successors were too much for the German conservatives, and now it is demonstrated that the thing which enables Germany to hold out as she is doing against all Europe is the result of this very social legislation.

Conservatives and reactionaries in this country claim to be very patriotic. Most of them would like to see better preparation for national defense. We should like to remind them that in resisting such things as workingmen's compensation laws, minimum wage laws, acts to regulate the condition and health of employes, in seeking to prevent almost every law designed to loosen just a little the grasp of organized wealth upon thel ives and destinies of men and women, under the plea that all such economic justice is "taking property without due process of law," they are working with all their might to weaken the power of this country to hold its own in either peace or war.—N. Y. Globe.

How Alexander Untied the Knot

By HERBERT KAUFMAN

Author of "Do Something! Be Something!"

ALEXANDER the Great was being shown the Gordian Knot. "It can't be untied," they told him; "every man who tried to do so failed."

But Alexander was not discouraged because the rest had flunked. He simply realized that he would have to go at it in a different way. And instead of wasting time with his fingers, he drew his sword and slashed it apart.

Every day a great business general is shown some knot which has proved too much for his competitors, and he succeeds, because he finds a way to cut it. The fumbler has no show so long as there is a brother merchant who doesn't waste time trying to accomplish the impossible—who takes lessons from the failures about him and avoids the methods which were their downfall.

The knottiest problems in trade are:

1—The problem of location.

2—The problem of getting the crowds.

3—The problem of keeping the crowds.

4—The problem of minimizing fixed expenses.

5—The problem of creating a valuable good will.

None of these knots is going to be untied by fumbling fingers. They are too complicated. They're all inextricably involved—so twisted and entangled that they can't be solved singly—like the Gordian knot they must be cut through at one stroke. And you can't cut the knot with anything but advertising—because:

1—A store that is constantly before the people makes its own neighborhood.

2—Crowds can be brought from anywhere by persistent advertising.

3—Customers can always be held by inducements.

4—Fixed expenses can only be reduced by increasing the volume of sales.

5—Good will can only be created through publicity.

Advertising is breeding new giants every year and making them more powerful every hour. Publicity is the sustaining food of a powerful store and the only strengthening nourishment for a weak one. The retailer who delays his entry into advertising must pay the penalty of his procrastination by facing more giant competitors as each month of opportunity slips by.

Personal ability as a close purchaser and as a clever seller, doesn't count for a hang, so long as other men are equally well posted and wear the sword of publicity to boot. They are able to tie your business into constantly closer knots, while you cannot retaliate, because there is no knot which their advertising cannot cut for them.

Yesterday you lost a customer—today they took one—tomorrow they'll get another. You cannot cope with their competition because you haven't the weapon with which to oppose it. You can't untie your Gordian knot because it can't be untied—you've got to cut it.

You must become an advertiser or you must pay the penalty of incompetence.

(Copyright.)

WITH THE SUFFRAGISTS.

The judge of the circuit court of Indiana on August 6 at Evansville disfranchised Mrs. Laura Hunter for five years, after sentencing her to the women's reformatory for theft.

* * *

The Fort Wayne Sentinel commented: "It is pretty clear that this particular jurist has lined up with the safety first ranks and is disposed to take no unnecessary chances whatever." Since to a conservative jurist the menace of the bad woman vote is so imminent, the progressive workers in Indiana for a woman including democracy are cheered by the thought that the hope of the good woman vote is also near fruition.

* * *

Vital statistics in Kansas have been rallied to the support of woman suffrage. Kansas women received full suffrage in 1912. In 1913 the public health nursing association was organized in Topeka, and the movement culminated in the establishment by the last legislature of the so-called baby bureau.

According to figures compiled by Harold E. Wood, the city health officer of Topeka, the mortality of babies had been cut down from 1913 to the present August, 25 per cent.; from 12 to 9 per cent.

* * *

Six hundred men representing in convention the 3,500 letter carriers of New York City voted without one dissenting vote to stand by the woman suffrage amendment in November.

The points brought out in the discussion were: That the Church Association full of women had secured for the postmen Sundays off; that at the Christmas period they found women more patient and more apt to extend a greeting; that postmen going from door to door have lots of chance to observeh uman nature, and they think mighty well of women. The national body of postmen have also endorsed suffrage.

* * *

Conflicting testihony is being offered on woman suffrage in New York State. On the one side the anti-suffrage speakers are assuring audiences that the equal suffrage states fall far below the manhood states in protecting children. On the other side the one man who knows most about it, Owen Lovejoy, secretary of the National Child Labor Committee, has given a week of his time to the suffragists to help them win the vote in November.

* * *

In Pennsylvania, U. S. Secretary of Labor Wilson, will take the platform in the interest of the passage of the woman suffrage amendment. Suffragists are citing this fact as proof that votes for women will strengthen the position of the laboring man in this country, as Secretary Wilson is a distinguished labor advocate.

* * *

The big, worth-while battles that have been won in Colorado against the powers of privilege have been due in large measure to the woman voter.—Judg Ben D. Lindsey.

JEWISH NEW YEAR CELEBRATED SEPT. 8

During the coming month there will be marked piety acong the Hebrews as they will celebrate three national Hebrew holidays. "Rosh Hoskannah," "Yom Kippur," and "Sukkuth," are periods sacred to the Hebrews and during this time all must abstain from labor and atone for their sins by fasting and prayer. "Rosh Hoskhannah," the Jewish New Year, begins at sunset September 8 and continues for two days. In the synagogue special prayers will be offered up and all labor is strictly forbidden.

At sunset on September 17 begins Yom Kippur, the most solemn of the Jewish days. This is the day of atonement and all Hebrews are required to abstain from food throughout the day and spend much of the time in the synagogues. The people pray for remission of sins and petition that the coming year shall bring life, prosperity and peace.

Sukkuoth, or the feast of the tabernacles, begins at sunset September 22 and continues seven days. The holiday is held in commemoration of the time when the children of Israel lived in the deseret in tents. It is also known as the feast of the ingathering when harvest time in the holy land is over and the crops are safely gathered. Special prayers are offered in thankfulness for the harvest plenty and for the bounty shown the chosen people.

RIGHTS OF EMPLOYERS.

In the course of a recent address before the Central Labor union of Meriden, Conn., Samuel Gompers said:

Men must learn that employers have some rights. If you will investigate you will find that strikes oftener are caused by unorganized or recently organized labor. In the latter case the workers suddenly think themselves all powerful and imagine employers have no rights. Avoid strikes. The right to strike is of paramount importance, not the exercise of that right.

In this country, when the war is over, thousands of workers will be thrown out of employment because of the cutting off of the present artificial market for the necessaries of life as well as for the implements of war. Labor organizations should prepare for this condition.

INSURES WORKERS' LIVES.

Brooklyn Rapid Transit Company Will Pay Half the Premiums.

By a group insurance contract issued recently—the biggest policy ever granted, it is believed—the 8,000 employees of the Brooklyn Rapid Transit company operating in Brooklyn borough, New York city, are insured for $1,000 each by the Travelers Insurance company of Hartford, the $8,000,000 insurance costing the B. R. T. about $50,000 a year, or about one-half the total premiums.

The opportunity to insure was offered all employees who have been with the transit company two years or more, and the company pays one-half the premium up to $1,000 of insurance, the rate of insurance varying, according to the age of the individual employee. The employee may, if he wishes to pay the additional premium, increase his policy to $5,000.

A special agreement will be required whereby in case of the employee leaving no dependents the principal of the policy may be used:

For paying funeral expenses; for reimbursing the company for premiums paid by it during the period in which it has assumed the entire premium, turning the balance over to the employees' benefit association.

All premiums will be paid in the first place by the Brooklyn Rapid Transit company, which will, through its respective constituent companies, collect by periodical deductions from wages one-half of each annual premium due.

It is pointed out that employees between the ages of fifteen and thirty-two will pay weekly on the average a fraction more than 7 cents for $1,000 of insurance; employees more than thirty-two and less than forty, a fraction more than 8 cents a week; employees of fifty will pay a fraction more than 13 cents a week; those of sixty, a fraction more than 26 cents a week, and those of sixty-five years, 41 cents a week.

USES MULE TO LOCATE OIL.

Colonel Green Has Novel Method of Finding Spot For New Wells.

Colonel E. H. R. Green of New York and Dallas, son of Mrs. Hetty Green, firmly believes that there is nothing like a mule for locating a new oil field.

The other day Colonel Green and a party of Dallas men associated with him in an oil venture went out to locate a site for the first well. He selected a mule as master of ceremonies. The mule was driven into the field and allowed to take his own time in coming to a stop.

Where the mule first started to graze a stake was driven and plans begun for the erection of the first derrick. If oil is struck the mule will be placed on a pension.

HIGH DUES MAKE VIRILE UNIONS

Trade Organizations Fail When Denied Support.

STORY OF THE CARPENTERS

Struggled Hard For Existence Until Power to Levy Assessments Was Conferred on Executive Board—Begging Letter System a Sign of Weakness—Consolidation Urged.

By FRANK DUFFY.

[General secretary of the United Brotherhood of Carpenters and Joiners of America.]

Half a century ago the working conditions of the carpenters were deplorable. A workday lasted from sunrise to sunset or as long as one could see. Realizing they could change or better these conditions only through organization, they commenced to agitate among the men of their craft and then to advocate the formation of carpenters' unions.

In many cities such unions were formed; but, being local affairs without a national head to guide them, many disbanded within a short time. This spasmodic system of organizing and reorganizing locally continued until 1881, when the United Brotherhood of Carpenters and Joiners of America was permanently formed.

It was a question of doubt at that time whether it would be a success or not owing to the fact that the members were not willing or perhaps could not afford to pay from the meager wages received high initiation fees and high dues, while at the same time wanting all the benefits they could get in return. These included sick, death and disability benefits as well as financial support in strikes and lockouts.

Per capita tax to the home office was very low, while the demands on said office were very heavy. A few years later—or, to be more exact, in 1892—after meeting all the demands made on us, we had in our general treasury $51.19.

We met the emergency by giving our general executive board authority to levy special assessments on our local unions whenever necessary. For a number of years following several assessments were levied by our board, which caused much grumbling and considerable dissatisfaction. In 1905 we submitted to referendum vote the question of either raising the tax to the home office or again levying an assessment. The membership voted by a large majority to increase the tax and also continued to give our general executive board authority to levy assessments whenever necessary.

During the last ten years the wages of our members have been substantially increased, in some places 50 cents per week and in other places $7.50 per week per member. Figured conservatively this means that over $18,600,000 have been placed in the pockets of our members annually more than they would have received if there was no such organization as the United Brotherhood of Carpenters and Joiners of America. Yet while that increase was won for our members through our organization they, on the other hand, objected, opposed and voted against paying higher dues, no matter what benefits were promised in return.

To be a success we must be as liberal with our organization as we are generous to ourselves. Or, in other words, if we do not create a fund for our own protection and defense we cannot, should not and, in fact, must not expect others who have such a fund to help us.

The United Brotherhood of Carpenters and Joiners of America, its local unions and district councils have not to our knowledge in the last twenty years issued begging letters to other labor organizations asking for financial aid to tide them over their difficulties and troubles, strikes and lockouts. On the contrary at our Washington convention in 1912 we established a fund to protect our members by levying an assessment of $1 per year per member on our entire membership, payable to the home office quarterly.

In doing this we caused the dues of our members to be raised considerably. On a membership of 215,000 in good standing, this means, a defense fund yearly of $215,000. We left with our general executive board at the same time authority to levy assessments if such should be found necessary.

This begging letter sytem, now so prevalent among unions, shows a weakness and lack of management somewhere, and of forethought and foresight on somebody's part. It is not at all encouraging to hear one of those letters read at a meeting of a union, predicting defeat and calamity if financial aid is not forthcoming. The old saying has it that "God helps those who help themselves," and as charity begins at home, it is time for organizations unable to support their members in times of trouble, strikes and lockouts to get together and consolidate with kindred trades and thereby form one good, strong organization in which the interests of all can be taken care of and protected. Then we would not have so many national and international unions as we have now, and perhaps not so many jurisdictional disputes to contend with. Neither would we have so many begging letters going the rounds.

SO DOES THE OSTRICH

WE HAVE all read of the ostrich, that extraordinary bird of the desert, which dines on scrap iron, lunches on stones and when danger threatens thrusts his head in the sand and believes himself safe from harm, because he cannot see the danger.

Picture to yourself this gigantic bird, taller than a man, resting in fancied security because his head is hidden from view, although his body can be seen for miles around.

There are too many of us who adopt the tactics of the foolish ostrich. We are told of an impending danger and think that we can escape it or avoid it by refusing to face it.

We are informed that there is great danger of restriction of our facilities for local trade if our local business men are not given better support; that we may find ourselves deprived of the opportunities for marketing our farm produce in our home town if our storekeepers find themselves stocked up with goods, but with no adequate volume of local business.

What is more natural than that this may be the case if we do not stop sending our money away from home to the mail order houses in the big cities? We must realize such possibilities and take steps to prevent them. If we don't, we will find out, in all probability, that our local merchants will look for other locations than in our town.

Which is the wisest thing to do—to look the conditions squarely in the face and take the steps necessary to counteract them or shall we, like the foolish ostrich, refuse to face the conditions and decline to take cognizance of them?

We can permit matters to drift along until the inevitable occurs, or we can think things over, carefully and with judgment, and take the steps necessary to protect our interests—the interests of ourselves and those who will come after us.

Our community is built up as the result of various interests, not the least of which is the tributary farming population. Our town was created because of the various interests that center here and because this is a natural point for the distribution of farm products and merchandise. The sale of the farm products brings the money for the buying of the merchandise, while the merchandise supplies the necessities of those who raise the crops.

It therefore follows, naturally as one of the unfailing laws of civilization, that IF IT WERE NOT FOR THE FARMERS AND OTHERS WHO PRODUCE THINGS FOR THE MARKET, THERE WOULD BE NO OCCASION FOR THIS COMMUNITY. THERE WOULD BE NO NECESSITY FOR STORES AND SHOPS.

On the other hand, were it not for the stores that are the mediums for the marketing of the crops, there would be a great lack of facilities for marketing and farming would not be as profitable as we now find it in our community.

If the business men of our town do not afford the requisite facilities for marketing such crops as must be handled locally in order to give full advantage to the farmers, then the farmers will find out that they must look for a market elsewhere or accept a much smaller profit on that which they have to sell.

On the other hand, if the farmers do not do their share toward the support of the business men, by spending their money locally and keeping it in circulation in our own town, instead of sending it to the mail order houses, then the local storekeepers will find it necessary to restrict their investments in goods for the local market, thereby resulting in a diminishing of the facilities for getting what we need at home.

This is a point we must not fail to observe. We must look the conditions squarely in the face and arrive at a conclusion as to what steps are necessary to preserve and to maintain the conditions which make for prosperity.

If we fail to do this, or if we temporize and let matters drift, we will find that we have emulated the silly ostrich, until the worst happens.

SPEND THE MONEY AT HOME. PATRONIZE THE LOCAL BUSINESS MEN. KEEP THE MONEY IN CIRCULATION IN OUR HOME TOWN. WE NEED EVERY DOLLAR AT HOME TO HELP THE COMMUNITY.

Let the ostriches do as they will and send their money to the mail order houses, but let us hope that we have but few of these foolish birds in this community.

ORNAMENTAL WINDOW BOXES

Often Can Be Made to Atone For Architectural Incongruity.

A properly designed window box, suitably planted with trailing vines and a harmonious selection of colors, can often be made to atone for a vast amount of architectural incongruity in the house itself. Even in the most skillfully designed work the need for some softening effects about the windows can be felt. Aside from the charming exterior effect of such an arrangement, the bright colors and the scent of the flowers add greatly to the interior atmosphere of the house, while the view from a window is greatly enhanced by being framed in by the foliage of growing plants. Great care should be taken to secure the boxes from falling on passersby.

The window box may be made of white pine, painted to withstand the weather, or oak or chestnut stained, strongly put together and braced, and should be lined with copper or zinc with suitable apertures for drainage. The soil is put directly into the metal lined box so formed.

Of the planting it is enough to say that there should be a vine of some sort to hang over the edge, thus softening the rigid lines of the box, and that the flowers selected should be such as harmonize in color. Plants which form constant masses of bloom are best. It is well to provide several flowers which blossom in rotation, thus insuring a continuous effect. Pansies, heliotrope, giant mignonette, myrtle and similar plants are suitable for small boxes, while foxglove, salvia and digitalis may be grown in the larger ones. Geraniums are hardy and because of their bright coloring and fragrance make an excellent combination for the smaller window gardens.

No, Indeed.

Bill—The smallest apartment houses are those occupied by bees. In a cubic foot of honeycomb there are about 9,000 cells. Jill—I suppose it is not alone the janitor who does the stinging?—Yonkers Statesman.

Gentle Methods.

Lucille—Anything can be accomplished by gentle methods. Cruelty is unnecessary.

Edna—I suppose instead of whipping cream you would just scold it.—Segment Block.

Is It Worth While?

Is it worth while that we jostle a brother
Bearing his load on the rough road of life?
Is it worth while that we jeer at each other
In blackness of heart—that we war to the knife?
God pity us in our pitiful strife.

God pity us all as we jostle each other;
God pardon us all for the triumphs we feel
When a fellow goes down; poor heart-broken brother,
Pierced to the heart; words are keener than steel,
And mightier far for woe or for weal.

Were it not well in this brief little journey,
On over the isthmus, down into the tide,
That we give him a fish instead of a serpent
Ere folding the hands to be and abide
For ever and aye in dust at his side.

Look at the roses saluting each other;
Look at the herds all at peace on the plain,
Man, and man only, makes war on his brother,
And dotes in his heart on his peril and pain—
Shamed by the brutes that go down on the plain.

—Joaquin Miller.

Home Town Helps

CONCRETE IN THE BASEMENT

Four-Inch Slab Is Recommended by Expert as Giving Best Possible Results.

Over the entire floor area of the basement a four-inch slab of concrete should be laid after the earth has been firmly tamped down. This slab of concrete should be insisted upon, wether the finished floor is to be of cement, brick, tile, or wood; and it is well to re-enforce it against shrinkage, stresses, and to bridge any soft places in the ground, by imbedding in the concrete some form of coarse wire mesh or expanded metal, says Ernest I. Freese in the House Beautiful.

Where cement finish is desired, this should be not less than three-quarters of an inch in thickness, and it should be applied before the concrete has become "set"—otherwise the cement finish will not properly unite with the concrete base.

In rooms having a cement floor, the cement can be carried up on the walls to a height of six or eight inches above the floor, thus forming a waterproof and sanitary base. Then, if the floor is slightly graded to a sump connected with the underground drainage system, the floor can easily be kept clean by turning the hose on it occasionally.

All cement floor finish should be jointed at regular intervals, not exceeding three feet, so as to concentrate at these jointings any probable shrinkage cracks. Here again, a simple, inexpensive wire mesh imbedded in the cement finish will react against the shrinkage strains and lessen the liability of cracking. For this re-enforcement, common chicken-wire mesh answers admirably.

LOOKING TO CIVIC BEAUTY

Builders Have Come to Recognize Value of Good Appearance of Buildings and Streets.

Gradually all phases of commercial industry are coming under the influence of the city-beautiful movement, comments the San Francisco Call. Factories erected today secure sufficient ground area to have some landscape gardening round-about the building or buildings. Even railroads, those supposed "soulless corporations," are now quite generally embellishing station grounds and rights of way. The schoolhouses, both rural and city, are being much improved in surrounds, being much helped by the school gardens, and the whole land is becoming, each year, more deeply engrossed in making a more beautiful America, and California is well up in the list. Let us not grow faint-hearted in the work.

IMPROVING NEIGHBORHOOD

There's much talk of conservation
Of the trees and rivers grand,
For we know their preservation
Helps to beautify the land.

We admit that talk like this will
Benefit the public good,
But at present your first job is
To improve your neighborhood.

Small beginnings have big endings,
And if you will make the start,
You will see how quick your neighbor
Pitches in and does his part.

Then you'll find that it's contagious;
Every house upon your street
Will be vying with each other
To keep looking clean and neat.

Paint and varnish are conserving,
You can prove beyond a doubt,
They're the best for the preserving
Of the house, inside and out.

—Exchange.

New School Architecture.

A one-story schoolhouse, built in the form of a square around a courtyard, and so constructed that, by raising a series of sashes, it can be converted into what will be practically an open-air school, is the type of structure that marks a new departure in modern school architecture. It provides healthful surroundings for the children, keeps them near the ground, so that the danger of fire and panic is reduced to a minimum, and at the same time affords exercise.

The open-air sashes face on an inner corridor, which will eventually form a sort of cloister around the courtyard. As the needs of the community require, other wings will be added on the three remaining sides of the central square. It is intended eventually to have a gymnasium and swimming pool in a basement under the courtyard.

Gophers in the Garden.

Gophers still infest gardens except in the central portions of large cities, and are hard to exterminate where many vacant lots are found. Garden owners do not care to keep poison and traps on hand, and how easily to accomplish the death of the gopher becomes a problem. Last week one threw up a little mound in the writer's garden, having burrowed under the fence from an adjoining vacant lot. A messenger was hastily sent to a nearby drug store for a bottle of carbon bisulphid. The hole was opened, a half cupful poured in, the hole closed and firmed with damp soil. The next day the soil was dug out and the hole followed but three feet into the vacant lot, and there his gophership reposed, dead.

STAGE STARS FALL FOR CAMERA'S LURE

CHANGE FROM "MOVIE" TO "PHOTODRAMA" BRINGS MANY INTO NEW FIELD.

THE SCREEN'S WIDE SCOPE

Plays Presented In Photo Form Overcome Limitations of Spoken Drama —Pathe Announces Conversions.

It was only a short time ago as time is reckoned, since the stars of the stage spurned the advances of the motion picture manufacturers. Considering the "movies," as they contemptuously termed the film drama, as a cheap and entirely ephemeral form of amusement they considered acting in them as beneath their dignity and preferred thirty week contracts at $200, to fifty-two weeks playing in pictures at larger figures. Today what a difference. One by one, at first apologetically, but now boldly to the sound of figurative trumpets, the great names of the stage have gone over to the "silent drama."

Bruce McRae.

Here is a list of popular stage favorites recently secured by Pathe, which illustrates the trend:

Rhys Alexander, Edwin Arden, Richard Carle, William Courtleigh, Jr., Clifton Crawford, Arnold Daly, Lionel Barrymore, Frederic de Belleville, Katherine Brown-Decker, William Elliott, Max Figman, Wm. Riley Hatch, Gail Kane, Sheldon Lewis, Lillian Lorraine, Fania Marinoff, Bruce McRae, Bliss Milford, Lolita Robertson, Jessie Ralph, and Melville Stewart.

Just one of those famous names attached to a photoplay two years ago would have made a sensation and yet the house of Pathe calmly announces now that other big stars will be signed in the near future!

His Qualities.

"What makes you think Dauber will succeed as a painter?"

"He has the soul of an artist and the perseverance of a book agent."—Philadelphia Ledger.

CORRECT DRESS FOR WOMEN

ONEIDA ST. FULTON.

CHILD CAPSIZES LAMP; IS BURNED

Was at Grandma's Home and Overturned Table; Pan of Water Saved Baby More Serious Injuries.

Helen McGuigan, the three-year-old daughter of Leroy McGuigan, of 74 West 2nd st., was severely burned on the face, head and arms last night in the home of a neighbor, Thomas Dunton, at 208 Phillips st., by the overturning of a table upon which stood a lighted oil lamp. The child spends most of the time in the Dunton home and Mrs. Dunton is known to Helen as "Grandma."

At the time of the accident Mrs. Dunton had left the child alone in the kitchen for a moment, and grasping the edge of the kitchen table, the leaves of which extended a considerable distance over the legs, making it not a difficult matter to overturn entirely, the child swung her entire weight on one side, the table was overturned and the child was thrown to the floor. In addition to the lamp a large pan of water stood on the table, and it is probably due to the latter that Helen escaped fatal burns, as the water was absorbed by her dress, and when Mrs. Dunton, who was in the front room ran in she was able to extinguish the flames by means of the table oil cloth before the water-soaked dress could become ignited. As it was, most of her hair was burned off, and in the fall she sustained a bad cut on one of her ears and her face was bruised. The fact that the child instinctively put her arms over her eyes and face no doubt saved her from permanent disfigurement. There are deep burns on both arms, on the right side of the face and upon the forehead.

The mother of the burned child was downtown at the time with a daughter of Mrs. Dunton, and after being brought home hurriedly in a taxicab and upon being told of the accident, fainted.

Dr. Fox believes no permanent disfigurement will result from the accident.

MRS. DRAPER ENTERTAINS THE RIVERSIDE COUNCIL

The D. of L., Riverside Council, No. 89, was pleasantly entertained at the home of Mrs. Curtis Draper, 317 South 3rd st., yesterday afternoon, in honor of Mrs. C. Armstrong of Utica, Mrs. H. H. Williams of Mohawk, and Mrs. B. J. Millard of Chicago. Card playing was indulged in, Mrs. H. H. Williams winning as first prize a beautiful cut glass bon-bon dish. Special music was given which was enjoyed by all present.

THE QUIRK TONIGHT

No other musical organization exercises the care in the selection of its comedians, dancers and singers as does the management of the above attraction. Such renowned comedians as Carl Ritter, who is the dancing producer of this show, as well as Mr. Joe Davis, Lew Blight, Jack Curtin and Lew Van, a group of comedians and merry-makers who keep things in an uproar, are all artists in their respective roles, well qualified to sustain the reputation of Messrs. Klein Bros. & Hengler's Minstrel production. Thec lever work of the ends is absolutely original and the songs, the very latest offerings. The dancing numbers vary from the refined French gavotte to the most ludicrous, grotesque and eccentric, with absolutely nothing to offend the most critical. The ballad contingent, under the direction of Mr. Arthur Russell, selected with no less care, comprises the well known artists: Mr. Harry Supplee, Cyril Dobaine, Paul De Voe and Ames Robyn, the sweet lyric tenor. The entire first part, comprising a most gorgeous array of scenic and spectacular effects, beautiful in the extreme, a synonism of all that is exquisite and beautiful in art, picture upon picture, of wonderment and expectation; all this to be followed by a complete vaudeville performance, consisting of seven acts, by real performers. Every department of Klein Bros. & Hengler's productions is thoroughly covered by competent principals, and everything is carefully measured and selected to the interest and satisfaction of the theater-going public, and all that is good and wholesome in refined and up-to-date minstrelsy will be found in Klein Bros. & Hengler's Greater Mastodon Minstrels.

"The best seller," is the expression of merchants handling Black Baking Co.'s products. adv.

MRS. WILLARD IS APPOINTED

Judge Coville Selects Members of Child Welfare Board --List Includes One of City's Leading Women.

Mrs. Mary Willard, cashier of the Citizens' National Bank and who lives in one of the pretty homes in East 1st st., has been appointed by Judge Henry D. Coville as a member of the Oswego County Child Welfare Board. The appointment was made yesterday, the remaining members being Mrs. R. A. Downey, Oswego, 6 years; Orin E. West, Central Square, five years; Mrs. F. G. Whitney, Pulaski, four years; James Buckley, Altmar, two years; Thomas H. King, Oswego, one year.

Mrs. Willard will serve three years.

This board is to have charge of the administration of the so-called "Mothers' Pension Law" in this county.

The members are well known and have been deeply interested in charitable work in this county in the past.

Messrs. Buckley of Altmar and West of Central Square are very well known in their respective communities and are interested in the successful administration of the new law. Mrs. Whitney of Pulaski has long been an active workers in matters of this kind and Mrs. Willard is identified in an active way with the charitable institutions of Fulton. It would be difficult to select a board the personnel of which would be more fitted to administer the new law.

County Superintendent of the Poor C. A. Stone will be ex-officio a member of the child welfare board.

The first meeting of the board will be held at the office of County Judge Coville in the county building, on Wednesday next, September 1, for the purpose of organizing and taking steps to secure an appropriation.

The board is without funds but an appropriation will be sought from the Board of Supervisors, either at the special session next Wednesday or at the regular session in November.

ORANGE TEAM TO MAKE LONG TRIPS

Syracuse, Aug. 27.—The members of the Syracuse University football team will be able to qualify as veteran globe trotters when the 1915 gridiron season has ended. No eastern college eleven of recent years has faced as many and as long jumps as the Orange schedule calls for this with a season which begins at home on September 25 and ends at Portland, Ore., on December 1.

The team starts touring on October 9 when Princeton will be played at Princeton. The following Saturday Rochester will be met at home and a week later the Salt Lake City team will go to Providence to face Brown. Ann Arbor will be visited on October 30, for the purpose of playing Yost's University of Michigan gridiron clan. The first two Saturdays of November will be spent at Syracuse entertaining Mt. Union and Colgate teams. Dartmouth will follow on November 20 and then the Orange eleven will trek eastward. Thanksgiving Day will see the team engaged with the University of Montana players at Missoula and on December 1 Syracuse will close an exceedingly busy season by tackling the Oregon Ag-Ore.
ricultural College team at Portland,

SPOT CADY OF PHOENIX IN SEMI-FINAL BOUT

A Phoenix boy, "Spot" Cady, is booked for the semi-final bout at the Arena tonight, his opponent being Young Leach Cross of Syracuse. Cady is known to a number of the fans in Fulton, and especially in Phoenix, where he is employed on a dredge, he is known for his ability as a fighter Cady cannot be called a scientific boxer, as his style is to go in from the gong and endeavor to land the "haymaker" before the other fellow can. This fact, together with the fact that oung Fisher of Syracuse and Eddie Judecki of Buffalo, two similar fighters, furnish the main bout should attract a big crowd from this vicinity. It can be safely said that the program appears to be a peach tonight, clever boxing and wading in fighting being evenly mixed.

Bread as sweet as the "kind your mother used to bake," is the people's verdict applied to Black company's bread. adv

MR. C. M. ALLEN ALLOWS POLITICAL BOOM TO DROP

The aldermanic boom, launched by kind friends for C. Milton Allen, Jr., of South 3rd st., exploded with a loud report this morning when Mr. Allen flatly denied the rumor that friends were circulating a petition in his behalf and declared he would not consider the nomination under any circumstances. "There must be some mistake somewhere," said Mr. Allen. "I don't know anything about it and would not consider it." Mr. Allen is a popular member of the younger set here, and was formerly connected with the American Woolen Company, but has been more recently identified with Charles M. Allen, Inc., excelsior manufacturers.

GEN. WOOD REPLIES TO MR. GARRISON

Washington, Aug. 27.—Major Gen. Leonard Wood replied today to the rebuke administered him yesterday by Secretary of War Garrison for allowing Former President Roosevelt to address the soldiers at the Plattsburg military training camp. His telegram said:

"Your telegram received and policy laid down will be rigidly adhered to."

Secretary Garrison, after making Wood's reply public handed out a statement in reply to the announcement made by Colonel Roosevelt in New York last night. It said:

"I have just read Mr. Roosevelt's statement. I see he blames the whole thing on me. He takes the position that it is notorious that he has the habit of making indiscreet speeches, and that it therefore was my duty to find out if he intended to go to Plattsburg, and if so, head him off and save him from himself. Well, may be that is so. But it is rather a large order. He is a rather active man and I'm a very busy one, and it's going to be a pretty hard job for me to keep my eye on him all the time."

"The colonel's attitude about himself reminds me of the story of the Maine farmer who was on the way to the railroad station one morning when he met a friend:

" 'Where are you goin'?' He replied: " 'I'm goin' down to Bangor to get drunk and great Lord, how I dread it.' "

COLD STORAGE MAN COMES HERE MONDAY

The Division of Agriculture of the Chamber of Commerce announced this morning that Mr. Dwight S. Beckwith of Albion, New York, will give an interesting talk Monday evening at 8 o'clock in the City Hall on cold storage plants and how to conduct them. The division cordially invites all interested persons, vegetable growers, rafmers, etc., to be on hand.

Digest No. 6 of Proposed Amendments to be Submitted

Albany, Aug. 27.—The proposed amendment to the State Constitution as presented by the Committee on Finance and which contained the ideas of several individual candidates, which deal with debts contracted by the state, is regarded as one of the most important propositions to come befere the people.

Two points stand out in the proposed amendment. One would prevent the continuance of a state debt for an indefinite period by requiring that when a debt is incurred equal payments shall be made annually until it is retired. Another point is that the first payment shall be made no later than one year and moreover that the last shall be made no later than fifty years from the date of its creation.

The effect of the amendment will also be to base all debts except emergency debts upon serial bonds and insure that the life of such bonds shall not exceed the life of the improvement for whic they shall have been issued.

The shortcoming of the present methods were thoroughly gone into by the convention which went on record as having reached the conclusion that the attempt to limit the method of taxation to direct taxation had not been saisfacory and had been modified by an amendment in 1906.

Quoting from the Committee on Finance the following casts additional light upon the state debt question. "The State Government has not been successful in its methods of calculating and collecting the contributions to the sinking fund. As a result, in some years a very much larger amount has been contributed than would be necessary under scientific amortization. In other years, evidently in reliance upon such excessive contributions in thep ast, no contributions whatever have been made to some of the funds. There has thus resulted on the one hand an unnecessary and oppressive taxation of the present generation while, on the other hand, there has been no certain or automatic method provided for the enforcement of sinking fund contributions. The unnecessary burden which has been put upon present taxpayers can readily be seen when it is stated that up to September 30, 1914, there had been contributed to all the sinking funds \$3,487,679.41, where only \$4,940,095.13 was required under a 3 per cent. actuarial computation, making a surplus at that date accrued of \$29,574,584.28."

Again it is pointed out that the most certain simple and cheap way to amortize a debt is to pay off in annual installments, since the uncertainties of calculation which have affected the sinking funds of the state in the past are in consequence eliminated.

"There is no large fund left in the hands of public officials," continues the report, "to be cared for and invested and again re-invested for 50 years with all the attendant risk and temptation, and the danger that this power of investment in various local securities may be perverted into a political power, is entirely removed. Furthermore, the fact that the same administration which incurs a debt must begin within a year to make provision for its retirement necessarily and strongly tends towards responsibility and prudence in the contraction of debt.

WHAT COLOR ARE YOUR EYES?

Look In the Glass, Quick! What Color Are Your Eyes? Brown, Blue, Black or Gray?

To reach the box office of the Quirk Theater between the hours of twelve and one Friday with a copy of the paper in which you read the above, in his or her hand, The Evening Times will receive a free ticket to the Quirk Theater to see "Beyond the Law."

This is the play for young people and people who stay young. The heroism of Young Clarke will win the admiration from all, and impounds into the hearts of the little ones a moral which will remain in mind for years to come, and mould the younger generation into better men and women.

Remember the hour—12 to 1 Tuesday. Remember the place—Quirk Theatre. Remember to have a copy of The Evening Times with you.

DAIRYMEN TO LEARN SCORING FOR CHEESE

An educational scoring for butter and cheese will be held at the New York State Fair at Syracuse under the direction of the Cornell Daily Students' Association in co-operation with the State Fair authorities.

There are always a large number of entries and exhibits of butter and chesse, and these naturally vary in quality. These variations are said to afford unusual opportunities for dairymen to obtain practice in judging such dairy products. Since the object of the State Fair is to educate people along agricultural lines, it is thought that this educational scoring will be one more step toward utilizing the large exhibit of dairy products in an educational way, and everyone who is interested is not only invited to be present but to take part in the scoring contest.

The work will be in charge of men who are competent judges of dairy products, both from a scientific standpoint and a market standpoint.

"Black's white bread" and Black's cookies have won a place here. They suit the taste. adv

A trial subscription for The Evening Times costs little and gives you much in return. It is the people's paper. adv

PULP WOOD DESTROYED ON ANTICOSTI ISLAND

Yesterday's Oswego Times contained the following story:

Forest fires, leaving a trail of devastation in their path, are raging along the railroad line of Anticosti Island, according to thei nformation brought here today by Henry G. Chapin, representative of the Menier interests, owner of the island. Mr. Chapin came to Oswego to supervise the unloading of 700 cords of pulp wood brought here yesterday by the Cadillac, Captain T. D. Sullivan, for the Granby Paper Co. at Fulton.

Huge piles of pulp wood, cut last winter and stored along the railroad tracks, have been reduced to ashes and the clearings have been burned to the very ground. The fire has not spread to the interior of the island, the dense forest being wet and damp by the heavy fogs and rains which have swept over that country. The fire started from sparks from a locomotive, it is believed. Soft coal is used exclusively by the Anticosti railroad.

Mr. Chapin stated that two or perhaps three more cargoes of pulp wood will be received here this year. The New York office has received no word from their representatives on Anticosti Island as to the amount of damage, but it is believed from reports that have been received through information brought down the St. Lawrence by steamboat captains that the damage will be heavy. Captain Sullivan reports that smoke was seen all along the Saguenay river on his trip down.

There Is a Military Truth:

"Modern Fortifications Crumble Beneath Modern Guns"

The fortification built up by the Mail Order Houses will not stand the fire of the 45 centimetre directed at them by the series of Home Trade Boosts appearing daily in this newspaper. Here as one specimen:

PROSPERITY AT HOME

THERE IS NOTHING OF GREATER IMPORTANCE TO US THAN THE PROSPERITY OF OUR COMMUNITY.

PROSPERITY AT HOME IS BASED ON LOCAL BUSINESS CONDITIONS.

If our local merchants and storekeepers transact a large volume of business their prosperity is communicated to every person in the entire community.

The values of our real estate increase. Wages are increased. There is more money in circulation and it is more readily obtained for purposes of expansion, paying for improvements, buying luxuries, etc.

In every way we can discover better conditions on all sides when our business men are busy.

There is every reason in the world why we should spend our cash at home instead of sending it to the big cities. By keeping it in circulation in our home community we profit in many ways.

But if we send our money to the mail order houses, that is the last we hear of it. If enough money is sent to the mail order houses from our community we may easily put our local merchants out of business. By diverting our trade from our local storekeepers we can make it impossible for them to maintain their stores.

Every dollar sent out of our town to the mail order houses detracts just so much from our own individual prosperity, as well as from the prosperity of the storekeepers and from the community in general.

Think of the consequences if we should all send to the mail order houses for our necessities and our luxuries. How long would it be before our local merchants would have the "closing out sale" signs on their doors, to be followed by the "for sale" signs on the stores themselves?

AND WHEN THE BUSINESS HOUSES ARE ALL ADVERTISED FOR SALE WHAT WILL BE THE VALUE OF OUR OWN HOUSES AND LOTS?

Such conditions have actually prevailed in some communities. It has happened that the citizens became "mail-order-mad" and sent to the big cities for the greater part of their merchandise. The local merchants abandoned the field, because there was no business there for them. The burden of taxation fell on the various property owners, because there were no business concerns to bear the big proportion which generally falls to their share. Property values decreased until there were no bidders for undesirable real estate. The town became dead.

In the meantime the head of a big mail order house in Chicago was drawing an income of over a million and a quarter dollars, made possible by the business received by his concern, by mail, from such communities as the one above described and from our own community, as well as from others all over the United States.

Every dollar of this enormous income was diverted from storekeepers in small communities. Every dollar sent in to that great mail order concern, amounting to hundreds of millions of dollars annually, detracted from the prosperity of some community, struggling to become a center of population, but retarded by the short-sightedness of the citizens who sent their money out of town in preference to helping towards the prosperity of their own community.

Of course, it was all done unthinkingly. Those who sent their dollars to the mail order house did not stop to consider that these same dollars would add to the prosperity of the home community if expended at home. They did not stop to reason that by helping those in their own community they would be best advancing their own interests.

THIS COMMUNITY NEEDS YOUR HELP. YOU NEED THE HELP OF EVERY DOLLAR IN ORDER TO MAKE A BETTER COMMUNITY IN WHICH TO LIVE. YOU NEED THE PROSPERITY OF THIS COMMUNITY TO MAKE YOUR PROPERTY OF GREATER VALUE AND TO GIVE YOU THE BENEFITS OF A BETTER COMMUNITY IN WHICH TO MAKE YOUR HOME BRIGHTER, MORE DESIRABLE AND WORTH MORE IN DOLLARS AND CENTS.

We must all consider these matters. We must stop and think, before sending our dollars to the mail order houses, that our co-operation is necessary to the upbuilding of our community and that, for our own selfish advantages, even with no other motive, we must patronize home institutions and keep our dollars at home so that they can work for the advancement of our own prosperity.

We will all find that it is a fact, when we consider the question from every view point, that we can buy as cheaply and as profitably from our local merchants as from a mail order house, and we then know what we are buying, instead of buying a "pig in a poke."

The above is only one of the features printed in

The Home Paper of Fulton

Measured by inches The Evening Times carries more original local news than any other daily circulated in Fulton's trade territory.

Advertisers are not slow to appreciate the advantage to be gained by using a medium like The Evening Times to reach trade.

RED-GARBED FLEAS

Bible Also Included in Plunder Taken From Home With Martial Insects.

Hartford, Conn.—If two curious and unusual burglars who ransacked the curio room in Herbert Randall's home bring forth fruits meet for repentance he thinks they will return an old Bible they took, whatever disposition they may make of two red-robed fleas they included in their booty. The Bible was printed in Greek, and was more than a century old. The fleas were considerably younger—and dead.

"The fleas were dressed in red uniforms," said Mr. Randall. "I bought them from an old lady in Seattle who

Ransacked the Curio Room.

made a living dressing fleas in martial array. They reposed in little boxes against a background of white cotton, and I often observed them through a microscope. Their martial spirit had long since fled, but I hope they come to life and take vengeance on the thieves."

When no one was at home two men were seen to enter Mr. Randall's house at noon and leave an hour later. They carefully piled up a quantity of silver, but left it intact. They likewise spurned a gold and pearl necklace and numerous gold pins. They made their selection almost entirely from antiquities and curios, of which Mr. Randall has a large collection. The only modern article they took was a new suit of clothes.

One of the most valuable objects missing is an antique Roman gold pin, which was presented to Mr. Randall in Venice by an Italian woman of rank. They removed and left behind a topaz stone which was set in the pin. Many rare Greek coins, a cameo pin bought in Scotland, a unique diamond pin and an old gold watch are among the missing articles. Mr. Randall places his loss at $1,000.

THEY "GUY" HIS TIN HAT

Whiting Built It Himself, for Himself to Wear on His Own Head, So It's His Own Affair.

Bangor, Me.—William H. Whiting of Jonesport, a seacoast village town in Washington county, doesn't care if he is caught out in the rain while wearing his new hat. It is made of tin and has a band of copper. In general build and dimensions it conforms to the 1915 model worn by fashionable young men. Mr. Whiting concluded that straw was too flimsy, wool too hot, and Panama too costly, so he went to his own tinshop and from the thinnest tin that he could find built for himself this novel hat. It shines gladly in the sulight of the morning, reflects the glory of the sunset, and echoes musically in the rain.

The only think about it that makes Whiting any way nervous is that some day it may attract a bolt of lightning. People "guy" the hat, but Whiting merely observes that it's his own hat.

COWS TRAVEL FAR TO MOURN

Wander Seven Miles to Spot Where Calves Were Killed in Pennsylvania.

Philadelphia.—Employees at the cattle pens at Paoli freight station were puzzled the other day when they found two stray cows near the pens when they reported for work. The cows were lowing and wouldn't be driven away.

When F. H. Bernheisel, a cattle dealer of Newton square, arrived, he said that the cows were the mothers of two calves found trampled dead when a car containing a herd consigned to him was unloaded at Paoli. The calves were buried soon after the unloading and Bernheisel's employees drove the herd to his farm.

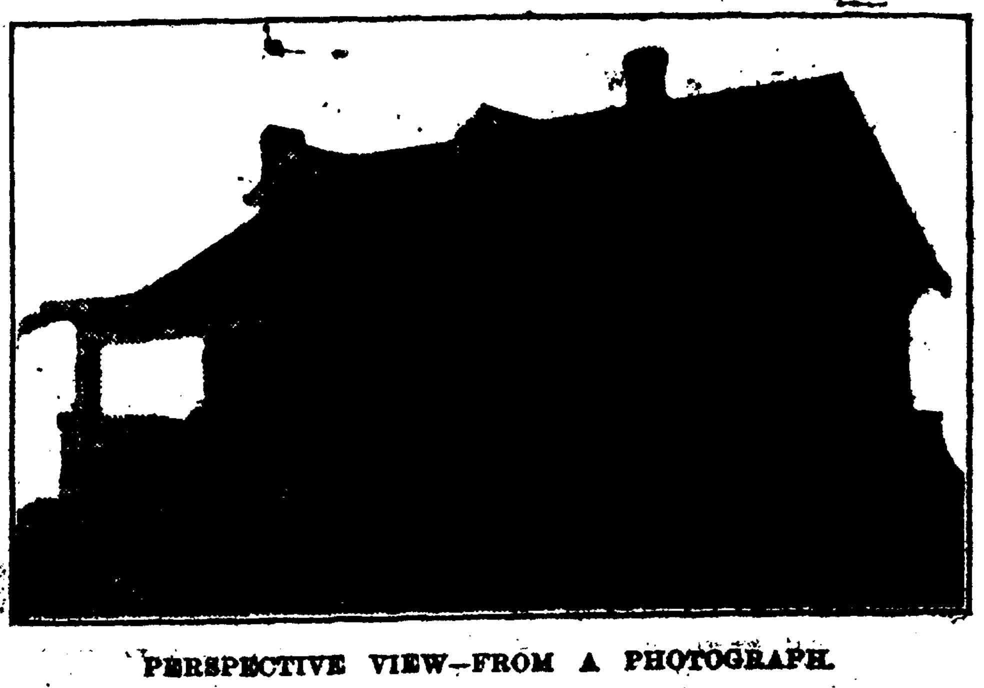
The two mother cows got away from the pasture during the night and made the seven-mile journey to their "babies" at Paoli in darkness.

Inventor Has "Invisible Submarine."

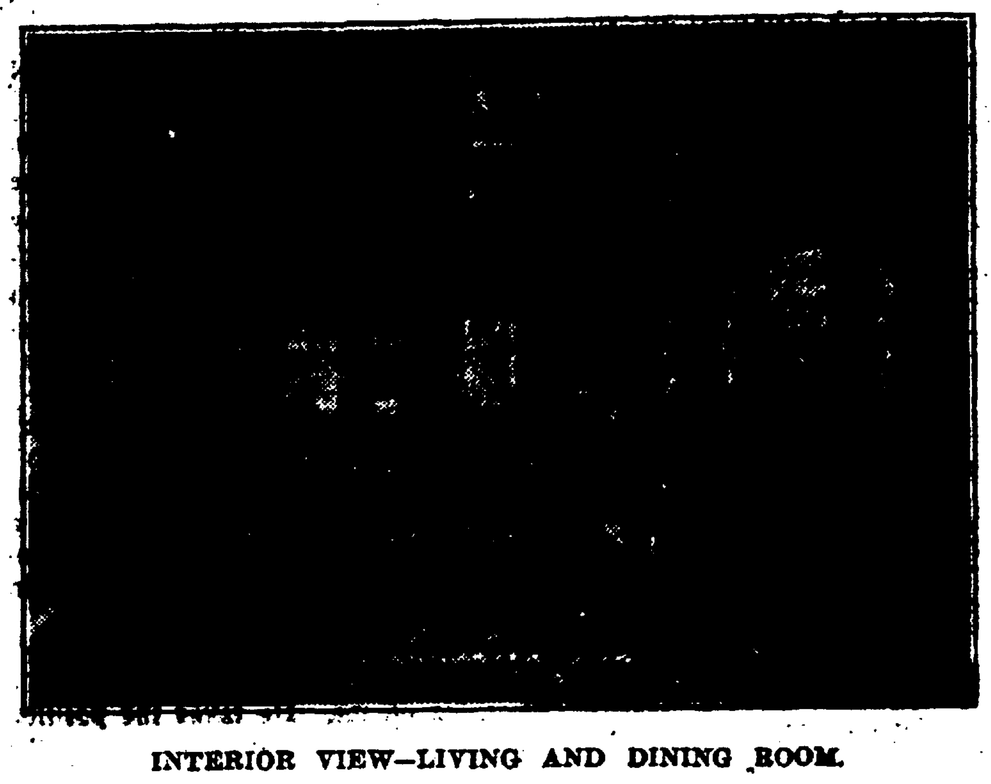
Denver, Colo.—Patrick Keenan of this city has applied for a patent on what he characterizes as an "invisible submarine." Keenan's idea is to clothe the portions of the craft above water with mirrors so that they will reflect the color of the waves.

[illegible] AND DINING ROOM EXTENSION

Design 1071, by Glenn L. Saxton, Architect, Minneapolis, Minn.



PERSPECTIVE VIEW—FROM A PHOTOGRAPH.



INTERIOR VIEW—LIVING AND DINING ROOM.

This house is artistic both as to the exterior and interior. Dark brown siding with white trim and the main roof sweeping over the front piazza give a very graceful effect. The living room and dining room are finished in dark oak, with beamed ceiling. Ionic columns extending to the ceiling give a classic and substantial effect to the division between the living and dining room. Both rooms are well provided with windows, those of the entrance being leaded. Size, 40 feet wide by 32 feet deep. First story 9 feet in the clear, second story 8 feet, basement 7 feet. Cost to build, exclusive of heating and plumbing, $4,000.

Upon receipt of $1 the publisher of this paper will furnish a copy of Saxton's book of plans, "American Dwellings." It contains 310 designs costing from $1,000 to $6,000; also a book of interiors, $1 per copy.

The Scrap Book

Getting His Hair Cut.

"HAD MY HAIR CUT TOO."

Mr. Cleverleigh entered his club a few mornings ago, his chin and cheeks showing plainly that he was freshly emancipated from the hands of the barber.

"Been having a shave, old man?" asked Dubbins lazily.

"Yes, and had my hair cut, too," was the reply. "Always have my hair cut when I have a shave."

"And how often do you get shaved?" was the languid inquiry from his friend.

"Every morning," answered Cleverleigh.

"And have your hair cut, too, every day?" said the other.

"Yes."

"Don't you find it rather expensive?"

"No; it only costs 15 cents."

"What! Only 15 cents for a shave and hair cutting?"

"That's all. Barber couldn't shave me without cutting my hair, you know."

And it took poor Dubbins seven and a half minutes by the club clock to see why.

Tears.

If every wish were granted,
  If every hope came true,
If every seed we planted
  A lovely blossom grew,
If every day were sunny
  And every one were wise,
There'd be no sweet in honey,
  There'd be no joys to prize.

If we knew that tomorrow
  Would be just like today,
With not one touch of sorrow,
  No care to spoil our play,
No doubt and no misgiving,
  No heartaches and no fears,
Then vain were all our living,
  We'd crave the joy of tears.

We'd sigh for sacred sorrow,
  We'd long to feel the rain,
And we should yearn to borrow
  The blessedness of pain,
For more than all the pleasure
  That came and quickly fled
Adown the years we treasure
  The tears that we have shed.
—Edgar A. Guest.

Wise Joseph.

Monsieur wanted the picture hung to the right; madame wanted it on the left. But monsieur insisted that the servant should hang the picture according to his orders. Consequently Joseph stuck a nail in the wall on the right, but this done he also went and stuck another in on the left. "What is that second nail for?" his master inquired in astonishment. "It's to save me the trouble of fetching the ladder tomorrow when monsieur will have come round to the views of madame."
—Argonaut.

One of Dr. Hale's Jokes.

When he was quite a young man the late Dr. Edward Everett Hale played a practical joke on some girls who were members of a party with whom he was summering on the Massachusetts coast.

All these girls were reading the same exciting novel, and one day at dinner it was a leading topic. Knowing that none of them had finished it, Hale, unknown to them, carried it away with him the next morning when he went to the city. On the train he wrote an absurd conclusion to the novel, laying the final scene at the summer resort.

Carrying this bogus conclusion to a publisher, a friend of his, he had it put in type, and then, carefully removing the bona fide conclusion, he pasted in his own. On his return he placed the book on the piazza and waited. The look which spread over a girl's face as she read that last chapter was, Dr. Hale declared, worth going far to see.

A Job of Branding.

The government official had been telling a simple old Scotch farmer what he must do in the case of a German invasion on the east coast of Scotland. "An' hae I really tae dae this wi' a' ma beesties if the Germans come?" asked the old fellow at the finish. The official informed him that such was the law. "All live stock of every description must be branded and driven inland." "Weel, I'm thinking I'll hae an awfu' job wi' ma bees!"

A Great Relief.

An old organ blower lay on his deathbed. He was a good old fellow, and everybody liked him. He had always been ready to do anything and everything connected with the church without complaining, but had evidently had his own troubles which he had kept locked in his breast.

The curate was with the old man, soothing and comforting him as best he could.

"Would you mind, sir," said the sick man, "asking the organist to play the dead march over me? I just love that dead march!"

"Certainly, with pleasure, Mr. Jones," replied the curate.

"Thank'ee, sir; none o' that there tweedledum Beethoven, you know, but Handel's."

"I can promise that much, my good man," said the curate.

The old man lay placidly for awhile and then exclaimed with fervor, "How thankful I am that I shan't have to blow for him when he plays the loud part at the end!"

Woman's World

Wife of New Secretary of State Occupies Mother's Former Place.

Photo © by Clinedinst.

MRS. ROBERT LANSING.

Not since the days when Mrs. John Hay entertained official Washington as wife of the secretary of state has a cabinet hostess of this rank appeared who is as well equipped as Mrs. Robert Lansing, wife of President Wilson's new premier.

Mrs. Lansing will enjoy the unique experience of succeeding to the very exacting social duties which were so ably performed by her mother back in the Harrison administration when John W. Foster, her father, was secretary of state.

Mrs. Lansing, then Eleanor Foster, was just making her bow in society, having been graduated from Smith college. Her interest in her mother's duties was sufficient to give her an experience which she will now be able to turn to practical advantage.

The wife of the secretary of state is called upon for many exacting social duties, and Washington expects to see Mrs. Lansing make a notable place for herself as a cabinet hostess. She is a good conversationalist, quick at repartee and somewhat of a wit. Furthermore, Mrs. Lansing is the youngest woman upon whom the duty of leading the cabinet's social affairs has fallen in many years.

Mrs. Lansing was married to Mr. Lansing in 1890 in the home of her father on I street, where the Fosters lived for many years. The Lansing wedding was attended by a notable gathering, including President Harrison and family, Vice President Morton and his family and other prominent officials and diplomats.

Mr. Lansing took his bride to a new home in Watertown, N. Y., where they have always lived except for the time spent in Washington. They spent many winters with General and Mrs. Foster before Mr. Lansing was appointed counselor of the state department, and since then they have continued to make their home with the Fosters, who have built a spacious and luxurious home on Eighteenth street, just opposite the Austro-Hungarian embassy, in Washington.

Mr. and Mrs. Lansing have no children.

Mrs. Lansing as the foremost of the cabinet wives will take precedence over many other women. She will take the lead in all things social in the cabinet circle. In social rank she comes next to the wife of the president or the president's hostess. Even the wife of the vice president does not have the social responsibility of the wife of the secretary of state. It is her duty to entertain the diplomatic corps, and it is to her that the wives and families of newly accredited ambassadors and ministers pay their respects after they have made their formal calls at the White House.

The most brilliant function of New Year's day next to the White House reception is the breakfast given by the secretary of state and his wife to the diplomatic corps.

Mrs. Lansing is known in Washington as a woman of exceptionally good taste, modesty and common sense.

Ways to Clean Silver.

One of the easiest ways to clean silver is to wash it with a soft cloth saturated with kerosene, then rinse it with scalding water. A long bath in sour milk will clean badly tarnished silver. If vinegar cruets are filled with it and left awhile the films on the inside will soon disappear.

Alcohol and salt will remove egg stains immediately, and alcohol and soda is also a good cleanser. Many prefer using alcohol to ammonia, though the latter does the work.

A chamois bag filled with powdered magnesia is very useful for polishing all silver articles. An old piece of velvet will prove wonderful for polishing silver, and a broken clothespin is a handy contrivance. Covered with a cloth, the flat, rounded tip will be more useful in working between the tines of the work and in moldings that require more friction than a brush can give.

Button Hooks.

For 5 cents buttonhooks with white bone handles can be bought. A supply of these might be laid in by many a housewife to advantage, for every room ought to be furnished with at least one shoe buttoner. Nothing is so aggravating as to be unable to find one's buttoner.

HOW TO KEEP MOSQUITOES AWAY.

To keep mosquitoes away from one while asleep it is recommended that the following solution be prepared and a few drops put on the pillow and on a towel near the head of the bed:

Oil of citronella	1 oz.
Spirits of camphor	1 oz.
Oil of cedar	1½ oz.

Another preparation for the same purpose is:

Oil of lavender	1 oz.
Alcohol	1 oz.
Castor oil	1 oz.

This is not as unpleasant as the other mixture, and a few drops can be sprinkled on the face and hands and on a towel hung at the end of the bed.

Orange peel burned in the room is also an efficacious mosquito killer. For mosquito bites plain soap applied to the bitten places is effective. Other remedies are ammonia, alcohol, glycerin, bicarbonate of soda, sugar, calcium chloride.

TEST FOODS.

Many Household Staples Found to Be Adulterated.

Housewives ought to have a bit of many kinds of knowledge. The perfect housewife must not only have a thorough knowledge of the cuisine, but she must also be an excellent business woman and know how to apply business methods to her home. She must have a practical acquaintance with chemistry and biology and must have the art of making a house into a home.

Just at present the women in the home need another kind of knowledge which will prove invaluable to them at many a time. That is how to know if their food is adulterated. There are, unfortunately, frauds in every line of work, and the food frauds always seize upon such occasions as the present, when the authorities are busy elsewhere, to perpetrate the worst crimes against the community. Probably foodstuffs all over will be adulterated and the wise housewife will learn how to detect the presence of foreign elements in the provisions she buys.

Butter is one of the first to suffer. Margarine has often been used as a substitute in the past and probably will be passed off many times in the future. While margarine is perfectly wholesome, still no woman wants to pay the price of butter for the less costly margarine. A reliable test is, melt a little bit in a spoon over a gas burner. Good butter froths a great deal, but makes very little noise. Margarine, on the contrary, crackles and bursts and makes little explosive sounds. After applying this test you can refuse to buy again at the same shop if you detect the presence of margarine in the substance which you bought as butter.

The easiest and commonest food to adulterate is milk. Watered milk is almost as common as plain water, but it is so easy to discover the fraud that no housewife need be taken in by it. Pour your milk into a pail or pot. Then take a fairly stout, very bright knitting needle and plunge it into the milk. If, on removal, a large drop of the fluid clings to the end of the needle for quite a time without falling off you may feel quite sure that the milk is all right. If, on the other hand, the liquid runs right off the steel needle and forms no lasting drop the milk has certainly been watered.

Mint Relishes.

Green Peas and Mint.—Shell green peas just before they are to be cooked. Line the top of a double boiler with green lettuce leaves, put the peas in, add a tablespoonful of chopped parsley, cover and cook until done, which will be about half an hour or perhaps forty minutes. Then drain, add a tablespoonful of finely minced mint, salt and pepper and two tablespoonfuls of butter.

Mint Sauce.—In taking your walks abroad at this season bring home with you if you can a handful of mint from the brookside. To make the sauce that goes so excellently well with spring lamb or game chop fine the well washed leaves of a bunch of mint, then pour over them a cupful of boiling water and add two tablespoonfuls of sugar. Cover and let stand in a cool place for an hour to fuse; then add a quarter of a teaspoonful of salt, a dash of paprika and four tablespoonfuls of vinegar. Mix thoroughly and serve with the meat.

Mint Chutney—Add to a handful of finely minced mint leaves a cupful of seeded raisins, two tablespoonfuls of sugar, one of tomato ketchup and a saltspoonful of salt. Mash and mix until juicy; then serve in a boat with cold meats.

Mint Sherbet.—Take six lemons, two oranges, two cupfuls of sugar, two cupfuls of water, one large bunch of fresh mint, the white of one egg and a piece of green leaf the size of a pea. Squeeze the juice from the lemons and oranges. Pour cold water over the peelings and put on the stove, allowing it to come to a boil; then pour it over the sugar and mint, which has been cut up fine. Cover it and allow it to steep for an hour. Then strain over the juice of the lemons and oranges. Dissolve the green leaf in a little of the mixture until it is clear and then add to the juices. Mix the ingredients together with the white of an egg, well beaten, and put in the freezer. Serve in sherbet glasses garnished with a tiny sprig of mint.

Easy & Practical Home Dress Making Lessons

Prepared Especially For This Newspaper by Pictorial Review

MODISH COAT WITH NEW STORM COLLAR.

COAT NO. 6375. SKIRT NO. 5989

A coat of taupe-colored duvetyn, closing to the neck with Chin Chin collar and having a pleated lower front section.

An exceedingly modish coat is this, made of taupe-colored duvetyn and self-trimmed. It closes at the neck edge with a "Chin Chin" collar, although the fronts may be turned back to form revers, if desired. The front is pleated under a belt which terminates at the under-arm seam, leaving the back to hang in plain effect, although there is quite some fullness at the lower edge of the skirt. The length of the coat is about 45 inches, for this year women of fashion are showing a decided liking for the longer effects.

In average size the model requires 4¼ yards 54-inch material, but, if used for misses or small women, 3¾ yards will be sufficient. By paying strict attention to the directions given in today's lesson the home dressmaker will have no difficulty in reproducing the coat. The first thing to do is to pleat the front, bringing the "T" to corresponding small "o" perforations and

tacking into place. If the line of small "o" perforations is followed the center-front will be easy to locate. Now adjust underfacing to position underneath front, corresponding edges even. Arrange belt to position on front, matching corresponding single large "O" and small "o" perforations; double "oo" perforation in belt indicates center-front. Join front, under-arm and back as notched, close shoulder seam as notched. Face collar and sew to neck edge as notched, center-backs even, leaving collar free forward of large "O" perforation. Small "o" perforation in collar indicates center-front.

All now is in readiness for the sleeves, the seams of which must be closed as notched, easing in any fullness between notches at the elbow. Turn hem at lower edge on small "o" perforations; if sleeve is desired with cuffs, cut off hem ⅝ inch below small "o" perforations. Close cuff seam as notched, sew to sleeve, single large "O" and double small "oo" perforations even; tack the pointed extension to position. Sew sleeve in armhole as notched, easing in any fullness.

If preferred, the turn-back cuffs may be omitted.

Pictorial Review Coat No. 6375. Sizes 32, 34, 36, 38, 40, 42, 44 and 46 inches bust. Price, 15 cents.

Skirt No. 5989. Sizes 22 to 36 inches waist. Price, 15 cents.

NEAT FOOTWEAR.

The Fad Styles Should Be Avoided by Women.

Regarding footwear, one cannot lay too much stress on the fact that it is one of the most important features of feminine wardrobe this season. Nevertheless the woman of good taste will disregard the many fad stockings and shoes offered to her and will select quiet, elegant pedal coverings that will distinguish her from the great mass who rush in where angels fear to tread.

It is perfectly good taste to wear the spats of white, of tan or pale gray with the morning or afternoon costume. With the latter, however, may be worn a low shoe of white, of gray or black kid—according to the costume—with trimmings of a contrasting color.

It is always better judgment to have the hosiery match the color of the dress or suit. This makes less awkward, in effect, the woman to whom the very short skirt is not becoming, and it makes less conspicuous the unshapely ankle which offends the eye of the esthetic.

After several seasons of buckle ornamentation an era of simple lacings or bow decoration has set in. Very few buckles are seen even in connection with the dancing slipper. Bronze vamps with champagne uppers are among the novelties offered for wear with the demi costume. They continue the color scheme of the costume and thus counteract the grotesque line of the very short skirt.

Shoe trees have improved vastly within the last few seasons. To a very large extent the wooden forms have been supplanted by those of metal.

Orange Mint Relish.

Take four large oranges, peel carefully, slice and cut into cubes the size of dice. Add an equal amount of pineapple prepared as above, sprinkle with four tablespoonfuls of powdered sugar, two tablespoonfuls of fine chopped mint, one tablespoonful of lemon juice and one tablespoonful of sherry wine. If the pineapple is not fully ripened crush enough to add a tablespoonful of the juice. Stir together lightly to prevent mashing the fruit. Serve in sherbet glasses cold and garnish with candied cherries or fresh cherries or other berries, as preferred.

Cottage Cheese Hint.

In making cottage cheese use an enameled ware colander in which to press it. Any milk product is very easily affected by its surroundings, and a metal colander may not only give a flavor, but is apt also to slightly darken the cheese, which should be of snowy whiteness.

After it has thoroughly drained add salt, a good sized piece of butter and a tablespoonful of sweet cream. Mix, cool on ice and serve while fresh.

Economy Hints

A penny saved is a penny earned.—Benjamin Franklin.

ARTICLES that are worn more or less evenly in all parts are best not patched, because, the surplus material of the patch being newer than that of the garment, it will only stain or tear it.

When patching is referred to as repairing it implies putting in entire new portions of a garment, such as bands, cuffs, collars and facings, and is best learned from the ways of making the garment. The ordinary patching is cutting out worn or torn parts and putting in better material. The patch must be of the same substance, color and quality as the original material.

Entirely new material, being stronger than the garment, should not be used. If partly worn pieces are not available it is best to choose thinner material. Wash fabrics should always be washed before using. Dresses generally lose some of the original color through wearing, and one may fade a patch in the sun to the right tone before using. The first principle in patching is to have the patch show as little as possible when finished.

In inserting a patch care must be taken to have the warp of patch and article run in the one direction. Selvages usually all run lengthwise on garments because the warp threads have more strength. When the position of the selvage cannot readily be determined pull the material in different ways; the stronger or warp threads will yield and stretch less than the woof; or fray out a few threads and you will find the warp smooth against a wavy appearance in the woof.

There are many ways of preparing and setting in these patches, but a few usual rules are to be observed. The widths of hems (suited to the thickness of the material) must be the same at each side; the corners must be firmly and securely sewed; the patch must be on the wrong side when finished.

An easy method is to hem the patch on the wrong side and then fell it on the right. Strike or mark on the right side of the material where it is to be cut away, then mark (on the right side) for the seam allowance, usually about one-quarter inch; lastly mark the actual width of the fell according to the thickness of the material. This last marking or striking is on the wrong side, as that is where the patch is to be sewed on.

Hints for Housewives

American Housewives Can Mix Their Own Flour.

That the American housewife is herself quite capable of doing all the flour mixing desirable, is the commentary of Assistant Secretary of Agriculture Vrooman on the mooted mixed flour question. He says further that the American housewife could materially reduce the cost of living if she were to get the flour mixing habit.

"There are some thirty substitutes that can be mixed with wheat flour in making bread. Many of these are more nutritious than wheat flour; some of them are cheaper than wheat flour, and of these two or three at least are commercially obtainable almost anywhere.

"Potatoes, corn flour and rice (in certain sections) can be used with profit in mixture with wheat flour in making yeast bread. With wheat flour as dear as it is now, the careful housewife stands to effect quite a saving by using one of these products to eke out her wheat flour. Experiments have shown that the substitutes can be used successfully in the proportion of one part to three parts of wheat flour. At least three-fourths of the mixture must be good wheat flour.

"Potatoes have a certain advantage in this regard, since potato bread can be made without going to the trouble to get the commercial potato meal. Plain mashed potatoes, four parts of mashed potatoes to three parts of wheat flour, will serve the purpose quite well. If the dry potato meal or flake is used the ratio should be one part of potato to three parts of flour. Boiled rice can be used in much the same way as mashed potatoes, care being taken to allow for the water in the rice and to use about three times as much in bulk as would be used of the rice flour.

"In making potato bread the sponge should be used and just enough water to serve to mix the yeast with the potato, since the sponge becomes very soft after partial fermentation. The remainder of the flour is worked in afterward, care being taken to make an extra stiff dough, which should be raised till quite light. This bread is much moister than bread made of straight wheat flour.

"Corn flour, which should cost about two-thirds the price of wheat flour, may be mixed with wheat flour direct, one part of corn flour to three parts of wheat flour. Use the mixture just as though it were wheat flour, and mix it yourself.

"It should be remembered that the addition of starchy materials, such as potatoes, rice or cornstarch (which is sometimes used to adulterate wheat flour in baking), tends to make a loaf less rich in protein and hence less nutritious than the straight wheat flour. The addition of corn flour makes little if any change in the nutritive value of the bread, but makes it cheaper.

"There are other flour substitutes, such as soybean meal and pea flour, which serve to add greatly to the nutritive value of the loaf when mixed with wheat flour. These products unfortunately cannot be recommended in the present emergency, since they are not as yet common articles of commerce in this country.

"In this connection it should be said that a great saving could be effected if the housewife would emulate the professional baker and buy low grade wheat flours. There are flours on the market quite as good for home baking as the fancy patent flours, which cost in bulk from 25 to 40 per cent less than the fancy grades. Such are the so called 'second clear' and 'low grade' flours, which are graded lower than patents merely because they are darker, not because they are any less nutritious or less palatable. In fact, the darker color may be evidence that the flour is more nutritious than white flour.

WIFE BEATER IS WHIPPED.

White Man Gets Fifteen Lashes at Post in Maryland.

To Charles S. Dove of Middlebrooke belongs the distinction of being the first white man to be whipped in Montgomery county, Md., for wife beating. Fifteen lashes upon his bare back were administered in the Rockville jail yard by Sheriff Peyton Whalen in the presence of the jail physician and a number of witnesses.

Several of them drew blood.

Chicken Shortcake.

This very unusual dish must be put together at the last possible moment and served immediately. Make a good shortcake of biscuit dough. When done, split the cake and butter it. Have ready a plate of thinly sliced boiled chicken which has been cooled, but not iced. Fill the shortcake with the chicken and spread thickly with a good mayonnaise, lay on the upper half, lightly butter the top, then spread it with a small bottle of macedoine vegetables that have been drained, chopped and marinated in French dressing for one hour, then drained again and mixed with mayonnaise. Serve the shortcake hot and as quickly as possible garnish with sprays of parsley drawn through thin slices of lemon. This is a rich, but most satisfying dinner dish.

TODAY'S FASHION NOTE

Members of the younger set will like this coat suit of blue and green mixed woolen material. The belt and collar of the coat and broad band on the skirt are of dark blue taffeta. The skirt is a two-piece circular model and may be cut either straight or on the bias. The entire costume calls for 4 1-2 yards 44-inch material, with 1 yard 40-inch silk for trimming.

Pictorial Review Coat, No. 6193. Sizes, 14 to 20 years. Price 15 cents. Skirt No. 5978. Sizes 14 to 20 years. Price, 15 cents.

Pictorial Review Patterns may be procured at the M. Katz & Co. Department Store, Fulton.

The Kitchen Cupboard

CABBAGE SALAD.

NEW cabbages are plentiful and cheap. People who do not go in for the more expensive salads should try them, and those who have had plenty of lettuce, cucumber, romaine and other winter salads will relish the cabbage for a change. This member of the mustard tribe is more easily digested raw than cooked unless the cooking be very deftly done.

Cabbage contains a volatile oil, rich in hydrogen and sulphur, which is wasted in careless cooking.

To Prepare the Cabbage.

Having chosen a firm head of cabbage, removed the outer leaves and halved it, one soaks it in cold water for an hour. Then the water is shaken out and it is very finely shredded and cut into short lengths. Then it is ready for the dressing, which may be one of two sorts, the simple French dressing or the one made of eggs and milk. It may be served after the meat course or with it, as some prefer. In either case it must be served cold.

Egg and Milk Dressing.

To make the egg and milk dressing beat one egg and add a mixture of one tablespoonful of flour, one teaspoonful of sugar, a quarter teaspoonful of mustard. Pour a cupful of milk into the whole, put it on the fire and bring it to a boil. When it has boiled add a half cupful of vinegar and salt to taste. Stand aside to cool. At serving time mix it with the dried, cold, shredded cabbage.

For this everything used, including the bowl and the wooden fork, should be cold. These are the proportions: After rubbing the bowl with half an onion or half a clove or garlic, put in half a teaspoonful of salt and a saltspoonful of pepper and add gradually while rubbing with a wooden fork six tablespoonfuls of olive oil. When the salt is dissolved add slowly a tablespoonful of vinegar (plain or tarragon) or lemon juice. Beat well and it is ready to pour over the cold, shredded, dried cabbage or any other green salad.

French Cooking Terms.

Anglaise—English style. Roasted or boiled plain.

Au Gratin—Dishes prepared with crumbs of bread and baked.

Bisque—A soup usually made with shellfish.

AUSTRIAN WEDGE CUTS OFF RUSSIAN ARMY AT DNIESTER

London, Aug. 27.—Brest-Litovsk, the greatest fortress and entrenched camp in Russia, and regarded by military authorities as a vastly more important stragetic point than Warsaw, has been occupied by the Austro-German armies. The exact time of its evacuation by the Russians cannot be stated, but apparently it began soon after the piercing of the western and northwestern front of the position by the Germanic allies on Tuesday night. As was the case at Warsaw, Ivangorod and Ossowetz, the Russian garrison not only escaped with minor losses, but managed to carry with them or destroy all their supplies and ammunition.

No attempt was made by Grand Duke Nicholas to defend the fortress itself. The Russian commander in chief, as shown all through the great campaign, regards a fortress as important only so long as it serves the purposes of a field army. In other words, it is used to facilitate the movements of the mobile force, not to imprison and immobilize it. Acting on this theory, he has not hesitated to sacrifice these fortifications of steel and concrete if by so doing he can save his armies, and the Russian people, having been brought to understand this, are accepting the bulletins of evacuation with the utmost equanimity.

The three weeks since August 5, the day of the German entry into Warsaw, has seen the German allies march and fight over 120 miles of Polish plain, between the Vistula and the Bug, seize the fortresses of Novo Georgievsk, Kovno, Ossowetz, Bialystok and Grodno and the secondary fortress of Olitia, crush the entire main Russian line of defense, the Bug river-Brest-Litovsk barrier.

In the opinion of observers here the most serious aspect of the situation for the Russians now is the Austro-German wedge driven into the Pripet marshes from Kovel. This wedge has effectually cut off the army south of Kovel, and operating along the Zlota River to the Dneister, from all connection with the great body on the line from Brest-Litovsk to the Gulf of Riga. The only railway communication now between the extreme left wing reaching down to Bessarabia and the Roumanian frontier and the center and right is by a circuitous route through Kovno and Lunienz, a distance of more than three hundred miles over a single track railroad. It is the first definite break the Teutonic allies have been able to inflict in the Russian alignment in the more than a year of war.

The retirement of the Russians from Brest-Litovsk is directed now toward Plinsk, on the eastern edge of the Pripet marshes, and one hundred miles away. They retain control of the only railways traversing the swamps, a line direct to Plinsk and the main road to Moscow. These roads, one between Brest-Litovsk and Bulkof separate at the latter point and run east and northeast respectively. An Austrian cavalry is moving north over one of the swamp roads from the southeast of Brest-Litovsk in an effort to cut these railways at Kobrin, but it is believed the retiring Russians will have passed Koblin before the Austrians will be in a position to endanger their avenue of retreat.

The Russian fortresses of Brest-Litovsk, which has just capitulated to the Austro-German forces, had been considered one of the strongest fortresses in Europe and was the southern base of the second Russian line of defenses to which the armies of Grand Duke Nicholas retreated after the fall of Warsaw. The citadel is situated on the Bug River and at the junction of several railways, 131 miles south of Grodno and 120 miles due east of the Polish capital.

The town, which had a population of about 50,000, was one of the most important depots for and the distributing point of military supplies near the western frontiers of Russia proper.

OFFER TO GERMANY TO MEDIATE WITH BRITAIN

Washington, Aug. 27.—Germany's suggestion that the United States seek to meditate between Great Britain and Germany the issues in Germany's submarine warfare and the British blockade of German ports is virtually an acceptance of the American Government's offer thus to act as mediator contained in the last note to Germany in the Lusitania case. The text of the American note bearing on this matter follows:

"The Government of the United States and the Imperial German Government are contending for the same great objevt—have long stood together in urging the very principles upon which the Government of the United States now so solemnly insists. They are both contending for the freedom of the seas.

"The Government of the United States will continue to contend for that freedom, from whatever quarter violated, without compromise and at any cost. It invites the practical co-operation of the Imperial German Government at this time, when co-operation may accomplish most and this great common object be most strikingly and effectively achieved.

"The Imperial German Government expresses the hope that this object may be in some measure accomplished even before the present war ends. It can be.

"The Government of the United States not only feels obliged to insist upon it, by whomsoever violated or ignored, in the protection of its own citizens, but is also deeply interested in seeing it made practicable between the delligerents themselves, and holds itself ready at any time to act as the common friend who may be privileged to suggest a way."

POTATO CROP IS ROTTED BY RAIN

Many Farmers Experiencing Trouble Getting Harvesting Done, and Tubers Are Rotting at Some Places.

Numerous complaints are made by farmers of the surrounding country that the heavy rains are raising havoc with the potatoes, as many of them are rotting and it will be several weeks before the late potatoes will be fit to dig. The farmers fear that by the time digging is begun many hundred bushels in this section may be destroyed, if the rainy weather continues.

Farmers are experiencing great difficulty in getting their harvesting done, due to the rain nearly every day. Some farmers have been obliged to cut open the bundles to let the grain dry out.

Strange as it may seem there is quite a little haying to be done in Oswego county yet. Haying was unusually late this year and then in the middle of it grain began to ripen. As the hay was greener than the grain and would stand longer without loss farmers turned their attention to the grain.

But that is not all. There are many meadows in Oswego county where a second crop of hay will be cut this year, particularly where clover is now growing. The yield of clover this year has been unusually large. Already many farmers who raise alfalfa have cut the second crop and there is every indication that they will be able to cut a fair 3d crop if the frost holds off. Fall seed was never better in the world at this season of the year than at the present time. There has been practically no complaint among farmers this year that their wells have gone dry. Some farmers who have always had to pump water every day in the year for their stock have not had to pump a drop this year on account of the large amount of rain.

SURROGATE AND JUDGE MAY PRACTICE LAW

Oswego, Aug. 27.—County Judge Coville and Surrogate Miller can continue to practice law as long as they hold their respective offices. There will be no combination of the offices of Surrogate and County Judge in this county and no amendments to the Constitution along this line will go before the people at the November election as had been predicted by many of the delegates to the Constitutional Convention. The matter was settled in the convention on Monday when the amendment was voted on and defeated by a vote of 55 to 23. The vote was actually taken on an amendment to leave the statute as it is at the present time. Nothing more is expected to be heard of the matter during the present convention.

POMONA GRANGE TO HOLD ITS QUARTERLY SESSION

The quarterly session of Oswego Pomona Grange will be held at Bernhard's Bay Tuesday, September 7th. The program follows:

Morning session, 10 a. m. Opening song, Bernhard's Bay choir. Opening of Grange in Fourth degree. Business session. Reports of Granges. Recess for dinner.

Afternoon session, 1:30 p. m. Song by choir of Bernhard's Bay Grange. A by choir of Bernhard's Bay Grange. Address of welcome, W. H. Taft, Master of Bernhard's Bay Gragne. Response by J. H. Mace, Master of Pomona. Address by State Grange speaker. Duet by Messrs. Clayton Winn and William Bristol. Work of Farm Bureau, M. L. Moran. Solo by Harry Myers. Recitation, Mrs. Oscar Greene. Unfinished business. Closing song.

HIGBEE CHOSEN GRAND CHIEF

I. C. Andrews of Syracuse Made Grand Chancellor—Poster Day to Be Observed October 12.

The program of yesterday closed the convention of the Good Templars. The session of state-wide representation was considered one of the most successful ever held. The delegates were a body of live, energetic men who are working with whole-souled interest to further the temperance cause.

New officers were elected yesterday afternoon. They are: George H. Higbee, Springfield, grand chief; I. C. Andrews, Syracuse, grand chancellor; Mrs. W. Stewart, Fulton, vice-templar; Mrs. Albert Bowerman, Rochester, S. J. W.; Gordon H. Payne, Medina, electoral superintendent; Amanda M. Myers, Schenectady, superintendent of temperance; A. M. Liffingwell, Waterloo, secretary; Arthur McCoy, Gloversville, treasurer; William Band, New York, D. I. G. T. The Board of Managers was chosen as follows: George H. Higbee, A. M. Leffingwell, J. C. Anmond, Syracuse; Charles Hustead, Pleasant Valley, and Lewis F. Moore of Kendall.

Poster Day will be observed throughout the nation on October 12. The purpose will be to show the harvest reaped through intemperance.

At the close of the session resolutions were read wherein appreciation was voiced for the cordial reception given by the city through its officials. The co-operation of organizations and individuals who aided in making the convention a success, was also noted.

The main sessions of the convention were held in Odd Fellows' temple in Oneida st.

The time to change your living place is before the fall rush begins. Advertise your wants in The Evening Times.

REV. J. W. BARRETT TO PREACH AT DEMPSTER

Sunday will be the last day of the Dempster Grove campmeeting. The love feast at 9:30 a. m. will be led by the Rev. C. F. Miller of Minetto; at 10:30 there will be preaching by the Rev. G. F. Shepherd, D. D., of Rome; at 2:00 p. m. preaching by the Rev. J. W. Barrett of Fulton; at 7:00 praise service and preaching by the district superintendent. The closing after service will follow.

Yesterday afternoon the Rev. L. F. of the anti-Saloon League delivered an address on temperance, after which the "Town Meeting" was held when financial reports of the campmeeting association were made and the interests of the summer community considered.

FIVE MEXICANS KILLED IN U. S. BORDER FIGHT

Brownsville, Tex., Aug. 27.—Five Mexicans killed two American cavalry horses, wounded in all night fighting between United States soldiers and Mexicans on the border near Santa Maria and Progresso Wednesday. No casualties among American soldiers were reported.

Soldiers going to relieve a guard near Progresso were fired upon by Mexicans on the other side. Five hundred shots were exchanged. A battle followed at Santa Maria two hours later when Mexicans appeared on the bank of the river and opened fire.

Company H of the Twenty-sixth Infantry, was sent to Rio Grande City this afternoon on a special train.

GOES 98 MILES AN HOUR

Chicago, Aug. 27.—Bob Perry, a college motorcyclist, made an average of 98 miles an hour here today when he established a new ten-mile record of 6:05.

HUSBANDS CHARGED BY WIVES WITH NON-SUPPORT

James Rebeor and Edward Stauring were arraigned in City Court this morning, charged with being disorderly persons. The wives of the men were the complainants in both instances and the charge was non-support.

Mrs. Stauring was unable to reach any agreement with her husband this morning, but the Rebeor case was settled temporarily. Both women claim they are in danger of becoming charges upon the city, as their husbands are not contributing to their support nor to the support of their families.

SUPREME COURT—County of Oswego. Fulton Savings Bank vs. Mary Brooker, James Brooker and Charles F. Brooker.

In pursuance of a judgment and decree of foreclosure and sale duly granted in the above entitled action on the 21st day of August, 1915, at a Special Term of the Supreme Court, held at the Court House in the City of Syracuse, New York, and duly filed and entered in the Clerk's office of the County of Oswego on the 23rd day of August, 1915, I, the undersigned, Referee appointed in and by said judgment and decree to make such sale, will sell at public auction the mortgaged premises in and by said judgment and decree directed to be sold and described therein as follows:

"All that Tract or Parcel of land situate in the City of Fulton, County of Oswego, and State of New York, known and distinguished as thirty-seven (37) feet in width off from the south side of Lot Number three (3) of Block Number one hundred and sixty-two (162) as the same is laid down on the map of the Town Plat at Oswego Falls, made by Peter Schenck for Col. James L. Voorhees in 1848, and being the same premises conveyed by John Burns to James M. Brooker by deed recorded in Oswego County Clerk's office in Liber, 236 of Deeds, at page 130" at the office of Piper & Pendergast, in the Fulton Savings Bank building, 75 South First Street, in the City of Fulton, County of Oswego, New York, on the 18th day of September, 1915, at 10 o'clock in the forenoon of that day.

Dated Fulton, New York, August 23rd, 1915.

RUSSIA FINDS DEADLIER THAN ARMS INTRIGUE

M. Sazanoff Says Teutons Are Trying New Kind of Poison to Break People's Spirit. There Can Be No Peace While Soldiers Remain on Muscovite Soil.

By Stanley Washburn.

In Russia, Aug. 28.—Russia is now facing two attacks. One is German's advance with her armies. The other is far more serious. It is the German publicity campaign which moves through a thousand intricate channels, and is aimed to discourage, with misinformation, the Russian public.

M. Sazanoff, Foreign Minister of Russia, authorizes me to quote him as follows:

"Unwillingly the Russian government takes note of malicious rumors which have been circulated in Petrograd and other parts of Russia as to the real conditions.

"The Germans have tried every method to break the Russian strength, from attempts by dropping bombs on undefended cities and killing women and children to start a panic that might spread to the army, to use the poisoned gas which produced such hideous suffering that it was hoped our heroic soldiers would be frightened from their duty.

"The world has seen how pitifully these efforts have failed. Three months of continued effort to break our army has been unsuccessful. The Teutons are now trying a new kind of poison, which is aimed through specious and plausible reasoning at breaking the spirit of the Russian people and the Russian army by circulating reports of a lack of harmony between the allies, failure of our munitions supply, and the prospect of an independent peace with Germany.

"I am ashamed that any Russian can seriously discuss such subjects. They are the enemy's latest attempts to accomplish by intrigue results which he has never yet obtained by arms. Taking these fables against the character of our people and our government in succession, will state categorically:

"First—Never, at any time, has there been the slightest difference of opinion between the high commands of the Allied armies. Absolute confidence prevails in the highest circles as to the actions taken by our Allies. Implicit faith is felt by all as to the ultimate issue of the campaign pending in the west.

"Second—Every step possible has been taken to replenish the munitions supplies of our armies and so enable them to continue the campaign with the stubbornness which has characterized their actions during the whole war.

"Finally, I wish forever to disabuse the public mind of any intention whatsoever on the part of the Russian government to make an independent peace so long as a hostile soldier remains in Russia."

RUSSIAN FLIGHT EXTENDS ALONG 150-MILE FRONT

Austrian Headquarters (via London), Aug. 28.—The Russians now are in full retreat on both sides of the railway to Minsk, about 150 miles northeast of Brest-Litovsk.

London, Aug. 28.—The fall of Brest-Litovsk has been followed by that of the Russian fortress of Olita, south of Kovno. The armies of Field Marshal von Hindenburg will now be reinforced and make another attempt to cut off the retreat of the Russians. Apparently the Russians have decided to evacuate Grodno also.

The capture of Olita makes the ninth to fall to the Germans in three weeks. In the same time they have captured 200,000 prisoners.

The Germans, in full possession of the entire Brest-Litovsk line, have resumed the offensive in the Baltic provinces and are pressing the Russians both in the districts southeast of Mitau and to the east of Kovno in an effort to reach and control the main line of railway which passes through Vilna and Dvinsk to Petrograd.

This may prove the mots important of the German opertions, although at present they are using more troops in thep ursuit of the Russians who are retiring from Brest-Litovsk and the line on either side of the fortress.

ARTILLERY BOMBARDS TRENT; BATTERIES SILENCED

Rome, Aug. 28.—The Italians have penetrated nearly to the heart of Trentino and are breaking in to the entrenched forts of which at certain points are under fire from the Italian artillery.

Italian troops have moved forward from Monte Civaron and Torrente, where they have been solidly established for several weeks, to the still more advanced positions of Mone Ar[illegible] and Monte Salubio. As a re[illegible] Borgo, though not occupied, is [illegible] range of Fort Panarotta, one of the principal strongholds barring access to the old town of Trent.

The advance along the precipitous mountain slopes on both sides of the Brenta was resumed ten days ago, when the Austrians opened up a furious fire from Fort Panarotta on the Italian troops as soon as the latter had occupied the positions on Monte Cona Cimonrava and Monte Civaron. The Italians, however, continued to advance and have moved several kilometres farther down the valley of Sugana.

AMERICAN'S LOCAL MILL STOCK OF DYESTUFFS IS RUNNING VERY LOW

That the American Woolen Mills are in possession of very little dyestuffs and have no prospect of getting any supply in the future unless it is manufactured in this country, became known today. According to rumor the supply of dyestuffs at the mill is running low and, although experts are experimenting with vegetable products, no substitute for the coal tar products, which were imported from Germany in the past, has yet been found. The Fulton mill uses only two colors, blue and black, but the dyes used are of the best quality and the supply now on hand was imported.

Other operators in all sections of the country have been experimenting for months in an effort to discover some substitute for the imported dyes, but nothing reliable has been found thus far.

RUNNING A CITY LIKE A BUSINESS

No. 7—How Buffalo Won Its Fight for a Commission Form of Government

By M. M. WILNER

One of the best Mayors Buffalo ever had was a successful merchant named J. N. Adam. His term ran from 1906 to 1910. Approaching the problems of city government from the viewpoint of a practical business man, he found at the very outset that all efforts at efficiency and economy were handicapped by the laws under which he must work. He voiced his disgust in the following outburst, which has become locally historic: "Instinctively, when we turn to improve Buffalo in an administrative sense, to develop it to a higher plane and better condition governmentally, we take up the charter, the poor old charter, the battered, amended, revised, recompiled charter, with its ambiguities, its contradictions, its loopholes and its vexations.

"Any business man in a very short time would find himself embarrassed, his business in confusion and bankruptcy awaiting him at a point not far off, if his business were run under such a charter."

Mayor Adam accordingly appointed a committee to draw up a new charter. It was a good committee. It included two former justices of the Supreme Court, two former corporation counsels, several other able lawyers, several big business men, two leading physicians and a representative labor leader. It worked in the customary, deliberate manner of such committees, and a short time before Mayor Adam's term expired it produced a new charter.

It had worked conscientiously, but this committee was wedded to old forms and old ideas. It did not have the speed in its charter did not have the punch. People said that it might do; that it undoubtedly would be an improvement. But they couldn't get up any enthusiasm over it.

The most that this committee accomplished was to serve as a foil for those whose minds had grasped a larger vision of the possibilities of municipal government. It furnished the needed stimulus to bring them together and set them to work. They realized that if there was ever to be radical reform, the time to strike had come. Otherwise, the old machine would be repaired just enough to make it endurable, and the old system would continue for another long period of years.

When the committee realized the growing strength of the movement in favor of those new and strange ideas that had come out of the West, some of its members set to work very earnestly to have their plan adopted. It became the rallying center for the more conservative business and professional men. But while it offered too little reform for the radicals, it contained too much for the politicians. Consequently it failed to gain the support of either the "practical" men or the enthusiasts, and its story is important chiefly as illustrating one of the elements of opposition that the supporters of the commission charter had to overcome.

A stronger element was made up of the trained politicians. These as a rule were well enough satisfied with the old charter, but when it was seen that the people were bound to have a new one, they produced a form of charter to represent their ideas. This was dangerous, because the men back of it had the power to put it through. But their nerve failed. They knew that public opinion was against them, and that they would only arouse it more if they went ahead.

So the commission charter picked a path between the conservative experts and the practical politicians and won through the impelling force of the ordinary men in the street. It was something which the ordinary man could understand without hiring a lawyer to explain it to him.

Damaged Names Result of Unkind Words; No Jests

Noon Meeting of Board of Works Anything But Peaceful---Onlookers Prevented What Might Have Been a Casualty List ---Prominent Citizens Involved.

The intense feeling which seems to prevail between those in favor of leaving First st. at its present width, and those who support the plan of the Board of Public Works to widen that thoroughfare four feet, reached the high-water mark this noon at City Hall shortly after an adjourned meeting of the Board of Public Works, when John W. Stevenson and Fred A. Gage came to blows.

The affair started nicely enough when Mr. Gage, Almon Bristol and George Mason entered the City Hall for the purpose of filing a petition, signed by property owners along First st., designating Messrs. Gage and Mason as their representatives on the paving board. Another petition also made its appearance, designating Mr. Gage and James W. Bogue as members of the paving board. Both petitions were signed by thirteen names and some of the property owners had signed both petitions.

The Gage-Mason petition was signed by the following: Almon Bristol, O. C. Breed, Catherine Parsons, William MacNamara, Mary L. Mead, Charles R. Lee, as executor of the Sarah Case estate; T. H. Webb and I. Achilli, as trustees of the Citizens' club; L. W. Emerick, as trustee of the Hunter property; Edward Quirk, who signed for himself, and for the Quirk Realty Co.; F. A. Gage, George Mason, F. E. Wolever and E. H. French.

The Gage-Bogue petition was signed by The B. P. O. E. by John W. Stevenson, Exalted Ruler; Messrs Webb and Achilli for the Citizens' club; Bessie Smith Dilts, Sarah A. Pratt, A. W. Leasby for the Trust and Deposit Co., of Syracuse; Lucy Dilts Bennett, George W. Brooker, Edward Quirk, the Quirk Realty Co., F. E. Wolever, James W. Bogue and William MacNamara.

When the meeting had been called to order President Stevenson remarked that both petitions carried thirteen names and said the board would take up neither petition at present, but would adjourn until Monday night. Mr. Gage leaned over and said, "Some of those names on your petition are no good. Mr. Wolever wants his name taken off, and so does Mr. Quirk."

"Well, they can come here and tell us that, if they want to," said President Stevenson. "Meanwhile we will adjourn until Monday night. This signature of Mr. Emerick on your petition is no good. He doesn't own that property, and the other petition is signed by the Syracuse bank that owns it."

Mr. Gage argued at length that the Hunter property still belonged to Thomas Hunter.

When the men reached the hall Mr. Stevenson and Mr. Gage began to argue once more. The crisis came when Mr. Gage accused Mr. Stevenson of erasing something on one of the petitions presented. Mr. Stevenson resented the implication in uncomplimentary words and sought to enforce his opinion in a muscular way. The timely interference of the other men present prevented anything more serious resulting to either of the excited participants than disarranged apparel. Finally Messrs. Gage, Bristol and Mason left the building, but not until both Mr. Gage and Mr. Stevenson had heartily promised each to knock the other's "block off" at some more propitions date. It is safe to prophesy that a large attendance will be on hand at the meeting of the Board of Public Works next Monday evening.

EQUIPMENT INADEQUATE; LOCAL PLANT DOOMED TO LOSE MUCH BUSINESS

According to an announcement yesterday by William H. Spanswick, President of the William H. Spanswick Knitting Mills, that thriving industry is in the midst of one of the greatest booms in its history and is swamped with orders for late fall and spring deliveries. Mr. Spanswick said the firm has sufficient business already booked to insure its operation on capacity time for ten months and that repeat orders and orders from customers later in the season, totaling $20,000 or more may have to be turned away.

The Spanswick mills have been operating on full time for nearly a year in spite of thed epression that has made itself felt in other quarters, and although the mill is a small one compared with some of the other local industries which occupy more prominent positions locally, the volume of business done is surprising. It is hoped that the present activity and promise of future business may necessitate the erection of a larger plant in the near future.

Why Not Community Singing?

It would be a simple thing to start in this city, in connection with the band concerts during this or any other summer, public singing affairs, which are just coming into vogue in many communities. On a stated night, people gather in some park or public place and all who care to do so take part in singing a few familiar songs. There is a singing leader, or possibly a quartet, or some choral society, or more frequently the band takes the lead. The idea is worth investigating. There seems to be no reason why it should not work out successfully in this city, if some one takes hold of it and pushes it.—Little Falls Times.

Model Hubby; Divorce.

Two years ago a newspaper conducted a symposium to determine the model husband. The palm was finally yielded to Edward K. Fischer, a railway clerk of St. Joseph, Mo. He was declared by women to be 100 proof and perfect without flaw or blemish.

This enviable record in the domestic line was won for the following reasons: He never lost an hour's work during the eight years of wedded life. Before he was married he saved $600 on a meager salary of $50 a month. He purchased a home and paid for it out of earnings of $60 a month. He always got up at night, during the infancy of the children, and fed them and took care of them. He always undressed they oungsters and saw that they were put to bed.

Fischer put out the family wash. He tilled a little garden and sold the truck, adding to his income. He raised chickens and every night wiped the dishes. He only asked his wife for a quarter for spending money every two weeks. He walked two miles to save carfare and sent the wife and the children every summer for a vacation. He was away from his home but one night in all his married life.

Under this stress of truly marvelous marital excellence Fischer family broke down. Now he is suing his wife for divorce, alleging that he might have her spoiled on the ground of over-indulgence. — Philadelphia Press.

Teutonic Drive in Russia.

The fortress of Ossewetz, which has just fallen into German hands, made the longest resistance of any of those the Russians have lost during the furious fighting of the past three weeks. Other fortresses had larger garrisons and were equally strong, but the peculiar situation of Ossowetz almost completely surrounded by swamps, made the task of the invaders of getting their big guns into position more difficult and delayed its surrender. The work of placing the guns finally was accomplished, and the Russians were forced to evacuate a fortress of strategic importance because it guards the approach, by railroad, to Bialystok and also the great Petrograd-Warsaw trunk line.

The fortresses of Brest-Litovsk Vilna and Dunabourg still stand intact between the invading hosts and the Russian capital, while Riga continues to hold out; so that the way to Petrograd is a long one. However, should the chain of western Polish fortifications fall entirely into the invaders' hands the world then will learn how far into Russia Germany proposes to push the war. The talk in Petrograd of removing the capital to Moscow shows that there is a very decided apprehension there that the Polish operations, together with the attack upon Riga, indicate a determination to plant the German standards on the banks of the Neva. That, however, is a questionable view of Germany's purpose. The enormous extension of communication lines which such a movew ould entail and the difficulty of bringing up supplies and reinforcements would put the Germans at a disadvantage should the Russians recuperate. When Japan comes to their aid with munitions and supplies, as it is reported she proposes to do.

The more obvious explanation of the German purpose is the more reasonable one. The capture of Brest-Litovsk would secure the Warsaw con quest against any counter attack in the immediate future, and would make the recapture of Poland at any time a task of extreme difficulty. A straightened German line running across Poland from the Baltic to the Galician, frontier can be pierced only at a great cost to the Russians, who, in their present weakened state, may be held on such a line by forces much smaller than those now employed by the Teutonic allies in the great drive.—Utica Dispatch.

"THE FLOPSIE BUNNIE"

By keeping pace with the "Fulton Comment" appearing in an out of town newspaper, one is able to account for the solicitude expressed under the heading, the purport of which is that the present political campaign is all wrong. "Fulton Comment" tells us the public has little respect for the Taxpayers' Committee and that the Business Men's League, as it (thep ublic) suspects that the men in both organizations are after some political pie, just what kind of pie is not known."—Which reminds one of the "Tale of the Flopsie Bunnies, who by reason of the extremely large family found there was not always quite enough to eat, so Benjamin used to borrow cabbages from Peter Rabbit. Sometimes Peter Rabbit had no cabbages to spare. Now it so happens that in the present political campaign there are no cabbages to spare for the newspaper which at this date finds that if the Business Men's League and the Taxpayers' Committee desire to win the respect of the citizens of Fulton their identity must be made known. It was not always thus, for well we remember the time when a cabbage under any old name—"Political Advertisement," etc., at a high rate of interest, elicited no comment whatsoever.

When the Flopsie Bunnies were short of cabbages they went across the field to a rubbish heap, in the ditch outside McGregor's garden, where they found a mixture not to their liking, until one day they found a quantity of overgrown lettuces. On this they feasted until one after another they were overcome with slumber, which is again reminiful of the statement appearing under the "Fulton Comment" heading, in last night's Syracuse Herald, as follows:

"The citizens are tired of the foolishness which has so long characterized this campaign and it IS TIME FOR RESPONSIBLE MEN TO TAKE OVER THE MOVEMENT ON BOTH SIDES."

Now here again the Flopsies smile sweetly in their sleep. When the political advertisements were forthcoming at the hands of the Business Men's League, the campaign had the proper soporific effect. The League lettuce was all right, as it kept in the van of the campaign and in real favor the same men who are now dubbed irresponsible by the Herald.

If the Business Men's League and the Taxpayers' Committee would have heed given their remarks they should try the specific effect produced by administering to the Fulton Comment column a big mouthful of lettuce, so big that the flopsical medium may choke, then and only then may the two organizations find it necessary to pinch the organ to wakefulness.

OLD COUNT VON MOLTKE

There's an old picture of him hanging on our wall.

A great old soldier was he and, like Bismarck, the Iron Chancellor, as told by the book of love letters he wrote to his wife, and proudly printed by her after his death, had a tender spot in a soldier general's heart.

The great von Moltke was a frequent visitor to the little farm which he kept all his life near Kreisen in memory of his wife. On a hill upon the farm he built a modest chapel, where reposed the body of her he loved above all, and the key of the chapel he always carried about with him. His first and last walk of the day was always up to the gentle eminence to converse with his own heart.

With a year of the horrors of the war spread anew by thousands of daily newspapers on our breakfast tables as a black tablecloth, and at night upon our beds as a black blanket we are in danger of forgetting that God has made all nations of one blood, and that there are pains deep and wide and sufferings long, even of sweat of blood, in the great human family on the other side of the sea, and many, such as Moltke and Bismarck were, who are longing for the end of strife and the new beginning of a permanent peace.

What can you and I and our neighbors do to help it on?

JOHN WANAMAKER.

PEACHES CHEAP IN METROPOLIS MARKETS

New York, Aug. 28.—Peaches were so cheap yesterday that it is no longer a compliment to be called one. One hundred carloads are now piled on the market and they are all "clings," no matter what variety they may be. The commission merchants, prodded by wire every few hours by the growers of fourteen states, are running around in circles trying to make sales, for peachesm ust not be kept waiting.

Imagine a fine crate of the blushing beauties containing 6 supposedly four quart baskets each offered at from 75 cents to $1 a crate! Each of the baskets contains from twenty to forty peaches, according to size, and that means that the individual peach may be obtained almost for the asking.

This is for the finest quality, for there were some very presentable ones sold for even less than that. One man who had a stock on consignment got rid of them at fifty cents a crate rather than have them on the sidewalk in front of his place.

The Horse That Drew the Load

By HERBERT KAUFMAN

Author of "Do Something! Be Something!"

A MOVING van came rolling down the street the other day with a big-spirited Percheron in the center and two wretched nags on either side. The Percheron was doing all the work, and it seemed that he would have got along far better in single harness, than he managed with his inferior mates retarding his speed.

The advertiser who selects a group of newspapers usually harnesses two lame propositions to every pulling newspaper on his list, and just as the van driver probably dealt out an equal portion of feed to each of his animals, just so many a merchant is paying practically the same rate to a weak paper that he is allowing the sturdy profitable sheet.

Unfortunately the accepted custom of inserting the same advertisement in every paper acts to the distinct disadvantage of the meritorious medium. The advertiser charges the sum total of his expense against the sum total of his returns, and thereby does himself and the best puller an injustice, by crediting the less productive sheets with results that they have not earned.

There are newspapers in many a town that are, single handed, able to build up businesses. Their circulation is solid muscle and sinew—all pull. It isn't the number of copies printed but the number of copies that reach the hands of buyers—it isn't the number of readers but the number of readers with money to spend—it isn't the bulk of a circulation but the amount of the circulation which is available to the advertiser—it isn't fat but brawn—that tell in the long run.

There are certain earmarks that indicate these strengths and weaknesses. They are as plain to the observing eye as the signs of the woods are significant to the trapper. The news columns tell you what you can expect out of the advertising columns. A newspaper always finds the class of readers to which it is edited. When its mental tone is low and its moral tone is careless depend upon it—the readers match the medium.

No gun can hit a target outside of its range. No newspaper can aim its policy in one direction and score in another. No advertiser can find a different class of men and women than the publisher has found for himself. He is judged by the company he keeps. If he lies down with dogs he will arise with fleas.

(Copyright.)

W. C. T. U. NOTES.

(Compiled by the Local Union.)

If women are not to be permitted to vote because "woman's place is the home," what is to be said about the great number of women who have no home except as they go out into the industrial world and earn for themselves a home? In an editorial in The Woman's Journal it is pointed out from figures compiled by the Empire State Campaign Committee that of the 2,757,521 women of voting age in New York State 983,686 are wage-earning women. This means that over one-third of all the women in New York State have no home except as they work outside of the home to make one. Of the 736,659 women of voting age in New Jersey 239,565 are compelled to work outside the home. The number of women of voting age in Massachusetts is 1,074,485, and of this number 444,301, or forty out of every one hundred women, work for a living. Again the number of women in Pennsylvania of voting age is 2,114,008, and of these 605,436 are wage-earning women. Taking these four states as a whole it means that 35 per cent. of all the women have a home only as they earn it for themselves.

* * *

The Union Pacific has issued an order that any employe found going into or coming out of a saloon will be discharged. The order, it is said, is made in the interests of safety and efficiency. The road has had in effect for several years a regulation that no drinking man shall have anything to do with the moving of trains. The new order applies to clerks in all departments of thel ine as well as to trainmen.

* * *

Georgia as a prohibition state objects to the use of liquor on railroad trains. A bill has been introduced in the state senate asking that it be made a misdemeanor for any one to drink liquor on a train, or for any one to get abroad a train while intoxicated.

* * *

As a means of preventing accidents railroads throughout the United States have been urged by the National Congress of Alienists and Netrologists to adopt rules as to the moral character of their employes. It is advised that railroads do not employ men who use alcoholic beverages on or off duty.

* * *

The Monon Railroad has a fine corps of officials who stand high for moral character and total abstinence. They will not employ a man who is known to use intoxicating liquors.

LEBANON DESCRIBES THE LA TENA CIRCUS

The Lebanon. N. H., Press has the following to say concerning the circus coming here next Thursday:

La Tena's Animal circus showed to two good audiences on Tuesday and the whole story is really told in saying they pleased and satisfied audiences. The parade at 10:30 was sufficient promise of the fulfillment of their bill work to draw the crowds.

What they had in the way of standard circus—flying trapeze, horizontal bar, contortion and riding—was high class, and they had an aggregation of clowns that were awfully funny in their team work. But La Tena will be remembered longest in Lebanon for the trained animals, which were a predominating feature. Remarkable intelligence was shown by elephants, bears, lions, dogs and ponies, but the most wonderful as well as the most novel feature was the trained seals.

It was altogether a clean show, which some were glad to see twice the same day.

THE CZAR'S CHECK.

It Passed Over Itching Palms, but That Was No Surprise.

When Professor Tuxen, the Danish artist, had finished his great work, "The Coronation of Edward VII," he received, it appears, an order from the Russian emperor for a copy of this painting, for which the czar was to pay 12,000 rubles.

In due course the professor repaired to Petrograd to deliver the painting. He was granted an audience with the czar, who expressed his satisfaction with the picture and who handed the professor an order on the imperial treasury for the sum agreed upon.

When the professor presented the check for payment he was told that an order from the emperor was subject to a discount, and he had, therefore, to accept a sum considerably smaller than the face value of the check.

Before his departure from Russia the professor had a farewell audience with the czar, who in the course of conversation asked him, "Did you get your money, professor?"

Professor Tuxen replied that he had not intended to mention the matter, but since his majesty himself raised the question he would say he had received only part of the money.

At this the czar seemed not at all surprised, but calmly made out another order for the sum which had been deducted from the original amount, and thus Tuxen got his money.—Washington Star.

A Lovely Ride.

"You visited Venice while you were in Europe, I hear, Mrs. Trotter?"

"Yes, indeed; and we were rowed about by one of the chandeliers for which that city is noted."—Wisconsin State Journal.

"Cut it," interrupted the man who wanted to catch a train.—Puck.

OUR SHRINKING SUN.

Its Diameter Becomes About Four Miles Less Each Century.

There are various theories to account for the enormous store of heat and light in the sun. The theory now generally accepted by physicists is that the gradual contraction of the sun in cooling is the chief source of apparent inexhaustible energy. It has been calculated that at the present rate of expenditure of heat the sun's diameter would contract four miles in a century, and in a few millions of years it may become as dense as the earth.

The sun is supposed to be composed of much the same materials as the earth, except that they are at a much higher temperature. About forty of the seventy terrestrial elements have been identified by the spectroscope as existing in the vapors around the sun. Astronomers think that they find traces there of very few substances not already known. Even these may be discovered on the earth some day.

It has been calculated that the heat thrown on a square mile exposed at noon under the equator would melt in an hour 26,000 tons of ice. This amount has to be multiplied fifty million times to arrive at the quantity of heat received by the earth's surface during a single hour. Yet this enormous supply is even less than one two-thousand-millionth part of what the sun pours forth in all directions in space. It stands to reason that this inconceivable outgiving of heat must be accompanied by a gradual though imperceptible diminution in the size of the sun.—Philadelphia Press.

Transmuted Philosophy.

Croesus had just touched a stone and turned it into gold.

"That's more than he could do to me," ruminated Hadji, the beggar "I'm too poor to touch."

Which goes far to prove that poverty is no bar to wit.—Louisville Courier Journal.

PAYING THE FIDDLER

WE ALL realize that when there is dancing going on, whether it be the new-fangled tango or the old-fashioned polka or waltz—some one must pay the fiddler.

We cannot have music without paying for it, nor can we have much of anything in this world without paying for it.

If we expect any person to do something for us, we expect, naturally, to do something in exchange for such favors as we receive. If we accept favors, but evade the responsibility of making any returns for them it will not be long before we discover that the unpaid for favors become curtailed.

Probably we become provoked, after the favors have stopped, and acknowledge our own stupidity. It is generally too late when we wake up and then it is merely the old story over again—of locking the door after the horse has been stolen.

Many of us in this community devote more or less of our time to the raising of produce of various kinds. We have vegetables, butter, eggs, milk, etc., to sell.

We find it a convenience to sell such products in the local stores. Some of our business men buy up the small quantities, as well as the larger lots, and ship all together to the more central markets.

This facility for disposing of such articles is a great convenience to us. If the local storekeepers did not buy our produce it would be difficult for us to find a market. In fact, there would be no market for small quantities except at ruinous prices.

Therefore we are favored, to a very considerable extent, by the fact that our local storekeeper stands ready to buy from us. This places us under certain obligations. The local storekeepers are entitled to some consideration from us in return.

HOW MANY OF US APPRECIATE AND ACKNOWLEDGE THIS FACT?

How many of us think of this when we have some cash to spend? How many of us consider that the local storekeeper is entitled to our trade and that we are morally bound to consider him as the proper repository for our orders and the recipient of our trade?

It is regrettable that many of us must plead guilty to an entire forgetfulness of any feeling of obligation. Therefore, we send our orders, with the cash, to the mail order houses, to whom we owe nothing.

We are enticed by cleverly written advertisements and neatly worded descriptions of goods and merchandise so that we deceive ourselves into believing them to be true. We forget the local storekeeper and his favors; we forget that he is a benefit to the community and to every individual in the community; we forget that he is affording us an opportunity to dispose of our produce—that he has his money invested in a stock of merchandise that he has selected because he believed we would need such articles and would wish to buy them at home.

Every dollar we send away from home to the mail order houses brings us closer to the limitations of our local opportunities. Every dollar diverted from local trade adds to the restrictions of our trade facilities at home so that we are not only permitting, but we are inviting, our local merchants to close up shop and go out of business; or to move to some community where their efforts will be more appreciated.

By our lack of appreciation we are urging our local storekeepers to restrict their efforts to carrying only the lines of merchandise that are the most profitable for them and to cut out all goods that we can buy in the city. We are actually inviting disaster.

LET US AWAKEN TO A REALIZATION OF THE CONDITIONS WHICH CONFRONT US. LET US PLACE SOME LIMITATIONS ON OUR DISREGARD FOR EXISTING CONDITIONS AND LOOK INTO THE FUTURE.

We can see what the consequences must be if we fail to do our share toward supporting the establishments of our business men in town, for the handwriting is written plainly on the wall.

Shall we read the writing and profit by the message or shall we continue to dance merrily and foolishly on until the time shall come when we must pay? And how shall we pay?

There will be only one way to pay and that will be with much more than the profit we shall have derived from our dealings with the mail order houses. WE WILL PAY DEARLY UNLESS WE AWAKEN TO A FULL [illegible] OF OUR [illegible] AND AT ONCE.

We wish to dance, but [illegible] change the tune—or the fiddler.

MODERN TORPEDO TERRIBLE WEAPON

Weighs 2,800 Pounds and Is Twenty-three Feet Long.

COST IS $3,000 TO $9,000.

Will Tear Through Side of a Double Skinned Ship and Then Explode. Loaded Only With High Explosive, Either Guncotton or Nitroglycerin. What Happens as It Strikes Prey.

The up to date torpedo is a loaded automobile shaped like a cigar, made to run in a certain direction in a fixed time and explode when it strikes something that offers sharp resistance. A reliable one, properly equipped with explosives and running gear, costs from $3,000 to $9,000, according to size. A large torpedo is twenty-three feet long, twenty-one inches in diameter and weighs 2,800 pounds and it tears a hole 30 by 10 feet in the bottom of a ship of two skins.

"The torpedo," said an expert of the navy, "has four principal parts—the war head, which carries the explosive; the air flask or fuel chamber, the engine and the steering gear and the balance chamber. The explosive head is filled with some high explosive—guncotton, etc.—and is provided with a percussion detonator. This strikes a hard or solid substance, and the explosive goes off instantaneously.

Guncotton or Nitroglycerin.

"The explosive head is the foremost compartment of the torpedo and contains the deadly charge and the pistol with which it is fired. Guncotton and nitroglycerin are the high explosives generally used for submarine purposes. There are many others, but these form the foundation for most of them. Gunpowder of the sort used by the country boy to shoot at a rabbit or a squirrel is no longer used. The high explosive is more powerful than gunpowder. Gunpowder burns quicker than the high explosive, and it splutters around if scattered on the ground, but it explodes if confined in a close place. The high explosive will burn if you stick a match to it, but not so easily as gunpowder. A sudden blow will apply heat to an explosive and set it off.

"The explosive head strikes the bottom of a ship, and a 'detonation,' not an 'explosion,' takes place. The mass of high explosive seems to explode at once, and that is what is desired, as the most sudden blow will knock a hole in the ship. Guncotton is detonated by fulminate of mercury, which, when ignited by a blow, expands 2,500 times its original size. The sudden expansion gives a blow to the guncotton that detonates it."

This Is What Happens.

"What happens when the explosive head strikes?"

"A detonation follows instantaneously and blows the outside of the ship in, making a hole about 30 by 10 feet in size. There is no rule about the extent of the damage to the side of the boat. It may be twice 30 by 10 feet. The blow drives in both the outer and inner skins of a vessel like the Lusitania. The double bottom is not sufficient to break the force of the torpedo if it strikes well. A glancing blow may not cause an explosion.

"The torpedo would have about the same effect on a collier that it would on a big merchant vessel. We have never tested thoroughly the effect of a torpedo blow on an oil tanker such as the Gulflight. We are doing that now.

"After the torpedo struck it would be blown to bits, and most of the pieces would go to the bottom of the sea. Some fragments might go inside and become entangled in the splinters made by the detonation.

"The torpedo must do many things in a very thoroughgoing way. It cannot succeed in its mission if a cog slips on the way, for it is primed for automatic action. Everything must be just right and in its proper place when it starts on its journey of destruction. It has to run at a certain speed so as to get to its destination on schedule time, to go a certain calculated distance in that fixed time, and travel in a certain direction to make sure of its mark. It cannot loaf, vary from the course outlined for it or dip down or shoot up on the way. If anything goes wrong all is off with that torpedo, and the thousands of dollars invested in it disappear beneath the waves.

"Torpedoes run from 1,000 to 10,000 yards to reach the object they are sent to destroy. It requires about eleven minutes to make the longer distance."

"What if the torpedo struck a whale on the way?"

"It would be bad for the whale, although the torpedo might not explode unless a big solid bone was hit."

Of Many Sorts.

"The torpedo is not known intimately by many naval officers," said one specialist. "There are all sorts of torpedoes. Some of them have individuality. No two seem to be exactly alike. We continually improve our knowledge of them. Each torpedo has to be carefully studied and corrected for its one voyage of destruction. Like the bee that stings, it gives up its life for one sting. The ship it strikes sinks. The 200 pounds of guncotton in its warhead tears the ship so that it cannot escape. It is the most terrible weapon of warfare known to the world."

ARRAS A HEAP OF DEBRIS; 120 OF 26,000 PEOPLE LEFT

Belgian Minister Describes Desolation of Historic City.

"I have just visited what remains of Arras and Soissons, along the Aisne scarpe. Of Arras, like also some of the first line trenches Nieuport and Ypres, our poor villages along the Yser, nothing remains but a heap of debris," writes Emile Vandervelde, the Belgian minister of state, to papers in the United States.

"The city hall, that gem of medieval architecture, has undergone the most grievous mutilation. In many streets not a single house is intact.

"Arras had before the war 26,000 inhabitants. There are now 120. In a small shop near the city hall I found a little old man cheerfully selling funeral crowns and post cards depicting the ruins. The bombardment continues daily. Most people are living in cellars.

"At Soissons I was entertained by a general at tea and at breakfast in the cellar. Bombs continuously passed over Soissons in the direction of Arras. The allied troops constantly are busy extending and strengthening the trenches and barbed wire defenses. At certain places the hostile lines are within sixty feet of each other.

"When not exchanging shots and grenades the soldiers enjoy the intervals of comparative calm, during which newspapers weighted with stones are thrown from one trench to another.

"One day a dog crossed to the French lines bearing the message, 'Please tell Corporal Blank that his wife and children at Lens are well and send him love.'"

ACCUSED OF MURDER IN 19013

Wyoming Man Would Escape Death Because of Clerk's Error.

Because through an error of a court clerk he is charged with committing a murder 17,098 years in the future, Grange Wilson White of Wyoming has appealed to the United States supreme court to save him from the hanging to which he has been sentenced.

White was convicted of "killing one Anderson Coffee on or about the 12th day of August, 1913." That was the way the information should have read, but after he had been condemned to hang on June 4 of this year White's lawyers discovered that the official papers returned by the grand jury gave the date of the murder as "Aug. 12, 19013."

Because of that "0," which, it was alleged, made the information insufficient and defective, White appealed to the Wyoming supreme court and before the day of the hanging arrived obtained a writ of supersedeas under which the case has been brought to the United States supreme court.

Why He Was Sad.

"Why so sad and downcast?"

"My wife has threatened to leave me."

"Cheer up. Women are always threatening something like that, but they hardly ever do it."

"That's what I was thinking."—Houston Post.

March of Progress.

"What has become of love in a cottage, anyhow?"

"It has given away to incompatibility in a bungalow."—Kansas City Journal.

The first duty of a man is still that of subduing fear.—Carlyle.

HOME TOWN HELPS

CLEAN MINDS; CLEAN CITIES

People Must Be Educated to the Necessity of Proper Appearance of Municipality.

"I'm as good as you are," said the dirty man to the well-dressed gentleman in the street car who had drawn away from him a bit.

"You may be right," answered the clean one, "but you certainly don't smell as good."

"Lord!" exclaimed a visitor to one of the most populous sections of Boston. "What smells there are here."

"Yes," agreed the social worker of the party, "we've got to clean out a lot of minds before we'll get rid of this dirt."

"You have to clean minds!"

"Surely. Dirty minds make dirty people, and dirty people make a dirty town. The idea of cleanliness must be put in the minds of those whose present standards of cleanliness are elemental.

"The woman who will tolerate cobwebs in the corner of her ceiling has cobwebs in the corners of her mind. Disorder in a home is evidence of the presence of minds that are disorderly. Our surroundings always reflect what we are within. To make these streets clean we must create in the people who live here a desire for clean streets."

"Do you mean to say that the people here are content with all this dirt around them?" the visitor asked with surprise.

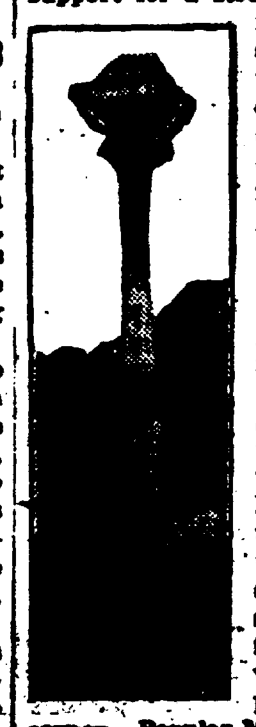
"The majority of them are. What the majority really and truly wants, the majority can have." The speaker was silent for a few moments. When they reached the next corner, he said, "If there was on this street one man or woman who wanted more than anything else to have this street cleaned and made sweet-smelling, the work would be done."

"The old story of Sodom and Gomorrah, eh!" observed the cynic.—Ford Hall Folks.

ADDS TO CITY'S APPEARANCE

Form of Street Lamp That Is Coming Into General Use Throughout the Country.

Besides forming a very attractive support for a street lamp, this re-enforced concrete post also offers a convenient place for displaying street signs. At the top of the pole is a 12-inch frosted-glass globe in which there is a high-candlepower electric lamp. Surrounding the globe is a square framework in which four strips of blue glass, carrying the street names in white letters, are held. During either the day or night, the name of the street and its intersecting thoroughfare are thus plainly visible when the pole is placed at a corner.—Popular Mechanics.



Making the Rock Garden.

The rock garden, to be successful, must be along the lines approved by nature. It must not, in any point, resemble a piece of masonry or other formal construction, says a writer in the Minneapolis Journal. The most satisfactory location for it is at the foot of a gentle slope, where it can climb the declivity and the rocks be given the appearance of jutting out from the hillside. But very excellent results may be achieved on flat surfaces if it is remembered to let the rocks appear to crop out on the surface rather than appear to be placed there for a purpose. The rock garden should have its highest point or beginning at some natural or artificial boundary—a wall, or better still, a clump of trees and shrubbery, which will serve to mask its origin. From this vantage point it may extend in a natural way to the limits marked out for it; here an isolated bowlder, here a group of less pretentious stones, and again a group of large stones may find room in their pockets for a small tree. The extent may be two or three rods in width at one end and gradually narrow until at the other it becomes an occasional rock on the lawn.

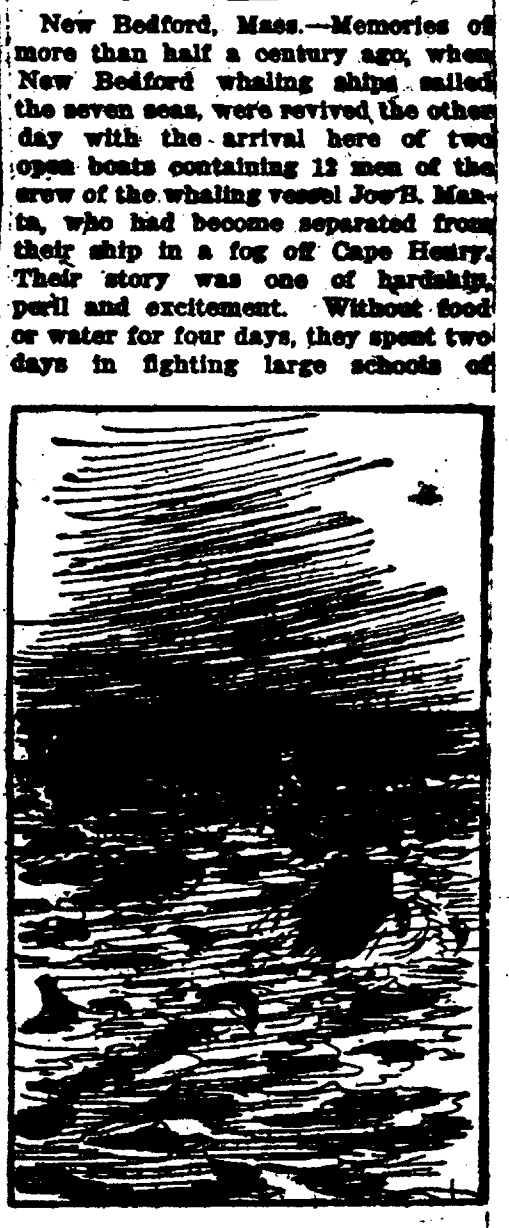
Many Factors Affect Cost.

Certain preliminary estimates given in connection with this series of house plans are necessarily subject to change. For instance, digging a cellar in rocky, hilly ground would cost more than the same job might cost elsewhere. Materials vary in cost as individual tastes differ. Most of the houses shown in this series have been built about Boston. The estimates given, therefore, are of actual costs. Do not neglect, however, to allow for the inevitable "extras" that crop up in the course of any building operation.

FIGHT SHARKS TWO DAYS FOR WHALE

Fishermen, Lost in Small Boats Without Food, Free Captured Monster.

New Bedford, Mass.—Memories of more than half a century ago, when New Bedford whaling ships sailed the seven seas, were revived the other day with the arrival here of two open boats containing 12 men of the crew of the whaling vessel Jose B. Manta, who had become separated from their ship in a fog off Cape Henry. Their story was one of hardship, peril and excitement. Without food or water for four days, they spent two days in fighting large schools of sharks, and were finally forced to violate the tradition of their calling never to lose a captured whale.



Schools of Sharks Were Attracted.

According to the story of the men, a whale was sighted off the Virginia coast early one morning. Two boats were lowered for the chase, one in charge of Mate Joseph Brown, and the other commanded by the second mate. Each crew put a harpoon into the quarry, but while they were making their capture they lost sight of their ship in the fog.

The whale was lashed between the two boats and the men laid a course toward the coast. Great schools of sharks were attracted by the carcass, and for two days the men fought these scavengers with lances and oars. Finally they became exhausted, and the whale was cut loose and given over to the sharks.

The men were without food and water until they were picked up by the Norwegian steamer Skard, bound from Newport News for Christiania. Later they were transferred to the steamer Piedmont, which ran into Vineyard sound, where the whalemen again took to their own boats and sailed across Buzzards bay to this port.

Don't Hate the Rich.

"Don't hate a man because he has lots of money," counsels a Eureka philosopher. "Cultivate his acquaintance, and see if there isn't some honest way you can separate him from some of it."—Kansas City Star.

Commission-Manager Form of Government stands for Efficiency in Public Service.

(Signed) TAXPAYERS' COMMITTEE

F. H. S. BOYS CHOOSE TEAM

New Players of Caliber Will Join the 1915 Team of Independents; Games Are Planned.

The re-organization of the Independents which represented Fulton on the gridiron last year will take place next week, when George Ward will call a meeting. All the former members of the team as well as "unkonws" who wish to try out will be informed of the first practice date.

The Independents of last year, composed of the best amateur talent to be obtained in Fulton, made an enviable record for themselves, defeating some of the best teams in Syracuse, Oswego and Phoenix. In fact, in the last four years only two games have been lost, and these by only a narrow margin and in both cases meeting their opponents with a crippled team.

George Ward, considered the best football player in Fulton, and a member of last year's victorious Syracuse freshman team, will be asked to coach the squad, and if his services are obtained a winning team is assured. His brother, "Tunk" Ward, a player of note, has already consented to become a member of the team and assist in coaching, and it is probable George Ward will don a suit and take part in several games himself.

Besides these two players there are available for this year's team Battles, Brennan, Leroy, Reavey, Frawley, Alexander and Blake, the last named boy being of Maultbesch calibre.

A schedule is being arranged by several of the above men with teams from Syracuse, Oswego and some of the neighboring towns, an effort being made to have most of the games played on the local fair grounds. Arrangements have also been made to hold a dance at Davis' academy September 17 to obtain funds for equipping the players withu niforms.

The rules this year have been modified in a few respects, the two most important changes being the eliminating of the forward pass on the 4th down when deliberately thrown out of bounds. Last year, a team unable to make the required distance, instead of kicking, in which the ball could be carried back, would resort to the trick of throwing the ball forward as far as possible and out of bounds, making the ball "dead." The second change prevents a player from hurling himself free foremost in front of the interference. Only in a few cases did the players attempt this dangerous play last year.

The time to change your living place is before the fall rush begins. Advertise your wants in The Evening Times.

Those You Know

Mr. Russell Widner, basso soloist of the Mastodon Minstrel show which gave a performance in this city last night, spent a portion of the day and evening with Mr. and Mrs. R. C. Anderson, 215 Untica st., who are personal friends of Mr. Widner.

Pulpit and Pew

First M. E. Church.

Rev. J. W. Barrett, Pastor.

"Have Faith in God" will be the pastor's theme at the 10:30 a. m. service in the church tomorrow.

Mr. Barrett will preach at the Dempster campmeeting in the afternoon at 2 o'clock.

The congregation will join in the union park services at 5 o'clock.

The Free Methodist Church.

C. C. Watson, Pastor.

Services tomorrow as follows:

Preaching by the pastor at 10:30. Morning subject: "The Evidences of a Heroic Faith." Sunday school at 11:45. Young People's meeting at 6:30. Preaching in the evening at 7:30, subject: "A Gracious Companion."

The pastor will also preach at the open air service at 5:00 p. m. The subject for this service will be "The Pathway to Divine Knowledge." If the weather is inclement the service will be held in the Baptist church.

First Presbyterian Church.

Rev. Harris Stewart of Auburn, a seminarian, will occupy the pulpit of the First Presbyterian church tomorrow morning at 10:30 in the absence of Rev. Charles S. Robertson, pastor of the church. Rev. Mr. Stewart is well know here, having substituted for the pastor of the church on another occasion about a year ago. He is a young man, a fluent speaker and deeply impressed his auditors last year with his earnestness and zeal.

First Baptist Church.

Only one preaching service will be held in the church tomorrow. At 10:30 a. m. the Rev. B. J. Lehigh of the First Baptist church, Oswego, will preach, in the absence of the Rev. Mr. Buck, who remains at Cleveland, N. Y.

Immediately following the preaching service the Sunday school will be held. At 5 o'clock the Union services will be held in the East Side park, the Rev. C. C. Watson, pastor of the Free Methodist church, to deliver the sermon.

Zion Episcopal Church.

Rev. M. J. Peters, Pastor.

Sunday, August 29, thirteenth Sunday after Trinity.

Services as follows:

Holy Communion .... 7:30 a. m.
Summer Church School .. 9:45 a. m.
Matins and Sermon ...... 10:45 a. m.

First Congregational Church.

Because of the continued absence of the pastor, the Rev. Charles Olmstead, no services will be held in the church tomorrow. The church will remain open at the noon hour to accommodate members of the Sunday school who may not be aware of conditions, but no session will be held.

State Street M. E. Church.

Rev. H. D. Holmes, Pastor.

The pastor willl return in time for the morning preaching services, at 10:30, but the subject of his sermon is not obtainable. Sunday school will be held at the noon hour. In the afternoon the congregation will unite with the other denominations in holding park services. Upon next Sunday the regular schedule of services will be held at the church and continue throughout the fall and winter.

PROGRESSIVES DECIDE TO HAVE FALL TICKET

Oswego, Aug. 28.—The Progressives are going to put a complete county and city ticket in the field at the fall elections, according to a decision of the County Committee at a postponed meeting held at the Danio today. The men who attended yesterday's meeting were County Chairman L. J. Farmer of Pulaski; Byron Worden, Oswego Town; Dr. James Cogswell, Orwel; H. C. Wilcox, Central Square; Dr. A. C. Baxter, Scriba; Clarence Young, West Monroe; Eugene F. Whitman, Contantia; Walter Benson, Richard Johnson, W. A. Harris and Louis Kraentler, Oswego.

WEATHER FORECAST

Probably showers tonight and on Sunday. Warmer Sunday.

AUBURN MARKET HAD BEST DAY YET

Auburn, Aug. 28.—Yesterday witnessed the best selling day since the reopening of the public market.

A demand for potatoes far greater than the supply and the best day's business to date featured. Thirty-five producers were on hand with their wares and 2,470 sales were made. Early it was seen by Market Master C. H. Miskell that the supply of potatoes could not meet the need and several grocers were notified that they could not be provided for. Only 50 bushels were disposed of at 50 and 80 cents.

Prices remained almost the same as on Tuesday. Forty-five pounds of butter went at 27 and 28 cents, 68 dozen bunches of celery at three and four bunches for 10 cents, 17 dozen head of cabbage at three and and five cents and 420 dozen ears of corn at 8, 10 and 12 cents.

The 108 pounds of poultry sold brought 16 cents alive and 20 cents dressed. Seventy-four dozen eggs went at 23, 24 and 25 cents. Tomatoes are becoming more plentiful and brisk sales of them took place today, 1,248 quarts being disposed of at five and eight cents. Receipts probably will be heavy from now on in this line and a decline in prices may result.

Cucumbers attracted the attention of a goodly number of buyers. Six hundred and 10 were sold, those for pickling bringing one and one and a half cents apiece. Cucumbers of bulk sold at 20 and 25 cents a dozen.

Twenty-two dozen squash went this morning at two for five cents and five cents apiece. Apples, which sold to the amount of 21 bushels, brought 50 and 80 cents.

Today one purchaser after paying a producer for a quantity of eggs, left her purchase on the wagon. The eggs may be obtained by asking Market Master Miskell.

Cookies and cakes and all things baked by the Black company, fresh every day, at your grocer's. Adv.

INFANT DEATHS SHOW DECREASE IN STATE

Albany, Aug. 28.—Infant mortality statistics for the month of July, made public today by the State Department, show a decrease of 15 points from the rate of July, 191. This decrease indicates that the campaign for the prevention of deaths of infants, inaugurated by the department last year, continues to effect decreases in the number of deaths of infants in the state outside of New York City.

The month of July this year recorded 844 deaths under one year as compared with 946 in July, 1914. Along with this there was an increase in the number of births reported. 8,411 births were reported in July, 1915, as against 8,260 in July, 1914. The number of deaths under one year of age per 1,000 living births was 100 in July, 1915, as against 115 in the same month, 1914, showing a decrease of 15 points.

In New York City the rate for July was 105, as compared with 103 for the same month of the previous year. Therefore, while there was a decrease of 15 points in the infant mortality outside of New York City last month there was an increase of 2 points in the metropolis.

130 ACRE FARM

MUST BE SOLD—Four miles from Fulton, good improvements, spring water piped into the buildings, the house is equipped with a new "Emeney" furnace. This is a splendid dairy farm and located near cheese factory, the soil is fertile and easy to work, 100 acres or more are tillable, sightly location, plenty of fruit, and one-half mile from R. R. Station. Owner leaving the county. Price reduced to $500. Apply promptly.

FULL HOUSE AT THE QUIRK

Minstrels Pleased, Managers Pleased and Now Everybody Looks Forward to Next Week's Stock Company.

The Klein Bros. & Hengler Mastodon Minstrels drew a capacity house at the Quirk theatre last night, not only because of the novelty and size of the production itself, but in a great measure because of the sports of those who attended the afternoon performance. Manager Daniel Darleigh of the theatre is to be congratulated on his energy in booking such an attraction, to say nothing of the risk assumed by the theatre in contracting for the double appearance of the show at great expense when public support in the past few months has not always been encouraging. The theatre was fairly well filled yesterday afternoon, but a capacity house greeted the minstrels last evening and, judging by the applause, the performance was appreciated.

Manager Darleigh has shown his confidence in the local theatre-going public further by an engagement of the Charles K. Champlin Stock Co. for a week's appearance here, with option on a season's engagement if the innovation receives public support.

Joe Davis, one of the end-men, was the star of last night's performance, and several other blackface members of the company were well received. The Great Russell, female impersonator, is an artist in his line and rendered several pleasing solos in soprano voice.

KNITTED GLOVES TO BE MADE IN OSWEGO

Oswego, Aug. 28.—The Oswego glove factory, Oswego's newest industry, will start manufacturing operation within the next few weeks. Ten machines with all necessary appliances for the manufacture of knitted gloves and other specialties of a somewhat similar nature have been ordered.

The new company will be composed of Daniel W. Yeckley, James Mylott and Harold Mylott. Mr. Yeckley will be the general manager and will have charge of the manufacturing end, while James Mylott will attend to the sales end and Harold Mylott will take charge of the packing and shipping. Mr. Mylott says that he hopes to have the new factory in active operation by October 1 at the very latest and he already has orders enough booked to keep all of the machines busy until well into February.

CONTRACTOR S. ROBERTS GOES TO ITHACA

Mr. and Mrs. Samuel Roberts left their home at Fairdale this morning for Ithaca, making the trip by auto. Mr. Roberts recently completed his contract at the Minetto power house and will on Monday begin work upon the new dormitories under construction at Cornell University.

Digest No. 8 of Proposed Amendments to be Submitted

By Frederic T. Cardoze.

Albany, Aug. 28.—What is believed to be an efficient check upon legislative acts appropriating money in the form of extra compensation for contractors and other public officers, is the proposed amendment to the State Constitution, offered by Delegate R. B. Smith of Onondaga county and adopted by the members of the convention. The proposition in question which is to come before the people this fall prohibits future allowances for extra compensation.

It has been the custom in the past for contractors and others who have been commissioned by the state to perform certain work to ask the Legislature to compensate them in an excess of the contract price, in the event that they lost money in the fulfillment of a contract.

Delegate Smith's amendment reads as follows:

"No extra compensation shall be granted or allowed to any public officer, servant, agent or contractor, by the state or any civil division thereof or by any board, officer or other agency of the state, or of any civil division."

The custom of demanding and receiving extra compensation for the performance of a public contract for the state has been practiced for many years. Back in the administration of Governor Hoffman the practice was prevalent. At that time that executive called attention to it and recommended that it should be ended. Notwithstanding the efforts of Governor Hoffman to correct the system of collecting additional compensation, which in some instances at that time, grew from early canal contracts, no definite check was effected. In the years following millions of dollars in excess to contract figures have been paid out from the treasury of the state.

For the most part the extra compensation was allowed in the guise of supplementary contract claims. Frequently a contractor who had agreed to undertake a contract for a public improvement and who signed the necessary papers therewith, found that he would lose money, and some of them did lose money, by living up to the specifications under the original contract price. These contractors demonstarated that they had suffered financial loss and consequently were given additional compensation to reimburse them for cost of labor, materials and time in excess to the amounts specified in their contracts for these three things.

Subsequently it became almost a custom on the part of contractors and others to submit bills and claims for extra work and expenses. So great grew the practice that frequently the treasury of the state was seriously threatened by demands made upon it in this guise.

The Smith proposition will prevent the extra compensation possibility. In the language of Delegate Smith extra compensation is no more nor less than a gratuity from the state and is illegal. The adoption of his amendment, he contends, will require contractors to complete the contracts they have undertaken under the original bid for which the contract was awarded by the state. Public officers and others performing work for the state under contract, or for a specified sum come under the proposed amendment.

JUDGE COVILLE GRANTS ORDER

Heeds Statement Made by One of Paper Company's Officials. Granby Indicates Intention to Fight.

County Judge Henry D. Coville yesterday signed an injunction applied for by the Granby Paper Company restraining the city from interference with the company in placing its pulp wood in Schenck st., recently opened on the West Side, after it had been used by the company for several years The injunction was served on Mayor F. E. Fox yesterday afternoon and the city officials immediately held a conference in the office of the City Attorney, George M. Fanning. In the meantime the company dumped several cars of pulp wood in the street and men began piling it up. City employes were at work on the street at the time preparing it for traffic. Mr. Fanning left for Oswego immediately and returned last night with an order from Judge Coville vacating the injunction and ordering the company to appear in court Monday, August 30, to show cause why the injunction should not be permanently vacated. In the interim Judge Coville orders the company shall not place any wood upon the thoroughfare.

In his affidavit petitioning that the order be vacated, Mayor Fox claims that the street is city property, having been deeded to the city in 1906 by Peter Schenck. He asserts that the company was ordered by the Fulton Board of Public Works in 1914 to remove its wood and that the company ignored this order entirely. The order vacating the injunction was served on J. Harry Howe of the Paper company last night at 8:30 by City Marshal John Youngs.

Judge Coville granted the order on the statement made by Mr. Howe that the company owned the land and it is understood that the company will fight for the possession of the disputed property, claiming it has a clear title to it.

THIRD BROTHER TO HAVE FRACTURED ARM

Herbert, the 10-year-old son of Daniel Kelly, of West 2nd st., fell out of a pear tree at the home of his aunt, Mrs. Preston, on West 2nd st., and fractured his right elbow. He is the third boy in the family to suffer a fractured right arm. Two of his brothers having during the past couple of years fallen and been injured in a like manner. Herbert's case, however, is more serious from the fact that several of the small bones in the elbow have been shattered, and until an X-ray examination of the arm can be made, it will be impossible to learn whether the injured member will return to its normal condition. Doctors Schlappi and Anderson found it necessary to place the boy under an anaesthetic in order to set the fractured bones.

The boy when he fell, was picking pears in the Preston yard with a pail slung over his arm, had just started climbing the tree, when he felt himself slipping. With his free arm he grabbed for a limb which happened to be decayed and broke under his weight, precipitating the lad to the ground. It is believed that the pail held in his right hand really caused the injury, as the boy in his fall was unable to let it go. He was taken to his home where the injury was treated.

MR. STEVENSON QUIET ON ABSORBING TOPICS

John W. Stevenson would make no statement this morning in regard to the reported rush or orders for the American Woolen Mills and intimated that the Boston conference was productive of nothing which would mean any change in industrial activity at the mills.

Mr. Stevenson had nothing to say concerning the anti-commission campaign and was equally reticent on the subject of the Schenck st. difficulties which have occurred during his absence.

Community Notes

Prof. J. R. Fairgrieve and family who are spending a vacation at Mexico Point will return to the city on Tuesday.

* * *

Mrs. Walter Simmons of Oswego was the guest of Mrs. Patrick Lilly yesterday.

* * *

Miss Helen Lynch of Utica has been the guest of Mrs. Thomas Coleman.

The MacIntyre laundry force will picnic at Reynolds' grove tomorrow.

GIVES HIS BLOOD TO SAVE BROTHER'S LIFE

Boston, Aug. 28.—Charles Appleton, in an effort to save the life of his brother, James Appleton, today submitted to a transfusion operation at the summer home of their parents.

James Appleton has been seriously ill of anemia for some time and when blood transfusion was suggested by specialists his brother volunteered.

The patient showed signs of improvement after the transfusion and it is believed that he will recover. His brother suffered little ill effects from the loss of an exceptionally large amount of blood.

APPLE AUCTION COMING SOON

100,000 Barrels Will Be Sold in Two Hudson River Orchards on September 1 and 2.

New York, Aug. 28.—Notices were issued yesterday to the wholesale fruit trade of the country by authority of John J. Dillon, of the New York State Bureau of Foods and Markets, that the hammer would fall over 100,000 barrels of apples on the first and second days of September. More fruits is to follow. The Fruit Auction Company, of 202 Franklin st., will be the auctioneers, and the stand will be under the shade of some old apple tree. The crop consists of Greenings, Northern Spies and early Baldwins and other standard varieties. The Commissioner, who knows the apple business to the core, says that this year the Hudson Valley has surpassed itself in the production of fine apples.

"The apples, this year," said he, "are unusually good in form and color. They are free from any blight or the ravages of insects. Although only a few are yet ripe, the indications are that they will be of unusually fine flavor. In good seasons the Hudson Valley produces apples which are not excelled by those of any other locality, and this is a banner year."

It is expected that there will be about four hundred buyers from the New York market present at these auctions, and also representatives from St. Paul, Chicago, Cleveland, Philadelphia and other cities. The first sale will take place on September 1 at two o'clock in the afternoon in the orchard of William F. Teator, of Red Hook, N. Y., on the Hudson River, not far from Poughkeepsie. There are about six thousand barrels growing ther. Mr. Teator took the grand special prize at ther ecent convention of American growers, which was held in Chicago. The bidders before the sale begins will have had an opportunity to inspect all of the trees. They will bid by the barrel, or crop, on the apples, according to kind and location. Most of the transactions will be based on the barrel basis. Some of the fruit will be ready for delivery on the day of the auctions, but most of it will be picked in September or even as late as October 15.

For its services the state will charge a commission of five per cent., and will have general supervision over the auction. All prices will be a matter of official record.

The object of the auction is to give the producer an opportunity to get a reasonably good price for his product and to market it under the best conditions. The method is considered an improvement over the secret negotiations carried on by speculators.

CHAMPLIN STOCK CO. AT QUIRK NEXT WEEK

Ambition is a small word, but it certainly does mean much. Many people think they have the ambition to do certain things, but when it comes to the point they seem to fall by the way side. Not so with Charley Champlin. He always had the ambition to be a shning light in the theatrical firmament and by dint of hard study and work he has gradually mounted the ladder of fame, step by step, until he has reached the topmost ranks, and has succeeded in grapsing the goal of his ambition, and that was to be the foremost star in his profession today. He is now making his 15th annual tour of the east and his special company will be seen here all next week in a new line of plays and one or two of the old favorites. The company under the direction of Mr. H. M. Addison will open the week's engagement with one of the most sensational plays of the day called "Beyond the Law." Other plays that will be produced during the week are "The Reformer," "Innocent," "The Heart of Maryland," "The Rosary" and the "Cowboy and the Captain." A special carload of scenery and electrical effects are carried and the settings have been given that little touch of fineness that qualifies them with Broadway productions, in fact they are Broadway productions at popular prices, played by a capable cast of clever artists and it is with pleasure that the engagement is announced for our city the coming week.

Give The Evening Times a trial. It has all the news about all the people you know, and their doings here.

There Is a Military Truth:

"Modern Fortifications Crumble Beneath Modern Guns"

The fortification built up by the Mail Order Houses will not stand the fire of the 45 centimetre directed at them by the series of Home Trade Boosts appearing daily in this newspaper. Here as one specimen:

PROSPERITY AT HOME

THERE IS NOTHING OF GREATER IMPORTANCE TO US THAN THE PROSPERITY OF OUR COMMUNITY.

PROSPERITY AT HOME IS BASED ON LOCAL BUSINESS CONDITIONS.

If our local merchants and storekeepers transact a large volume of business their prosperity is communicated to every person in the entire community.

The values of our real estate increase. Wages are increased. There is more money in circulation and it is more readily obtained for purposes of expansion, paying for improvements, buying luxuries, etc.

In every way we can discover better conditions on all sides when our business men are busy.

There is every reason in the world why we should spend our cash at home instead of sending it to the big cities. By keeping it in circulation in our home community we profit in many ways.

But if we send our money to the mail order houses, that is the last we hear of it. If enough money is sent to the mail order houses from our community we may easily put our local merchants out of business. By diverting our trade from our local storekeepers we can make it impossible for them to maintain their stores.

Every dollar sent out of our town to the mail order houses detracts just as much from our own individual prosperity, as well as from the prosperity of the storekeepers and from the community in general.

Think of the consequences if we should all send to the mail order houses for our necessities and our luxuries. How long would it be before our local merchants would have the "closing out sale" signs on their doors, to be followed by the "for sale" signs on the stores themselves?

AND WHEN THE BUSINESS HOUSES ARE ALL ADVERTISED FOR SALE WHAT WILL BE THE VALUE OF OUR OWN HOUSES AND LOTS?

Such conditions have actually prevailed in some communities. It has happened that the citizens became "mail-order-mad" and sent to the big cities for the greater part of their merchandise. The local merchants abandoned the field, because there was no business there for them. The burden of taxation fell on the various property owners, because there were no business concerns to bear the big proportion which generally falls to their share. Property values decreased until there were no bidders for undesirable real estate. The town became dead.

In the meantime the head of a big mail order house in Chicago was drawing an income of over a million and a quarter dollars, made possible by the business received by his concern, by mail, from such communities as the one above described and from our own community, as well as from others all over the United States.

Every dollar of this enormous income was diverted from storekeepers in small communities. Every dollar sent in to that great mail order concern, amounting to hundreds of millions of dollars annually, detracted from the prosperity of some community, struggling to become a center of population, but retarded by the short-sightedness of the citizens who sent their money out of town in preference to helping towards the prosperity of their own community.

Of course, it was all done unthinkingly. These who sent their dollars to the mail order house did not stop to consider that these same dollars would add to the prosperity of the home community if expended at home. They did not stop to reason that by helping those in their own community they would be best advancing their own interests.

THIS COMMUNITY NEEDS YOUR HELP. YOU NEED THE HELP OF EVERY DOLLAR IN ORDER TO MAKE A BETTER COMMUNITY IN WHICH TO LIVE. YOU NEED THE PROSPERITY OF THIS COMMUNITY TO MAKE YOUR PROPERTY OF GREATER VALUE AND TO GIVE YOU THE BENEFITS OF A BETTER COMMUNITY IN WHICH TO MAKE YOUR HOME BRIGHTER, MORE DESIRABLE AND WORTH MORE IN DOLLARS AND CENTS.

We must all consider these matters. We must stop and think, before sending our dollars to the mail order houses, that our co-operation is necessary to the upbuilding of our community and that, for our own selfish advantages, even with no other motive, we must patronize home institutions and keep our dollars at home so that they can work for the advancement of our own prosperity.

We will all find that it is a fact, when we consider the question from every view point, that we can buy as cheaply and as profitably from our local merchants as from a mail order house, and we then know what we are buying, instead of buying a "pig in a poke."

The above is only one of the features printed in

The Home Paper of Fulton

"WALLINGFORD" TO APPEAR ON SCREEN

FAMOUS STORIES WILL BE PRESENTED AS ELABORATE FILM DRAMAS.

FAMOUS FICTION CHARACTER

J. Rufus and His Partner, Blackie Daw, Have Entertained Millions of Readers.

No character in fiction of recent years has excited quite the same interest as that of "J. Rufus Wallingford, the get-rich-quick man." George Randolph Chester, his creator, acquired fame through him and for years the shady schemes of the big promoter have amused the American public from coast to coast. "Wallingford" is so peculiarly an American product, his adventures are so startlingly original and humorous that the question has often been raised as to why the stories have not been put into pictures.

Now comes the house of Pathe with the announcement that they have secured the rights to film these stories and that the pictures will be put out in the fall under the title of "The New Adventures of Wallingford." The production of them has been turned over to Wharton, Inc., who have produced many Pathe successes. Work was started by them on the "Wallingford" stories at Ithaca, N. Y., on July 12th. Several of the best known players of the stage today have been secured for the cast. Max Figman will do "Blackie Daw", Frederic de Belleville will play "Wallingford", and Lolita Robertson will have the feminine lead.

Max Figman.

Max Figman is easily one of the best known actors of the day. Augustin Daly saw him playing a small part in Philadelphia when young Figman was only eighteen years old, and offered him a three years' contract. On the expiration of his contract Mr. Figman went with Charles Frohman, and then with Mrs. Fiske, with whom he was associated for seven years as a producer and leading man. Then he went starring and for the last eight years has been under the management of John Cort. A recent engagement was with the all star cast of "Fine Feathers." Mr. Figman has just built a fine summer home at Great Neck, Long Island, but because of his "Wallingford" engagement cannot christen it until fall.

Mr. de Belleville needs little introduction to the playgoing public. Born in Liege, Belgium, his father was a colonel and his brother a commandant in the Belgian Army. One of his great-uncles was a prime minister of Belgium in 1830. He played a wide variety of parts in London and Australia, and made his first appearance in the United States years ago in San Francisco. Some of the famous productions with which he has been identified are "Diplomacy" with Rose Coghlan; "Divorcons," with Mrs. Fiske; "Tess of the Durbervilles"; "The Eternal City," with Viola Allen; and with Mrs. Fiske again in "Leah Kleschna."

Lolita Robertson is a California girl and began her stage career in stock at the Alcazar Theatre. After a season or two there she came to New York, and was engaged by Henry Miller for "The Great Divide." Mr. Figman offered her a good part in "The Substitute," with which company she remained for two years. Since then she has been continuously associated with Mr. Figman in his productions.

ARNOLD DALY IN NEW PLAY.

The new "Arnold Daly Series" will soon be released by Pathe. Mr. Daly will appear as Ashton Kirk, investigator; the character having been taken from the stories of that name, by John McIntyre.

Bowser Catches On

And It's Mrs. Bowser Who Gets the Worst of It.

By M. QUAD.

Copyright, 1915, by the McClure Newspaper Syndicate.

Bowser had been good for a week—that is, good for him.

He hadn't been up in a balloon or down in a submarine.

He hadn't planned a trip to either pole.

He hadn't had a row with the street car conductor or told the butcher what he thought of him for sending so much bone with the meat.

He hadn't hustled a tramp out of the yard or had he threatened the arrest of a street peddler.

But in place of this he had been very arrogant about the house. He had talked about "my" house, "my" grocery, "my" friends and a whole lot of other "mys," as if he was the whole show and Mrs. Bowser was nothing at all. She was both amused and provoked, and after several days she wrote a letter to her mother. In the letter she said:

"Mr. Bowser has a case of the 'big head.' I think you had better come out

HE BACKED AGAINST A FENCE AND READ EVERY WORD OF IT.

here and apply the remedy. I want you to come unexpectedly and catch him in the act."

And the mother wrote back:

"I will come next Friday afternoon, and I will attend to Samuel's case with promptness and dispatch, as I well know how to do. I can find my way over from the depot, and I will arrive about an hour before he comes up to dinner. Let him act up and canter around, for his time is short."

On the day Mrs. Bowser wrote her letter she handed it to Mr. Bowser to drop into the letter box on the corner. He carried it along in his hand, and as he was about to mail it he noticed that the envelope was not sealed.

"Huh!" he grunted. "Just like a woman. This letter is to her mother, and I suppose it contains a hundred dollar bill? Guess I will look in and see."

And he backed up against a fence and read every word of it. He was thereby put in possession of Mrs. Bowser's nice little plot to take him down a peg or two.

"The old woman will answer this in a day or two," he mused, "and I will get hold of the answer in some way. Then we will see who is the biggest man. Acting up, am I? Need taking down a peg or two. H'm! Nice little bear trap they are going to set for me."

Like 99 women out of 100, when Mrs. Bowser received her letter she reads it and then places it on the mantelpiece or piano until she gets time to read it two or three times more. Mr. Bowser had only to read it once to lay his little plan.

When the train from Okomas arrived in the city at 5 o'clock in the afternoon Mr. Bowser's mother-in-law was one of the passengers. As usual, she had a folded umbrella in one hand and her quaint old carpet bag in the other. She was disputing with the hackman as to the price to be paid when her smiling son-in-law approached with extended hand and a bland smile. He not only wrung her hand like one glad to see another, but he kissed her—yes, sir, Mr. Bowser positively kissed his mother-in-law and that before fifty people!

"Why—why—why"— she stammered, in her great confusion.

"Why, mother, dear, I'm awfully glad to see you," he said.

"But I—I didn't expect you to meet me. Did Sarah tell you to come?"

"Oh, I just happened to be here on business. You are going to the house, of course?"

"Why—er—yes."

"Then come along, and never mind the hack. We'll whirl over in an auto. Nothing is too rich for my dear mother."

The old lady was so paralyzed that she dropped both satchel and umbrella, and when he had picked them up she slowly followed him out of the depot and wondered if she had arrived at Oshkosh or Yaphank, and whether his name was Bowser or Jones. On the way over to the house he kept calling her "dear mother" and saying that he had been longing to see her for the last month, and she was so astonished that for once in her life she kept her mouth [illegible] for fully five minutes.

As Mrs. Bowser had planned it, she was to lay down on the lounge a few minutes before Mr. Bowser would reach home for dinner. There would be camphor sprinkled around, and she would have a nice clean towel around her head. The mother would be seated upstairs, ready to play her part at a minute's notice. Mr. Bowser would burst into the hall in his usual impetuous way, and, smelling the camphor, he would strike back into the sitting room and demand of the half dead woman lying with closed eyes:

"Woman, what in the old Harry does this mean! Is it another of your infernal sick headaches? Can't I leave this house for a day and return without finding you kerflopped with some ailment or other?"

"Oh, Samuel!" she murmured.

"Don't 'oh, Samuel me!'" he shouted, "but tell me what's the matter. Have you got a chicken bone in your throat or has a rattlesnake bitten you?"

And at this critical moment the mother-in-law would appear in the door, and the way she would go for Samuel Bowser and the way he would be crushed would long be remembered. But that little plot never developed.

Mrs. Bowser was on the front steps, looking up the street for the arrival of the expected mother, who probably would come on the street car, when an auto whirled around the corner and drove up to the gate and stopped with a grand flourish. In that auto were seated Mr. Bowser and her mother. They were not ghosts, but living human beings. Mr. Bowser raised his hat and gave a half cheer, and the old lady somehow managed to call out, "Howdy, Sarah?"

With tenderest hand and smiling like a June morning Mr. Bowser assisted his visitor to alight and conducted her up the steps and said to the puzzled and astonished wife:

"Isn't it splendid of her to come to visit us? She probably will want to return home in about a month, but we will keep her three months at least—six months—a whole year. Never, never shall we let the mother out of our sight again."

When the mother and daughter were alone upstairs the mother asked:

"Sarah, what in tarnation does this mean?"

"I—I don't know, mother."

"Well, he acts more like a bridegroom than a son-in-law. He never liked me, and I never liked him, and yet he is as juicy and tender toward me as a rare beefsteak. He said he was at the depot on business, but I don't believe it. I believe he must have got hold of my letter and is playing a joke on us. It doesn't look as if I would have a chance to do any crushing this trip."

The "crushing" was all in Mr. Bowser's hands, and Mrs. Bowser was made the victim. Under the excuse that the house might be broken into if left to guard itself he invited the mother-in-law to go to the movies with him while Mrs. Bowser remained at home. "Dear mother" accepted the invitation, and her daughter shed a few tears during the lonely hours she had to pass.

The old lady had never been to a zoo. Mr. Bowser took her to one while Mrs. Bowser had to remain at home to see about the dinner.

One evening at the dinner table Mr. Bowser announced that he had received an invitation to deliver an address before the Gulliver club.

"And you will go?" asked Mrs. Bowser.

"Not by a long shot. I am going to teach mother how to play euchre this evening."

And he did. The next day the mother said to the daughter:

"Sarah, this is intolerable. We must change it."

"But how can we?" was asked.

"There is but one way—let him be Bowser again. I liked his old ways better than his new ones."

"So did I."

And the "dear mother" took an early opportunity to say:

"Samuel, my son, you are acting too darned good. Please make a change."

And a few hours later as Mr. Bowser came upon Mrs. Bowser using the carpet sweeper he saw tears in her eyes as she looked up at him.

"Oh, Samuel, you are too good—too good! Please go back to last week and be bad again. You have punished me enough!"

"Hanged if I don't be a bad man with a big B and carry two guns and a knife!" he laughed.

And next time you hear Mr. Bowser you will learn that he has resumed business at the old stand.

Do You Believe This?

A plumber once presented to a millionaire a bill of $100 for mending a pipe.

But the millionaire handed the plumber a dollar note and said severely:

"Receipt that bill of [illegible] in full."

"But—but"— said the plumber.

"Receipt it in full," the millionaire repeated. "I used to be a plumber, man, myself."

The plumber at this gave a great start, receipted the bill and handed the millionaire 50 cents change.—Detroit Free Press.

Look Before You Leap.

The cake she made looked fine enough
To justify her pride,
But when we came to eat the stuff
We pretty nearly died!
She said she could not comprehend
What trouble there could be.
She'd followed closely to the end
The cookbook recipe.

It certainly seemed strange the cake
Should turn out such a mess
Unless she made some sad mistake
Despite her carefulness.
The book proved such the truth to be
Beyond the slightest doubt.

For the Children

Herman Miller Healthiest Baby on Staten Island.

Photo by American Press Association.

The rather solemn young gentleman here pictured is quite distinguished in a way—and a very good way it is. He is Master Herman Miller, aged about one year, and his distinction comes from good health. Herman won a prize recently because he was declared by a competent committee of doctors to be the healthiest baby exhibited at a recent baby show held on Staten Island, New York city. While a fairly good looking youngster, Herman did not win the beauty prize. That went to a girl. But good health in itself is something to be proud of, and Herman no doubt is perfectly content that a girl won the beauty prize.

Game of Initials.

Write ten or twelve questions on cards and distribute them among the party. Have pencils attached. The questions are to be answered by using the two initials of the name of the person holding the card as the initials of the answers given.

As an example, suppose the name is Ethel Hart.

1. What is your name? Ethel Hart.
2. Where do you live? East Hanover.
3. If not yourself, who would you rather be? Edward Hale.
4. What do you think of the tariff? Excessively high.
5. What is your latest fad? Eating horseradish.
6. Describe your character. Exceedingly hopeful.
7. What is your favorite flower? Early hyacinth.
8. Your favorite book? "Eben Holden."
9. The height of your ambition? Encouraging hoboes.
10. Your chief accomplishment? Etching horseshoes.
11. Your favorite occupation? Epitaph hunting.
12. Your favorite dish? Eggs and ham.

Bucks the Indian.

The captains are chosen, and each captain then chooses alternately the remaining company until two long lines are formed. They face each other, holding hands tightly. One captain calls the name of one of his strongest boys, and this boy runs and hurls himself between two boys of the opposing side. If he succeeds in breaking through he takes back with him to his own side all the boys on the line below the place he broke through. If he is unsuccessful he must join the enemy's side. This is kept up, each side taking a turn until all the boys are on one side, the captain included.

The strongest boys should be stationed near the top of the line, near the captain, and stratagem is shown in trying to catch the strong boys off their guard by pretending to tackle the boys at the bottom of the line.

Riddlemeree.

My first is in toasting and also in tea,
My second's in viewing and also in see,
My third is in looking and also in leap,
My fourth is in seeing and also in peep,
My fifth is in several and also in some,
My sixth is in calling and also in come,
My seventh's in bowing and also in bow,
My eighth is in reaping and also in plow,
My ninth is in eating and also in meat,
My whole brings the stars almost to our feet.

Answer.—Telescope.

—Children's Magazine.

The Boy and the Squirrel.

Up in the tree a squirrel,
Under the tree a boy,
While through nut laden branches
Murmured the breezes coy.
Chippy was very busy
Gathering his winter hoard,
Never a moment's play time
Could Chippy Gray afford.

"My, what a lazy fellow!"
(Chippy had spied the boy
Stretched on the grass beneath him
Nothing his time to employ.)
"Hit him a whack!" the wind cried.
Chippy winked back, "That's so!"
Then from his mouth a nut fell.
Up sprang the boy: "Oh, ho!

Some one's up in the nut tree,
Bet I can tell you who!"
While he was speaking—kerwhack!
Down came nut number two.
Then the boy seized his basket,
"Better get busy," he said,
"Else all the squirrels in Nut Town
Of me will get ahead."

—Orange Judd Farmer.

Live Decoys Are Often Used and Made to Play the Traitor.

American wild geese each spring migrate from waters of the southern states to the shores of the Arctic in northern Canada. The two great common varieties of the bird are the honkers and the wavy, or white, goose.

Both of these are extensively hunted. Covering, as they do, about 5,000 miles on their annual migration, these birds rest at various places en route and are thus shot by sportsmen almost across the length of the continent. The birds have a peculiar trait of always leaving one of their number on lookout while the rest feed.

To aid in the shooting of wild geese live wild ones, captured young and raised in captivity, are often placed in feeding grounds in likely territory on the line of flight of the migrating flocks. These decoys are terrible traitors and by their calling often bring the flying ones within shooting distance of the sportsmen, who lie in hidden pits near at hand.

Painted decoys, shaped like geese and made of steel, are also used by the hunters. In the latter case the men, from their hiding place in the pits, call the birds by using a goose call, a metal instrument like a flute, which mimics the sound of the goose with remarkable realism.—Philadelphia North American.

WRITING ON METALS.

By the Use of Wax and Acids Etchings May Easily Be Made.

Usually a man attempts to put his name on his metal possessions by scratching with a file or knife point and makes the poorest sort of a job. It is really very easy to write on any metal—the blade of a jackknife, a watchcase, skates—if one happens to know how, and the attractiveness of the inscription is limited only by the artistic ability of the individual.

Cover the place where you wish to write with a thin coating of melted beeswax. When the wax is cold write plainly with any pointed instrument, being particular to cut the letters through the wax to the metal.

Then mix one ounce of muriatic acid and one-half of an ounce of nitric acid, or smaller quantities in the same proportions (and remember that those acids are deadly poisons), and apply the mixture to the lettering with a feather, carefully filling each letter.

Allow the acids to remain from one to ten minutes, according as the etching is to be light or deep. Next dip the article in water, wash out the acids and melt off the wax, and the thing is done. A little oil should be applied as a finishing touch. Gold, silver, iron or steel can be marked in this way.—Youth's Companion.

Berthollet and Robespierre.

It is said that the celebrated savant Berthollet in the most dangerous times of the republic sustained his fearless love of truth. Some days prior to the ninth Thermidor a sandy deposit was found in a barrel of brandy intended for the army. The contractors, suspected of poisoning, were immediately arrested, and the scaffold was already prepared. Berthollet, however, examined the brandy and reported it free from all adulteration.

"You dare maintain," said Robespierre to him, "that that brandy does not contain poison?"

As his reply Berthollet drank off a glass, saying, "I never drank so much before."

"You have plenty of courage!" exclaimed Robespierre.

"I had more when I signed my report," replied the chemist, and here the matter terminated.

Seventh Century Needlework.

Before the end of the seventh century needlework was carried to great perfection in convents, where it was used for the establishment of the church and the decoration of priestly robes. Artists did not think it beneath their dignity to trace the patterns used for embroidery in their natural colors. A certain religious lady, wishing to embroider a sacerdotal vestment, asked no less a personage than St. Dunstan, then a young man, but already noted for his artistic skill and taste, to draw the flowers and figures, which she afterward worked in gold thread.—Exchange.

Easily Arranged.

A man took the following telegram to a telegraph office: "Mrs. Brown, Center Street: I announce with grief the death of Uncle James. Come quickly to read the will. I believe we are his heirs. John Black."

The telegraph clerk, having counted the words, said, "There are two words too many, sir."

"Cut out 'with grief,'" was the reply.—Chicago News.

In These Martial Days.

"You must not be so quarrelsome, Willie," said William's father impressively. "Remember that 'the meek shall inherit the earth.'"

"Maybe they will hereafter," responded the young militant, "but around in my school they are used to wipe up the earth."—Chicago Herald.

What It Will Be Called.

Teacher in Civics—When we have everything in common and your business is everybody's business, what is it called? Observing Student—It is usually called gossip.—Judge.

Corrected.

Mr. Hennypeck (peevishly)—When you tell me to do a thing, like a fool I go and do it. Mrs. Hennypeck (acridly)—No; you go and do it like a fool.—New York Post.

Easy & Practical Home Dress Making Lessons

* * *

Prepared Especially For This Newspaper by Pictorial Review

FOR THE VAIN LITTLE MISS.

Frock of white linene trimmed with pearl buttons and a touch of hand embroidery. It looks well also in a combination of plain and plaid materials.

Children are vain little beings and are fond of looking pretty. This dainty model meets the desires of the little maid and satisfies the demand for something practical at the same time. It is made of white linene, has long, one-piece sleeves and a belt that may extend all the way around the lengthened waist-line or be arrested at either side of the front and finished with pearl buttons.

For a miss of four years 2 yards of 36-inch material will be required to make the dress. Some mothers do not care at all for long sleeves for their youngsters. The design shown here may be shortened by cutting off the pattern along line of small "o" perforations.

Before attempting to cut out any of the various parts, however, the linene is folded in half so that the collar, the back and the front may be arranged along the lengthwise fold. Along the selvage edge the belt is laid, and if the short effect is preferred the front edge of the belt may be cut off along small "o" perforations. The sleeve section is laid over a lengthwise thread of the goods.

A touch of hand embroidery makes a nice finish for the collar and the front of the dress where the belt is slipped through unstitched pleats. The front is slashed to accommodate the piping of contrasting material and furnish a background for the button trimming.

This model is capable of attractive variation. For instance, it may be made of lightweight serge trimmed with belt and collar of plaid silk. Such a combination is as effective in tub materials as in serge and silk, however, and much less expensive.

Pictorial Review Dress No. 6338. Sizes 1, 2, 3, 4, 5 and 6 years. Price, 15 cents.

Embroidery design No. 12175. Transfer pattern, 10 cents.

Care of the Baby in Summer

Helps For the Country Mother in the Care of the Baby.

[Prepared by the children's bureau, United States department of labor.]

Thousands of young mothers living on the farms and in the sparsely settled rural communities of this country have to meet the problems of motherhood with little help. City mothers may have doctors and nurses without number at their service, as well as hospitals and dispensaries. In addition the infant welfare station has proved of enormous help to mothers situated so as to be able to avail themselves of it.

But the country mother usually lives too far away to make use of these stations, while hospitals and doctors are resources to be used only in illness or emergencies. Thus the country mother usually has had to learn from her neighbors or from her own, sometimes sorrowful, experience what to do or what not to do in the care of her baby. In this situation the mother should have at least one good book on this subject. If she will apply to the chief of the children's bureau, United States department of labor, Washington, asking for the publication called "Infant Care" it will be sent free of charge. This bulletin contains simple directions for the care of the baby and in addition gives references to the standard books dealing with the subject.

An encouraging prospect for the relief of the country mother has lately opened up in the coming of the rural visiting nurse, who travels about the farming communities with a horse or an automobile. She is employed by the families in her district, who contribute to pay her salary. The town and country nursing service maintained by the American Red Cross association, with headquarters at 1624 H street, Washington, will be glad to send literature and answer questions about such service.

The nurses ride about their districts, calling at each house where there is need of their assistance. They work under the direction of a doctor, helping the family to carry out his instructions in cases of illness or accident. Thus the nurse does dressings, gives baths, takes temperatures or whatever may be required in the case. If there is a baby she advises the mother as to his care, shows her how to give him a bath and how to prepare his food if he is already weaned. But in addition to giving bedside nursing and home care the rural nurse does many other things. If typhoid makes its appearance she may look about for a polluted water supply or trace back the milk the family uses to its origin to see whether this is the source of the infection and urge methods which will prevent further spread of the disease.

She stops at the country schools and looks over the children and sometimes detects beginning cases of infectious disease in time to prevent an epidemic. She also notes cases of probable adenoids, deafness or weak eyes and calls the attention of the child's family to the need of care by a physician.

In all of this she carries on a continual campaign of education toward a better standard of community life by showing the mothers how flies can be exterminated or at least be kept out of the house; how to take care of the milk and the baby's bottles; how to clean up the premises, dispose of the refuse and how to keep the streams of the community pure. Such a nurse is therefore, if she is as useful as she may be, far more than a nurse. She is teacher, hygienist, dietician as well, and her salary will be saved many times over in the course of years by the prevention of illness and suffering through her work.

A rural woman's club may be the nucleus from which the movement for a community nurse starts. Clubs of this sort interested in such a movement will find many suggestions in a bulletin published by the children's bureau on work of this sort which is carried on in New Zealand. This pamphlet is published by the New Zealand Society For the Health of Women and Children and is sent free by the children's bureau, Washington, to all who ask for it.

Yellow Is Popular.

Yellow is an extremely fashionable color this season, as is evidenced by the number of pale yellow dance frocks at every opening of importance and by the hats trimmed with yellow daisies and pale yellow frosted grapes. A particularly charming hat noted the other day at luncheon hour was of black milan in elongated sailor shape, with a trimming of white petaled, yellow centered daisies of exaggerated size all around the base of the crown and a simple bow of black moire ribbon across the back. Two short amber headed pins held this hat to the hair, which, by the way, was dark; and around the edge of the brim was draped one of the graceful sanpan veils, the latest veil notion of fashion. These veils are square or circular affairs, cut out in the middle to fit over the hat crown and with an elastic run through a casing, so that the veil holds itself on without aid of pins.

Fresh Beets Valuable.

Fresh beets are quite rich in food properties and may be eaten hot with a dressing of butter or cold with an oil and vinegar dressing. Pickled beets, one of the best loved picnic dishes, are invaluable as an appetizer and deserve a place on every table.

Mexico has about everything that could serve to complicate its affairs except an energetic peace movement.

The Way a Child Does It Is an Index to Its Character.

It is very often the little things that children do which give the best indication of what their future characters will be. Schoolteachers, for instance, have a first rate opportunity for watching the different traits in the children who come before them. In their work and in their play the sort of man or woman the child will become is daily unfolded. In such a small matter even as the sharpening of a pencil valuable hints may be obtained by any one in the least observant. Here it may easily be discovered whether a boy or girl is careful, destructive, wasteful or economical.

The boy, for instance, who sharpens his pencil into a stub is inclined to be economical, careful and quick in after life. The boy or girl who takes an inordinately long time to make a slender point, cutting very precisely and regularly all the time will usually prove to be of an artistic and dreamy disposition. The child who, regardless of the look of the pencil, gouges out great pieces in order to get to the lead will show impulsiveness and generosity.

Mere destructiveness, however, becomes apparent when a child takes a delight in sticking his knife in his pencil and splitting it or destroying it in some other way.

Parents, watch your children when sharpening their pencils, and correct and advise them accordingly.—Pearson's Weekly.

CARLYLE'S FIRST LOVE.

She May Have Been the Blumine of "Sartor Resartus."

During the year 1818 Thomas Carlyle, the Scotch philosopher, was living at Kirkcaldy, and he seems then for the first time to have fallen in love. The lady appears not to have returned the attachment, although she, with great insight, at the age of twenty-two, perceived the genius of her suitor of twenty-five.

In the letter in which she took leave of her admirer she used these significant expressions: "Cultivate the milder dispositions of your heart, subdue the more extravagant visions of the brain. * * * Genius will render you great. May virtue render you beloved! 'Let your light shine before men,' and think them not unworthy this trouble."

Many years after, when Carlyle wrote his reminiscences, he described the episode. He says that Margaret Gordon "continued for, perhaps, some three years a figure hanging more or less in my fancy, on the usual romantic and latterly quite elegiac and silent terms."

The real interest of the story is: Was Margaret Gordon the original of the Blumine of "Sartor Resartus?" One critic would have us answer that although Jane Welsh might have inspired some of the details, it was Margaret Gordon who was the true original.—New York Telegram.

The Faust Legend.

For 1,400 years the Faust legend—the sale of a human soul to a devil—has existed. The first recorded hint of its vitality is given in the sixth century story of "Theophilus." That story suited the early Christians in their efforts to stamp out the necromancing devices of evilly disposed persons prone to seek power by unholy means. The association of the name of Faust, however, with the legend is not more than 400 years old. The likeliest prototype of the modern Faust is the man of the same name who in Cracow boldly proclaimed himself a professor of magic. In the sixteenth century stories Helen of Troy was bestowed by Mephistopheles upon Faust, and not until the middle of the eighteenth century does there appear a shadowy Margaret in the form of a "beautiful but poor girl," who afterward develops into the Margaret of Goethe.

The Dead Horse.

The smart traveling man stood on a corner in the little country village at dusk. He was looking for amusement, and the first object that attracted his attention was an overgrown boy, perhaps fifteen years of age, riding a horse that might have come out of the ark.

"Hello, sonny!" shouted the salesman. "How long has that horse been dead?"

Quick as a flash the boy replied, "Three days, but you're the first buzzard that has noticed it."

The traveling man moved on to the hotel.—Youth's Companion.

Force of Association.

While the owner of the touring car dismounted during necessary repairs, the young front wheel timidly asked the old back wheel:

"Don't you get weary of the social whirl—revolving and revolving and revolving?"

"You'll get used to it," said the old wheel. "Our owner is a spinster, with nothing to do but go round, till sometimes I feel like a Daughter of the Revolution myself."—Judge.

His View.

Willis—Do you think a man should be allowed to hold the highest honor in the United States more than four years? Gillis—Sure thing! I say, if a man can top the league in batting for ten or even fifteen years let him stay in the game for the good of the sport.—Boston Journal.

A Difficulty.

"When I marry the woman I want must be the possessor of brains."

"But suppose she makes the same requirement?"—Baltimore American.

TODAY'S FASHION NOTE

A modish coat for Autumn, suitable to development in ripple cloth or imitation caracul, a material which this season has attained a high degree of perfection. Braid frogs are used as a fastening and the coque matches the coat. Size 16 requires 2 5-8 wards of 54-inch material.

Pictorial Review Coat No. 5535. Sizes, 14 to 20 years. Price, 15 cents. Skirt No. 5978. Sizes, 14 to 20 years, price 15 cents.

Pictorial Review Patterns may be procured at the M. Katz & Co. Department Store, Fulton.

The KITCHEN CUPBOARD

JAMS AND JELLIES.

PEACH JELLY.—Peaches never make a firm jelly that will retain its shape when turned from a mold, but no jelly is more delicious for cake fillings. For jelly select peaches not quite ripe enough for eating. Rub off the down with a rough cloth, cut in pieces, saving pits. Cover with water and cook slowly, closely covered, until the fruit is perfectly soft. Turn into a jelly bag and hang to drip. When the juice is all extracted measure and allow to every pint of juice a pound of sugar and the juice of a lemon. Set the sugar in the oven to heat and place the liquid uncovered over the fire. Cook steadily twenty minutes, add the heated sugar, stir until dissolved, cook five minutes, then strain through a cheesecloth. Use pits for flavoring.

Mint Jelly.—Take a pint of freshly gathered mint leaves, wash and add to them a quart of water and a cupful of tarragon vinegar, two cupfuls of sugar, a dash of paprika and a teaspoonful of salt. Boil gently for twenty minutes. Add a half package of gelatin that has been standing in a little cold water, let all heat and melt, then strain carefully into little glasses to set. This is excellent to serve with cold meats or to use in fresh cucumber salad with French dressing or mayonnaise.

Rose Leaf Jam.—Gather a quantity of fresh red and pink rose leaves when they have unfolded after a recent shower and to every solid pint add a scant pint of sugar. To six pints of the leaves add one quart of distilled water. Let all slowly heat and melt. When it reaches the boiling point stir carefully and boil twenty minutes, turn into little jam pots and when cold cover down for use. This is good to serve with ice cream, for cake filling or for sandwiches.

Gooseberries and Red Raspberries.—Gooseberries and red raspberries in equal parts make fine preserves. For this combination use one pound of sugar to each pound of fruit, as the gooseberries are tart. In combining raspberries and rhubarb use two parts raspberries and one part rhubarb.

French Cooking Terms.

Bouillon—A plain, clear soup.

Braise—Meat cooked slowly in a covered pan.

Consomme—Clear soup or bouillon boiled down until very rich.

Anna Thompson

BANKERS IN SPECIAL TRAINS FOR SEATTLE CONVENTION

The New York State Bankers' Association each year arranges for the tour of the eastern bankers to the convention of the American Bankers' Association. This year the convention will be held in Seattle, September 6 to 10. Advantage has been taken of the occasion for a tour through Glacier National Park, the Canadian Rockies, Colorado Rockies, Grand Canyon, Salt Lake and visits to the expositions at San Francisco and at San Diego.

The party numbering over 300 will travel in three special trains leaving Grand Central Terminal, New York, on Saturday, August 28, via the New York Central.

There will be in all thirty-four steel cars in the three trains. Each train will be accompanied by a maid, stenographer, barber and valet. Baseball scores will be telegraphed to the trains en route.

The convention of the American Bankers' Association is one of the most important gatherings of business men held in the United States and draws leaders in the financial world from all parts of the country.

SPANISH-AMERICAN VETS WANT PREFERENCE

Contending that the preferment of Spanish war veterans for Civil Service positions will impair the efficiency and jeopardize the administration of public service, the Civil Service Reform Association has issued a pamphlet which it is sending to all the Spanish-American war veterans in the state and to others, calling attention to the proposed amendments before the Constitutional Convention giving the veteran preference over the other citizens for Civil Service positions. The pamphlet is entitled An Appeal to Veterans Against the Adoption of Veteran Preferment Amendments.

FOUND HIS $5 BILL IN THE CABBAGE DINNER

Winsted, Conn., Aug. 28.—Two months ago Fritz Helmer, while working in his garden on Platt Hill, lost a folded five-dollar bill from a pocket in his working shirt. Yesterday while eating boiled cabbage which was grown in the same garden here, he found his money in the cabbage. "The bill," he said, "must have fallen into the spreading leaves of a cabbage plant which in folding concealed the money. I have sold a hundred head of cabbage, and I am glad nobody else got my cabbage bank for a dime."

A trial subscription for The Evening Times costs little and gives you much in return. It is the people's paper. adv

OUR WASHINGTON CORRESPONDENCE

News Mostly of a Political Nature From the Nation's Seat of Government for Times' Readers.

Washington, Aug. 28.—The net balance in the general fund of the National Treasury dropped to $58,431,490 during the week ending Saturday, August 14, compared with over $130,000,000 two years ago. The deficit from July 1 to August 14 was $24,711,866.

* * *

Imports entered at 13 principal customs districts of the United States for the week ending August 7, 1915, were valued at $34,394,000; duty collected thereon $3,432,000, an average ad valorem duty of 10 per cent., compared with an annual average advalorem of 17 per cent. for 1913, under Republican law.

* * *

The New York Times Annalist Index Number on wholesale prices of 25 leading articles of food for the first week in August, 1915, was 145.17, compared with 1138.7 for the first week in August, 1913, under Republican law. The Index Number for the year 1914 was 146.7, compared with 139.98 for the year 1913.

* * *

Men and women of an earlier generation have a clear recollection of "blackstrap" molasses, a by-product of the manufacture of cane sugar. It was a common article of food half a century ago, but the children of today scarcely know it even by name. But the European war has suddenly created a large demand for it for use in making denatured alcohol, which, in turn, is used in making smokeless powder. A fifty per cent. increase in the price of blackstrap has been a great help to the cane sugar producers and has further impressed upon their minds the fact that the European war alone has saved them from the disastrous consequences of a Democratic tariff law.

* * *

"Mr. Carranza and the persons who co-operate with him are of the profound conviction that if the American government would know the true situation in Mexico it would understand that the only possible, just and acceptable solution would be to leave the revolution follow its natural course until the complete victory of the party representing greater necessities and popularity."—Carranza's note to the Latin American Conference.

"I hold it as a fundamental principle, and so do you, that every people has the right to determine its own form of government; and 80 per cent. of the people of Mexico never had a 'look-in' in determining who should be their governor or what their government should be. It is none of my business, and it is none of your business, how long they take in determining it. It is none of my business, and it is none of your how they go about the business. The country is theirs. The government is theirs. The liberty, if they can get it—and God speed them in getting it—is theirs. And so far as my influence goes, while I am President nobody shall interfere with them.

"Have not European nations taken as long as they wanted and spilt as much blood as they pleased in settling their affairs? And shall we deny that to Mexico because she is weak? No, I say!"—Woodrow Wilson's speech at Indianapolis.

ADVERTISING SIGNS FORBIDDEN ON ROADS

Under a law which was placed on the statute books of the state at the last session of the State Legislature, and which will become operative on September 1, all people or concerns who place advertising signs within the limits of a public highway will be subject to prosecution. Seven states now have similar laws, the others being Vermont, Rhode Island, Massachusetts, Connecticut, Pennsylvania and Maryland.

Under the present law of the State of New York, the placing of the advertising signs within the highway limits is unlawful, but the only person caught putting up the signs can be prosecuted. The penalty is a fine of $25 or 40 days in jail.

Make Life Miserable for Many Fulton People

There's nothing more annoying than kidney weakness or inability to properly control the kidney secretions. Night and day alike, the sufferer is tormented and what with the burning and scalding, the attendant backache, headache and dizziness, life is indeed, a burden. Doan's Kidney Pills have given peace and comfort to many Fulton people. Profit by this Fulton resident's experience.

Mrs. Mary A. Knapp, 207 Buffalo st., Fulton, says: "I suffered from kidney trouble. My body bloated and my feet swelled so badly that I could not get on my shoes. My kidneys did not act properly and my back was lame. I doctored and tried several medicines, but nothing helped me until I used Doan's Kidney Pills. They regulated the action of my kidneys and made me feel better in every way.

Price 50c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. Knapp had. Foster-Milburn Co., Props., Buffalo, N. Y. adv

METHODISTS WANT TO AID RETIRED MINISTERS

The Rev. Charles E. Miller, of Rome, Superintendent of the Ontario District of the Northern Conference, is the author of an article in the August issue of the Veteran Preacher, of Chicago, telling of the efforts being made to raise funds for superannuated preachers. In part Mr. Miller says:

"The Methodist minister makes two surrenders: He surrenders the right to say where he shall labor. So that whether the support be ample, meager, or inadequate, go he must. Then he covenants to employ all his time in the work of God. Cut off from choice of labor and limited to 'this one thing,' it would be manifestly unjust to leave him suffer when he has exhausted his energies and is compelled to retire at a time when he is unfit for other work.

"But the care of the retired Methodist minister is possible. The Methodist Episcopal church has a membership of nearly 4,000,000, and a property value of churches, parsonages, educational, benevolent, and other institutions of probably more than $325,000,000. With such a host, and with such wealth, it surely is possible for this great church to provide for the future of its retired ministers.

"Now Ontario District is to undertake to show that it is scriptural, just, and possible to do this. With its 10,000 members and probably 25,000 adherents, our full apportionment of the $400,000 would be less than $1.80 per member and adherent. Let us reach it this year.

NEW YORK HAY FAVORED BY BUYERS

Rochester, Aug. 28.—Three men from great hay markets told the one hundred and fifty men who attended the opening of the tenth convention of the New York Hay Dealers' Association, at the Hotel Seneca yesterday, that New York hay was generally favored by buyers. They were F. M. Williams, of New York; S. S. Anderson, of Boston, and E. Steen, of Baltimore.

The stringency of New York State laws, which prescribed definite and severe penalties for their infraction, the three men were unanimous in saying, was placing New York hay at a premium. Dealers have come to hold the impression, they said, that hay baled in New York was very nearly sure to come up to scheduled weight and quality.

Hay shrinks after it is baled under certain conditions. A farmer hires balers to put the hay into bales and the baler often is not careful to pack the bales to an amount that will allow for shrinkage above the branded weight of the bale. The farmer sells the hay so baled after it has stood in the markets a while a bale bought to contain a hundred pounds of hay often has shrunk several pounds so that it actually contains several pounds less.

Want to know what the folks are doing? Then subscribe for The Evening Times. It tells you everything worth knowing about. adv

HIGHER RATES IN PARCEL POST

Advance of Cent a Pound Applies to First and Second Zones; Provisions for Veterans' Vacations.

A straight line between two places often falls short of the mailing distance between them, and in the first and second zones of the parcel post there are many postoffices that are not far apart, yet when it comes to getting mail from one to the other it must travel many miles. In view of this, Postmaster Conley has received a new order, which states that on packages of one pound or more the rate points in the first and second zones 300 or more miles distant by the shortest mail route will after September 1st be 6 cents for the first pound and 2 cents for each additional pound or fraction thereof. The present rate to all parts of the two first zones is 5 cents for the first pound and 1 cent for each additional pound.

A bulletin from the postoffice at Washington states that on and after September 1st admissible liquids and oils, pastes, salves or other articles easily liquefiable may be sent by international parcel post from the United States to the Bahamas, British Honduras, Costa Rica, Curaco, Danish West Indes, Jamacia, Newfoundland and Trinidad, or from those countries to the United States, when packed according to the provisions in paragraph No. 4 of Section No. 474 of the postal laws and regulations.

Members of the United Spanish war veterans employed in the postal service may obtain leave of absence to attend the national encampment at Scranton, Pa., from August 30th to September 1st, inclusive, such absence to be charged to their annual leave.

Veterans of the Civil War who are in the Federal service may obtain leave of absence to take part in the Grand Army encampment at Washington from September 27th to October 2. Postmasters are instructed to grant such employes such time off as may be necessary to make the trip. The veterans' annual vacations are not to be affected, and they are to receive full pay for the time they are away.

Sealed proposals will be received in the office of the purchasing agent of the Postoffice Department up to 2 o'clock on the afternoon of September 22 for the furnishing of 2,400,000 pounds of jute twine, or approximately 1,600,000 pounds of cotton twine, or other twne material or tying devices that may be used to tie packages of letters.

NO HINDRANCE PLACED ON VIOLATION OF ORDINANCE

Residents of South 1st st. near the downtown section are beginning to wonder where the policeman, if there is one in that section, keeps himself about 11 or 12 o'clock at night. For the past two weeks, about that hour, a gang of young roughs have made the night hideous in that section by singing ribald songs and using loud and profane language. These disturbers of the peace walk up and down for hours, and last night became particularly offensive and residents are determined to put a stop to it. As far as can be learned no policeman has ever warned the youthful miscreants.

WILLIAM MULDOON TO FRAME BOXING LAW

Boston, Aug. 28.—Governor Whitman of New York, who is here attending the conference of state executives, has placed the subject of regulating boxing in New York state in the hands of William Muldoon, who conducts a health farm at Purchase, N. Y.

Mr. Muldoon has been asked by Governor Whitman to incorporate his ideas in a program to be followed by the State Athletic Commission, which supervises boxing in the Empire state.

How far Mr. Muldoon will go in his recommendations is not known, excepting that he is opposed to what he terms the present rough-and-tumble method of so-called boxing contests, in which he says no skill is resorted to and in which there is nothing for the spectators to see that is instructive or interesting.

The new Boxing Commission of three paid members will be named by Governor Whitman on October 1, and an appropriation will be made at that time.

With Three Tests, You Can Learn the Truth About Shotgun Shells

The tests will show what shell has the quickest and strongest primer—what shell has the highest velocity, and deepest penetration—what shell is most waterproof—what shell has the hardest crimping—what shell is the best for reloading, etc.

Make these tests yourself.

US BLACK SHELLS

We have a book telling you how to make these tests with your own gun. Call and get a copy free.

Most interesting book about shells that you ever read.

SUFFRAGISTS WIN VICTORIES

Albany, Aug. 28.—Those who are fighting the battel of "votes for women" won two decided victories in the Constitutional Convention today, when the attempt was made to prohibit the enactment of future amendments to the constitution unless two thirds of the voters vote on the proposal was defeated.

The enemies of the suffrage who are working for the defeat of the proposal which, it was decidede today, is to be submitted to the people as a separate proposition, wants future amendments made difficult so that if the suffragists lose at the coming election they will have little chance of winning the ballot for the next 20 years.

"New Joker Found."

Two innocent-looking little brackets which nestle in the body of the judiciary article of the new constitution, comprise one of the latest "jokers" discovered in that document. They were slipped in by ex-Attorney General George W. Wickersham, the same cunning floor manager of Elihu Root's convention who slipped into the public utilities article the "joker" that public service commissioners can be removed only for "cause," thereby giving them the right of court protection if corporation-owned commissioners should run afoul of a people's Governor.

This latest Wickersham "joker" absolutely nulifies an amendment to the Constitution adopted by the people in 1905 by a vote of 288,277 to 125,649.

OSWEGO TO HAVE THE SYMPHONY ORCHESTRA

Mrs. J. C. Churchill, who has arranged to bring the Russian Symphony Orchestra to Oswego in October announces that she has met with great success in disposing of tickets for the concert, having sold nearly $900 worth already.

MASON-GAGE FORCES SECURE CONTROL OF PAVING SITUATION

Commissioner Stevenson's Unexpected Leave Taking Arouses Suspicions of Persons Who Believe They See in His Advocacy of Widening Project a "Nigger in the Wood Pile."

President John W. Stevenson, of the Board of Public Works, left the city last evening, presumably for New York, and it was announced at City Hall this morning that the Board of Public Works would not meet this evening, although Mr. Stevenson set to-night as the date for the next session before his disagreement with Fred A. Gage Saturday noon. It became known this morning that both the Stevenson and Gage forces have been making concerted efforts to line up property owners along First st. on their petitions. What degree of success has attended their efforts has not been learned.

A man in close touch with the situation said this morning that Dr. Charles R. Lee, who can sign the petition for two parcels of property, will revoke his signature on the petition, naming Fred Gage and James W. Bogue, and sign the Gage-Mason petition only. This one desertion from the petition drawn by the Stevenson forces will mean a majority of signers for the Gage-Mason petition and insure the appointment of Messrs. Gage and Mason as members of the Paving Board, unless some of the signers of that petition switch to the Gage-Bogue forces. As members of the board Mr. Gage and Mr. Mason will share all the powers of the Board of Public Works on that particular section of public work, and it was to prevent their appointment that the other petition was circulated, it is claimed, as President Stevenson, knowing the sentiment of Mr. Gage and Mr. [illegible] on this particular improvement, to say nothing of personal feelings involved, wishes to insure prompt and united action on the part of the board and believes the two gentlemen in question will do everything in their power to impede certain plans.

It is well known that Commissioner Wiltsie takes the same view of the matter as Messrs. Gage and Mason and their appointment to the Paving Board will constitute a controling majority.

When Mr. Stevenson and Mr. Gage exchanged hot words before engaging in a brief bout Saturday at City Hall, Mr. Gage made some assertion regarding Mr. Stevenson's tactics in attempting to carry out the plans of the Board of Works in the improvement. It appears that Edward Quirk signed the petition nominating Mr. Gage and Mr. Bogue after he had refused to act with Mr. Bogue on the improvement, and had been told that Mr. Mason wished to withdraw as a representative on the Paving Board. When Mr. Quirk signed the petition nominating Mr. Gage and Mr. Bogue he did so according to his statement to a Times reporter this morning, with the understanding that Mr. Mason had declined to serve and that the board intended to take two feet from each side of the street and put both sidewalks to the curb. Both Mr. Gage and Mr. Mason told him they would agree to the change in the width of the street if two feet was to be taken off each side, and if the sidewalks were to be placed at the curbs.

Since that time, Mr. Quirk says, he has learned that the board has no intention and that their plans were misrepresented when he signed the petition. He would not say who informed him as to the plans of the board when he affixed his signature to the Gage-Bogue

(Continued on Page Four)

LIGHTING STANDARD IS NOT YET IN THE OFFING

The question of an ornamental light at the corner of Oneida and First sts. must be settled within very few days, as the state engineer announced this morning that the paving will begin some time late this week. The point at which the light was to be placed has already been covered with concrete and if the standard is purchased some arrangements will have to be made for a conduit to carry the wires.

Tomorrow morning traffic will be turned upon the west side of the trolley track, where the concrete is hard, while the north side of the tracks and the southern end of North First st. is concreted. A narrow road will be maintained along the eastern side of North First st. in order to permit traffic to pass from Oneida st. down North First st., but no vehicles will be allowed to cross from the bridge into Oneida st. Several loads of sand have been dumped on the sections already concreted, preparatory to starting the brick work.

RUNNING A CITY LIKE A BUSINESS

No. 8---A Business [illegible] to Bring Efficiency to [illegible]

By M. M. WIENER

The first practical move toward the adoption of a commission charter in Buffalo was made in 1908 when, largely through the efforts of the referendum league, the Common Council was persuaded to submit to the people the question whether Buffalo should ask the legislature for a new and simplified charter. That was a presidential year and there were many candidates to vote for. Nevertheless, there was a vote of 17,632 on the charter question—nearly a third of the total. Of these 13,286 were in the affirmative and 4,346 in the negative—a majority of 8,940.

That looked serious. The politicians had consented to the referendum because it would be a sop to the reformers and would not pledge anything. At that time the politicians looked upon commission-charter talk as a joke. In fact, up to the very last many of them could not persuade themselves that it really was a serious thing.

* * *

But the reformers came back the next year with a more specific question—should Buffalo ask the legislature for a commission charter? There were about eighty city and county offices to be filled that year. The total vote dropped to 11,346, but of these 8,848 were in the affirmative and 2,498 in the negative—a majority of 6,350. Still nothing came of it. The politicians continued to laugh at it.

The reformers up to this [illegible] working through various organizations, principally the referendum league and the municipal league. During the summer of 1910 they united in a single organization with a commission charter as its sole object. They called it the Commission Government Association. An attorney and a secretary were hired. A bill based on the Des Moines charter was drawn up by a competent committee under the supervision of Dr. Carlos E. Alden, dean of the Buffalo Law School and formerly legal adviser to Governor Hughes.

* * *

Then things began to stir. Weekly luncheons were held throughout the following winter at the Manufacturers' Club. Speakers were brought from all over the West where commission charters were in force to tell about them. Speakers who had gained reputations as authorities on municipal government were brought from eastern centers.

One of the largest and most successful meetings of the series was addressed by S. S. McClure of New York. The audiences were mostly business men, particularly the younger business men—the class who were still climbing as distinct from those who already had reached the summit. Local and other speakers were supplied to clubs and societies throughout the city. Printed matter was distributed in the three or four languages which are commonly used in Buffalo. Before the winter was over every business men's organization in the city had adopted resolutions in favor of the commission charter. A big delegation went to Albany to argue before the legislative committees. And the cost of all this very practical and prolonged campaign was less than $10,000, which was raised by voluntary subscriptions. It made some of the "practical" politicians stare.

* * *

Of course, the bill was not passed that year. Nobody expected that it would be. But the next fall seven out of nine Erie County Assemblymen and one out of three Senators went to Albany and pledged not only to vote for a commission charter, but to vote against any other form of charter. The Commission Government Association had become a force which the men who held or who wished to hold public office had begun to fear and to respect.

(No. 9 will be published tomorrow.)

(Copyright, 1915, by S. S. McClure.)

EX-MAYOR WANTS BELLIGERENTS TO BE ABOVE BOARD

Refuses to Sympathize With Those Who Hide Behind Committee Names---Light Upon Other Subjects, Too, Is Wanted ---Believes Cause of Both Sides Suffers By Secrecy.

"This political campaign on at present makes me tired," said a onetime Mayor of Fulton this morning. The speaker has done little in local politics since the expiration of his term as Mayor, and refused to express his real sentiments until he had been promised that his name would be withheld.

"Now, here is a perfectly ordinary political campaign. Some men are after something and others want to prevent it. Both sides are spending money on advertising. It is evident that some prominent local men are lined up on both sides of the proposition.

"What puzzles me is—why all this secrecy? Is it a crime for any many to say, 'I want Commission Government!' Is it a crime for some other man to say, 'I don't want it!' Instead of advancing their arguments, they are to my mind and in the mind of a great many people who consider these things a little, making a great mistake and only exciting suspicion.

"They tell me that a friend of mine is heading the Taxpayers' Committee. Why is he afraid to say so? And I know that another man I know well is working against this thing, and everyone in town knows it. And yet he will not come out in the open and say so.

Another thing—why did the Chamber of Commerce drop out of this and put the Taxpayers' Committee into the fight, as many people claim? Is there any reason why the Chamber of Commerce shouldn't back this thing if the members really believe in it? And no one really believes that the Taxpayers' Committee isn't a Chamber of Commerce plan. Of course, it wouldn't do for a man to get out and boost for Commission Government if everyone could guess at his motives. And I think some of these fellows are really afraid to come out in the open for it, for fear the expression of their sentiments will hurt their business or lose them some friends. But if they haven't [illegible] come out and say so?"

The former Mayor concluded by saying that he wondered who was putting up the money for the campaign. He added that he had not made up his mind on the question yet and would not do so until he had been informed thoroughly on the commission plan.

HANDS OFF IN SCHENCK STREET, IS THE COURT ORDER; CASE WITHDRAWN

The controversy between the Granby Paper Company of the West Side and the City of Fulton was settled temporarily this morning before County Judge Coville in Oswego, when the court ordered that neither party should take any further action in Schenck st. until after the trial of the action brought by the Granby Paper Company against the city, which will take place in September. The order stipulates that the city shall not attempt to open the street for traffic or make any alterations on the street, and hat the company shall not pile any more wood on the street, nor remove the wood on the street in at present. The matter is left in statu quo until after the trial of the company's action against the city for a permanent injunction restraining the city from interfering with the company's occupancy of the land.

Giles S. Piper represented the paper company this morning, while George M. Fanning appeared for the city. The hearing today was occasioned by an order secured by Mr. Fanning from County Judge Coville ordering the company to appear this morning and show cause why the injunction secured last Friday should not be vacated.

The trouble between the city and the paper company started last year when the Board of Public Works notified the company to remove its wood from what the city officials claim is Scenck st. The company has maintained large piles of pulp wood on the contested ground for several years, and the board finally determined to open the street and oust the company. No attention was paid to the first order of the board and last Tuesday gang of men under orders from the board removed the company's wood from the street. Wednesday afternoon two employes of the company were arrested when they attempted to pile more wood upon the street, and Friday the company secured a temporary injunction restraining the city from completing work started last week to open the street to traffic. Friday night Mr. Fanning secured an order from Judge Coville on the company to show cause why the injunction should not be vacated.

Both sides are powerless to do anything further on the street until after the trial of the action. The city claims title to the street by reason of a [illegible] by Peter Schenck, in which the land was conveyed to the city in 1906. The city officials claim to have a copy of the deed by which the company lays claim to the land and declare it worthless.

The city has withdrawn its case against Charles Vickery and Norman Waugh, employes of the Granby Co., who were arrested Wednesday last, charged with obstructing a public st. The men were piling pulp wood on Schenck st. under orders from company officials.

WEATHER FORECAST.

Partly cloudy and cooler tonight. Tuesday, fair. Moderate [illegible]

Thomas Mott Osborne, warden of Sing Sing, disbelieves in capital punishment and says so vigorously. During the week of justice and the courts at the Chautauqua institution, Chautauqua, N. Y., Warden Osborne spoke to a large afternoon audience in the amphitheater. After the speech questions were asked and answered, among others being that of capital punishment. Mr. Osborne said: "I believe in the state doing away with capital punishment. Every one who is directly connected with it hates and disbelieves in the hideous thing. If the governor of this state were by law required to witness every death in the death chamber we should not have any more executions. I can find nothing in the Commandments that will show any reason why the responsibility of taking a life is changed when 500,000 people take the life instead of five. It is the one place in life where we have brought ourselves to believe that a debit can be balanced by a debit. The old Mosaic law of 'an eye for an eye, a tooth for a tooth,' was designed for a different state of society and was a prohibition from going any further. There is nothing in the teachings of Jesus Christ that can give us any ground for considering ourselves not accountable when we take the lives of human beings in this way."

The civil war taught the economists of the southern belt of states that a mistake had been made in living closely up to the theory that "cotton is king." What the south needed most to keep the war going was grain to supply the troops and the civilian population. The European war threatened to make the great southern staple a drug on the market, and this year, according to the Manufacturers' Record, the grain production of the south will show an increase of about 28 per cent as against an increase for the country at large of 5½ per cent. The total increase in the south will be in the neighborhood of 300,000,000 bushels, the cotton states contributing fully two-thirds of the increase. Arkansas, Mississippi, Louisiana and Texas, which were cotton "poor" in 1864 and finally burned immense stores of it to prevent it from enriching the enemy, will be represented in the grain increase for 1915 by over 120,000,000 bushels.

The destiny of Haiti may be that of Cuba. If the United States starts in on pacification it will finish the job, possibly more energetically than in the case of Cuba. We have learned much about our southern neighbors during the past fifteen years. It has also worked the other way. What we do with Haiti in 1915 may be a warning to other turbulent South American peoples. A lesson which should be driven home is that foreign recognition saddles upon the beneficiary the obligation to prove worth it and worthy of it.

A bunch of New England college men are earning $3 a day in the Kansas harvest fields. They are athletes and expect that the hard labor will keep them "fit" for the gridiron when the season opens. Surely farm work affords better practice for muscles than waiting on table.

United States marines pacify the Haitian situation by disarming the scrappers. And this country is believed to be in a position to do some disarming in the European muss any time it takes a notion.

First medical aid by radio may work all right for many ills our flesh or mind is heir to, but a pipe line from the nearest bar is the only way to hurry up the favorite snake bite cure of our daddies.

It is over a year since Franz Josef sent that little note to Servia to be good. Surely it takes a long time to swat Austria, and so many on the job too!

The newest submarine can cross the Atlantic under or over water and back, providing no other undersea voyager prevents it from getting back.

Judging from the year end boasts on all sides, the belligerents have been having an "cinch" of a time putting it

"WHAT IS EVERYBODY'S BUSINESS"

In some of the "Political Advertisements" that have appeared in the Syracuse newspapers and signed by the "Business Men's League," the present form of municipal government was ardently defended on the ground that it is truly representative; that it is the only panacea for the people of this city who want what they want and when they want it, because at all times they have a Mayor and a Board of Aldermen every ready to give a listening ear to their needs; that any other form of government is a monarchy and therefore defeats the will of the taxpayer; that by retaining the present form of government we come into possession of our own. It is surprising that a large percentage of the intelligent population of a town takes up with this sort of clap-trap campaign stuff, yet such is the case.

We have every day at least just one example of the hollowness of the arguments set forth by the "Business Men's League" and the persons in sympathy with its campaign cry, and it is the result of having ward representation, or, more correctly speaking, the result of a government of "What is everybody's business is nobody's business." The case in point is that of the everyday violations of traffic regulations in the business or congested streets of the city, and on Oneida street bridge.

As yet no loss of life has resulted from the reckless disregard shown by the officials and employes of the trolley line who persist in running the cars between two points in the city at a higher rate of speed than the city ordinance permits, but this fact is not to be credited to the amount of foresight or hindsight belonging to any one concerned, including the city's police department, the aldermen or the mayor. If a kind providence enables the persons who have a right to the use of the streets to dodge danger another feather has been added to the cap of the present form of city government, as it is a fact beyond dispute that no one clothed with authority has raised a finger to prevent the Empire United Railways from running its cross-town cars at a rate of speed dangerous to life and limb.

Oneida street bridge is at its best a risk that no one who uses the northern sidewalk can underrate. Were an iron railing to be built that would guard the pedestrian from coming in contact with trolley cars that are run at a speed in violation of all rules of safety, danger might be lessened. Such a railing is an unlikely possibility. Last year the cross-town car did not include the Oneida street bridge in its trips. With the opening of the city schools hundreds of children will cross the structure daily and something should be done to prevent accidents on the bridge. After an accident, then what? What comment can be made? What word or what hundreds of words could reveal the sadness and the shame of a city government which works so imperfectly and with such uncertainty as to expose people to injury or probable death.

Is there no way to arouse a Mayor and and a Board of Aldermen to a realization of the dangers attending the continued violation of an ordinance to regulate the speed of trolley cars? Must it be necessary to suffer an accident before something is done? Is it to be said that a city government representing each ward does nothing until the horse has been stolen?

Chicago had its theater fire and afterwards its theatres were made safe. It had its Eastland disaster and now lake steamboat service may be safer than before the accident, but a boat crowded with excursionists had to topple over at its dock before precautions would be made unremitting and unescapable, but with that catastrophe the inevitable has happened—the inevitable habit of activity after the fact is to be followed sternly. In other words, we count the injured and dead and then act.

The matter of allowing the trolley cars to exceed a safe limit of speed is simply a case of "What is everybody's business is nobody's business," and a clear demonstration of the weakness of what some of us are applauding as a representative form of government, but which is far from being a government for the people.

POLITICAL EDITORIALS

It can be truthfully said of the Democratic party: Ye shall know it by its deficit.—Oneida Dispatch.

* * *

Only another Democratic victory will ensue if Mr. Perkins' advice is followed to any great exent, which it will not be. The worst that he predicts will not happen—unless Republicans themselves permit it to happen. The way to prevent it is not by destroying the party and erecting a weak and inefficient third party. The way to effective action lies through a united party, not through a party torn by dissensions and split upon hairs.—Auburn Advertiser-Journal.

* * *

If there were real need for a Progressive party in New York State it would not find itself in sixth place in the running after maintaining an expensive propaganda for three years past. Real Progressives in New York State have seen the futility of continued fealty to the party.—Lowville Journal and Republican.

* * *

Two of this year's great supply bills, one appropriating funds for the Postoffice Department and the other for the Indian Bureau, failed of passage last March. All the work of preparing estimates, planning new projects and the intelligent continuation of former works has been absolutely wasted by the failure of these bills. The affairs of those two branches of government must now be conducted under plans nearly two years old which are absolutely foreign to conditions at the present time. A tremendous waste of time and of money is inevitable, and the service that should be rendered to the public will be seriously impaired. As business managers the Democrats have certainly been a conspicuous failure.—Kingston Freeman.

True Living in Days of Present

By Charles R. Hobart, Kansas City, Mo.

Prepare to live by all means, but for heaven's sake do not forget to live. You will never have a better chance than you possess at this moment. You may think a larger opportunity will come to you later, but you are mistaken. Any future larger opportunity is gained only by truly living in the days of the present.

Think! Use your God-given gray matter or you allow it to corrode and evolve into a ne'er-do-well. Solve your own problems, make your own plans and then don't be too lazy to apply them. It's your job to find your niche, your vocation, some work you may like and are sure will like you, but never for the money there is in it. The law of remuneration takes care of that if you fit your life occupation. It pays to be happy in the earnest playing of your part on the stage of life. There is no understudy to take your place. It's for you alone to do the acting, and all the while.

Consciously live, making the most of every spare hour. Desire to grow mentally and spiritually. Meditate on the way to it through your work and your recreations, physical and mental. Your life will become lopsided if the pleasures which your conscience allows are postponed till you have fulfilled ambitious desire. Soon ambition will make you its slave and then forever good-by to the open mind and its happiness. Its road carries you into a narrowing sphere of life, resulting in mere human machines, whose bearings soon become worn and loose for want of the oil of whole-souled living.

Hear the wail of souls in the markets of the world's commerce, in the cruel slavery of that hardest of taskmasters, ambition for worldly honor and gain. What a price to pay for a closed mind and a chained soul! When will the eyes of humanity be opened to the worldwide swath that false ambition has mown down to misery throughout the centuries? Why do men imprison themselves in a keyless house of slavery?

Live your life fully. Be free. Why should what the distorted vision of the world counts gain hold you back?

Should wisdom of action give way to custom and mere form?

Should we fail to make the best of our inner lives because of what people will say?

Neighborhood of Your Advertising

By HERBERT KAUFMAN

Author of "Do Something! Be Something!"

CIRCULATION is a commodity which must be bought with the same common sense used in selecting potatoes, cloth and real estate. It can be measured and weighed—it is merchandise with a probable value. It varies just as much as the grocer's green stuff, the tailor's fabrics and the lots of the real estate man.

Your cook refuses to accept green and rotten tomatoes at the price of perfect ones. She does not calculate the number of vegetables that are delivered to her, but those that she can use. When your wife selects a piece of cloth she first makes sure that it will serve the purpose she has in view. When you buy a piece of property you consider the neighborhood as well as the ground. Just so when you buy advertising you must find out how much of the circulation you can use. You must judge the neighborhoods where your copy will be read, with the same thoughtfulness that you devoted to selecting the spot where your goods are sold.

A dealer in precious stones would be foolish to open up in a tenement district, and equally short-sighted, to tell about his jewelry in a newspaper largely distributed there. Out of a thousand men and women who might see what he had to say not ten of them could afford to buy his goods. These thousand readers would be mass without muscle. He could make them willing to do business with him, but their incomes wouldn't let them become customers.

One of the greatest mistakes in publicity is to drop your lines where the fish can't take your bait.

Circulation is, as you see, a very interesting subject, but very few people know anything about it. It would surprise you to know that this ignorance often extends to the business offices of newspapers. I have known publishers to continually mistake the class of their readers and have met hundreds of them who had the most fantastic ideas upon the figures of their circulation.

While I would not be so harsh as to accuse them of anything more than being mistaken, none the less their tendency to infect others with this misinformation renders it extremely advisable for you to become a member of the Missouri society—and "be shown."

WILLOW GROWERS WILL PROFIT BY GREAT WAR

Wayne county willow growers believe that they will profit by reason of the European war. Heretofore, large quantities of willows have been imported from Germany, France, England, Holland and Belgium. This year there will be no such importations, and as the imported stocks have been practically used up, the domestic willow will have to be used.

The crop looks good this year. The willow beetle which damaged the crop last year, has not been here this year. Last season many crops were not harvested because of the ravages of this pest. There is a very large willow acreage in Wayne county and particularly in this vicinity. The crop has been shipped to Onondaga county to be manufactured but this year buyers from other points have been interviewing the growers and there promises to be competition.

WILD ANIMALS FORM A SHOW OF INTEREST

The Torrington, Conn., Register says of the La Tena Shows which come here Thursday:

The circus consists of three rings and several sideshows. The exhibition of wild animals was of special merit. In fact, the circus features its wild animals. The performance of these animals was inside a large steel cage. Another feature of great interest was Captain Wesley's troupe of trained seals, which appeared for a year at the London Hippodrome. The most exciting act was that of Mlle. Eugenie's troupe of seven performing lions.

Other features were Walter Allen and the famous herd of Downie elephants. Herman Griggs and Olga Reid, equestrians; the Powel family of five wire artists, Captain Wilson and his riding tiger, Nemo. There were 28 acts in all. The circus has three bands and a calliope and eight tents. For a circus of its size it is of high quality and thoroughly enjoyable for old and young. The verdict of those who attended the performances was that it was superior in a great many ways to Wheeler Brothers' Circus, which was here last Saturday.

WHAT COLD STORAGE MEANS FOR LYONS

Storage for 25,000 barrels of apples has already been engaged in the Lyons Cold Storage. The capacity of the house as measured by apple barrels is 40,000. It is expected that a liberal amount of space will be engaged for celery this year.

DISCUSS SANDWICHES AND H. S. EDUCATION

Eureka Grange of Lyons met Saturday afternoon. The program was as follows: Discussions on "Different Ways to Make Sandwiches for the Lunch Box;" Resolved, that the farmer's boys and girls should have a High school education;" "How much land does it take to support one person." Several other topics such as picnics, etc., were up for discussion.

"Black's white bread" and Black's cookies have won a place here. They suit the taste. adv

WON RACE WITH A COUGAR

McGhie, Motorist, Tells a Thrilling Yarn of an Experience in Washington.

Everett, Wash.—The story of a race between an automobile and a big cougar is related by S. P. McGhie, who drove the car in the unusual sporting event a few days ago, while returning from Mount Rainier with a party consisting of Mr. and Mrs. S. J. Pritchard and Mr. and Mrs. C. H. Graves.

Soon after leaving the National Park Inn they saw the animal coming up the road. As they approached it stopped. The road at that point runs along a high ledge, precipitous on each side, and the animal had no other chance to escape than to run down the road.

Mr. McGhie took up the chase "stepping upon" his eight-cylinder car for probably half a mile. The animal saw that it was about to be overtaken, leaped to the roadside and crouching close to the rocks, snarled as the machine rushed on.

Forgot He Hid Money in Stove.

Landsdale, Pa.—Adolph Blattner, a gatekeeper on a railroad here, hid his savings in the stove in his shanty and forgot to remove them before he built a fire. The bills were partly burned, but can be redeemed.

Queen Mother.

"Isn't that perfectly ridiculous?" exclaimed Mrs. Binks. "That young Mrs. Upstarte who lives around the corner actually has the audacity to claim that she is of royal lineage!"

"Well," said the head of the house, stroking his gray mustache as he thought of bygone days, "she may not be so far wrong at that. I remember her mother when she was a girl, and, believe me, she was some queen."—St. Louis Post-Dispatch.

ROBERTS WORKS IN LAUNDRY

Former Mayor of Terre Haute Complained of Way Clothes Were Washed.

When Donn M. Roberts, ex-mayor of Terre Haute, Ind., convicted of election frauds, was brought to the federal penitentiary the officials tried to show him all possible leniency by putting him at clerical work.

Roberts' laundry was not done to suit him one day, and he went to the prison laundry to complain.

"Do you think it could be done any better?" the superintendent asked.

"I see no reason why it shouldn't," the ex-mayor replied. "I'd think anybody could do better work than this."

"Well, then, you're just the man we want. Get to work."

Ex-Mayor Roberts now washes prisoners' clothes.

ELEVEN CENT STAMP OUT.

Bears Head of Franklin and Is For Parcel Post Use.

The new eleven cent postage stamp has appeared. It bears the head of Franklin in profile, from Houdon's bust, and is printed in dark green ink. It is the same shape and size as the ordinary stamps, series of 1911.

The new stamp is issued primarily for use in prepaying postage on parcels and postage and insurance fee on insured parcels amounting to 11 cents.

The cost of radium has fallen again. If this keeps on radium will soon be within the reach of the poorest household.

If the sun doesn't shine every day it has a knack of making up for lost time with interest.

The purchaser of Belgium would better wait and deal with the last grabber.

RECIPROCITY AT HOME

MANY persons believe that the word "reciprocity" has merely a political significance.

But it means one of the greatest principles. All civilization is founded on it. Were it not for this great principle there would be no government, no society, no cities and towns. We would have merely anarchy.

IN PLAIN WORDS, "RECIPROCITY" MEANS THAT IF YOU EXPECT SOMEBODY TO DO SOMETHING FOR YOU, THEN YOU MUST DO SOMETHING IN RETURN.

Let us lay aside the political significance of the word and discuss this great principle as it applies to our own individual and communistic interests.

We have a prosperous community. We have a town which we are proud to call our own. We have various business establishments, good, well-kept stores, stocked with merchandise; we have various facilities for marketing the produce raised by the farmers who are a great and important part of our community.

Were it not for the farmers we would not have all of these facilities for doing business. It is possible that there would be no great necessity for a town of this size and importance.

On the other hand, were it not for the town the farmers would not be enabled to market their crops with such facility and their prosperity would be considerably curtailed.

Now here is where the reciprocity comes in and affects our local conditions and our prosperity.

THE STOREKEEPERS HELP THE FARMERS AND THE FARMERS HELP THE STOREKEEPERS.

Simplest thing in the world. Each does something for the other and both are benefited. The town is benefited and the agricultural district is benefited. We have good schools, churches, places of entertainment and our town is a general headquarters and meeting place for all interests. Every one of us has a certain place in the community and helps to make up a desirable place where we can have interchanges of ideas and commodities.

What if some great monopoly should swoop down and buy up everything the farmers raise, cattle and sheep and crops of all kinds, ship the whole lot direct to the city and thereby deprive our local merchants of the opportunity of handling the same; to utterly ignore the local interests?

Business would suffer. Many of our concerns would find it necessary to close up shop and go out of business. If this same policy were to be continued we would soon be without the necessity of having any town at all.

Of course, this is rather a far-fetched illustration, because there is no possibility of anything of the kind happening. BUT THERE IS DANGER FROM ANOTHER SOURCE.

What if the farmers should all send their money to the mail order houses instead of buying their goods from our local storekeepers?

Many of them do—too many of them.

IF THIS POLICY OF SENDING MONEY AWAY TO THE BIG CITIES INSTEAD OF BUYING FROM THE LOCAL MERCHANTS KEEPS UP AND CONTINUES, WE SHALL EXPERIENCE CONDITIONS WHICH WILL BE FAR FROM PROSPEROUS.

Reciprocity is what we need, right here at home. The storekeepers must deal fairly with the farmers and the farmers must deal fairly with the storekeepers, otherwise our system of business will be thrown out of its philosophical orbit.

Keep the money at home. Buy what you need from the local storekeepers. Don't help the big mail order houses to profit at the expense of our local merchants. Help the men who are helping to build up the community, helping to increase the value of your property by making a bigger and a better town where every facility for doing business is supplied for the benefit of the farmers—and the rest of us.

We must do for others if we expect others to do for us. We cannot evade the responsibilities of reciprocity, nor should we attempt to do so. Every dollar sent away to the big mail order houses restricts our opportunities for local advancement. EVERY DOLLAR SO DIVERTED FROM LOCAL TRADE MEANS SO MUCH TAKEN FROM OUR TAXES, WHICH GO TO SUPPORT THE COMMUNITY.

We can all do as well at home in the buying of goods as we can by sending our money to the mail order houses. We can do better, when we come to consider values and everything.

And reciprocity is the thing that builds up communities. THINK IT OVER THE NEXT TIME THERE'S SOMETHING TO BE BOUGHT.

THE BARD OF AVON

Now It Is Alleged That Shakespeare Was Illiterate.

COULD NOT WRITE, IT IS SAID.

An Expert in Such Things Claims That an Analysis of the Signatures Left by the Immortal William Strips Him of All Literary Credit.

The question of who did "write Shakespeare" does not concern William McConway, who has written a monograph on his Shakespeare theories, so much as "could William Shakespeare of Stratford-on-Avon write at all?" Mr. Conway is convinced that, whoever did write the plays, it was not the bard of Avon, so called. He bases his belief on evidence presented by certain existing signatures made by William Shakespeare and which seem to prove him to have been an illiterate man.

Mr. McConway admits that, though so evidently illiterate, Shakespeare possessed native ability, manifested by his money getting faculties, and adds the fact that as a theatrical manager Shakespeare secured to himself the plays that he did and thus stamped himself a competent man of business and a judge of public taste. But in regard to certain deficiencies exhibited by his signature Mr. McConway, after having made a study of the characteristics of signatures, says:

"Observations of the efforts and performances of illiterate men in the laborious production of signatures has led me to the conclusion that here was a man ashamed of his inability to write, made so by his associations and the rise in his condition of life, seeking to cover his intellectual nakedness with a garment provided by a sympathizing friend.

"The sympathizing friend in this instance floated into the imagination in the form of some scrivener who 'set the copy' so laboriously reproduced in the form of the signatures to the deed and mortgage of 1613 and to the will of 1616."

Mr. McConway refers to the original documents unearthed by Professor Wallace in 1910, and his theory is that the solicitor who drew up the papers of the mortgage and of the will is the man who made for Shakespeare a copy of his name, which the illiterate Shakespeare then followed in scrawling, uncertain imitation to make the signatures to the documents. This saved him from the humiliation of having to make "his X mark."

A second document put in evidence by Mr. McConway is a fragment relating to litigation in respect to certain money interests in the Globe theater. In this fragment appears, in two places, the name "Wilm, Shakespeare," written by the professional scrivener who prepared the case. Mr. McConway points out that Shakespeare's own signature appended is a laborious imitation, performed by a man who could not read his chirography when he had written it.

Mr. McConway is convinced that this scrivener is the man who made the copy which enabled "Wilm. Shakespeare" to execute legal papers without the humiliation of the "X mark." The rule of legal procedure required the evidence to be written out and signed by the witness before leaving the presence of the court.

"Special attention is called to this signature," says Mr. McConway, "as it is much abbreviated. The 'great dramatist,' who had at his command, as evidenced by his putative works, a wealth of words measuring five times the number gathered into the dictionary of the time, uses but a moiety of the characters which he had been taught to use as the ideograph to represent his name.

"We are told that he was instructed to appear later before the court for a further examination, but the record nowhere shows that he ever appeared, although the other witnesses appeared a second time. Would they be considered cynical who might surmise that the position in which Shakespeare of Stratford found himself when called upon to attach his signature to the record in open court was one of extreme embarrassment in that he could not without some exposure of ignorance use his 'copy' to guide his pen?"—New York Sun.

While other nations shoulder the cost and sacrifices of the big war Japan craftily gobbles up all that war tosses her way.

LIKE A MONEY TREE.

Simple and Profitable Scheme of a Kongo Trading Company.

The possibilities of a really enterprising trading company are realized at Kifiku, central Africa, where the Kongo Oriental company owns all stores, where money can be spent and fixes its own prices for ivory, rubber, labor and trade goods. "It was as if by planting a few francs in the ground money bearing trees had sprung into existence." The lucrative procedure is explained in James Barnes' "Through Central Africa."

"As soon as a native was paid cash for anything, either as an advance or for services rendered, he hastened hotfoot to the company's stores and bought anything from a harmonicon to a secondhand gold braided uniform, and as the profit in these articles ran from 100 to 250 per cent it can easily be seen where the money trees come in.

"The man who had brought in ivory was paid for it in cash at a rate that insured a profit of about 150 per cent, and immediately he repaired to the store, where he bought things he had no use for, giving another profit of cent per cent at least. The money was sent from the store to the company's offices, where the native was paid for carrying the ivory on the first stage of its long journey to the coast. The money received was the same that had been paid for the ivory in the first place, and the bearer would surely come back and spend his wages at the store again.

"It was a lovely system, and the only real chance for loss was the wear and tear on the money itself and the expense of bookkeeping. If the native demanded an extra price for ivory or labor there was very little trouble made over it—the extra cost was added to the articles in the store."

TOO HAUGHTY TO WORK.

English Servants Will Not Do What They Think Beneath Them.

The Lowells lived at 31 Lowndes square, having moved there from another house in the same square. Their establishment was not magnificent, but adequate, with a sufficient complement of servants. These servants were engaged for special posts in the "service," as is always the custom in England, and each was a stickler for his prerogatives and perquisites and quick to resent any demand that did not fall in the province of his sharply defined duties.

It so happened that in moving a carpet from the former house had been put down in the new one, leaving a few inches uncovered in a corner, which the furnishers had overlooked. As there was a dinner party at the embassy that night and Mrs. Lowell possessed a piece of the carpeting to cover the bare spot on the floor, she rang for one of the menservants and asked him if he would kindly tack it down for her. He drew himself up, distinctly offended in his pride.

"I beg your pardon, your excellency," he said, "but it is not my place to do that. I will ring for Alfred."

Alfred appeared, and his answer to the same request was:

"I beg pardon, your excellency, but it is not my place to lay carpets. I will call Charles."

And Charles came with the same answer. Mrs. Lowell called up, I think, every male servant in the house, but one and all stuck their noses in the air and looked with disdain upon the humiliating hammer and tacks. She then had them stand in a row while she herself proceeded to nail down the small corner of carpet and instantly dismissed them from her service.—Princess Lazarovich in Century.

Wood Pulp.

Observation of nature has often suggested ideas to business men. Many years ago James G. Blaine said to Dr. Hill that there was a rapidly diminishing supply of rags and cotton for papermaking. That set Dr. Hill thinking. One day he came into the office of a paper manufacturer holding a hornet's nest in his hand. "Why cannot you make paper like this?" he said. Dr. Hill's trained eye had seen that the hornet began making its nest by chewing up particles of wood into a fine pulp. That illustration led to the use of wood pulp for making paper.

Not an Expert in Ice.

"I'm so sorry the cream is sour," said young Mrs. Torkins.

"Everything in the refrigerator appears to be spoiled," commented her husband.

"It's the ice man's fault. He will bring around artificial ice, and I can't tell it from the genuine."—Washington Star.

Home Town Helps

UTILIZING THE VACANT LOTS

Matter of Importance in Which This Country Might Learn a Lesson Form Older Lands.

Some of the gayest, happiest pictures of family life to be found in Germany, and even as far north as Copenhagen, are of the evening gatherings of working men and women in the vacant lots, for families who live in apartments and tenements are allowed to have small gardens or playplots there. The actuating purpose behind this movement in Europe is the preservation of the home, and limitation of the poverty and disease due to alcoholism, but it is as powerful an influence in directing the recreation of the "grownups" into wholesome channels as are our schoolgardens in this country.

A New York paper recently computed the value of 191,742 pieces of vacant land in the city to be $644,437,185. It is being argued that the owners should contribute the use of this land for "temporary playgrounds for children and potato patches to help hold down the cost of living for the poor."

An enterprising department store in Los Angeles recently purchased a quarter-block of land for a new site, upon which it will build five years hence. The walls of adjoining buildings were painted artistically with mountain scenery and an announcement of the advantages of this site for the future business of the store. The ground was laid out as an inviting public recreation park for children and adults, to be used until building operations commenced. Such experiments would be possible and valuable in almost every city or town.

COUNTRY TOWN MUST STAY

City Centralization a Menace to the Most Vital Interests of the Country.

The pendulum of trade is swinging slowly but certainly toward the elimination of the country town in business systems of a not far distant day, according to the views of some serious-minded students of the times. Numerous retailers of the state foresaw changes coming years ago, and are beginning to predicate their beliefs on this town elimination on the now existing conduct of business in practically every town in the state, says a Lincoln (Neb.) correspondent of the St. Louis Globe-Democrat.

It is a problem that has caused many a country storekeeper to swallow a lump when he began to think about it. Economists have given it theoretical attention and the merchants have considered it in the light of practice. Both are arriving at some conclusions in the matter and both are pointing out remedies which they believe could be applied in such a way that the disease, if such it be, can be checked and the identity of the country town preserved.

If not the country town—what? Therein students of economy, besides business men, become a factor in the equation. That is just it. If not the town, what shall supplant it? That is the question which farmers have begun to study, too. It's all very much of a problem to which the thoughts of hundreds of Nebraska business men are being directed at this time. It is the guiding impulse in convention discussions and the topic wherever a few of them are gathered.

Rest Rose Bushes Now.

In the case of roses now more than one year planted, no water need be given until October, unless the soil is very light indeed. This will afford a much-needed rest. Do not be troubled if some leaves turn yellow and drop away, for no harm will result. Small and soft canes may have their bark shrivel. These should be cut away about October 1, all crossing canes tangled growths pruned out, the center of each bush left free and two-thirds of all other growth cut back. This leaves a few stubby, sturdy canes. Water well, and keep watered. When vigorous growth is started the plants will begin to hunger. Then fertilize, lightly at first, and in three or four weeks as heavily as you choose. The result will be roses of a high order.

Journalistic Feat By "T. P."

A brilliantly striking feat in journalism was recently performed by T. P. O'Connor, M. P. The best appreciation of Mr. Chamberlain, from the point of view of a personal observer, which appeared in the London newspapers, was that written by Mr. O'Connor for the Telegraph. A request for the article was sent to Mr. O'Connor just as the House of Commons was rising at 5 o'clock. Between 5:30 and 7:30 p. m. he had written the appreciation, which ran to between five thousand and six thousand words. This did not exhaust Mr. O'Connor's activities for the day, as he attended the dinner of the Associated Industrial Insurance Societies in the evening, and delivered a brilliant after-dinner speech.

"Tay Pay" is renewing his journalistic youth!

ESSENTIALS OF PITCHING.

First Comes Control, Then Knowledge of a Batter's Weakness.

"Control is the thing," say all the great pitchers, and all the great pitchers agree that a study of the batsman is next in importance. There are certain batters who can punish certain kinds of balls, while against a different style of pitching they are correspondingly weak. If a batter likes a fast ball at the waist line it becomes the duty of the wise pitcher never to give him a ball to his liking. Perhaps he is weak on a curve ball at the knee on the outside. The foxy pitcher makes a specialty of offering him that kind of delivery in abundance. In deciding what is best to pitch to the various batters a brainy catcher is of wonderful assistance.

Then, too, the pitcher must study situations. When he divines that a sacrifice is the play it is usually the best plan to keep the ball high. Such a ball is harder to meet squarely, while it is almost impossible to give it definite direction. On a low ball the skillful bunter can usually place it toward first or third, as is desired. For batters who have a tendency to pull away pitchers usually keep the ball on the outside, mostly depending on the curve. Seldom do batters who pull meet such balls squarely. As a rule they hit fast balls on the inside hard. The batter who hugs the plate closely and steps into the ball is bothered most by a fast ball on the inside, as it has a tendency to make him meet the ball on the handle, thereby losing most of the force he puts into the swing.

The pitcher must also take into consideration the position of his infield and must know who is covering the base on a throw, so that he may pitch to aid his infielders.—Billy Evans in St. Nicholas.

New York's First Ferry.

Cornelius Dircksen was the first official ferryman on the island of Manhattan. The mooring place on the Manhattan side was about where Water street crosses the present Peck slip. He started the system in 1637. Passengers who wanted to be rowed over blew a horn for the skipper if he chanced to be absent when they arrived. From Dircksen's skiff grew the ferry system of the city.

No Chance.

"Your digestive apparatus is all out of kilter," said the doctor after examining his patient. "The best advice I can give you is to discharge your cook and get a new one."

"It can't be done, Doc," answered the patient sadly. "I'm married to her."—Pittsburgh Dispatch.

She Was Ready.

Former Mistress — I would like to give you a good recommendation, Delia, but my conscience compels me to state that you never got the meals on time. I wonder how I can put that in a nice sort of way? Delia—Yes moight jist say that Oi got the meals the same way as Oi got me pay.—Puck.

Immortalized.

Brown—That's the cuckoo from a clock I used to have. I have the highest respect and admiration for it, because it is the only thing that ever dared to butt in while my wife was talking.—Boston Journal.

Too True.

You may break, you may shatter
A ten dollar bill,
And you'll find that the remnants
Won't cling to you still.
—[illegible]

TAXPAYERS' COMMITTEE

OATS CROP THIS YEAR IS HEAVY

College of Agriculture Reports Buckwheat and Certain Vegetables Ahead of Last Year---Potatoes Drop Back

Ithaca, Aug. 30.—The condition of corn in New York State fell off slightly during July, according to Federal crop estimates. The forecast for oats, however, shows a 5,000,000 bushel increase since the crop prediction of July 1, and promises more than 9,000,000 bushels more than the crop of last year. Considerable improvement is also shown in barley. Winter wheat promises an increase of 500,000 bushels since the forecast of July 1, and this ought to bring the production of the year that much greater than last year's production.

Presumably because of the excessive rainy weather the hay crop is about 300,000,000 tons less than last year, and the condition on August 1 was only 79 per cent. as compared with an average percentage of 82 for the past seven years.

Buckwheat is better than usual, and the total production will be nearly 200,000 bushels greater than in 1914. The apple crop is less than half that of last year, and 16 per cent. lower than the preceding ten-year average. While the peach crop this year will be more than three times greater than that of last year it promises to be less than was expected on July 1; pears have improved during the past month, and will slightly exceed the production of 1914.

Tomatoes, cabbage, and onions promise well; field beans will give an average crop; hops a little better than average; grapes considerably less than the past ten-year average; watermelons and cantaloupes slightly less; blackberries and raspberries a good deal more.

The predicted production of potatoes for the state on August 1 was approximately 38,000,000 bushels as compared with 36,000,000 predicted on July 1. This is, of course, far less than the over-production of last year when it was estimated more than 53,000,000 bushels were raised.

The August 1 forecast for potatoes promises the largest yield for the entire United States, 115.4 bushels per acre, and the greatest total production 430,000,000 bushels, on record since the beginning of the United States Government crop estimate in 1866. The average price received by producers for potatoes on August 1, 56.3 cents, is the lowest since the collection of these figures was begun in 1908. The next lowest, 64.9, was in 1910. The highest, $1.36, was in 1911. The average for the five years, 1910 to -914 was 88.7 cents.

In the estimated value of important farm products on July 15, hogs, beef, and veal show a slightly lower price per hundred pounds than in 1914; sheep and lambs are higher. The value of milch cows per head in New York State averages $65, as compared with $66 on the same date last year; the average price of horses, $173, or $2 more at the same time last year.

Apples, at 63 cents a bushel, brought 15 cents less per bushel on New York farms than they did at the same time last year. Cabbages brought 35 cents less per hundred pounds, and onions more than $1.50 less per bushel; tomatoes, on the other hand, brought nearly that much more. All farm crops had a higher estimated farm value on August 1 this year than last year except potatoes, which are bringing 50 cents less a bushel.

During 1914, 3,600,000 dozen eggs were shipped from Shanghai, China, to California, Oregon and Washington. Their value was more than half a million dollars, or about 15 cents a dozen. The freight from China to the Pacific coast ports cost about 1.6 cents a dozen, refrigeration cost about 3.2, and the transportation charge was approximately 5 cents a dozen, making the eggs cost 20 cents when landed in this country.

Vegetable canners thorughout the country this year contracted for a 4 per cent. greaaer acreage of sweet corn, 18 per cent. smaller acreage of peas, and 10 per cent. smaller acreage of tomatoes.

MANY HORSE DEALERS TO VISIT STATE FAIR

The public sale of horses to be held at the New York State Fair, Syracuse, N. Y., September 17 to 18, promises to be the most important distribution of horses in numbers and in point of quality ever held in the state. The commissioners are meeting with the hearty co-operation of eastern breeders and the horses to be offered will be of the best breeds and composed of picked animals, some of which represent an outlay of $2,000 to their owners.

The entry includes animals from twenty of thel argest stock farms in Connecticut and New York and fram as far south as Virginia. Among the principal consignments of Percherons will be stock from the Mohegan Farms; G. F. Gray; The David Harum Farm; M. Stewart; Charles Harper; S. D. Wicks; C. F. Jones and J. B. Rising; and of Belgians from the studs of James B. Hall, M. E. DeWitt and A. C. Hazel. T. W. Okie will send several prize winning Suffolk stallions and there is a fine entry of high-class draft pairs, grade and draft colts, coach stallions and light harness horses.

The opportunity offered to dealers and private purchaers of high bred stallions, draft and farm horses, which the State Fair Commission is able to give, is greater than any ordinary sale could offer, and will enable the purchaser to secure exceptional stock at practically his own price. The sale is proving by the entries to be the focus of many prominent breeders and the entire output of a number of farms will be offered for sale.

"The best seller," is the expression of merchants handling Black Baking Co.'s products. adv.

QUIRK THEATRE

OPENING FALL SEASON

NIGHTS—10c, 20c, 30c and 50c.

MASON-GAGE FORCES SECURE FULL CONTROL

(Continued from Page One)

petition, and did not explain how it happened that his signature also appeared on the Gage-Mason petition.

Whether or not Mr. Quirk intends to revoke his signature on the Gage-Bogue petition, as did Dr. Lee, could not be learned.

Just before Mr. Stevenson and Mr. Gage "mixed" Saturday, Mr. Stevenson denied emphatically that he had changed the petition upon which Mr. Quirk's name first appeared by substituting Mr. Gage's name after Mr. Quirk declined to serve, and also denied that he had misrepresented anything to Mr. Quirk. City Chamberlain George Washburn said he had called up every signer of the Quirk-Bogue petition and had asked them if they objected to the substitution of Mr. Gage's name for that of Mr. Quirk. In each case, he says, the signer said he was satisfied with the substitution.

It was rumored this morning that Mr. Stevenson's absence from the city has to do with the paving question, and some of his friends are inclined to think he has gone to Albany. Everything is in readiness here for the work, even to the apportionment of the costs to the property owners under the 38 feet plan, although the figures could not be procured this morning. Commissioner Wiltsie said today he had received no notice to the effect that tonight's meeting had been postponed and declared his intention of coming to the City Hall at the appointed time, unless he received official notice to the contrary. If the meeting is not held tonight it is understood that the board will meet some time tomorrow, probably at noon, although the first noon meeting was quite unsatisfactory.

When the proposal to widen the street to 38 feet was first mentioned Mr. Gage and Mr. Mason were opposed to it under any circumstances, but according to Mr. Quirk's statement this morning they have become reconciled to the idea, provided the board takes two feet from each side of the street and the sidewalks are laid along the curb. Some of the property owners objected to the plan to take four feet from the west side of the street for the reason that several large trees would be removed, but it is understood that they are willing to sacrifice the trees on the street line if the four feet is divided between both sides of the street.

The Stevenson-Gage fracas Saturday was the subject of universal discussion about the city Saturday night and yesterday, and seldom has any plan of the board or any public improvement created such interest and discussion. The consensus of opinion seems to be that the affair is little to either man's credit, and although there is little doubt that the plan to change the width of First st. occasioned it to some extent, political and personal differences of long standing played important parts in the matter. Neither Mayor Fox, City Attorney George M. Fanning, Almon Bristol, Mr. Bogue, Mr. Mason or the principals had any statement to make Saturday.

ROME HAS GAINS IN FIVE YEARS

Albany, Aug. 30.—The industrial activity which has characterized the city of Rome for several years past is evident in the increased population which the brass town shops by the recent enumeration. According to the official figures made public today by Francis M. Hugo, Secretary of State, Rome has had a growth of 3,371 during the last five years and now is a city of 23,868. Fifteen years ago Rome's population was 15,343, or 8,525 less than it is today.

The fact that Rome has a rather large alien population, 3,385, or about one-seventh of its total, is largely due to its manufacturing concerns. The largest alien population is housed in the First ward of the city, where out of 4,006 residents, 1,784 were enumerated as aliens.

The 1892 census shows Rome a city of 13,638 inhabitants, a matter of over 10,000 less than in 1915. During the eight years that followed that census the city had a slow growth, increasing its residents by 1,705. From 1900 to 1905 there was little improvement shown, the city increasing in size by but 1,219 persons. In the latter year Rome had 16,562 within its borders.

A different story is told by the 1910 enumeration. From 1905 the city forged ahead, adding 3,935 to its population in the five years and attaining a size of 20,497. While the last five years has not brought quite as many additions to this city, it is nevertheless one that is creditable.

The institutions of the city sheltered no less than 2,510 inmates when the census man called in June. Of that number 111 were aliens. The Rome Custodial Asylum contained 1,734; the institution for deaf mutes, 125; Oneida county home, 498, and the Rome county jail, 68.

NOT MUCH MONEY LEFT FOR THE CREDITORS

Referee in Bankruptcy A. S. Wright gave a hearing Saturday in the case of Thomas Hunter of this city, bankrupt. It was shown at the hearing that there remains but $2,532.55 to offset claims aggregating $1,000,000.

Attorney Giles S. Piper appeared at the hearing and proved a secured claim for $118.16. Louis W. Emerick, trustee, was allowed $90.68 as his commission, and John C. Henry was awarded $40 for fees as stenographer during the entire proceedings.

Attorney Claude E. Guile, attorney for Thustee L. W. Emerick, and Charles S. Spencer, attorney for the bankrupt, both told the court what they considered their services worth, but stated in view of the small balance they could not expect that amount. Judge Wright has made no decision as to the amount of their allowance and probably will not for several days, he stated.

K. OF C. PLANNING FOR CELEBRATING OCT. 12

St. Joseph's Council No. 254, K. of C., will work the first degree on a class of candidates in their rooms on Tuesday evening. The degree will be followed by a buffet luncheon, a smoker and social hour. At this meeting plans will be perfected for the proper observance of Columbus Day.

PALERMO.

Mr. and Mrs. Fred Trumble, Mr. and Mrs. Matthew Frawley, Mr. and Mrs. Lee Loomis of Palermo and Mr. and Mrs. Ray Vrooman of Central Square started Friday morning with their auto on a pleasure trip which will include Auburn, Rochester, Buffalo and Niagara Falls.

* * *

Mrs. Mary Vincent has returned from Sodus, where she has been camping with her son, W. Huntington, of Syracuse.

* * *

Mrs. Frank Dolbear of Syracuse is at Frank Jennings' helping to take care of her father, Willis Jennings, who has been confined to his bed for over three months.

* * *

Miss Kate Sullivan of Fulton is the guest of Miss Mazie Gorman.

Give The Evening Times a trial. It has all the news about all the people you know, and then some more.

The Parish Aid Societies of Zion Episcopal church will meet this evening at the home of Mrs. Pirch, 446 Utica st. at 8 o'clock.

* * *

Mrs. P. J. Buck of 211 Utica st. is in Syracuse. She will spend a few days with her mother, Mrs. Bernard Caffrey, and one sister, Mrs. M. A. Stewart.

* * *

Frank Gillette spent the week-end at Skaneateles.

* * *

Miss Alice Tucker had as Saturday and Sunday guests the Rev. and Mrs. W. L. Sawtelle of Troy, N. Y. Mr. Sawtelle preached in the Presbyterion Church on Sunday morning.

* * *

No services were held yesterday at the Congregational church on account of the absence of the pastor.

* * *

The Rev. B. J. Lehigh was greeted by many old-time friends yesterday. He came from Oswego to preach a sermon at 10:30 in the Baptist church.

* * *

Prof. J. R. Fairgrieve and family returned today from a month's outing at Mexico Point.

* * *

The Misses Schenck of Phoenix are the guests of local friends and relatives.

* * *

Mr. G. C. Warner of New York is in the city for a few days.

* * *

Miss Madge Allen has been the guest of friends at Ingall's Crossing.

* * *

Mr. and Mrs. W. J. Boomer have returned from an extended motor trip. They visited yesterday a gladiola farm of several acres at Berlin, N. Y., and brought home with them specimens of the gorgeous bloom.

* * *

The suffrage cartoonist will give a street talk and demonstration of her art tonight in the downtown section.

* * *

T. H. McCann of Texas City, one of Uncle Sam's boys who saw service on the Mexican border, is the guest of relatives in this city.

* * *

Mrs. James Stevens and Mrs. Arthur Mount of West 1st st., are visiting at Fulton camp, Oswego Beach.

* * *

Mr. and Mrs. F. A. Summerville left today for Binghamton where they will remain one week. Mrs. Summerville spent last week at Beach Oswego in camp with a number of friends.

* * *

Mr. H. Putnam Allen, who has been seriously ill, is gaining nicely.

* * *

City Chamberlain George Washburn is suffering from a severe cold, but is able to attend to his duties today.

* * *

Miss Isabella Diamond and Miss Mayme Frawley of West First st. spent Saturday in Syracuse, the guests of Miss Genevieve Joy of State st.

* * *

Mr. and Mrs. M. W. Buck, Ithaca, Mr. and Mrs. W. H. Conklin of Groton and Dr. F. H. Conklin of Oneida st. motored Saturday to Clayton and Alexandria Bay, where they spent the week-end, returning to their homes this morning.

* * *

Dr. Austin Lavine of Syracuse is the guest of relatives in Fulton for several weeks.

* * *

Andrew D. Carroll has returned to his home in Cleveland, Ohio, after spending his vacation with relatives in this city.

* * *

Saturday afternoon Mrs. A. Alderman of Schuyler st. entertained a number of friends who reside in Camillus, N. Y. The Camillus people, Mr. and Mrs. H. Raechelson and family, Mr. and Mrs. Wolf Share, Mr. and Mrs. Arthur Strauss remained in Fulton but will return to their homes Tuesday after visiting friends in Oswego.

* * *

Miss Lucile Alderman, of Syracuse is visiting her aunt, Mrs. I. Alderman, of First st.

* * *

Mrs. Frank Day of Sodus has been the guest of Mrs. R. Burt.

* * *

Miss Gladys Wybron has returned to her home in Waldrat st. after an extended visit with friends in Jamesville.

* * *

Mr. and Mrs. Floyd Cox and daughter, Dorothy, of West 2nd st., have returned to their home after spending a few days in Hannibal.

* * *

Mr. and Mrs. Otis Hessel of New Haven were the over-Sunday guests of Mrs. Louisa Bargey.

* * *

Mrs. Charles F. Jones of W. Broadway is recovering from a recent illness.

GAZED AT HIS HOST.

Trained on a Trellis.

The head of a big New York business concern is exceptionally tall, and his height is still further accentuated by his exceeding slimness. The other day a visitor from the south called to see him and was duly asked to sit down.

After they had concluded their business the visitor rose to go and his host, who had been sitting low down in his easy chair, rose also and seemed to rise and rise. The southerner, letting his glance travel upward, gazed at his host as though inspecting a new species of skyscraper and, with an expression of awed admiration, ejaculated:

"Great Scott, old man, your parents must have trained you on a trellis!"—Buffalo News.

She Knew.

Passing a swimming pool in a small city one day two country women read this sign at the entrance: "25,000 Gals. In and Out Every Hour." "That's all nonsense," said one of the women. "There ain't that many women in this whole county."

Select.

Once when passing through a cemetery in Lenox Elliot Gregory was surprised to see that the members of one old New England family had been buried in a circle, with their feet toward its center. He asked the reason for this arrangement, and a wit of that day, daughter of Mrs. Stowe, replied, "So that when they rise at the last day only members of their own family may face them!"

Rough on the Barber.

Teacher—What is a barbarian?

Pupil—A man who cuts hair, sir!—London Mail.

MISS ROGERS TO CARTOON CAUSE

Has Ability to Draw Comic Pictures and Crowds; To Work Tonight in Fulton Streets.

A fresh and original method of suffrage propaganda has just been begun by Miss Lou Rogers, a popular cartoonist of New York City. Miss Rogers will have street meetings in Fulton tonight, will be at the Minetto-Meriden plant tomorrow. Miss Rogers takes a large drawing board and easel to the appointed street corner, spreads large sheets of paper thereon and begins to talk about how cartoons are made. After an audience has collected, she turns her discourse to the suffrage issue, drawing swift sketches as she talks, to illustrate her arguments. She cartoons conditions and types of the west where women are enfranchised, with contrasting conditions and types of the east where they are now carrying on the struggle for the vote in four principal states, New York, Pennsylvania, New Jersey and Massachusetts.

Miss Rogers is gifted with an abundant sense of humor, a pleasing and piquant presence, and the gift of popular oratory. She is giving some time to speaking in this part of the state, accompanied by Mrs. Frances E. Brewer.

When the Woman's Appeal for Liberty was read in New York city, one of the six speakers chosen for the day from all the possible speakers of New York city was Mrs. Frances E. Brewer. She is assembly district leader of the woman suffrage party for Richmond borough, and has all of Staten Island under her directing eye. She made also one of the band of college women offering their silent protest in Judge Handy's Naturalization Court, New York city, June 8, 1915.

Mrs. Brewer is a graduate of Indiana University and vice-president of the Collegiate League of Equal Suffrage. She is a member of Mayor Mitchel's Market Commission. Evidently her work on the Market Commission has been a good demonstration for woman suffrage, since borough president Charles T. McCormack, a fellow member of the commission, was won over to suffrage while working with her. Just before his death he said to her: "Do you know, Mrs. Brewer, I am beginning to think more and more every day that you are right, and if the women want the vote they ought to have it."

Oswego county suffragists are very greatly pleased over the action of County Judge Henry D. Coville in appointing three women on the newly created Board of Child Welfare for the county. The three women selected, Mrs. R. A. Downey, Mrs. F. G. Whitney and Mrs. M. F. Willard, are specially well qualified for the work, and it is thought that they will show that women are not only qualified to vote but to hold office. Their appointment is quite a victory for the suffragists who persuaded the legislature to provide that at least two women should be appointed in every county, and who did a great deal to secure the passage of the law creating such boards.

BECKWITH TALKS UPON COLD STORAGE TONIGHT

Mr. Dwight S. Beckwith of Albion, N. Y., will talk on the operation of cold storage plants tonight in the City Hall at 8 p. m.

The meeting is held under the auspices of the agricultural division of the Chamber of Commerce and is open to the public. The fruit and vegetable growers and the grange have been invited to be present, and it is understood that the former will attend in a body.

A letter received from Mr. Beckwith this morning intimates that he may be able to bring with him Dr. Lattin, who has some apple orchards about six miles outside of Fulton. The Chamber of Commerce has extended a cordial invitation to all interested citizens to be present.

B. COE TURNER THINKS WELL OF THE IDEA

B. Coe Turner, well known in Progressive circles, is being urged to run for Member of the Assembly under the Bull Moose emblem. "We are going to see how the stage is set and then start our performance," Mr. Turner said today.

Bread as sweet as the "kind your mother used to bake," is the people's verdict applied to Black company's bread. adv

Digest No. 9 of Proposed Amendments to be Submitted

By Frederic T. Cardoze.

Albany, Aug. 30.—The proposed amendment to the Constitution suggested by the Committee on Relations to Indians, which proposition has been adopted by the Constitutional Convention, provides for the elimination of certain powers enjoyed by Indian tribes in this state which comparatively few people realize they possessed.

Under the present Constitution peacemakers' and surrogates' courts of the Indian tribes of this state are done away with.

These courts administered by full-blooded Indians had a powerful influence upon those who had occasion to resort to them. The decisions and rulings of these Indian tribunals were binding and of a far-reaching character. Divorces were granted in some of them so far as they affected the members of the Indian tribes or those residing upon the Indian reservations of the state were concerned.

Under the proposed amendment the courts of the state shall in future administer the laws and functions at present exercised by the peacemakers' and surrogates' courts of the state.

The exact wording of the proposed amendment bearing upon the subject which the people will vote upon this fall is:

"The peacemakers' courts of the Tonawanda nation, the peacemakers' courts and the surrogates' courts of the Seneca station and all other agencies of the Indian tribes and nations, insofar as they exercise judicial functions, are hereby abolishd, and their jurisdiction shall vest in the courts of the state. All actions and proceedings now pending in such courts and agencies of the Indian nations and tribes shall be transferred for determination to the proper courts of the state. Except as otherwise provided by the treaties of this state and the constitution, treaties and laws of the United States, all general laws of the state, now or hereafter in force, shall apply to all Indians within the state. The legislature shall provide for the preservation of the judicial records of the Indain tribes and nations."

In relation to the records of the peacemakers' and surrogates' courts of the Indian tribes harbored in this state, many interesting cases and decisions are obtainable. Many instances of equity and most judicious decisions made in both of these aboriginal courts of record have been noticed.

The proposed amendment is desired for the most part to make general in application, so as to effect the Indian and white man alike the prerogative vested in those who preside over the surrogate courts and the other court of record, known by the Indians as the peacemakers' court. It nevertheless takes away from the Indian tribes one of its oldest privileges.

The Constitution has been amended before and numerous legislative acts have been passed in relation to the right of the Indian to maintain their own courts of civil jurisdiction. For many years they have exercised the right to settle the difficulties over property and domestic disputes which have arisen from time to time among the members of the tribes empowered to dispose of these questions.

MERCERSBURG CLUB MAY BE FORMED HERE

It is possible the organization of a Mercersburg club in Fulton will be brought about within the next week or so. There are a number of young men in Fulton and vicinity who have graduated from the Pennsylvania institution, and this fall the school will enroll at least three more boys, graduates last year from Fulton High. The regular term of the Mercersburg Academy opens the 13th of next month, and several students who have been in town all summer are anxious to get every man to unite in forming an Alma Mater club before the school session commences.

The Mercersburg Academy seems to grow in popularity among the local high school graduates every year, a number of the boys desiring to enter the institution on account of the athletic facilities, of which there are many. Francis Murphy and George Ward are known to have made good in several branches of sport and are hearty in their praise of the institution, not only from the athletic point of view, but from the scholastic as well. Any man residing in Fulton or vicinity who claims Mercersburg as his Alma Mater is advised to communicate with either of the above mentioned young men if interested in joining the club.

GRANDSON OF MRS. SANFORD RISING YOUNG SINGER

Richard Ferris of Brooklyn, the 16-year-old grandson of Mrs. R. K. Sanford, who has been spending his vacation in this city, returned to his home today.

The young man possesees a voice of sympathy and sweetness at once appealing. During the past year he has been a student in music at New York University and has mastered a technique surprising in one so young. Yesterday morning he was heard in a solo at the Christian Science church. The organ accompaniment was played by Herman Randall, another rising young musician.

Mrs. Ferris, the young singer's mother, will be remembered by many in this city as having been a soloist of exceptional worth.

FRONT DORR LOCKED BROKEN; NOTHING GONE

What is believed to have been an attempt at robbery was discovered by James W. Bogue of South First st. Saturday night, who found the lock broken on his front door on his return from home late in the evening. A hasty inventory revealed nothing missing from Mr. Bogue's business establishment, and he is inclined to believe that the marauders were frightened away.

INDEMNITY WILL BE PAID INSURED PARCELS

Postmaster Peter M. Conley has received instructions relative to the indemnity of insured parcels. It is as follows:

Effective September 1, 1915, paragraph 2, section of 488 of the postal laws of regulations is amended to read:

2. Fourth-class mail shall not be registered, but may be insured against loss is an amendment equivalent to its actual value, but not to exceed $5 in anyone case, on payment of a fee of 3 cents; not to exceed $25 on payment of a fee of 5 cents; not to exceed $50 in payment of a fee of 10 cents, or not to exceed $100 on payment of a fee of 25 cents, in addition to the postage, both to be prepaid by stamps affixed; but indemnity will not be allowed in cases of loss of such mail addressed to the Philippine Islands, unless the loss occurred in the postal service of the United States.

The amendment provides the following indemnity will be paid for loss of insured parcels mailed on and after September 1, 1915:

Covered by a 3-cent fee, value up to $5.00.

Covered by a 5-cent fee, value up to $25.00.

Covered by a 10-cent fee, value up to $50.00.

Covered by a 25-cent fee, value up to $100.00.

FRED J. FRENCH OPENS NEW MARKET WEDNESDAY

For the third time in his business history, which means also his life, Fred J. French will once more open a meat market. This time the place he will occupy is at 61 West 1st st. and the opening day is set for Wednesday.

Mr. French will include in his stock, in addition to meats, a full line of canned goods and fresh vegetables, butter and eggs, and The Times bespeaks for him success.

FIFTY-TWO PRODUCERS MADE 3,495 SALES

Concerning the activity exhibited at the Auburn public market the Citizen of that city says of Saturday's doings:

Today's business at the Municipal Market was the heaviest since its founding, with 3,495 sales recorded. Transactions in poultry were brisk, sales in this line featuring the buying from the 52 farmers present. Poultry changed hands at 18 and 20 cents, New York dressed, while live fowls brought 14 and 15 cents in crates and 16 when sold separately. The bulk of the offering was sold separately.

Eggs were scarce at 24 and 26 cents per dozen. Butter sold quickly at 27 and 28 cents with a small supply. Tomatoes were plentiful and sold at five cents per quart and 50 and 60 cents per basket. The trading in this line was heavy.

Corn was all cleared up at 10, 12 and 15 cents per dozen. Berries were very scarce, only one farmer having a supply and this was small.

For the first time this year, turkeys were brought in to the market and were snapped up at 25 cents per pound.

All lines of vegetables had brisk sales, but changes in prices were few. Combed honey sold readily at 15 cents, while the strained brought 13 cents per pound. Celery sold at 25 and 30 cents a dozen bunches, cabbage at 40 and 50 cents a dozen heads, and pickles 20 and 25 cents a hundred and potatoes at 50 and 60 cents a bushel. Green and wax beans brought 60 and 75 cents a bushel.

The appearance of many purchasers from the Italian colony as well as many other foreigners in increasing numbers is giving Market Master Charles H. Miskell a gratified feeling. The sale of produce among the foreigners for the most part comprise live poultry.

The consistent advertiser wins in the end. It may cost a dollar to get a dollar, but the deal wins prestige.

INDEPENDENTS AGAIN TAKEN INTO CAMP

For the second time this season the Pulaski team took the measure of the Fulton Independents at Pulaski Saturday, winning by 10-5. In a game a month ago the Pulaski team won by a 7.4 score. George Snow pitched for Fulton for six innings when he was replaced by Painter. Some costly errors netted the Pulaski lads most of their tallies. McCullom played a good game at short for Fulton.

ELECTION BETS DON'T FAVOR COMMISSION PLAN

Many wagers are being made on the election September 17, at which time the citizens will decide whether or not they want commission government. A local newspaper man offered to bet $550 at two to one this morning that the commission plan would be defeated and said he knew a man willing to wager $1,000 to $500 that the proposal would be defeated by a vote of two to one against it.

LUCK OF AN ADMIRAL.

An Apparently Fool Order That Won Him Fresh Laurels.

Among the stories in J. B. Thornhill's "Adventures in Africa" is an amusing one that was told by Captain Ghoeur, the Belgian chef de zone of the Haut Luapula zone of Katanga. It followed a discussion on the way office boys rise to preferment while really good outside men make no headway:

"A young cadet in the Portuguese navy was given work at the admiralty office, where he remained, and, without ever having been on board ship, rose through influence to be captain and ultimately admiral. When the king and queen of Portugal went on a visit to Tangier he was charged with the duty of taking them there and hoisted his flag accordingly. The captain of the boat naturally went to him for orders as to which the office bred admiral was in a state of hopeless innocence. He parried questions and solved difficulties by telling the captain to act for himself. On arrival at Tangier the captain asked how many cables he should put out, and the admiral in a quandary answered:

"'All.'

"The order was obeyed, and the Portuguese boat became the laughing stock of foreign battleships as cable after cable was run out. That night a hurricane came on. An English cruiser slipped her cable and put to sea—and safety. The French, German and Italian vessels snapped their cables and were driven on the beach. The Portuguese vessel alone rode out the gale. The admiral was given decorations in recognition of his foresight, was promoted to naval commander in chief and was congratulated by every one.

"'What a head that man has!' was the universal comment."

Help Others.

No man can live happily who regards himself alone, who turns everything to his own advantage. Thou must live for another if thou wishest to live for thyself.—Seneca.

Off With the Old—On With the New.

In a Georgia town the darkies were out for their Saturday afternoon good time. A mulatto woman, whose somber dress and wealth of crape betokened recent bereavement, attended by a man on each side and two in the rear—all clamoring for the pleasure of taking her to the picture show—came down the street. A plainly clad auntie stepped out of a crowd, accusingly fronting her:

"Say, how's dis, Minnie? Mistah Saul skasely col' in 'is grave—an' you 'ceivin' de 'tensions o' gentermens!"

"Huh!" fired back Minnie with a toss of her head that swished her veil. "I ain't crazy 'bout no dead man!"—Saturday Evening Post.

D/34

WHY THE HOME PAPER ? ? ?

An advertisement writer says: "Have you ever asked yourself why you take your Home Paper, or why it is necessary to have a Home Paper?

HERE IS THE WHY

The big city daily comes to you and gives you the important news of the outside world, but you and the home are too small for a place in its columns.

About its only thought of you is the money it gets from you.

It deals in world matters and is of value to you because through it you obtain much of your knowledge of the greater affairs of life.

But it utterly ignores you and yours.

Hence the local paper, and likewise your reason for taking the local paper.

You cannot exist without a knowledge of the affairs of your home community.

You must know of the plans and of the work of the local authorities, and you must know of the doings of the churches, and of the community in general.

You cannot obtain this knowledge from the big city paper, but you can and do find it in the columns of the home paper.

You buy the big city daily because you must know of the progress of the world, for your mind is developing day by day and demands this greater fund of information.

But your mind craves even a more intimate knowledge of affairs that are vital to the interests of you and yours, and these things you find only in the home paper.

To the great city daily you are but as a single pebble upon the beach, a drifting sand of the desert.

But to the home paper you are one of us, an important factor in the community; a force with which to be reckoned.

A disrupted and disintegrating community means a shrinkage and loss in property values and a stagnant public mind. Hence the home paper has an ever watchful eye to the interests of the community and of yourself, for only in the preservation of the community and of yourself can the home paper hope for a continued existence.

The home paper is your friend and you know it.

And because you are loyal to your friends and to the community you believe in the home paper and its ceaseless work for home and home people.

Your interests and those of the home paper are identical, and you need it quite as much as it needs you.

And the man who recognizes the necessity for community of interests as demonstrated in

THE FULTON EVENING TIMES

Becomes a Builder and Not a Destroyer.

SPY ON HUSBAND

Mrs. Emil Braun Becomes Suspicious and Does Some Detective Work.

MOVES ARE A MYSTERY

Fondness for Night Journeys, Views of American Forts and His Skill at Penning Code Letters, Had Military Significance.

Lakewood, N. J.—Emil Braun, the mysterious German, recently located here, has disappeared. His American bride of a few months, mystified and baffled by his peculiar habits, played the detective, and as a result of her efforts has turned over to the authorities a paper, found among Braun's possession, setting forth the fact that one, Helmuth Emil Max Schmidt, is wanted by German authorities on a charge of fraudulent bankruptcy. Incidentally the bride discovered that the handsome silverware, jewelry and linens of the Emil Braun she had married were all elaborately marked with the initials "H. S."

When Emil Braun first appeared in Lakewood he was accompanied by three women, his wife, his sister and his daughter, the latter large and mature for her years. To the real estate agent, Braun explained that he was moving to America because he was tired of Germany and thought a small chicken farm in New Jersey would be much to his liking. Six months later, one of the women comprising the Braun household went away. To those who inquired Braun explained that his wife had returned to Germany. In July, 1914, he added the further information that she had died in a hospital.

Interested in Military Affairs.

Prior to this announcement, however, Braun appeared to take much more interest in military affairs than he did in New Jersey chickens. He developed an interest in the fortifications immediately adjacent to New York and he especially longed to make a visit to Sandy Hook. His wish was granted. Braun wanted to go inside the fort but when the right was refused, he first persisted, and then made no effort to conceal his disappointment.

Immediately after the European war broke out, Braun's interest in chicken raising suddenly ceased. About this time the second member of his household went away, leaving only the daughter. Braun advertised for a wife, and a New York stenographer answered. The two met shortly before the holidays and were married on December 30, 1914.

She Unearthed Several Old Photographic Plates.

Within a few weeks Braun's mysterious disappearance, coupled with his unsatisfactory explanations of the markings of the family silver, and the vast quantities of clocks, Russian tea sets and other valuables with which his home was furnished, decided Mrs. Braun to make an investigation.

In a closet, among some packages, she unearthed several old photographic plates, one of which she carried to New York in the lining of her hat and had a print made from it. It was that of a jewelry store with the name "Helmuth Schmidt" over the door. She also found a picture of Emil Braun, taken in Berlin at a time when he wore a beard, and a picture of his daughter, Gertrude, on the reverse side of which was written "Gertrude Schmidt."

Code Letters From Germany.

A short time ago Braun received a code letter from Germany, stating that a brother had been decorated with the Iron Cross. Soon afterward he took his daughter with him, ostensibly to make a payment on his chicken farm.

Braun is described as an accomplished linguist, a man of education who has seen military service, and who has taken marked interest in American roadways and fortifications. He writes letters in a secret code with the ease and rapidity of a stenographer. His code is practically undecipherable in that each character represents a word.

The Doctor Made Sure at Least That He Would Not Be Bled.

Sir Charles Locock, who was the physician attending Queen Victoria at a certain period of her reign, was once commanded by her majesty to proceed to Berlin and report on the condition of her daughter, the crown princess. On the return trip, stopping at Dover for a hasty luncheon, he was enabled to snatch a glass of poor sherry and a piece of questionable pork pie.

After the train had pulled out and Sir Charles had been locked in his compartment he began to feel drowsy and

MADE HIS WAY THROUGH THE STATION.

to fear that faintness was overtaking him. Immediately he thought to himself:

"They will find me in a faint on the floor and bleed me for a fit, and I need all my blood to digest this pork pie."

Thereupon he hurriedly drew out his pencil, wrote on a blank page that he tore from a book and stuck the sheet in the band of his hat. Then he resigned himself to the deep sleep that came upon him. He did not wake until the train had pulled into the London station, and, still dazed by his slumber, scrambled out of the train and made his way through the station amid the stares and titters of the throng, reached the street, jumped into a carriage and was driven home.

The grins of the servants and the exclamation of his wife were followed by the inquiry from one of the children, "Oh, papa, what have you got in your hat?"

Then he remembered his experience on the train. Taking off his hat, he removed the large white paper on which he had scribbled this petition to the general public:

"Don't bleed me. It's only a fit of indigestion from eating some confounded pork pie!"

Suffering.

Man is an apprentice, pain is his master, and none knows himself so long as he has not suffered.—Alfred de Musset.

One of Sheridan's Retorts.

Sheridan was one day annoyed by a fellow member of the house of commons, who kept crying out, "Hear, hear!" During the debate he took occasion to describe a political opponent. "Where," he exclaimed, with great emphasis, "where shall we find a more foolish knave or a more knavish fool than he?" "Hear, hear!" shouted the troublesome member. Sheridan turned round and, thanking him for the prompt information, sat down amid a roar of laughter.

Correct Time in Egypt.

The working of the oriental mind was delightfully illustrated in a story which Professor Turner told. He had been spending the Christmas vacation in Egypt to supervise the erection of a telescope at Helouan. Captain Lyons, who was in charge of the instrument, said that he had found that at noon every day a gun was fired and was anxious to know how the system worked. Accordingly he interviewed the gunner and asked how he knew when to fire the signal. "Oh, I look at my watch," said the official. "And how do you correct your watch?" asked the captain. "I take it to the maker in Cairo, and he tells me the error." Forthwith Captain Lyons interviewed the watchmaker and asked him how he checked the error of the watch. "I get the correct time from the gun," said that simple craftsman. And thus time was told in Egypt.—London Standard.

Not on His Visiting List.

In his book of memories, "Sixty Years In the Wilderness," Sir Henry Lucy, the English parliamentary writer, has a story about Sir Francis Burnand, the celebrated Punch writer.

Sir Henry and Sir Francis were talking together at a big public function when a very important looking guest, arrayed in a brilliant uniform, came up and effusively shook hands with Burnand, who appeared surprised at the act.

"I see you don't know me from Adam," said the stranger.

"My dear sir," answered Burnand gravely, "I didn't know Adam."

SPORT OF THE WAR

Soldier That Does the Work Is Prince of Artillery.

"ARCHIBALD" IS A TERROR.

Allies Give Nickname to Their Busy Anti-air Craft Gun, Which Is Removed From Place to Place In a Private Car—Aeroplanes Can Withstand Much Shell Fire.

A crack and a whish through the air. No sound is more familiar at the front where the artillery is never silent—the sound of a shell breaking from a gun muzzle and its shrill flight toward the German line to pay them back for some shell they have sent, writes a correspondent from the British headquarters in France.

Only this which did not pass out over the landscape in a long parabola on toward the German lines. It went right up into the heavens at about the angle of a skyrocket, for it was Archibald who was on the job.

Six or seven thousand feet over the British trenches there was something as big as your hand against the light blue of the summer sky. This was the target—a German aeroplane.

Wings of Intelligence.

Other features of life at the front may grow commonplace, but never the work of the planes—these wings of the army's intelligence. If they might fly as low as they pleased they might know all that was going on over the lines. They must keep up so high that through the aviator's glasses a man on the road is the size of a pinhead.

Archibald, the anti-air craft gun, sets the dead line. He watches over it as a cat watches a mouse. The trick of sneaking up under the cover of a noonday cloud and all the other man bird tricks he knows.

A couple of seconds after that crack a tiny puff of smoke breaks about a hundred yards behind the taube. The smoking brass shell case is out of Archibald's steel throat and another shell case with its charge slipped in its place and started on its way before the first puff breaks.

Archibald rushes the fighting. It is the business of the taube to sidestep. The aviator cannot hit back except through its allies, the German batteries, on the earth. But all that the aviator can see is mottled landscape. From his side Archibald flies no goal flags.

Archibald's propensities are entirely peripatetic. He is the vagabond of the army lines. Locate him—and he is gone. He is the only gun which keeps regular hours like a Christian gentleman. All the others fire at any hour night or day. Aeroplanes do not go up at night, and when no aeroplanes are up Archibald has no interest in the war.

Why he was named Archibald nobody knows. As his full name is Archibald, the Archer, possibly it comes from some association with the idea of archery.

Has His Private Car.

Archibald, who is quite the swellest thing in the army, has his own private car built especially for him. While the cavalry horses back of the lines grow sleek from inaction, the aeroplanes have taken their places. All the romances and risk of scouting are theirs.

Such of the cavalry's former part as the planes do not play Archibald plays. He keeps off the enemy's scouts. Do you seek team work spirit of corps and smartness in this theater of France where all the old glamor of war is lacking? You will find it in the attendants of Archibald.

The sport of war is not dead for Archibald. Here you see your target, which is so rare these days when British infantrymen have stormed and taken trenches without ever seeing a German, and the target is a bird—a man bird. Puffs of smoke with bursting hearts of death are clustered around the Taube. They hang where they broke in the still air. One follows another in quick succession—for more than one Archibald is firing—before your entranced eyes.

It is amazing how much shell fire an aeroplane can stand. Aviators are accustomed to the whizz of shell fragments and bullets and to have their planes punctured and ripped. Though their engines are put out of commission and frequently though wounded, they are able to volplane back to the cover of their own lines.

Drawing the Line.

Mrs. de Fashion—My dear, I have picked out a husband for you. Miss de Fashion—Very well, but I want to say right now, mother, that when it comes to buying the wedding dress I am going to select the materials myself, so there!—New York Weekly.

There Are Lots of Them.

Hokus—Old Gotrox is devoted to music. There is a clause in his will leaving $25,000 to establish a home for poor singers. Pokus — How inadequate! Twenty-five millions wouldn't begin to house all the poor singers.—Life.

Good Reason.

"So you have written a book on cemented basements. But why did you choose such a subject?"

"Because I wanted it to be among the best cellars."—Baltimore American.

Woman's World

A Titled Beauty Who Also Is Interested In Charities and the War.

THE COUNTESS OF WARWICK.

The Countess of Warwick, famous though she is for her beauty, has achieved quite as much distinction on account of her various and well directed charities, upon which subject she is as reticent as she is liberal. Two of the objects upon which her philanthropic energies are expended have assumed such proportions as to be beyond the power of concealment. These are the Easton School of Needlework and the Essex Needlework guild, both excellent organizations to aid the poor of England. The countess recently caused much talk by her criticisms of the social "butterflies" who make a pretense of nursing wounded soldiers—in reality posing and hindering the war work.

The countess is an optimist, as witness what she said in an interview not so very long ago.

"The best time of life is always after the age of thirty. Better than that is after forty. The very best time of life is fifty-three, which is my age. I just now am having the best time I ever had. At eighteen I was a pessimist. Now I know better. And because of what I've learned—by putting my experiences, my knowledge, to the best uses—I, like all women of my age, know better how to enjoy the days that are given to me."

This is what she thinks about the ballot for women: "The ballot in itself means nothing. What prompts the fight for the ballot in England and America is a fight for sex independence, a fight women are making—and which eventually they will win—because woman, given economic independence plus the ballot, will then be started on the road toward her right to exact a recognition of the fact that she is entitled to exercise her God given impulses quite as much as a man is."

The responsibility of the United States in the present war in Europe she voices thus:

"It seems to me that the greatest republic of the world has a serious duty, a grave responsibility. It has thriven on a gigantic scale without patronage or privileged classes, without titles, without such honors as are merely honors in name. Freed by the Atlantic from the domination of Europe, it has grown in power and given its citizens a life removed from the worst anxieties that beset the continent. It knows what kingship and unlimited power have cost Europe, and it embraces within its wide domain the children of every European nation, who dwell side by side in peace and amity. The freedom enjoyed by the republic would not be bartered for the wealth of the world, for that freedom is the secret of its eternal youth, its boundless energy, its untrammeled progress."

FURNITURE COVERS.

It is especially necessary to have looseness in a slip cover. There must be plenty of "give" to it. Otherwise when one sits on it it is apt to burst open, which would be most disconcerting, particularly if it happened to be some one else's chair.

The strip which runs from the extreme top of the chair back down to the seat, across the seat and on down to the required length, should be cut lengthwise of the goods without piecing.

Before cutting it should be tucked well into the crease between the seat and the back. The narrow fronts of the arms are cut separately.

The arm's inner side is cut lengthwise and extends over the roll, under which another seam occurs. The outside of the arm is cut in one with the side of the seat.

The rear side of the chair back is cut in two lengthwise pieces, with the opening up the middle. The back's "thickness" will also need a small piece, extending to the arm.

The fasteners are balls and sockets, or buttons and buttonholes, or, in some instances, little bows. The balls and sockets are used for the back openings or for little tabs when seam openings are used.

HOPE FOR AGREEMENT.

United Mine Workers Not Preparing For a Strike Next Spring.

President John P. White of the United Mine Workers of America recently gave out a statement in which he declared that the miners of the anthracite fields were not preparing for a strike at the expiration of the present agreement. His statement follows:

Articles appearing in certain newspapers during the last few days, for the most part published a great distance from the anthracite industry, containing the information that the anthracite mine workers are making huge preparations for a big strike at the expiration of the present agreement, March 21, 1916, are absolutely unfounded.

The campaign now being conducted in the anthracite region is for the sole purpose of uniting the men of the mines as members of the United Mine Workers of America. When the anthracite miners have perfected their organization I am of the belief that the union will be sufficiently strong and efficient to command the respect and recognition it deserves.

I have every reason to feel assured that the operators, like the miners, want to be fair, and consequently I am at a loss to understand why the attempt in some quarters is being made to misrepresent the real purpose of our present membership campaign.

The international officials nor district officials have formulated any plans that contemplate a strike at the expiration of the agreement. We are, on the other hand, hopeful that we will enjoy the opportunity to meet the operators in conference and reach a fair agreement, embracing needed reforms and betterments that we feel quite confident the general condition of the industry will permit. The public should not become alarmed at the stories of a strike nature, for the mission of the United Mine Workers is one of peace, and I predict that such will be the outcome of our negotiations when we meet the operators.

WEAVERS GET RAISE.

Seven Thousand Carpet Workers Receive a 10 Per Cent Boost.

The 7,000 employees in the mills of the Alexander Smith & Sons Carpet company at Yonkers, N. Y., were agreeably surprised when they received their pay envelopes on July 29 to find in them slips announcing a 10 per cent increase in wages. The increase aggregates $8,000 a week and brings the company's weekly payroll up to about $90,000. The mills have been running only four days a week for some time, but it is expected that full time operation will soon be resumed.

The increase is said to have been ordered by Alexander Smith Cochran, well known in yachting circles, who is the controlling director. He has been participating more actively in the affairs of the company of late. The increase restores a wage scale which existed up to two years ago, when it was announced that general business conditions necessitated a cut.

Part time operation of the mills had been caused to some extent by inability to get enough dyestuffs after the foreign supply was shut off by the war. This situation has been largely remedied.

Du Pont Increases Wages.

Employees of the Brandywine (Del.) shops of the Du Pont Powder company were notified that from Aug. 1 eight hours would constitute a day's work and that the workmen would receive ten hours' pay for the shorter day. Eleven hundred men were affected by the new order. They include every class of workman, from the skilled mechanic to the laborers. The eight hour day was granted voluntarily and without any request from the workmen. At the Brandywine shops machinery and equipment for the company's powder plants are manufactured.

Copper Men Get Bonus.

The Wolverene and Mohawk Copper Mining companies, Calumet, Mich., in paying their 1,200 employees on July 31 included an extra check for 5 per cent of the total wages of June as a bonus because of the high price at which copper is selling. It came as a surprise to the men. It was unofficially announced that the two companies might continue to pay the same bonus every month while copper remains at 20 cents a pound or better. It was said that several other mining companies will follow this example.

More Pay For Rural Teachers.

The Wisconsin state legislature has passed a bill increasing wages of rural schoolteachers $5 to $25 a month, according to qualifications and terms of service. There are about 7,000 rural teachers in the state.

OF INTEREST TO LABOR.

Trade unionism is the one protection in which the workers can put their trust.

The Danbury hatters have been served with foreclosure writs on their property.

Trade unionism has been the great revolutionizing force for industrial betterment and progress.

More than 200,000 machinists have received the eight hour day with advanced or no reduction of wages.

Conditions in the labor market for the month of July, as viewed from the City of New York public employment bureau, are encouraging, especially in the large number of orders for skilled help.

Easy & Practical Home Dress Making Lessons

Prepared Especially For This Newspaper by Pictorial Review

IN AFRICAN BROWN VOILE.

A costume for the college girl, developed in African brown poplin and featuring an overblouse effect on the front of the waist.

Among the irresistible frocks for the younger set is this costume in African brown voile, with a four-piece skirt attached to a waist which has an overblouse effect in front and closes at the left side. The back extends over the shoulders, forming a yoke effect in front in pointed outline.

The home dressmaker will not find it difficult to construct the frock. Taking the waist first, the front edge of the under-front is turned under on slot perforations for an underfacing. Next, stitch one strap on right outer-front, edge of strap having double "oo" perforations along the left side edge, shoulder edges even; stitch remaining strap to position, edge having double "oo" perforation along line of single small "o" perforations in right front, shoulder edges even. Leave the straps free below single small "o" perforations to pass belt through. If desired omit straps and underface the edge of front about two inches back. Arrange the outer-front on the under-front, center-fronts and corresponding edges even. The large "O" perforations indicate center-front. Close under-arm seam as notched; lap the extension of back, on the front matching notches, single large and double "oo" perforations and stitch, or cut off extension on small "o" perforations and close seam as notched. Gather lower edge of waist between double "TT" perforations. Sew stay to lower edge of waist, center-backs even, small "o" perforation at underarm seam and bring front edge to center-front. Face collar sections, join and sew to neck edge as notched. Large "O" perforation in collar indicates center-front.

Next close the sleeve seam and gather the lower edge. Join the cuff and turn-over as notched, then sew to lower edge of sleeve as notched, small "o" perforation in cuff at sleeve seam; bring edges of cuff together and tack. Sew sleeve in armhole as notched, easing in any fullness.

Stitch the skirt strap to position on the right front gore, corresponding edges even (small "o" perforation in skirt strap indicates upper front edge), or omit strap and underface the front edge. Lap right-front gore on left to double "oo" perforations and stitch, leaving edges free above single large "O" perforation in right-front gore for placket. Join gores as notched, close center-back seam. Gather between double "TT" perforations. Sew to lower edge of waist over stay, center-fronts and center-backs even (large "O" perforations in right front gore indicate center-front) and bring side seam to under-arm seam. Adjust belt as illustrated on reverse side of envelope and close underneath the left strap. A sharp bit of contrast may be gained by using buttons of black or red silk.

Pictorial Review Costume No. 6357. Sizes 14, 16, 18 and 20 years. Price, 15 cents.

Economy Hints

A penny saved is a penny earned.—Benjamin Franklin.

DID you ever stop to think that good care of the toothbrush is almost as essential as good care of the teeth? Yet how few persons really take the proper care of either! Nothing spoils a pretty face so quickly as bad teeth, and the girl who has any regard for her appearance will watch both her brush and her teeth.

It never pays to invest in a cheap toothbrush. In the first place a bad set of bristles leave their work half done. They have not the necessary stiffness and resistance to clean the teeth well. Then the bristles in a cheap brush are not well fastened and are apt to fall out. This makes a cheap toothbrush a real menace, for if the bristles come loose in the mouth they are apt to slip down the throat, catch there and decay, or they may pierce through the walls of the digestive tract.

Buy a good brush and then take care of it. Before you use a brush for the first time soak it in a weak solution of bicarbonate of soda for two hours. This not only serves to disinfect it from shop handling, but it sets the bristles so that they will not fall out so readily.

It is better not to use a toothbrush for a longer period than three weeks at a time, and it is wiser to keep two brushes going at once. In this way one can be drying out and airing while the other is in use. Be sure that the brush is well rinsed and thoroughly clean of all tooth paste or dirt before hanging it up to dry. Once a week let it boil in clear hot water for about five minutes to kill any germs which may be lingering in the bristles and to disinfect it well.

The teeth should be brushed after each meal, before retiring and upon arising in the morning. The nightly cleansing, so often neglected, is in reality the most important of all. It is essential to brush the teeth both inside and out before retiring, so that the food particles will not stay in the crevices and decay overnight. Once a day or twice at the most is often enough to use tooth paste or powder. At other times wash the teeth with clear water.

Very often after a long illness it will be found that the teeth have begun to decay. This is usually laid down to the nature of the illness. In reality it is more often due to neglect of the teeth than to the ailment itself. During illness the teeth should be cleaned often, especially as they cannot be attended to by a dentist.

The best mouth wash, one which will help to harden the gums and will keep away tartar, can be made by dissolving a teaspoonful of bicarbonate of soda (ordinary baking soda) in a pint of water. Bottle this and keep it on hand for use. It is quite as good a cleanser as peroxide, and it is not so hard on the teeth. The peroxide is said to wear the enamel away.

The Care of Foodstuffs.

As soon as meat or fish arrives from the market it should be examined in the folds and crevices to make sure there are no eggs left by intruding flies. A wire safe in the cellar is the best place to hang meat. In mutton or in lamb the marrow or soft, fatty substance should be taken from the backbone, as also the thin membrane which appears under steaks and chops, as these decay quickly and, therefore, are liable to taint the whole piece. Never leave meat in paper, but put at once on a clean plate if it is not hung.

Fish should not be laid directly on artificial ice, as the ammonia used is apt to combine with the fish and cause ptomaine poisoning. Do not cover meat or fish tightly before being cooked and never cover cooked food such as soups, meats and vegetables while still hot. Let them cool as rapidly as possible, then cover. Bacons and hams may be kept in any cool place where there is plenty of cold air in circulation about them to prevent mildew. They are best hung, protected by bags of cloth or paper.

Fruits should be kept in a cool, dark place and separated as much as possible. Berries should be poured on large plates or platters and spread out. If the watermelon is too large for the ice chest cover with a wet piece of sacking and place where the wind will blow over it. The evaporation will make it delightfully cold. Lemons are best kept by wrapping in tissue paper and hanging in an openwork bag in a cool place. A bag made of netted white string is admirable for this purpose and can be washed when necessary.

The Silkworm.

The silkworm is three inches long and is well provided with legs, having no less than sixteen of them.

MONT PELEE AS IT IS TODAY.

Its Appearance Thirteen Years After Its Fearful Eruption.

Since its outbursts in 1902-3 Mont Pelee has simmered down to a commonplace volcano, and now vegetation has re-established itself to the summit of the mountain, and even the forest is beginning to reassert itself. The whole aspect of this side of the volcano is verdant and peaceful and gives no indication of the devastation of thirteen years ago. Even the rocks of the new cone are more or less thickly coated with moss, while the sides and top of the old cone are covered with grass, ferns and bushes in addition to the moss and lichens.

On the summit plateau are found an abundance of red raspberry bushes bearing flowers and green and ripe fruit. Sugar plantations on the west side of Mont Pelee have been reinstated as far as the Roxelane river, within the border of the original zone of annihilation, while the ruined city of St. Pierre now contains about thirty new buildings of durable construction and a resident population of between 200 and 300 people.

The zones stretching down the southwest side of the volcano lying between the Seche and Blanche rivers, which was the route traversed by hundreds or perhaps thousands of destructive eruption clouds, still lie drear and desolate, because the soil was completely swept away by the blasts, and the material left behind as well as that added by the eruption is too porous for the retention of the water necessary to restore it to fertility.—Argonaut.

Bernhardt's Wish.

Mme. Sarah Bernhardt, whose leg was recently amputated, is cured. To see her walk one could doubt that she had been maimed, thanks to the miracles of surgery and mechanics. She is much more courageous than heretofore. She looks at her articulated leg and smiles. "It pleases me," she says, "and it would please me entirely if it should be celebrated by two of my best friends—one a poet and the other a painter. I wish that the adorable Edmond Rostand would celebrate it in a little poem and that my faithful Clairin would make it the subject of a beautiful drawing." Rostand and Clairin have been apprised of the wish of the grand tragedienne and it is said that they will not delay to respond to it.—Cri de Paris.

An Expert on Volcanoes.

Frank Alvord Perret, whose knowledge of volcanoes is probably unique in the world, is an American, a native of Hartford, Conn. After volcanic outbursts he has been able to accurately forecast their conduct for some time to come, and in this way his labors have been of inestimable value to residents of volcanic districts. He has visited and studied practically every volcano of note in the world. He was the first to reach Messina after the devastating earthquake of 1908. In 1904 he took up volcanology and became honorary assistant to Professor Matteucci in the Royal observatory, Mount Vesuvius, and was later decorated Knight of the Italian Crown.

Our Agricultural Possibilities.

With improvements which are steadily being made in American agriculture under the stimulus of a number of helpful agencies, including the department of agriculture and the land grant colleges, the chances for successful competition from abroad will become smaller and smaller. We must remember that not over 45 per cent of our arable land is yet under cultivation and that not more than 12 per cent of that is yielding full returns.—David F. Houston in American Review of Reviews.

Wishbones and a Wedding.

During the twenty-five years of wedded life of Mr. and Mrs. Grossenbach of St. Louis they used 800 chickens and turkeys, and at their silver wedding recently the 800 wishbones which had been accumulated were dipped in silver and strung about the dining room on silver hued ribbons.

Stars In the Flag.

There were thirteen stars in the United States flag at the time of the revolution, fifteen in the war of 1812, twenty-nine during the Mexican war, thirty-five at the time of the civil war and forty-five in the Spanish-American war. Now there are forty-eight.

PRACTICAL HEALTH HINT.

Loss of Weight.

One of the early symptoms of tuberculosis is a loss of weight. Any decided decreases should be watched with suspicion. It often means that the general bodily functions are not all that they should be. It is certain, under any circumstances, to indicate that one's physical resistance is being lowered, and this in itself opens the way to unusual chances of disease.

If this loss in weight is accompanied by loss of appetite, night sweats or a persistent cough or cold a physician should be consulted and nourishing food, plenty of rest and long hours of sleep in the fresh air should be resorted to in an effort to build up the body.

People will neglect themselves for months when decreasing weight should warn them as surely as the falling barometer denotes a coming storm that their physical well being is in jeopardy.

TODAY'S FASHION NOTE

A frock of blue silk poplin trimmed with bands of black velvet is shown here, made in Empire style. It is a simple matter to gain a longer waist effect, however, by adding another belt in the dual girdle fashion now so popular. The frock is an exceptionally good design for the girl of "awkward age," and requires but 3 3-8 yards of 54-inch material to develop.

Pictorial Review Costume No. 6182. Sizes, 14 to 20 years. Price, 15 cents.

Pictorial Review Patterns may be procured at the M. Katz & Co. Department Store, Fulton.

The Kitchen Cupboard

THE DECORATIVE BEET.

A FINE large boiled beet may be so sliced down from the top as to closely resemble a many petaled peony, and this, quite by itself on a lettuce leaf, may be so placed as to stand in shape as a handsome salad. The parts must be held together while the cutting is done or the whole may fall like a block house and be hard to put together again.

This way of making a peony salad was discovered some years since when an attempt was made to imitate the Japanese method of carving vegetables, but, let it be said, only such as could be eaten. Uneatable garnishes are to most people of good taste generally objectionable, with the exception of lobster legs and a few like things.

The new beets are often of a rather light and beautiful peony shade when boiled, even when every rootlet and a good portion of the leaf stem is left on to keep them from bleeding. Young cooks have been known to prepare beets for boiling by paring them.

Peony Salad Recipe.

Put well washed and rinsed young beets to boil in lightly salted water to cover, and in a covered kettle. When they are tender, or in about an hour (it is a good plan to give the largest fifteen minutes' start when those of a bunch are of quite uneven size), drop them into cold water and rub off the skins quickly so that they will not cool much. Chop rather coarsely and butter them lightly while they are yet hot enough to melt the butter. Press into small cups, and when cool turn out on lettuce leaves. The mold of beets ought to keep its shape perfectly and not crumble. Encircle this at the base with slices of rather large pink and white boiled radishes. Serve with French dressing. On a noonday table, these show up handsomely, just as tomatoes on green are handsomest under artificial light, and so are best for dinner.

A Jelly Recipe.

Aspic Jelly.—Take two pints of cold water, one-quarter of an ounce of vegetable gelatine, one lemon, some pepper and salt, a pinch of cayenne and two tablespoonfuls of Tarragon vinegar. Soak the gelatine two hours in one pint of water, then add the other ingredients, strain the juice of the lemon. Put over a slow fire until the gelatine is dissolved, then boil two or three minutes, and strain through jelly bag.

Anna Thompson

Allies Baffled to Know Where Next Blow Falls

By Hilaire Belloc.

Paris, Aug. 30.—It is clear that the Teutons' success at the conclusion of the three months' campaign upon the eastern front has restored to them the initiative in the largest sense of the term. That is, the great main lines of the next development are for them to choose, and it is the allies who are wondering what they will do next, and not the Teutons who are wondering what the allies will do next.

The Teutons may continue their eastern movement; they may strike southeast against Serbia; they may send troops to the Italian front, or they may come west.

The conditions under which the Austro-Germans lie and which limit their next action are threefold in character. They consist in the length of line upon which they will consent to remain stationary, the character of that line for defense, and the numbers which will remain available for them for the prosecution of their mobile attack.

* * *

Wherever the Teutons may decide to expend what remains of their military energy (and the choice is now in their hands) there will be, in their intention at least, a mobile front and there will be a stationary front.

Suppose, for instance, they decide to strike down southeastward towards Serbia. Then it is clear that they will have to hold all the present eastern front from Roumania to the Baltic against the gradual, although tardy, equipment and munitioning of the Russians.

Or suppose that the Teutons decide on continuing their eastern advance, and particularly a turning of the Russian line by a northern movement along the Baltic coast, it is quite equally clear that south of some fixed point upon the whole front they will be holding the Russians while the main blows are being delivered in the north.

Just as the Teutons held the central Polish front while they were delivering ther blow in Galicia, so they will, in the nature of things, have to remain more or less stationary along the portion of their eastern line (or the whole of it) while they concentrate for special action in a special area. If they come west or south they must equally hold some definite eastern line.

* * *

The Russian forces find themselves divided by the great marsh region of the Pripet river, which has formed in every great Russian campaign the chief physical feature determining its nature. These marshes are traversed by one single line of railway from Kovel to Brest, and not by a few roads. Nevertheless, they form a very serious natural barrier separating armies to the north of them from those to the south.

This accident of ground has some effects favorable to the containment of the Russians by the Austro-Germans opposed to them, but other disadvantages. I mean that in some ways it spares them the necessity of using a certain number of men, but that in other ways it defeats the main object.

The mere fact that over a breadth of something like fifty miles there can be no continuous line of entrenchment nor any active movements permits that sector to be watched by smaller numbers. But, on the other hand, the advantage the Teutons obtain from the separation of the Russian forces into two groups through the presence of the marshes only may easily be exaggerated.

We speak of the separation of two fractions of an army as a disadvantage or a disaster, because such separation interferes with an exact co-ordination of movements between the various parts and because such separation usualy implies the existence of a gap which the enemy can occupy and thus permanently turn out one large army into two smaller ones which he will defeat in detail.

The first of these handicaps the Russians would indeed suffer if, in the line of positions they ultimately take up, the Pripet marshes intervene. But it is nothing like the handicap it was before the existence of railways and of the telegraph.

It is still perfectly possible to co-ordinate the two branches of the Russian forces even though that co-ordination may not be as simple a matter as it was when the whole line was continuous.

* * *

The second and much more serious point does not in this case appear. The gap formed by the Pripet marshes is not a gap of which the Teutons could take any advantage. The same natural conditions which caused them to be an obstacle separating the northern from the southern Russian forces forbid the Austro-Germans to advance through this district.

VON BERNSTORFF DENIES TURKISH ATROCITIES

Rochester, Aug. 30.—The German Government, thrugh Ambassador Count von Bernstorff, has made official denial to the Jews of Rochester of atrocities in Palestine charged against the Turks. Of late numerous alarming reports concerning the situation of the Jewish population in Palestine have been received here. According to these, the Zionist properties were confiscated by the Turkish government and the leaders of the movement were exiled to Asia Minor.

Many Rochester Jews are vitally interested in affairs in Palestine. More than three thousand of them contribute annually toward the maintenance of the Palestian institutions. A number of them have friends and relatives who have taken up their abode there. A few Rochester Jews have purchased land in Palestine with the idea of making their home there some day.

U. S. INSISTS THAT REFUGEES BE FREED

London, Aug. 30.—The Morning Post correspondent at Rome says:

Mr. Thomas Nelson Page, American Ambassador at Rome, had a very lengthy interview with Barone Sonnino on the question of Italian subjects in Turkey. The United States government has suggested to Constantinople that Italian women and children be allowed to leave the country. The Turkish reply was evasive. The American Ambassador at Constantinople now has received instructions to insist on non-combatants being allowed to leave aboard American ships. The Porte war notified that an American war ship is lying in Smyrna harbor on board which women and children can be immediately placed.

ITALIAN MACHINE SHOPS TAKEN OVER BY THE STATE

New York, Aug. 30.—The entire machine tool facilities of Italy are reported to have been commandeered by the government for war munitions' work. This includes the shops which ordinarily are not engaged in manufacturing military supplies. The arms and steel works, whose business is to produce equipment for the army and navy, remain, it is said, under their previous status:

Italy has been independent of foreign countries for several years in the matter of equipment for the army and navy. Italian artillery for both the land and naval forces is of Italian construction, and the ships of the navy are wholly built now in Italy.

"BIG PUSH" WILL.. COME IN OCTOBER

London, Aug. 30.—Rumors are filling the clubs and hotels that the date for thel ong deferred "big push" has been set for mid-October. Naturally there is no official recognition of these vague reports, which apparently have originated in the belief that General Joffre's arrangements are about complete for a favored movement in great force.

There has been increasing activity by the artillery on the western front that is thought to have its significance The Frech have shelled almost the entire legnth of the German line in the last twod ays, at some points attaining exceptional severity. There is no indication whether it followed reports of the German troop concentration or was intended to feel out the strength of the opposing forces. Artois and the Hetass sector of Flanders were particularly shaken by the thunder of the field guns. Steenstraate received a quantity of shells where the Germans are holding a part of the hamlet.

No infantry actions have been reported from the Argonne to the sea for a week, except the daily exchanges of bombs and hand grenades, which does nothing but keep the opposing trenches on the alert.

MR. AND MRS. WM. TAYLOR CELEBRATE CHINA WEDDING

Mr. and Mrs. William Taylor of 519 Fremont st. celebrated the 20th anniversary of their marriage at their home Saturday night. Forty-five guests were present including many friends of the couple from Auburn, Oswego, Rochester and other cities. Mr. and Mrs. Taylor received several beautiful pieces of chinaware.

The anniversary supper was served on the lawn, which was prettily lighted with lanterns. Music was furnished during the supper by the Otis orchestra and Prof. John Gallon rendered a violin solo later in the evening.

KENWORTHY HEIR TO MILLION DOLLARS

Pittsburgh, Pa., Aug. 30.—William Buck Kenworthy, second baseman of the Kansas Federal League team, has fallen heir to $1,000,000 from the estate of his uncle, Joshua Kenworthy, late of London, England, who was burned to death in a hotel in Connecticut a year ago, while touring this country.

This uncle inherited $30,000,000 a number of years ago, and at the time of his death he had increased this fortune to $50,000,000. He had divided the money among relatives, both here and in England and Ireland.

BANCROFT ANNOUNCES PLAYERS WHO WILL TOUR

New York, Aug. 30.—Frank Bancroft, the veteran business manager of the Cincinnati Reds, announced the names of the players in the National League who will tour the Northwest with the American League after the season is over as follows: Pitchers, Jack Coombs, Christy Mathewson, Grover Cleveland Alexander and Jim Vaughn. Catchers, William Killifer, Frank Snyder or Otto Miller. First base, Jake Daubert; second base, Dots Miller; third base, Heine Groh; shortstop, Hans Wagner; outfielders, Geo. Burns, Wade Killifer and Cozy Dolan.

AT THE QUIRK TONIGHT

The Charles K. Champlin Stock Co., an organization that is different than others, has this season selected a line of plays that will appeal to lovers of true dramatic construction. It might be said that "Beyond the Law" entirely covers that statement. It is a drama of vivid interest and concerns a mother's sacrifice of love, ambition, social position and, in fact, every thing, all for a dearly beloved daughter from whom she is separated by adverse circumstances, while the child is young, too young to ever know a mother's love. A man's honor is at stake. The mother is the tool selected by the man higher up, a man so to speak, "Beyond the Law," whose only purpose is to gain his desire at not matter what cost to others with whom he has come in contact. The woman is the power of the man higher up, with a sentence hanging over her head merely by a thread, who he alone can deal out, she dares not refuse his nefarious system of getting what he goes after. The daughter of the woman loves the man on whom the attack is directed; at a given time the trap is set, the mother face to face with her daughter and the man she loves is branded as a criminal by the person in whose power she is unfortunately a slave. At the psychological moment the man that goes right, by mere chance, places the woman in question as the mother of the girl he loves, bit by bit her story is brought forth and little by little she sees herself placed in the right by the man who goes straight, only to find that she is facing her own daughter and the man she loves, hence the mother's sacrifice, a man's honor and a woman's love end in that peaceful path of an unblemished love and happiness: "Home with wife and mother."

BRIEF BITS OF LIVE WAR NEWS

American Red Cross May Withdraw Doctors and Nurses.

FUNDS NEARLY EXHAUSTED.

Statistics Show How Much Medicine Was Used In Cleaning Up Servia. Canada Lowers Her Recruiting Standard in Order to Increase Enlistments—Other Interesting Items.

American Red Cross doctors and nurses will be withdrawn from the battlefields of Europe on Oct. 1 because of a lack of funds to keep them there longer, according to a statement made at Washington by Miss Mabel T. Boardman, chairman of the Red Cross relief commission.

It is possible that the two units in Belgium, where the greatest need exists, will be continued, but the other fourteen detachments will be recalled on the date mentioned, when the American fund of $1,560,000 will be exhausted. In the work of cleaning up Servia the Red Cross has used 358,-783 pounds of sulphur, 700,000 bichloride tablets, 7,000 gallons of kerosene oil, 5,600 pounds of formaldehyde, 12,-200 doses of cholera vaccine, 500 whitewash brushes, 70 bathtubs, 50 stepladders and 11 automobile trucks.

In order to increase her enlistments Canada has lowerd the recruiting standard. Men five feet two inches in height may now become Canadian soldiers. Hitherto the minimum height has been five feet three inches. The minimum chest measurement is now thirty-three inches for those thirty years old or under, the former minimum having been thirty-three and one-half inches.

Marconi, who is a lieutenant of engineers in the Italian army, has been in London buying war supplies for his nation. He expresses confidence in Italy's ability to defeat Austria and says that Italy is well supplied with ammunition, her factories working at high pressure day and night turning out shells. Italy, he says, is particularly well equipped with dirigibles and aeroplanes.

Since the outbreak of the war the Swedish army has been almost doubled. It now has a total of 540,000 trained men, 360,000 of which are troops of the first line, the remainder being landsturm. New training schools for noncommissioned officers have been established since last August, in which 60,000 noncoms have been trained.

The French government has conferred the military cross upon Professor Richard Norton, founder of the American volunteer ambulance corps, which is the chief Red Cross unit in the Second French army. With the decoration the government sent Professor Norton a letter warmly praising the work of the corps.

Regret has been expressed by the British government to the Norwegian government because of the violation of Norwegian territorial waters by British warships, particularly the seizure of a German steamer inside the three mile limit. The note was cordial and was in reply to a protest by Norway.

Several Americans were in Rheims recently during a heavy bombardment. The party took refuge in a cellar for an hour. On reaching Paris they said that on the day they were in Rheims between 500 and 600 large caliber shells were dropped on the city.

Typhus has practically been wiped out in Servia. The Servian army is reported to be in good condition and probably better equipped than ever before. It is mobilized around the frontiers, ready to move at any point at any moment.

Ten more large national munitions factories are to be established in England, in addition to the sixteen huge national plants now in operation, according to a statement made by Lloyd-George, minister of munitions.

Captain H. A. Tomkinson of the British Royal dragoons has been promoted to the rank of major. He played No. 1 on the polo team which took back the international polo cup to England last year from the United States.

The sultan of Turkey has decorated three American officials of the Standard Oil company at Constantinople for their humanitarian services. Those decorated are W. E. Bemis, Oscar Gunkel and L. I. Thomas.

Gabriele d'Annunzio flew over Trieste a few days ago in the aeroplane of Lieutenant Miraglia. The lieutenant dropped bombs on the city, while the poet threw down poetic messages.

The Austrian government has agreed to spare Italian churches and monuments in Italian coast towns provided the Italians do not use them for military purposes.

A convention ceding to Bulgaria the Turkish portion of the Dedeagatch railway has been signed in Constantinople.

James J. Hill predicts a population of 400,000,000 by the year 2000. That means four men, four women and four kids for every one in evidence now.

As Mexico's revolution spree has cost that country nearly $400,000,000 it should be glad to have Uncle Sam step in with a cleanup squad.

It's Permysl here and Przemysl there, and you take your choice, but just can't pronounce it either way correctly.
